Mr. Murray was then called upon to give a few remarks. He dealt with the same questions practically as had Mr. Irwin, and also explained the testing of milk and the different qualities of milk, also the different elements that cause the milk to become unfit for cheese. He explained the system of marketing the cheese, and invited any who might wish to, to come to Campbellford and see the cheese graded there in the U.D.C. cold storage plant.

Several questions were asked Mr. Murray, who answered very fully each one.

On motion, it was decided that James McCarthy be treasurer for the coming season.

STUDY IN STUCCO AND SHINGLES

Edgar M. Prain, Architect.

This house is 32 ft. x 22 ft., the larger dimension governing the size of lot required. It is an attractive design and would look well finished with stucco and shingles used in conjunction with frame construction. Hollow tile or brick backing could be substituted for frame walls and the stucco applied to either of these materials. This would preclude the use of shingles where designated, with the exception of the roof. Another alternative would be to use face brick.

As in the case of all plans, certain features assert themselves and command attention. In this instance we have the enclosed verandah and balcony; large rooms throughout, and a decidedly convenient layout pertaining to both floors.

The verandah is really a sunroom and this being so, the path of the sun should be taken into consideration when either choosing a lot or deciding on the adaptability of this plan for a site you already possess. Furthermore, the old adage about "the sauce, goose and gander" must be kept in mind as the success of the sleeping balcony is dependent upon the same matter as that of the sunroom. A southern or western exposure would both be suitable.

From the viewpoint of winter, which is just around the corner at the time of writing, the vestibule separating the hall from the entrance is well worth noticing.

Now we come to the living room. This home could almost afford to let its appeal rest on this one feature alone. A delightful fireplace; lots of light through well placed windows, and lots of room to enjoy it as the dimensions, 12 ft. x 20 ft. 0 in., imply.

The dining room is 11 ft. 5 in. x 10 ft. 8 in., the square type of room so convenient for this purpose. A pass pantry, in which is located the sink, provides a convenient service connection with the kitchen, also easily reached through the hall. Back of the pantry, between it and the outside wall, is a spacious broom cupboard. The kitchen is 10 ft. 6in. x 9 ft. 6 in. and here are two more features. Three steps lead to the outside grade entrance and a few more to the cellar where space is provided for fruit and vegetable storage.

On the next floor are three bedrooms with clothes closets; linen closet and bathroom. You will also notice that windows light the hall and stairway, doing away with any necessity to leave bedroom doors open.

Hot water heating insures consistent comfort and is included in the approximate estimate of the total cost—$7,600.

Readers desiring further information regarding a house of this design should communicate with MacLean Builders' Guide, 345 Adelaide St. West, Toronto, Ont., who will see that it is supplied. When writing please mention design number 115. Copyright, 1928.

FURRING MASONRY WALLS

Question: Please advise about hollow tile and block construction, as to cold walls and what can be done to prevent condensation.

Unless there is some device in the wall to break the mortar joints, we believe all exterior walls of masonry should be furred. The device used to break the mortar joint should be positive so that in all cases the joint will be broken. Through the use of furring or by breaking the mortar joint the inside plaster planes are kept at the same temperature as the air in the rooms and condensation will not gather on them.

APPROPRIATE LIGHTING FIXTURES

Question: I have a Colonial house. Please advise what lighting fixtures would be appropriate.

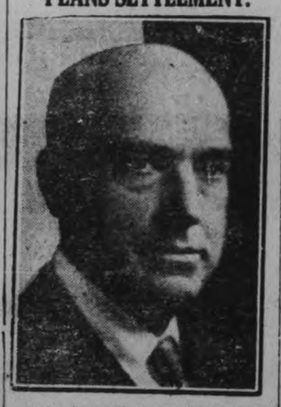
It is a matter of principle that the design of these should be of a type in keeping with the Colonial architecture. Selection may be made from stock lighting fixtures. The finish of these should match the hardware of the rooms. Silver plated fixtures for the dining room are in excellent taste. If bedrooms are finished with enamel paint; have the fixtures in these rooms enameled also. They may be equipped with simple colored canopies to harmonize with the wall paper. Kitchen and bathroom fixtures should be nickeled.

SPOTTED PLASTER

Question: What do you put on plaster to keep it from causing spots in paint? What does it do?

Brush on a solution of zinc sulphate. The proportions are 1-3 of a pound to a gallon of water. It neutralizes the free lime.

PLANS SETTLEMENT.



Major-General A. D. McRae, M.P., who recently outlined in parliament a land settlement scheme for the west which would provide Canada with an additional two million people in ten years and establish an imperial settlement in the Peace river district.

Nothing Is Worse Than An Aching Back

B. C. Man Tells About Dodd's Kidney Pills.

Mr. Herman Wewers Suffered Severely With Pains in His Back

Lumby, B.C., March 13.—(Special) "About 25 years ago, in the States, when husking corn, I got a pain in my back, so bad I had to stop work," writes Mr. Wewers, well known in this district. "The farmer I was working for advised me to take Dodd's Kidney Pills. I did and was soon able to work again. I always keep Dodd's Kidney Pills in the house and if my back gets sore I take a few and am soon all right again."

Dodd's Kidney Pills purify the blood, and pure blood carried to all parts of the body means new health and increased energy all over the body. Dodd's Kidney Pills are an excellent tonic, and now is the opportune time to take them. During the long, weary winter months, the system becomes weakened and gets in a run-down condition. Dodd's Kidneys Pills work with Nature by encouraging and assisting the kidneys—to cast out everything impure or diseased.

Mounted police were called to handle the crowd that gathered in London to witness the arrival and departure of the bride and groom when Lord Hamilton, elder son of the Governor of Northern Ireland, and the daughter of the late Lord Crichton were married recently.

The Egyptian government recently seized a ship from the Syrian const having aboard 4,400 pounds of hashish.

CENTENARIAN PASSES AWAY

Samuel McClanaghan, of Montague, Was Born in Ireland in 1827.

FACULTIES KEEN TO END.

MERRICKVILLE Ont., March 14. —Canadian Press. — Samuel McClanaghan, one hundred years, and seventy eight days old, died at his home in Montague township Monday, it became known here to-day.

At the age of 32 he married Margaret Matthewson of the town of Ballenlough parish of Temple Patrick County of Antrim. Of their seven children two girls and one boy are dead.

Those living are Mrs. John Burchill, of Montague Township, with whom he resided; Mrs. John Young, of Belleville Miss Charlotte McClanaghan, of Cobourg, and William McClanghan of Kelfield, Sask. There are but four grandchildren.

Mr. McClanaghan migrated to Canada with his wife and seven children in 1883 and settled in the township of Marlbrough County of Carleton, where for many years he resided

Mr. McClanaghan was a Presbyterian in religion and at the last election, at the a age of 99 years, he polled his vote in the interest of the Conservative party

Mr. McClanaghan had remained quite active and still possessed a fine memory. He was able to read newsprint without glasses.

His chief topic of conversation was religion and he was able to quote copiously from the Bible.

GILMOUR CIRCLE HEARS OF SCHOOLS

Ladies Hear Papers On Training of Bible Women in India.

"Training Schools for Bible Women in India," was the subject discussed at the regular meeting of the Ladies' Mission Circle of Gilmour Memorial Baptist Church, was held on Tuesday, March 13th in the church. The president, Mrs. J. Gordon Mann, occupied the chair. The meeting opened by singing "Where are the Reapers?" Mrs. Allan Mann read the Scriptures, Psalm 107:1-21. Mrs. Edward Archer and Mrs. Jos. Mann led in prayer. The subject was "Training Schools for Bible Women in India."

Papers were given by Mrs. J. A. Young, Mrs. J. Archer, Marian Blewett and Mrs. Sidney Blewett. The special object of the circle this year is to have every woman in the church a member of the circle. Two new members joined at this meeting. The meeting closed with prayer by the president.

CIRCLE ACCEPTS 1928 ALLOCATION

St. James' Church Ladies Hear Interesting Talk on Study Book.

The regular monthly meeting of the X. L. Mission Circle of St. James' United church was held at the home of the president, Miss Marion Wagar, on Monday evening. An interesting program was presented, with Miss Nina Andrus, first vice-president, presiding.

The allocation for the year was read in a letter from the superintendent of Christian Stewardship of the Presbyterial, and was accepted by the Circle.

A splendid response from the Heralds was given by Miss Mabel Dulmage and Nina Andrus.

The main feature of the program was the study on "New Paths for Old Purposes," which was presented by Mrs. Hugh McCullough in a very interesting and attractive manner.

At the conclusion of the program a social half-hour with a distinctively "Irish" flavor, was enjoyed, and dainty refreshments also in keeping with St. Patrick's Day were served by the hostesses, Jessie McGregor and Marion Wagar.

The April meeting of the Circle will be held at the home of Miss Zetta Wood, Lansdowne avenue, with Miss Edith Wright assisting the hostess.

IN POLICE COURT

Magistrate Langley dismissed the charge against W. T. Belleghem for failing to stop at the intersection of McDonnel and Aylmer Streets. The defendant claimed that his truck was not at the intersection at the time the offence was supposed to have occurred. His Worship, in dismissing the case, without costs, said it had not been sufficiently proved to justify a conviction.

William Henry, of the Township of North Monaghan, appeared on a charge of failing to feed and water a number of hens, two cats, and a dog during the month of February. Humane Inspector R. C. Smith withdrew the charge, but asked the Magistrate to reprimand Mr. Henry. In this, Mr. O'Brien, the defendant's lawyer, concurred.

His Worship said "The Inspector has taken a very charitable view, and although I have not the evidence of the case before me, I know enough to believe that the conditions on your farm are deplorable, and that there needs to be a 'jacking-up.' You are a poor man, and the little money you might have, we would rather see going to buy feed for your stock than in paying a fine. The officers have my instructions to watch you, and you must live a decent life."

RICHARD HALL LIMITED

MAIL CARRIERS UNABLE TO TRAVEL

Service in Mount Pleasant District Interrupted By Storm.

MOUNT PLEASANT, March 14.—Owing to the severe storm on Friday, the roads were in a very bad condition, and the rural mail carriers were unable to get over all their routes. So many recent storms of snow and wind have caused the roads to become very high and if the snow which is now very deep on the level, does not go away moderately, there will be a great flood in the spring.

Personals.

Messrs. Doig and Sedgwick will close their lumbering operations in Shield's woods on Wednesday.

Mr. Garnet Elliott of Peterborough spent a few days with his father, Mr. William Elliott at Ida.

Dr. Ellis, veterinary surgeon from Millbrook, made a call in this vicinity on Friday.

Mr. and Mrs. Wilbert McCall and family have moved to their new home in North Monaghan.

Mr. William Timney of Cavanville was a recent visitor to town.

Mr. Beatty Fee has been ill during the week.

Dr. G. N. Earle of Omemee made a professional call in the village on Saturday.

Mr. George Hootan of Fairmount called in the village on Friday.

An epidemic of mumps is prevailing in a number of homes in the vicinity of Ida.

Neuritis

In combating, relieving and defeating Neuritis, Thermogene is soothing, comforting and persuasive. But it is also definitely commanding.

The action of Thermogene is that of assured authority, of complete confidence in superior force. The Neuritis pain may shift its position from limb to limb, but Thermogene will follow it. It may vary its attack, but Thermogene will circumvent it. It may take refuge in a muscle or a joint, but Thermogene will hunt it out. There's only one end to this conflict. Neuritis must capitulate, Thermogene must win.

And when its healing warmth has done its work, Thermogene may be removed layer by layer—safely and comfortably.

W.M.S. ENTERTAINED.

Several Interesting Papers Given at Meeting of Bailieboro Ladies.

BAILIEBORO, March 14.—Mrs. Jeffrey Jewison entertained the members of the Women's Missionary Society at the regular meeting held recently, with Mrs. H. W. Foley presiding, and the topic "Christian Stewardship", given by Mrs. Harry Barnard. Several papers concerning business of the W.M.S. were read and discussed and the meeting was brought to a close with a short prayer.

The Provincial Highway snow-plow was stuck just south of Bailieboro on Thursday afternoon, and blocked the traffic from both ways for the greater part of the afternoon.

Personals.

Mr. and Mrs. Charles Dawson and family motored to Oshawa on Thursday.

Mr. Dawson attended the annual sale of shorthorn stock at Bowmanville.

CATTLE, GRAIN AND PRODUCE

(Continued from Page 4.)

CHICAGO GRAIN.

CHICAGO, March 14 (Canadian Press). — Urgent need of rain in Northern Kansas and Southern Nebraska did much to stimulate buying of wheat yesterday, and give an upward trend to prices. Special notice was also taken that purchasing of corn for shipment from here totalled the largest of any day this season.

Wheat closed firm ⅝c to 1⅜c net higher, oats ¼c to ¼c to 1½c up, corn at ⅛c decline to ⅜c advance, and provisions varying from 2 cents off to a rise of 7 cents.

Unfavorable crop reports from various sections of winter wheat territory afforded considerable advantage at times yesterday to the buying side of the market. In this connection, special interest was shown regarding despatches of a Chicago crop expert who telegraphed from Hastings, Nebraska, that below the Kansas line from Goodland to Saint Francis, wheat is practically a failuse, and that in Nebraska from Holdredge to Hastings rain is needed badly.

With the world's available supplies of wheat showing 3,755,000 bushels decrease for the week, and with deliveries in March contracts here passing into strong hands, the market displayed a friendly strong undertone. Commission house buying readily absorbed future delivery offerings, particularly upon the various transient setbacks in price. On the other hand, selling was more plentiful whenever the market advanced to any material extent.

Free selling of corn was witnessed on all bulges in the corn market. The general run of news, nevertheless, was favorable to holders. Some export business in corn was put through, three lake charters for corn were made, and 200,000 bushels of corn was bought for all rail shipment to Buffalo.

Oats values were strengthened by indications of export dealings in oats.

Provisions averaged higher, responsive to an upturn in hog values here and to good-sized clearances of lard and meats at New York.

STERLING EXCHANGE.

MONTREAL, March 14 (Canadian Press). — Sterling exchange rates were quoted here yesterday as:
Demand—$4.87 9-16 to $4.87 11-16.
Cables—$4.88 to $4.88 1-16.

DISTRICT CHURCHES.

TRENT RIVER, March 14.—Rev. W. R. Archer, chose his text from 1st Corinthians, 1st chapter. The topic of his address was "Our Debt." He dealt with what christians had to endure at time of Nero, in the Roman period. To be a christian, meant to give up everything at that time. Spies were abroad and citizens were imprisoned and allowed to die of starvation, and anyone who attempted to take food to them were apprehended.

The mainspring of man's life is the heart, all the great thinkers have their names written large in life's history. Real success, according to the teachings of the Book, the great throne of the universe is occupied by One whose name is Love, not law, God is love, and His saving power is abroad in hearts and homes. In time of John Cabot, because their hearts were right and wished to worship God, caused them to see new life. If we want to live this life it is not enough to consider what we believe, we must put our hearts into it. He that doeth righteousness is righteous. There are so many different various creeds yet after all there is only one vital question. Jenny Lind sang her way into the hearts of the people—singing and thinking of little children of whom the result of her singing founded a hospital for them. Saul was not any use to the King till his heart was touched. We should recognize the great privilege of Divine Power. Real progress is in love. Our age has in it the movement that began long ago—at the Crimean War, when Florence Nightingale went out as a Red Cross Nurse. Direct result of the heart is sacrifice. The minister concluded by the name in connection with the freeing of slaves—Wilberforce raged a campaign for the slaves. What do we owe for all we today enjoy, that has been purchased at such a cost? Are we doing all we can for our bit? What do we owe? trained in farm work and will be dis-

To cut down the waste of human effort through the use of "head porterage," Sierra Leone, Africa, is considering the building of feeder highways to the railroads, thus permitting auto and animal transportation to displace man freightage.

Trent River

TRENT RIVER, March 14.—Miss R. Marion Inkster spent the week-end at her parental home. Miss Leila Johnson of Stirling accompanied her.

Mrs. James Cook returned Saturday from Toronto where she has spent the past two months.

Miss Reta Cochrane, Campbellford, was a recent guest of Mr. and Mrs. Douglas Greenly.

Miss Annie Wight spent Sunday at her parental home.

Mrs. Ward Glenn and Mrs. Thomas Doupe went to Peterborough on Saturday to see Mrs. Thomas Brown, who has been confined to Nicholls Hospital for a number of weeks.

Mr. George Brooks received word of the death of his brother-in-law, Leonard Venters, of Lindsay. Mr. Brooks, accompanied by his aunt, Mrs. Frank Davidson, of West Seymour, left on Saturday to attend the funeral.

The main road to Havelock being blocked since Friday's snow storm, the Belmont council had a number of men employed shovelling the snow.

A CLEAR HEAD

Parke's Nasaline keeps your head clear of that stuffed-up feeling. Just try a little up each nostril. Its healing, soothing vapor goes all through the air passages and keeps them free from inflammation. It also prevents colds from getting a start. 25c at Bond's Drug Store, corner George and Hunter streets.

JOLLY JINGLES By Graham Hunter

MILLBROOK C.G.I.T. GIRLS GO ON HIKE

(Continued from Page 1)

new position in Toronto on Monday of this week.

The church organist, Miss Estelle Hetherington, spoke briefly expressing her personal appreciation, and also that of the choir in general, of the help which Miss Marjorie has given during the past few years when she had been a member of the organization, her cheerful manner and regular attendance oeing among the points specially mentioned.

The choir leader, Mrs. H. W. Johnston, on behalf of the membership then presented Miss Sayles with a handsomely-bound copy of the church hymnal, adding briefly her own word of the value placed upon service willingly and capably rendered.

The recipient of the gift, to whom the whole affair was a matter of genuine surprise, expressed her gratitude and appreciation suitably, mentioning also the regret felt in severing the ties connecting her with the musical part of the worship services in her home church. The fact that Miss Marjorie will be missed from her place in the choir each Sunday, and from the social gatherings of the organization as well, was reiterated not alone in the formal addresses, but by the choir members generally as they gathered round for a final word of farewell, and an expression of good wishes for happiness and prosperity in the new field of activity which lay just ahead.

Miss Bertha Lang represented the local Continuation School at the district oratorical contest held in the opera house, Cobourg, on Friday night, and was tied with Miss Marjorie Ackermann, of Campbellford, for fourth place, in a field of with nine competitors. Miss Muir, principal of the school, accompanied Miss Bertha to Cobourg, as did also Mrs. Lang. Had the roads been fit two carloads from here had made arrangements to attend the contest, and other High Schools would have been equally well represented, fellow pupils of the various competitors being anxious to give all the support possible.

The winner of the contest, Miss Beatrice Purdy, of Colborne, is a pupil of Miss May Mitchell's, the latter at one time being assistant principal of the Continuation School here.

CONCERNED IN OFFICE CHANGE

At the left is Viscount Cave, 72-year-old Lord Chancellor of Great Britain, whose resignation on account of poor health, is considered likely He is being attended by the king's physician. Centre is Sir Douglas Hogg, solicitor-generalk who would be regarded as the logical successor to the Woolsack were it not for the opinion that he is too valuable a parliamentarian to be spared by the government. Right, is Earl Birkenhead, a previous Lord Chancellor, whose willingness to resume the post is reported.

URGES SINKING FUND PLAN TO WIPE OUT NATIONAL DEBT

Opposition Chieftain Outlines a Scheme For Wiping Out National Debt.

LEADERS CLASH.

Hon. R. B. Bennett Leads Way in Debate On Budget at Ottawa.

OTTAWA, Mar. 14. — (Canadian Press.)—When the day opened, the House presented such a scene as it has not presented before this session. Public galleries were packed. In the corridors outside were numbers more vainly waiting to get in. In the chamber itself members were gathered in strength reminiscent of the stirring two years ago when party whips nervously counted heads before every division.

Hon. R. B. Bennett, leader of the opposition, led the way in debate. He opened with a number of rhyming citations. The budget was
An infant crying for the light,
And with no language but a cry.

For Mr. Forke, he had Browning's "Last Leader," etc.

To Mr. Dunning's attack on the group system, he replied amid Conservative laughter with the lines:
Blow, blow, thou winter wind
Thou are not so unkind
As man's ingratitude.

He mentioned that there had been a reduction in the funded debt during the last years of $92,172,267. This worked out at $42,089 per day. But during the same six years, Mr. Bennett contended, there had been gathered in taxes $189,471 per day more than during the six years preceding.

Establish Sinking Fund.

We urged that a statutory sinking fund should be established to pay off the National debt. He estimated that the debt of $2,400,000,000 could be wiped off in forty-five years by setting $19,829,904 each year. This was assuming a four per cent. rate on money.

Mr. Bennett had sharp criticism for W. H. Moore, chairman of the tariff board. He spoke of Mr. Moore as having been one of the chief instruments of MacKenzie and Mann, as a defeated Liberal candidate who was aiming to be a candidate at the next election—in whose constituency there were a large number of industries touched by the tariff changes, whose political friends were benefitted and whose political opponents were injured.

The references to Mr. Moore led to snappy interchanges and considerable uproar at the evening sitting. Premier King retorted that while still a member of the House Sir Thomas White had been appointed a member of the Grand Trunk Commission. Conservatives protested that Sir Thomas was not then a member. Premier King insisted that at the time of his appointment, Sir Thomas was a member and cited an extract from Hansard in support of his view.

Mr. King mentioned also the case of Sir Henry Drayton, as Minister of Finance going around the country collecting evidence on the tariff. No one should object to this. But the method had been found unsatisfactory and the tariff board was appointed.

On the question of debt, Premier King charged Conservatives with having left the whole capital cost of the war and demobilization to their successors. "My hon. friends talk about mortgages on farms," the Prime Minister exclaimed. "They left a mortgage of $1,700,000,000, not one dollar of which they sought to meet while in office." When Liberals took office, they had to increase taxes to meet the accumulation of debt left by the Conservatives.

Buy a Rogers and be sure!

Save $55.00 on this genuine 1928 Model

ROGERS (Batteryless) RADIO

THE famous Rogers Batteryless "Two-Twenty" Model, shown above with the Junior Symphony Speaker, is the standard in performance and quality among all "electric" radios.

The *former* price of this model in combination with the Junior Symphony Speaker was $330. *Now* you can buy it for $275—a clear saving of $55. Or you can buy the set alone for $225—*no more than you would pay for any good battery-operated set.*

You've probably wanted a Rogers Batteryless—most people do. Take advantage of this new low price to get this *complete* Rogers Outfit *now*—the *best* radio for the *least* money on the market today. Terms to suit your convenience.

FEAR OVER 400 LOST LIVES IN FLOOD

(Continued from page one.)

ties in the devastated zone, it was virtually impossible definitely to state the number of bodies recovered.

Cause Unknown

The dam was one of the reservoir units of the Los Angeles aqueduct system from Owens Valley, serving the city with domestic water. What caused the big dam to give way was not definitely known. Officials believed, however, that seepage of water through the shale formation of one of the earthen abutments had caused the concrete wall to break away from its end mooring. An early report by two telephone linemen that an earthquake had caused the break was discounted.

The seismograph at the University of California, Berkeley, had not recorded an earth shock Tuesday night. An Associated Press correspondent flew over the devastated area and found only the central section of the dam standing. The east and west wings had crashed outward under the force of the tons of water released from the reservoir stretching back five miles.

A few ranch houses had miraculously escaped and from the air it appeared as if the wall of water had missed them only by inches.

In one eddy of the stream floated the floors of what had been two houses, the superstructures of both having been carried away.

Railway Tracks Destroyed

The rails of the Southern Pacific Railroad's branch running up the valley added their bit to the picture of destruction. For a distance of half a mile, the metals looked like two badly twisted strings of spaghetti, their sleepers hanging from them at all angles.

A deep gully, half a mile wide, in the mire of whose bed could be seen the bodies of animals, wreckage of every description, and here and there a rescue group seeking more bodies of the human victims, replaced what Tuesday had been green fields, orchards and homes. Vultures circled overhead.

Rescue camps presented pitiful figures of those who came through with life only—many with loved ones left dead in the gutted valley.

They told stories of how houses and cabins were tossed about like corks on the crest of the tremendous wave, washed against trees, poles or anything that stood in the way.

Red Cross headquarters were established at several points, and refugees, many of whom fled only in night clothing, were being cared for.

Act of Heroism

E. Locke, night watchman at the Southern California Edison Company's camp in the canyon, refused to attempt his own escape until he had notified his fellow workers.

He paid with his life for his heroism.

The payrool at this camp, company officials stated, carried 170 names. Of these men, sixty had been definitely accounted for and six bodies had been recovered. Among them was that of Locke.

According to the workmen refugees, the night watchman ran from cabin to cabin and from tent to tent in the construction camp, warning the workers to flee for their lives.

The Los Angeles City Council ordered its water and power committee to start an investigation into the cause of the disaster. The board of water and power commissioners voted $25,000 for relief work.

COLDS ARE DANGEROUS

Don't trifle with colds. They often provide the opening for dangerous illness. If you wait until a cold has developed before treating it, your resistance may be lowered to make you an easy prey for some dread disease.

Ward off colds with Gallagher's Indian Lung Remedy. It builds up your blood. Keeps you in vigorous health.

If you already have a cold, this long-tried herbal remedy heals the inflamed tissues, stops the coughing, drives out the cold and *keeps* it out.

Made entirely from herbs, according to the recipe discovered 50 years ago by James Gallagher, this Remedy contains no harsh mineral drugs. It works in nature's way.

Now, for the first time, this invaluable remedy can be obtained at drug stores. Keep a bottle of it constantly on your medicine shelf. Take it every time you have been exposed to cold or chill—after getting your feet wet—after riding in crowded, germ-laden street cars. Keep free from colds this Winter.

Minden, Ontario: "I take pleasure in recommending your Indian Lung Remedy. I suffered three years and the last year had hemorrhages practically every two weeks. The doctor was making regular trips to stop the bleeding. We tried the Indian Lung Remedy and I have had no bleeding since. Am out all the time, feel fine and am gaining weight." (Name on request.) CHAIR IS REPAIRED

Rt. Hon. W. L. Mackenzie King, who inherited the mantle of Laurier and who came into possession of his office chair, has, up to now, steadfastly refused to have it renovated, preferring the inspiration it afforded by the time-worn condition in which the great statesman left it. But an offer by A. A. Heaps, the Labor member from Winnipeg, himself an upholsterer, to repair it with his own hands, was too striking to refuse and Mr. King consented. The famous chair is shown ABOVE, inset being Sir Wilfred, Mr. Heaps and Mr. King.

BRUCE BARTON WILL STIR CITY IN "WHAT CAN A MAN BELIEVE?"

Author of "The Man Nobody Knows" Contributes Stirring New Discussion.

ANSWERS QUESTIONS.

Problems Are Solved and New Puzzles Raised in Examiner Feature.

The Examiner has in the past presented to its readers many features by outstanding men, but it counts itself more than fortunate in having secured the rights to Bruce Barton's new book, "What Can a Man Believe?". Barton stirred the English-speaking world with his "The Book Nobody Knows" and "The Man Nobody Knows" and his latest production which will appear in The Examiner, one chapter a day, starting on Monday, promises to cause as much discussion and to create as much interest as both of these together.

Startling questions are asked and answered in this series. "Would the world be better or worse off if it should abolish religion?" is one of the first topics discussed, and the author continues with a discussion of the points for and against the modern church, marshalling the facts for and against religion with equal force.

This book is no surface discussion of a theoretical question but goes down to the basis of modern religious belief. In fact Barton goes farther; he shows the growth of present religious leanings all the way from the beginning of time, telling the part played by Buddha (whom he describes as a human man); Confucius and Mohammed, and he tells in the most human language of the foundation of present day christianity in the way that made "The Man Nobody Knows" so well liked.

This feature will commend itself not only to those who enjoy religious discussion but to all who are eager to know the historical facts about religion and to those who are interested in any phase of fundamentalist-modernist discussion. Everybody, no matter what his religious belief, will be interested in reading Barton's chapter on "Why do you go to Church, if you do?", and his discussion on "Can the Church learn from business?", and yet again "What has prosperity to do with the decline of religion?" Early in the series a chapter is devoted to a discussion of "Did God create conscience, or did man's conscience make God?"

Barton's book, "What Can a Man Believe?" will appear daily in The Examiner, starting on Monday when the first chapter will be published.

HOLSTEINS SOLD FOR GOOD PRICES

Herd Sire Brings $500—Cows Sell As High As $160.

DOURO, March 14.—The sale of the Holstein herd of James Sweeney was held recently with L. E. Franklin of Toronto, as auctioneer.

The heaviest purchaser was Arthur Gibson, of Orono, who bought seven cows, ranging from $160 down to $80. J. L. Buckley, also of Orono, was the purchaser of two cows, while others who purchased were: John Ferguson of Port Hope, Vincent McCarthy, N. McConkey, for Monsignor McColl, Joseph Mann of Bridgenorth, Joseph Garvey, Allan Hayes, Stanley Farley, Howard Baptie, of Smith, and W. Tully of Otonabee.

One of the best bred and best type bulls in Ontario grading XX in advance registry and sire of all heifers two years and under, was sold a few days previous to the sale to P. M. Elder, Glenelem, Quebec, for $500, making a total for the sale over $3,400. Three cows and five young heifers are left on the farm.

Personals.

Mr. and Mrs. John English of Hastings visited the former's sister, Mrs. James Sweeney, for a few days and were present at the sale.

Mrs. William Crough of Ennismore also visited her sister, Mrs. Sweeney, during the sale.

Claimed to be "never fading," a carnation recently shown in London changes in color from mauve to green as it grows older.

YOUNG PEOPLE HEAR INTERESTING TALK

Mrs. H. Edwards Gives Address on "Rolling Back the Map."

HASTINGS, March 14.—Mrs. H. Edwards, convenor of the 2nd department, had charge of the Young People's League of the United Church at its meeting recently, while the topic "Rolling back the map", was given by Mrs. D. E. Scriver in an interesting and educational manner. The scripture reading was given by Arthur Beamish, a vocal duet by Irene Sargent and Madeline Bond; reading, Mrs. William Walker, "Mrs. MacDonald's Auxiliary Meeting." L. J. Elliott gave a beautiful solo "Be on the Level with Mother", with "I know what is means to be lonesome" as an encore. A vocal solo was given by Rev. Mr. Hie. John C. McDonald, a visitor from Listowel, gave a very interesting talk.

When You Catch Cold Rub on Musterole

Musterole is easy to apply and works right away. It may prevent a cold from turning into "flu" or pneumonia. It does all the good work of grandmother's mustard plaster.

Musterole is a clean, white ointment of oil of mustard and other home simples. It is recommended by many doctors and nurses. Try Musterole for sore throat, cold on the chest, rheumatism, lumbago, pleurisy, stiff neck, bronchitis, asthma, neuralgia, congestion, pains and aches of the back and joints, sprains, sore muscles, bruises, chilblains, frosted feet—colds of all sorts.

Spring Crosses the Threshold!

And every nook and cranny of home responds to the urge for rejuvenation. Spring cleaning's a big task: furniture to be tugged about and re-arranged so that each room takes on a new aspect and a new individuality; woodwork to be done over and curtains to be renewed; pictures to be juggled and re-grouped, with a new one here and there to keep the walls interesting; cheery new linens for bathroom, bedroom and for the table; and the matter of meals to be revitalized with new chinaware and kitchenwares. A big task! Yet when it's complete we have accomplished a worth-while end: our home is in harmony with the season of seasons when all things must be fresh—vivid—and high-hearted.

The Gayest of Chintzes!

A color feast of bold new patterns in every imaginable hue. Among the leaders are several new variations of the flower and bird theme, in startling shades against unusual backgrounds. All of them 36 inches wide, and, yard **35c**

INTERESTING TALK IS GIVEN B.Y.P.U.

Winning Christ is Subject of Address to Gilmour Branch.

Mr. Thompson of Pittsburgh gave a very inteersting address at the B.Y.P.U. of Gilmour Memorial Baptist, on Sunday evening. His topic being "Winning Christ". "Helping Others to Win Christ" was a paper given by Reg. McMullen. Others taking part were Rev. W. S. Edgar, Margaret Mann and Leila Sanderson.

BELIEVED BRITISH AVIATOR, ETC.

(Continued from Page 1)

The plane is a stock model Stinson Detroiter monoplane with a Wright Whirlwind motor and may be distinguished in the air by its shining gold wings. It has dual control (Miss MacKay is a licensed pilot).

The plane weighs 1,970 pounds empty, has a span of 45 feet10 inches, is 32 feet long, and has 232 square feet of wing area. It has a standard steelpropeller, a speed at sea level of 128 miles per hour, and a cruising speed of 105 miles. Its service ceiling is 14,000 feet. Gas consumption is 11½ gallons per hour and oil one quart an hour. It is built of welded steel tubing and its wings are of wooded fabric.

In a recent letter to Gillespie, Captain Hinchliffe said that at the time of his take-off, the position of every vessel along his course would be known and indicated in a chart he would carry.

"If we see any ship," he wrote, "by making reference to this chart, we can determine our exact position. We have every type of the best navigational instruments also."

Through the letter Captain Hinchliffe spoke of "we," but did not mention the name of his companion. This associates said, was because it was firmly understood that Miss MacKay was to be the other occupant of the plane, but the greatest secrecy was observed to prevent that fact "breaking."

liffe's only objective was America, but that if he found he had plenty of but that if he foundhe had plenty of gasoline after reaching Newfoundland, he might continue to New York or to Philadelphia. The latter course would win a $25,000 prize for him.

The Weather Bureau announced that conditions were favorable over the first two-thirds of the ocean journey, but extremely perilous for the last third. Cold clouds were blowing up over the Grand Banks, with their threat of ice forming on the plane's wings.

BOURASSA BLOCKS BUDGET VOTE

(Continued from Page 1)

Speaker," he said, "of a similar situation which took place last year, when a member's speech lasted until a few minutes after six and the fact was pointed out to you. On that occasion you said that you were in the hands of the House."

The Speaker reaffirmed that under the 11 o'clock rule he had no such recourse. 'The suspension of the rules requires unanimous consent," he said, "and the House is not unanimous."

"It is! It is!" Liberal members vociferated, particularly those in the vicinity of the recalcitrant Independent.

"The hon. member usually makes his meaning quite clear," the Speaker commented doubtfully, adding, with a glance directed at Mr. Bourassa: "I took it that he was opposed to having the proceedings continue."

Mr. Bourassa nodded acquiescence.

"Then," the speaker declared finally, "it now being 11 o'clock, I declare this House adjourned until three o'clock to-morrow afternoon."

The adjournment which followed was not the usually decorous one which the Chamber observes. A general chorus of "boos" were directed towards Mr. Bourassa, and there was even the suggestion voiced to "throw him out of the House."

The Independent member for Labelle, however, was not at all perturbed by the confusion, which he had occasioned. He maintained his smiling manner, and finally left the House as if to the accompaniment of an ovation instead of to the jeers and angers of his colleagues.

First Division

The first division was on the sub-amendment of B. W. Fansher, East Lambton, Independent Progressive, which objected to the budget because it "proposes further reductions in the income tax, thus making a serious departure from the principal of direct taxation that the proposed revision of the Customs tariff is inadequate to bring effective relief to the consuming public, and that the sales tax on the necessaries of life has not been eliminated."

This was supported only by the Independent Progressives, Labor and Henri Bourassa. Those voting for it were:

Messrs. Lucas, Kennedy, Coote, Garland, Evans, Speakman, Carmichael, Bird, Ludovich, Spencer, Campbell, Jelliff., Fansher, Keiner, Western Progressives; Miss Macphail and F. W. Fansher, East Lambton, Ontario Progressives; Woodsworth and Heaps, Winnipeg, and Adshead, Calgary East, Labor; and Henri Bourassa. The amendment was defeated by 171 to 20.

The vote on the Cahan amendment saw the Conservatives alone against a combination of Liberals, Liberal-Progressives and Labor. The Cahan amendment expressing Conservative opinion regretted that: "The measures proposed by the Government do not tend to provide increased employment in Canada nor to induce the return of Canadians to their native land, nor to prevent the continued emigration of our people to the United States, and that they make no provision for the preservation of our domestic markets, for the Canadian farm and dairy products nor for the effective development of the resources of the country, nor for the abolition of the sales tax by January 1st, 1929."

This was defeated by 136 to 76. Then Mr. Bourassa intervened and the House adjourned.

OBITUARY

MRS. MATTHEW WILSON

OMEMEE, Mar. 14. — Sarah Ann Hall, beloved wife of Matthew Wilson, passed to her eternal reward early on Thursday morning, March 8th, at the home of her daughter, Mrs. Harold Laidley.

The late Mrs. Wilson was born in Ops Township almost 70 years ago, and was the daughter of the late Mr. and Mrs. Joseph Hall. After her marriage she and her husband lived for some years near Dunsford where their two sons were born. They later moved to their farm just west of the village where they lived until they retired in Omemee a few years ago. Two years ago the late Mrs. Wilson and her husband celebrated the fiftieth anniversary of their marriage.

Almost a year ago the deceased was taken seriously ill and an operation was necessary in order to relieve her suffering. After this operation she recovered for a time and was able to be around during the summer months and in the early fall she and her husband went to Chicago and spent the winter at the home of their son, Mr. Bert Wilson, returning to Omemee the last of January. The day following their arrival home the late Mrs. Wilson, who was in delicate health was taken ill, and although all that medical skill could do and the care of a loving daughter and son, it was of no avail.

The funeral of the departed was held on Saturday afternoon from Trinity United church, the pastor, the Rev. E. W. Rowland, conducting the services. The opening hymn: "Oh, for a closer walk wih God," and the Scripture reading from the 103 Psalm were both favorites of the deceased. The gowned choir rendered softly: "Breathe on me Breath of God," after which the pastor in a brief address from the 6th chapter of Isaiah, spoke very feelingly of the life of the deceased. She was a member of the former Methodist church and later the United church and rarely ever missed a service on Sunday when health permitted. For 31 years she had been a member of the Women's Missionary Society. She was a devoted wife and mother and a good, kind neighbor.

The funeral cortege wended its way to the Emily cemetery where the remains were laid to rest by two brothers, Joseph and Sidney Hall, two brothers-in-law, Thomas and Langdon Wilson, a cousin, Andrew Hall, and a nephew, Lawrence MacGauhey.

Numerous floral tributes enveloped the casket.

Those left to mourn her are her aged husband, one daughter, Mrs. Harold Laidley, of Omemee, two sons, Bert of Chicago, and George of Omemee, four grandchildren, Albert Wilson of Chicago, and Florence and Jean Laidley and Errol Wilson, of Omemee; four sisters, Mrs. Porter of San Francisco, Cal., Mrs. Killen, of Flint, Mich., Mrs. Spiers of Midland, Mrs. McGauhey of Lindsay; and three brothers, Joseph Hall of Lindsay, Sidney Hall of Peterboro, and James Hall of Flint, Michigan.

Among those from a distance who attended the funeral were Mr. and Mrs. Joseph Hall, Mrs. Melville Irvine, Mrs. MacGauhey and son, Mr. Lawrence MacGauhey, Mr. Andrew Hall Mrs. Dinner and Mr. J. Be... of Lindsay, Mr. Thomas Wilson ... Dunsford, Mrs. A. Ford, Havelock, Mr. Bert Wilson, Chicago, Mr. Sidney Hall and daughter, Peterborough, Mr. and Mrs. Dan McCarrol and daughter of East Emily

RAINBOW COMPLETE CIRCLE

That he had seen, for the first time in his 13 years of flying, a complete circular rainbow, was declared by a pilot in the Imperial Airways of England. He says that he was approaching the English Channel on his way from Paris to London when he saw the vividly-colored rainbow, which formed a perfect circle, through the centre of which he appeared to fly.

AGED CAPTAIN STILL ACTIVE

Captain J. E. Bernier, the Arctic explorer and his wife who were recently in Ontario on their way from Vancouver to Quebec. It was 20 years ago this year that Captain Bernier took possession of the Arctic archipelago in the name of Canada. He has always been a champion of the Hudson Bay route and has been in and out of the straits a score of times without the least mishap. At 76 this iron man, who came over from the wooden ships to the iron ships, is a physical marvel and is far from having made the last entry in his log books.

WHAT DO THE STARS SAY?

Solve this Puzzle

WIN New 1928 Ford Sedan $1500.00 in Cash Prizes

PRIZES

FIRST, 1928 Ford Sedan, Value $750.00

Second	$250.00	Cash
Third	150.00	"
Fourth	100.00	"
Fifth	75.00	"
Sixth	50.00	"
Seventh	25.00	"
Eighth	10.00	"
9 to 26	5.00	Each

The above prizes are unconditionally guaranteed.

Follow these Simple Rules

1. Write your answers in pen and ink only, on one side of the paper. Put name and address in upper right hand corner stating whether Mr., Mrs., or Miss, also name of this paper. Write anything else on separate sheet. Don't send fancy, drawn, or typewritten answers.
2. Contestants must be 10 years or over.
3. Employees of Banner Hosiery Co. or friends and relatives of employees are forbidden to enter.
4. Three entries may be submitted but only one can win a prize.
5. Different members of a family may compete but only one prize will be awarded to any one household or group.
6. Final awards will be made by a committee of three prominent Toronto business men who are in no way connected with this firm. Their names will be made known to all contestants. Contestants must agree to abide by their decisions.
7. If you find the correct answer to the puzzle you will be awarded 950 points, and we will send you by mail, a simple acting charade puzzle game on which you will be awarded all the final points. No points are to be awarded for neatness, handwriting, or general appearance, nor are points to be awarded for orders unless sent optionally to a limited amount to take the place of missing or doubtful answers. You are neither obliged nor required to buy or sell a single thing to win the highest prize.
8. Contest closes 5 p.m., Friday Aug. 31st, 1928. Entries should be forwarded promptly.

One night Professor Gazor, the great astronomer noticed through his telescope that various stars in one of the great constellations had different numbers of points to them. He was able to group these odd stars. This discovery so startled the scientific world that it was decided to find out what it all meant. After tremendous research it was decided that one of the planets was using this method to send the world an important message. By mathematical calculation Professor Gazor was able to decipher the message. His colleagues naturally wanted to know all about it, but he would not give them the message. He told them to work it out for themselves.

How He Did It

"You will notice," the professor told them, "some stars have three points, others four points, some five, or six points, etc. The number of points each star has determines what letter of the word of the message that star stands for. For instance if a star has three points it is the letter a. However, if it has four points it is either c, e, or f. Some stars represent only one letter, some 3 letters and some 3 letters. I have worked out the table code for you, now you count the number of points on each star and try to find what letter each star stands for, by referring to the table code. I have correctly arranged the stars so that each row of stars spells a word of the message. In order to help you a bit the first word is "Greatest."

Solve This Puzzle Win First Prize

If you can solve this puzzle, send your answer in at once to compete for the beautiful 1928 Ford Sedan First Prize. Write your answer neatly on a piece of paper in pen and ink.

WOMEN'S PAGE

PERSONALS

A very well attended and successful Irish tea was held yesterday afternoon and evening at the home of Mrs. J. A. Wolstenholme, Bolivar street, under the auspices of Mrs. Wolstenholme's group of missionary workers at Trinity church. The hostess was assisted in receiving by Mrs. J. M. Greene and Mrs. W. J. Padget. Mrs. N. Pogue ushered the guests into the tea room, where the table was artistically arranged with a mirror centrepiece that reflected the yellow and green of daffodils and shamrocks in a large silver basket, banked with smilax. Green candles were in silver candlesticks. Tea was poured by Mrs. B. Chambers, assisted by Mrs. H. Huffman, Mrs. H. S. Huffman, Mrs. F. Barret and Mrs. W. Nugent. A sale of home-made cooking was in charge of Mrs. J. H. Kimberley and Mrs. T. Sargent had charge of the sale of candy. Other ladies of the group assisted in various ways during the afternoon and evening. An interesting musical program included vocal solos by Mrs. W. H. Hohner, Mrs. Padget, Mrs. E. Brockwell, Miss Bertha Hill, Miss Margaret Wolstenholme, Miss Alma Blanchard, readings by Mrs. A. Barton and Miss Irene Cox, instrumental selections by Miss Musa Cox, Miss Frances McFadden, Miss Jean Padget and Miss Margaret Seabrooke, violin solos by Ross Gillespie and numbers by a trio composed of Miss Mildred Greene, pianist, Donald Greene, violinist and Jack Thackeray, cello. Accompaniments were played by the Misses Cox and Wolstenholme.

* * *

A number of the friends of Mrs. John Stewart (formerly Annie Allin) presented her with a handsome spread in rayon silk, at a shower held at her home. The evening was spent in the enjoyment of games and music, followed by the service of dainty refreshments.

* * *

Miss Norma Maker has returned from Belleville, where she spent the past fortnight with her grandparents, Mr. and Mrs. Nelson Patterson.

* * *

Mrs. H. F. Doig went up to Toronto yesterday to hear the famous Russian bass, Chaliapin, in recital at Massey Hall last night.

* * *

Mrs. Annie Elliott, who resides with Mrs. W. N. Hayes on Park street, while visiting in Toronto, had the misfortune to fal land break her leg. She is now in the General Hospital in Toronto.

* * *

Last evening, at the home of Mrs. P. Hetherington, King street, the "Star Class" of George Street United Church held a very enjoyable miscellaneous shower in honour of the bride-to-be, Miss Dorothea Stevens. Little Ruth Deyell and Allan Harrison, dressed as bride and groom, entererd the room to the strains of the bridal chorus, drawing a prettily decorated wagon filled with many beautiful and useful gifts. The bride was then placed in an archway where the nicely tied parcels were opened. The remainder of the evening was spent in contests and music provided by Misses Musa Cox and Alice Cocks, with several humorous readings by Miss Irene Cox, followed by dainty refreshments. The evening came to a close with the singing of "For She's a Jolly Good Fellow."

Are You Nervous? Sleepless?

St. Catharines, Ont.—"I was in such a nervous and rundown state of health that I could hardly get around to do my work. I could not sleep and the least noise or excitement would completely upset me and throw me into a nervous spell. I was advised to take Dr. Pierce's Favorite Prescription and I was soon well and strong and have never had another spell of nervousness since.

Mrs. Ada Taylor

"I always keep a bottle of Dr. Pierce's Pleasant Pellets in my medicine chest: they are the only medicine I have ever taken that would regulate the liver and relieve constipation without causing distress."—Mrs. Ada Taylor, 46 Wiley St.

Send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., if you desire a trial pkg. Favorite Prescription tablets.

Braid Trimming is Smart

This attractive dress has the much desired slenderizing line, and is a style suitable for all daytime wear. The front and back are quite plain and the plaited side-sections give added width and grace to the skirt. Braid is effectively used on the bodice to form a deep pointed yoke, and also trims the convertible collar, the cuffs finishing the long dart-fitted sleeves, and sides. No. 1522 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4¾ yards 39-inch material, or 3¼ yards 54-inch, and 7 yards trimming braid. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centers, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

FOUR DEBATERS AWARDED PRIZE

Judges Decide None of Them Know What "Chained Store" Is.

The March meeting of the Men's Association of George Street United Church was held in the Assembly Hall of the Sunday school at eight o'clock Monday evening.

The president, C. S. Thompson, occupied the chair, on account of the unavoidable absence of the secretary, Lloyd Gilders, acted as secretary. The meeting was opened by the singing of "Stand Up, Stand Up, For Jesus," after which A. Stewart led in prayer.

After the regular routine business was over and the singing of a few popular songs, Dr. J. E. Middleton was called upon to take charge of the main part of the program, which was a debate, "Resolved, that the chained store method is the best system of merchandising goods." Frank Dobbin and Sam Oke upheld the affirmative side of the debate, while Morley Powell and C. H. Saunders upheld the negative side. Quite a heated argument ensued; and it was not until after some deep thought, and until the judges all put on their coats, that they presented a decision that the contest was a tie. The judges were J. E. Smith, Dr. Weldon and F. C. McBride. A bronze statue was presented to all the debaters, to be held until the next debate, because of the fact tha none of them seemed to know what a chained store was.

DANGER

Your tongue is the best barometer of your physical condition. Look at it every morning before breakfast. If it is coated with white, yellow or brown coloring, and does not have a clean red appearance you are constipated and not well.

Heed Its Warning

Constipation causes more ailments than all other diseases, and is the result of not having a daily bowel movement. Sick-headache, indigestion, biliousness and sallow complexion follow. Ask your druggist for a 25c red paper package of CARTER'S LITTLE LIVER PILLS "Safe Laxative". Take a dose to-night and continue one pill after each meal. Don't stop—until your tongue is clean. You will be surprised at the tonic effect this doctor's formula will have on you.

CARTER'S LITTLE LIVER PILLS

Campbellford

Campbellford, March 14. — Gerald Bailey, Maple,, Ont., spent the week end with his parents, Mr. and Mrs. F. B. Bailey, Centre street.

Mrs. Barron Barrie, and her young est son, are visiting Mrs. Thomas Rutherford, Rannie street.

Clarence E. McKeel left yesterday for Detroit, where he will take a position.

Richard Riendeau, Detroit, spent the past few days as the guest of his brother, A. L. Riendeau, Rear street.

William Baxter, Detroit, is visiting his parents here.

Howard Shapter is confined to his bed with a serious illness. It is expected that an operation will be necessary.

Mrs. James Jackson, Booth street, is recovering from a broken arm, which she sustained some time ago, when the streets were covered with a sheet of ice.

Jack Twigg, Toronto, motored from Toronto yesterday to spend a few days with relatives and friends in town.

"Corbie" Rowe Timmins, was a recent visitor to town. He has gone to Guelph where he will accept a position.

With the first warm spell of the season Campbellford welcomed the first of the tourists. In the midst of a deluge a large sedan bearing California license markers passed down the main street going west last night about 7.30.

Several hockey fans motored to Stirling last night to see the exhibition hockey game between Stirling and the Trenton "Film Fun" players.

FUEL SHORTAGE ADDED PROBLEM

People of Upper Michigan Short of Coal For Light Plant.

FOOD BEING RATIONED..

DETROIT, March 14 (Canadian Press).—Residents of the snowbound Upper Michigan Peninsula villages faced another day of isolation today with the threat of a fuel famine added to the food shortage problem. Officials of Grand Marais, on Lake Superior, declared over the telephone that the power plant there would be forced to close unless coal was obtained by tomorrow. The communities of Detour, Pickford, Johnswood, Lime Island, Rudyard, and Stalwart also report fuel shortages. Although food is being rationed in most of villages, there is said to be no immediate danger of starvation.

Does Washing, Walks 5 Miles, Gains 10 Lbs.

"After a hard day washing, I can walk five miles now, since taking Vinol. I gained 10 pounds and feel fine."—Mrs. M. Curfman.

Vinol is a delicious compound of cod liver peptone, iron, etc. Nervous, easily tired, anemic people are surprised how Vinol gives new pep, sound sleep and a BIG appetite. The very FIRST bottle often adds several pounds weight to thin children or adults. Tastes delicious. McDermid & Jury, E. L. Payne, McDermid Drug Co.

THREE ACCIDENTS CAUSE TEN DEATHS

Train, Car and Plane Wrecked in States and England.

LOS ANGELES, March 14 (Canadian Press). — Three persons were killed, one seriously injured, and several others shaken up and bruised last night when a Santa Fe passenger train was derailed at Yampai, Arizona.

Five Persons Drowned

ALLENTOWN, Penn., March 14 (Canadian Press).—Five persons were drowned in three feet of water when an automobile plunged over a culvert bridge into Coplay Creek, near here, today.

Aviators Killed

MANSTON, England, March 14 (Canadian Press).—Two British officers were killed today in the crash of their airplane after collision with another plane. The second plane succeeded in landing safely.

More than 500 Americans on one German steamer recently visited Santiago de Cuba, Cuba.

CURING RUPTURE

If the hernia has not progressed too far there is a possibility of a cure through first the development of the abdominal muscles and, at the same time, a reduction of the internal pressure.

As soon as a hernial sack begins to show itself either by symptoms of pain or through being discovered by palpation, it is wise for the patient to immediately secure a good rupture support and wear it constantly until he is assured by his doctor that the cure is complete. The next thing to do is to start developing the abdominal muscles through taking a careful course of "setting-up" exercises. All of those exercises taken while lying on the back will be helpful. Any book on physical culture will explain these exercises, or I will be glad to send you a special chart of them if you will write to me in care of The Examiner.

These exercises must be taken very carefully at first and used at least twice daily, gradually increasing the exercises each day and adding new ones as the strength of the abdominal muscles permits.

At the same time as the support is applied and the exercises started, patient should use all measures necessary to produce as flat an abdomen as possible. The quantity of food used must be kept to the minimum of the body's requirements. All especially gas-forming foods such as onions, cooked cabbage, etc., should be carefully avoided. Only good food combinations should be used, such as those I suggest in the weekly menus which are printed each Saturday in this column. The menus are always outlined for the following week. Watch for them and learn how to combine your foods.

It is a good plan to take at least one enema each day and perhaps better to take two, one in the morning and one in the evening, using only one quart of plain water each time. The enema should be taken in the knee-chest position or while lying on the back, and the rupture support should be worn at the same time to prevent any undue pressure which may be caused by the temporary distention of the intestines by the water used for the enema. These enemas should be continued for several weeks or even several months if necessary as it is worth while to use all of these measures in attempting to cure the hernia so as to avoid a surgical operation which may become necessary unless every helpful precaution is taken.

Long walks should be taken each day to increase the general strength and produce a better tone of all of the muscles and organs of the pelvis.

The patient should have his doctor examine him at frequent intervals to see if a cure is being effected.

Questions and Answers.

Question Esther writes "I have chronic appendicitis and have heard that olive oil is very good. How much should I take and how often?"

Answer Olive oil is a good oil to use at any time and if used in large quantities it does have the effect of lubricating the bowels, and is a good remedy to use in overcoming chronic appendicitis. It may be taken on salads, or in a large dose of as much as four ounces at bedtime. A good way to take this large does is to combine it with an equal amount of grapefruit juice, and drink it just before retiring, as far away from the evening meal as possible.

Question Mrs. W. K. asks "Why is the sulphur on dried fruits harmful?"

Answer If any sulphur is left on dried fruits it may prove harmful due to the excessive gas which is produced when too much sulphur is used in the diet. Very little sulphur is used at the present time in drying fruits, and the only ones of which you may be suspicious are the light colored figs and raisins which are often bleached by sulphur gas.

Question Miss B. writes "I am a person seemingly in good health but on arising in the morning, underneath my eyes is very swollen and puffed. During the day this seems to go away, only to leave creases and marks. I drink hot water in the morning about a half hour before breakfast. Is this all right?"

Answer The swelling is due to some congestion in either your blood or lymphatic circulation. Such congestion may come from either kidney or heart trouble. Do not guess about it, but have a good diagnosis made.

Assam teas are known by experts as the finest teas grown—a fact which explains why Red Rose Orange Pekoe has become so deservedly popular in Canada. For Red Rose Orange Pekoe is chiefly composed of Assam teas, which accounts for its distinctive quality and value. Every package guaranteed.

Barrie's LIMITED

DRESS

By MARY MARSHALL

Chiffon printed in large floral design fashions this distinctive evening frock. The belt of the material is held with a rhinestone buckle.

The smartest use to which printed materials are put at present is in the making of evening frocks. And there are women who never have worn and apparently never will wear figured materials for the street or day time wear generally who are wearing the new type of figured evening gown with real satisfaction.

The midwinter collections included a number of printed frocks for evening—printed taffeta and satin among them. Almost invariably they were made with extreme simplicity but a sort of simplicity that was not easy for the amateur to copy. There was never any extraneous trimming save possibly a single buckle or other ornament of rhinestone. With the coming of warmer weather printed chiffons are taking the place of the more substantial materials and at Palm Beach women who didn't wear printed chiffon frocks on occasions were hard to find.

There is, of course, danger of letting your taste for printed fabrics get the better of you. I know one woman who never has any frocks that are not made of some sort of figured or patterned material. She assures you that plain surfaced materials show spots—she can't endure spots, you know. Well, once you know her reason for favoring figures you rather wish she wouldn't.

It seems to be the fond delusion of many more substantially built women that figured materials detract from their apparent size. I know a woman of more than usual rotundity who received at an afternoon bridge at her own house the other day wearing a new frock showing large rose figures on a beige background with large green leaves. I cannot imagine a much less appropriate sort of material—but the frock came from one of the best dressmakers and I know my friend was entirely satisfied.

Some women of indefinite coloring and rather too demure appearance wear figured materials convinced that they are more becoming. But this is not always the case.

HOROSCOPE

The Stars Incline, But Do Not Compel

(Copyright, 1928, McClure Syndicate.)

THURSDAY, MARCH 15, 1928.

Astrologers read this as an unimportant day in planetary government, but nevertheless a time to be cautious.

There may be a tendency toward pessimistic or despondent thoughts today and for that reason all ideas that are not hopeful should be dispelled.

The mind should be flexible at this period of the world's progress so that it may bend to new ideas and may not resist new ideas.

While many changes have taken place in the last decade, the seers prophesy even greater progress in the next few years.

The pendulum of thought is swinging backward far enough to mark what was good in past customs of social and business life.

This year is to be marked by more general travel than any year of the past, for much air transportation will be sought, it is forecast.

Persons whose birthdate it is may expect travel and unusual changes that should be fortunate.

Children born on this day may be ambitious, but inclined to many changes in plans or inclinations. They probably will be talented.

Who Wrote This?

(Copyright, 1928, McClure Syndicate.)

1. "His heart was as great as the world, but there was no room in it to hold the memory of a wrong."
2. "And can eternity belong to me, Poor pensioner on the bounties of an hour?"
3. "Seven cities warred for Homer being dead,
   Who living had no roof to shroud his head."
4. "The production of souls is the secret of unfathomable depth."
5. "Hast thou a charm to stay the morning star
   In his deep course?"
6. "Choice word and measured phrase, above the reach of ordinary men."
7. "Thoughts that voluntary move Harmonious numbers."
8. "Certainly virtue is like precious odours, most fragrant when they are incensed or crushed."

Answers to to-day's questions
1, Ralph Waldo Emerson; 2, Edward Young; 3, Thomas Heywood; 4, Victor Hugo; 5, S. T. Coleridge; 6, Wordsworth; 7, John Milton; 8, Sir Francis Bacon.

The Colonial Club, principal social organization of Tampico, Mexico, has just announced that its restaurant has been closed "because of lack of patronage, but the free lunch will be served at the bar as heretofore."

BEG YOUR PARDON

The name of Isobel Shurety was omitted from the list given in last night's Examiner of those taking part in the program given at the meeting of the Juvenile Orange Lodge.

In giving The Examiner a report of the meeting held on Saturday in St. John's parish Hall when Miss E. Harrison of Toronto addressed the members of the Junior Humane Society inadvertent omission was made of the name of Mrs. Hazel Davidson McClelland who gave two much appreciated readings.

Perspiration Odour so unpardonable so easy to banish

What quality is so attractive as personal charm . . . . and what social fault so obnoxious as perspiration odour.

Every person perspires, of course. It's natural, it's healthful. Physicians say the perspiration of the average person measures between one and two pints daily. Nature takes this way of ridding the body of impurities through the millions of tiny pores of the skin.

But perspiration need not be objectionable. Lifebuoy Soap, used in the bath, banishes the odour. Lifebuoy's creamy, mild lather not only cleanses, but also purifies the pores—antiseptically—and keeps them sweet, open and breathing.

To Keep Well

Drink plenty of water, perspire freely and banish perspiration odour with Lifebuoy Soap.

Make sure of avoiding the needless social error of perspiration odour. Use Lifebuoy Soap, for hands, face and bath.

Low in price—wonderful in results.

Belleville C.I. Wins Interscholastic Championship

PETES LOSE IN FINAL ROUND WHEN HOME TEAM WINS 3-0

Two Goal Lead Secured Here Is Overcome in Water-Covered Ice.

COUNTERS DISPUTED.

Fans Play Part By Sweeping Water in Front of Belleville Goal.

A two-goal lead carried over from the first of home-and-home games, played here, was not sufficient to tide the Peterborough Collegiate hockey team over in their invasion of Belleville for the final game last night, to decide the winner of the Oshawa Rotary Club Cup, emblematic of the Interscholastic championship of Eastern Ontario. The Petes went under by 3-0 in a heart-breaking battle played on a sheet of ice covered in many places by water an inch in depth. May it be a long time before a Peterborough team will again lose such a struggle against formidable opposition plus treatment of which they are not deserving! But more of that later. By virtue of their win last night, the Belleville students took the championship round by 6-5. Hats off to the victors.

It was a hard game for the Petes to lose.. They had bested the Quinte town representatives here by 5-3, but contrary to the impression apt to be given the fans at home, they did not lost out last night through any underestimation of their opposition. In their loss, Mother Nature played a leading part by contributing a liberal supply of water which leaked through the roof and dripped onto the ice. So far so good. That was as hard on the homesters as on the local students, but when, at the end of the second period, the water was scraped down around the end to be held by the Belleville team so that shooting on their goal was most difficult, the fan, hitherto neutral, could not help but ponder the calibre of sporting spirit possessed by the over-enthusiastic hometown fans who did the work.

In fairness to the now champions, it should be said that they put up a game struggle to overcome their two point handicap. They found the going every bit as hard as the Petes did in the first session, when neither outfit could register, and in the second they worked hard, climbing right in on Doxsee to get their first counter. McDonald worked the rubber across the line during a scramble soon after the period began; a few minutes later another pile-up took place in front of the invaders' net, and a disputed goal was allowed, while the third tally, by McDonald, came on a pass out from behind the goal. However, the official counting should not have stopped here, for about fourteen minutes after the start of the final chucker a shot from a Peterborough stick got in between Colling and the goal post, but the referees failed to see him clear it as he did—the goal official probably because he was watching play through a small hole in the boards, well protected by a couple of strands of wire and surrounded by the fans. He was well back and above the goal line, and when the goalie dropped, could not possibly have had a clear view of the clearing progress. He was replaced, on protest by the Peterborough players.

Referee Bill Green, replacing Mundell, of Kingston, who failed to put in an appearance, had his hands full—and flowing over. Certainly he could not have been accused of being overly zealous in the discharge of his duty. He imposed two penalties, one to Spencer and one to St. Denis. However, it should be remembered that he made the game possible by taking the job when the regularly appointed official was not on hand.

The attendance at last night's game was fair, despite the heavy downpour of rain outside as well as inside. The fans came armed with slickers and umbrellas, while a small contingent of Peterborough supporters, though greatly in the minority, cheered the boys on. Belleville Collegiate students showed their interest. They constituted a large portion of the home-town crowd.

The Game

The game did not get under way until 8.45 when Referee Green dropped the puck (with a splash) and the boys waded in. All attempts at combination were thrown into the discard and the boys began a combination shinney, golf, and "you-splash-me-and-I'll-splash-you" display without gaining a single hard shot for ten minutes. Doxsee and Colling pushed the rubber to the sides when it did filter through but the puck carrier had to travel slow while his pursuers made better time. Subs were used often.

Then came the disastrous second frame, in which a championship changed hands. With the resumption of hostilities, both teams went up on the line, though the Petes kept both defencemen back. Close checking and water on the ice made the going slow and hard on the players. The first counter of the game came then. The Belleville forwards had "gained yards" and a shot put the rubber close to the Petes' goal; a scramble ensued and the rubber slithered out from behind. Doxsee was down at one side and McDonald shoved it in. The fans liked it.

Finding it profitable to keep the homesters at their own end where they found difficulty in getting away due to a young lake inside their blue line, the Petes shot the puck up often and had it returned as often, until Spencer was penalized. While he was off, they drove in hard to make the advantage in numbers count—another pile-up resulted, and a goal allowed, though Woods was lying in the net and in the blue line.

The count on the round evened, the game became more strenuous with neither team making much headway. Players were drenched from falling and the spray flew wherever a stick was lowered, and the battle went merrily on.

The disputed final goal came just before the bell, when McDonald waltzed in, grabbed a loose puck and put it in while the rest of the lads were picking themselves up from a flop near the goal mouth.

Even when one goal down, the Petes appeared to have a good chance of breaking into the scoring column, but here occurred the water displacement act referred to elsewhere. An army of bucket boys and a couple of home-town fans got on the job during the intermisison and at first their intentions appeared quite worthy. However, when, under the pretense of shoving the excess water through an outlet, they merely shoved it down in front of the goal to be defended by their team .Peterborough supporters appealed to the referee who, of course, had little control over the rink work.

The last twenty minutes furnished most of the real excitement of the night, for in it the visitors threw up four men on the line and took an edge on the play. They worked in to close quarters, only to find it almost impossible to get a clean drive at Colling, while Benny Spencer, sitting back, was kept busy returning the puck which the defenders shot up the rink as often as possible. The nearest approach to a counter came when Woods took a hoist from left rail and watched it slide in, only to be thrown out by the goalie. Though the referee did not allow the goal, the official behind the screen was replaced. That decision rather took the fight out of the losers. While they never stopped trying, the play afterwards seemed less aggressive and the gong found them still trailing.

The teams:

Belleville.—Colling, goal; Clark and Young, defence; Ross, centre; Galway and St. Denis, wings; Black and McDonald, subs.

Peterborough. — Doxsee, goal; Spencer and Woods, defence; Cuthbertson, centre; Dunkerley and Hewett, wings; Taylor and Theobald, subs.

Her Three Boys Had Terrible Colds That Hung On

Mrs. G. Ames, 35 St. George Street, Chatham, Ont., writes:—"Last winter my three boys had terrible colds and a cough that hung on so long that it began to worry me.

"I went to my druggist and he asked me if I had tried

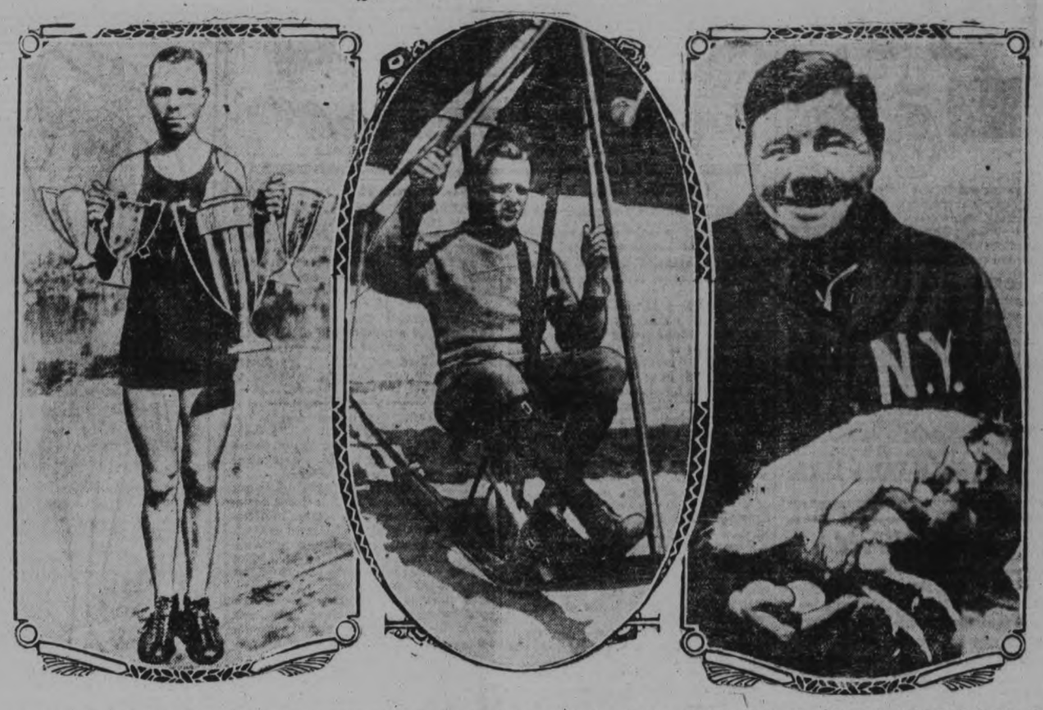
Dr. Wood's Norway Pine Syrup

"I told him I had not, but that I would, and I must say that after they had finished the third bottle they were entirely rid of the cough.

"I will never be without a bottle of 'Dr. Wood's' on hand."

Price 35c. a bottle, large family size 60c.; put up only by The T. Milburn Co., Limited, Toronto, Ont.

QUARTET OF CHAMPIONS



Here's a quartet of champs—and the hen's included. First is Wilbur Marx, sixteen-year-old world champion "birler" or log roller. His trophies are for neat footwork on rolling logs in the water, Ferdinand Schulz, centre, flies his kites with himself aboard. He is world champion operator of the engineless glider and has reached a height of over 2,500 feet. The "Sultan of Swat", Babe Ruth, home run king is showing off "Lady Baby Ruth" who holds the champion long distance laying record for consecutive work—an egg a day for 170 days.

Hockey Scores

Hockey games played last night resulted as follows:

National League.
Ottawa 1, Maple Leafs 1.
Montreal 5, Americans 0.
Canadiens 4, Rangers 1.
Boston 3, Detroit 0.

O.H.A. Memorial Cup
Regina 8, Kenora 0.

Senior High School.
Humberside 4, Riverdale 1.

Bantam T.A.H.A.
Danforth 2, St. Michael's 0.

Juvenile T.A.H.A.
Westmorelands 0, Wolverines 0.

Junior T.A.H.A.
Dentonia 8, McMurrichs 3.

Kitchener Junior League.
St. Jerome's 1, Wild Cats 1.

L. O. H. A.
Aura Lee 4, Forest 2.

WOOLER WINS.

Defeats Warkworth at Home in Fast Hockey Game.

NORHAM, March 14.—Wooler defeated Warkworth 7-5 in the hockey game played in the Warkworth arena on Wednesday night, with a good crowd in attendance.

Personals.

Miss Edith Menelley of Toronto spent the week-end at her home.

Misses Claire Curtis and Lucille Lean spent Tuesday and Wednesday in Warkworth at the home of their aunt, Mrs. B. Buchanan.

LOCAL RINK IS DEFEATED

Lose Out to Kingston 9-5 in Bonspiel at Lake Shore City.

TWENTY-TWO CLUBS.

KINGSTON, March 14.—(Special)—A Peterborough rink, skipped by J. N. Bacon was defeated by a rink skipped by W. J. Drysdale of Kingston yesterday afternoon at the local club's bonspiel by 9-5 in the preliminary round of the primary competition. The team was composed of the following; M. Bredin, W. Oke, G. Cairns and J. N. Bacon (skip).

There are twenty-two rinks taking part in the bonspiel which is being held at the Harty Arena and which will be continued today and Thursday. There are eight Kingston rinks competing, four from Rockwood Hospital, two from Napanee, two from Picton and one each from Belleville, Peterborough and Colborne.

FOR GAS, ACID STOMACH, INDIGESTION

Bisurated Magnesia Is Safe and Reliable

If you are a victim of Stomach Trouble,—Gas, Sourness, Acidity, Pain or Bloating after eating, Bisurated Magnesia is made for you.

At the nearest drug store, get a bottle—powder or tablets—take a little and get instant relief.

Keeps your stomach sweet and strong—digestion perfect. It works like a charm.

Britisher Eliminated

NEW YORK, March 14 (Canadian Press).—The last remaining invader in the men's national indoor tennis tournament here, was eliminated yesterday when G. P. Hughes of England was defeated in the fourth round by Lawrence Kurzrok of New York, 7—5, 7—5.

RICKARD LANDS MANDELL MATCH

Lightweight Champ Will Battle McLarnin at Polo Grounds May 17.

NEW YORK, March 14. — Tex Rickard has won out over Jim Mullen, of Chicago, in their battle for the services of Sammy Mandell, the lightweight champion.

Eddie Kane, manager of Mandell, has accepted Rickard's terms for a championship match with "Baby Face Jimmy" McLarin. The bout will be staged at the Polo Grounds on May 17.

News of Kane's acceptance leaked out through Charles 'Pop" Foster, manager of McLarin. He was notified by Jess McMahon, matchmaker of Madison Square Garden, that final details of the match will be completed upon Kane's arrival Wednesday.

BRITISH RUNNER STILL IN LEAD

Arthur Newton Wins Tenth Lap of Coast-to-Coast Marathon.

MAKES GOOD TIME.

KINGMAN, Ariz., March 14 (Canadian Press). — Arthur Newton, the great British long distance runner, showed his heels to the remainder of the field yesterday to win the tenth lap of the coast-to-coast Marathon He covered the 26.8 mile stretch from Oatman, Ariz., to this city in 4 hours and 3 minutes.

Already leader in total elapsed time, the lanky entrant from Rhodesia, South Africa, boosted his advantage heavily again yesterday. His total time for the 345.7 miles covered since the race got under way at Los Angeles on March 4 is 53 hours 32 minutes.

Paul Simpson, of Charlotte, N.C., was the second to complete yesterday's stretch. His time was 4 hours 10 minutes, giving him a total elapsed time of74 hours 56 minutes 59 seconds. Simpson led the field at the 18-mile mark, but relinquished it shortly after as Newton's steady pace carried him to the fore.

The field of the contestants showed another slight reduction yesterday, 127 runners leaving the starting point at Oatman.

ASSOCIATION WAS OPERATED WITH DEFICIT

Necessary To Meet Competitors' Prices, Sales Manager Tells Members.

IMPROVEMENT URGED.

F. H. Buker Advises Millbrook Egg Producers To Better Their Flocks.

MILLBROOK, March 14.—The annual meeting of the Millbrook Produce Association was held in the town hall on Tuesday, March 13, at 2.30 p.m., the vice-president, R. J. McKnight, in the chair.

Considering that there are about two hundred members connected with the organization, the attendance was disappointingly small, a feature of the annual meeting that seems to be repeated each year. The association has been in existence for three years, and at the end of the first twelve months the sales manager issued circulars to every member giving notice of the meeting, and urging attendance. The result was not encouraging, and since then notification has been through the local press.

The financial statement was presented by M. McDowell, sales manager, who regretted having to report operating this year at a loss; this was explained as being the result of competition last spring, "and to retain our shippers we had to stay within the same range of prices with our opposition." The statement was as follows:

Assets

Cash in bank	$340.76
Cash in till	73.63
Eggs in stock	87.65
Accounts receivable	154.34
Egg cases and equipment	142.78
Total	$798.36

Liabilities

Bank loan	$400.00
Customers' balance	25.00
Accounts payable	130.55
Total	$555.55

Income

Profit and Loss—	
Gross sales	$18,383.03
Paid to shippers	17,241.31
Gross profit	$ 1141.72

Expenses

Wages	$ 1120.48
Rent, heat and light	142.42
Gen expenses and fillers	47.19
Interest	65.17
Cheque books	13.00
Depreciation	30.00
Total	$ 1418.26
Net loss	$ 276.54

Number of dozen 56,024; sale price per dozen 32.8; price per dozen to shippers 30.7; expenses per dozen 2.5 Comparing these prices with those of the previous year 32.2 was the price per dozen, and 29.07 the price to shippers

Owing to the failure of the one appointed to act the books had not been audited for two years. J. L. Byam was engaged to do the work this year and appended the statement: "I have examined the accounts of the Millbrook Produce Association from 1925 to the end of 1926; and from 1926 until the end of January, 1928, and have found the same correct.—J. L. Byam, auditor."

It was moved by Messrs. Elson and Morton, that the financial statement be adopted. Carried.

F. H. Buker.

F. H. Buker, district poultry promoter for Eastern Ontario, addressed the gathering, and said the egg business is a big thing that is appealing more and more to the merchants. Commenting on the small attendance, the speaker mentioned the big problem it is to come into personal touch with the shippers, but thought non-attendance when the annual meeting is called a poor way of showing support. He suggested doing something startling, such as dropping the price of eggs ten cents a dozen the week before the meeting, and thus forcing the shippers out to voice their protest.

The suggestion was also advanced to broaden the association's activities so that it became, not merely an egg market, but a "Poultry Improvement Association." Due to the R.O.P. tests pedigree stock, in almost every variety of fowl, may now be readily secured, and registered cockerels had been brought into the community last year through the efforts of the local sales manager. "However, it is not the breed particularly, but the kind that will lay the most eggs, that producers are anxious to secure," he said.

"Canada is still increasing her egg consumption annually; in 1926 it was 337 eggs per capita. One of the advantages of the World's Poultry Congress held last summer at Ottawa and one very far-reaching from the poultry standpoint, was the excellent advertising medium that it was for this country. England's egg consumption per capita is 119 eggs; that of the United States 180; what would happen if they increased their home consumption to the figure that Canada has reached?"

Referring to the question sometimes asked whether the poultry business is not likely to be overdone, the speaker said that while a great many go in, possibly because returns begin to come in with a few months, a great many others go out, hence a balance is maintained.

That egg grading is here to stay, Mr. Baker felt to be an assured fact. Regarding the regulations there are differing opinions. The producer who has eggs of poor quality for sale is glad to lose their identification by having them put in with others, so prefers the flat rate. The Port Hope and Welcome Association, at its meeting the previous evening, had forwarded a resolution asking that more prominence be given the grad of "pullet extras" on the governmen chart—the list to be five instead four specials; extras; pullet extra firsts, and seconds. This associatio had also protested against the pro posed increase in weight of 30 doze egg cases from 55 to 58 pounds fo shipping purposes.

Freight Increase Proposed

After reading the letter from th Department mentioning the propose freight increase, the speaker asserte that, basing calculations on the busi ness of the year, this would mea approximately $100 more expense jus for carriage to the local organiza tion.

"When you are dealing with th question of egg production, you ar practically dealing with a system o currency, hence it is a big problem we are facing. Two factors are vit ally interested—the producer and the consumer. If the association wil broaden out so it has the business men of the community behind it, i will mean bringing trade to the stores, and an increased interest at tendance and volume of business.

"The poultry population of Canada in 1926 was 48,000,000; supposing an increase of just one egg per hen, that means over $1,000,000 of actual increase in revenue."

Messrs. McDowell and Hutchison moved that the association forward a resolution to the Department of Agriculture at Ottawa, and also to the Railway Board, protesting against the proposed increase in express rates. Carried.

A round table discussion on some of the difficulties actually experienced in connection with the egg-grading regulations occupied a considerable time, and there will likely be some practical action taken as a result.

R. J. McKnight, President

A directors' meeting followed immediately after the annual meeting; the following officers being elected: President, R. J. McKnight; vice-president, L. J. Hutchison; secretary, L. W. Smith; auditor, J. L. Byam; sales' manager, M. McDowell. Coupled with the latter appointment was a unanimous vote of thanks, sponsored by L. W. Smith and R. J. McKnight, for the very able manner in which Mr. McDowell has carried on the work. The directors for 1928 are: L. Hutchison, Wesley Wood, L. W. Smith, R. J. McKnight, E. Armstrong, J. Perrin, W. Elson, and Herbert Morton.

INITIAL TEAS NEARING CLOSE

Third of Series of Four at Campbellford Is Great Success.

MANY ATTEND.

CAMPBELLFORD, Mar. 14.— The third of the series of four initial teas held under the auspices of the women of St. Andrew's church was held in the Sunday school rooms last night. The program was arranged by the ladies whose initials are included in the group M, N, O, and P, and Willaim Pearson, organist, was largely responsible for the musical numbers. The program opened with a piano duet by Misses Eva McKelvie and Mary McGregor and the second number was a vocal solo, Mother Machree by Mrs. Ernest Bedford. Miss Marjorie Ackerman's reading was well received. The male chorus singing Killarney and the Wearin' o' the Green, received loud applause. Between several of the numbers Miss Bertha Blue and William Blue, with their guitars, entertained. The scenes from the nursery rhymes, Mother Goose, Old Mother Hubbard, Old King Cole, the Old Woman Who Lived in a Shoe, and others, with a chorus of children's voices, was the high light of the program. The remainder of the program consisted of solos, readings and male choruses.

The general opinion of those who have heard the three programs is that experience is a good teacher. The fourth and final tea for the season is expected to be the best since it will have benefitted by the ideas which its predecessors have produced. There are to be made novelties as well.

After the program, lunch was served by the ladies in charge and the evening ended with two hundred and thirty-six well pleased people who had paid their admission fee, which is negligible for such a high class entertainment.

THERE ARE STRANGE AND BEAUTIFUL SIGHTS ALONG THE PACIFIC COAST—YOU CAN SEE THEM THIS SUMMER

Great snow-capped mountains—glaciers that tower high above the water's edge—fiords of surpassing scenic beauty—all await you along the Pacific Coast and in Alaska.

You can see the beauty and the grandeur of the finest scenery in the world by taking one of the Canadian National Railways inexpensive tours of the Pacific Coast and Alaska.

The tour includes a visit to Jasper Park—the playground of the Rockies.

Out of the heart of the Rockies the tour brings you to Vancouver and Victoria—the two most attractive cities on the North Pacific.

Now you leave the centres of population for a thousand mile sail along the famous inside passage to Skagway, Alaska. From comfortable modern steamers you will sail through picturesque and awe-inspiring channels where you will see nature in her most rugged and alluring dress—scenes beyond imagination and beauty spots that bring thrills to the most sophisticated traveller.

All these wonders can be visited in one complete tour. Ask any Canadian National Railway Agent about this trip. He will help you plan you itinerary and give you full information and illustrated literature.

THURSDAY—FRIDAY—SATURDAY

PETERBORO'S FAVORITE COMEDIAN

CARL LAEMMLE presents

REGINALD DENNY

"ON YOUR TOES"

A UNIVERSAL PICTURE

How he dances. How he makes love. How he fights. The gripping story of a world champion's son—ignorant of his father's career—who is a dancing master. Different? And how! Thrills and heart throbs. Laughs and left hooks. You haven't seen Denny's best till you see him here!

THURSDAY NIGHT IS MUSIC NIGHT

Copies of Standard Compositions Free to the First 200 Ladies Entering

THEATRES

AT THE CAPITOL.

DENNY RETURNS AS FIGHTER IN "ON YOUR TOES"

Motion picture followers all over the country are welcoming the return of the ever-popular star, Reginald Denny, to the role of a boxer in his recent Universal picture, "On Your Toes". The enthusiasm aroused over Denny's portrayals of a fighter in the "Leather Pushers" has never quite died down although the series has been released for some time.

There is no doubt, therefore, that many persons will await with eager interest the opening of his latest screen hit at the Capitol Theatre where it has been booked as the feature attraction commencing tomorrow. Reginald Denny is familiar to every movie patron in the world, it is said, through his numerous screen successes, but in this newest and greatest comedy he surpasses everything that he has given film audiences in the past. "On Your Toes" is now showing over the country and is raising the high standard of entertainment set by the most successful season in the history of the motion picture industry.

Universal has selected the finest cast it could assemble to support Denny. Barbara Worth, the leading lady, is one of Hollywood's most beautiful and charming women. She is a worthy opposite for the handsome Denny. Mary Carr, the screen's "best-known mother", has a featured role. Others in the cast are such players as Hayden Stevenson, Frank Hagney, and Gertrude Howard. Fred Newmeyer wielded the megaphone.

Denny portrays the born boxer whose good nature makes him chicken-hearted in a fight. The scheme by which he is finally made mad enough to fight for the championship provide an evening of the most glowing and thrilling entertainment.

AT THE REGENT.

"THE BRUTE" FILMED NEAR GHOST CITIES

The mysterious "ghost cities" of Rhyolite, Skidoo and Pioneer, once 'boom" mining centres, and now lying in death like silence of a score of years, are a part of the environment in which scenes of Warner Bros.' production of "The Brute," starring Monte Blue, were filmed.

The brooding mystery of these cities, for more than twenty years a part of the unholy silence of the great American desert, Death Valley, remains to-day as one of the unsolved enigmas, open to conjecture.

One night the haven of lustful miners bent on drinking their fill from the mineral wealth reputed to be held in the ranges bordering Death Valley, the dawn found a deathlike stillness pervading the streets of these ctiles. Not a sound, nor a movement broke the ominous calm. Skidoo, with its population of 5,000 on one day in 1905 had none on the following day. Rhydolite, which boasted a milling 10,000, was deserted similarly, and not a soul has been known to live in either since.

The hastily built homes and business places were left practically intact in the haste of the exodus. Food, wearing apparel, practically everything was left undisturbed. Court records remain to-day as filed, disturbed only by the prying fingers of those curious souls who have come and gone there since to view the mysterious "ghost cities" and to go on.

What became of the populace of the "ghost cities" of Death Valley is open to conjecture. That they were swallowed up in the wastes of the parched vale of death appears unlikely.. The story is advanced that a "strike" in some distant quarter, causing a new rush, caused them to drop everything in their wild haste to the new field. The latter solution is regarded as the most plausible, but has never been corroborated.

"The Brue," which depicts a story of the period in which Rhyolite, Skidoo and Pioneer were at their height, has as a part of its locale this section of Death Valley and the adjacent cattle and mining country. Much of its most beautiful scenery is that filmed in the portion of Death Valley known to the miners who populated the "ghost cities."

The splendid supporting cast for Monte Blue in "The Brute" includes Leila Hyams in the leading feminine role, Clyde Cook, Carrol Nye and Paul Nicholson. Irving Cumings directed "The Brute" which is based on W. Douglas Newton's popular novel.

"The Brute" comes to the Regent Theatre to-morrow for a run of three days.

TORONTO LEAFS OUT OF RUNNING

Have Very Slim Chance of Gaining Third Place—Play Tie With Ottawa.

N.H.L. GAMES.

TORONTO, March 14.—One of those momentary defensive lapses of which the Leafs have been guilty several times this season with costly results again made its appearance last night, and as a consequence the locals practically lost their chance of getting in the play-off for the group title. At the start of the game the Senators enjoyed a six-point lead over the Leafs and as the teams battled, and the latter word is used literally not figuratively, to a one all tie they skated off the ice at the end of the seventy minutes with their margin neither reduced nor increased but the Leafs are in the position of having only three games to play while the Senators have four. The locals must win all their games and even then the champions have only to get a division of the points in any of the remaining games to finish in the third hole.

Maroons Win Easily.

MONTREAL, March 14—The Montreal Maroons consolidated their hold on second place of the Canadian section of the National Hockey League by whitewashing the New York Americans 5 to 0 here last night.

With the exception of the opening minutes and for a short time in the final session, the Americans hardly were in the issue. Only "Jakie" Forbes' good work in the nets kept the Maroon sharpshooters from adding to their total.

Canadiens Beat Rangers.

NEW YORK, March 14.—Les Canadiens of Montreal rose to the heights of brilliancy, which has kept them in the vanguard of National Hockey League teams this season, when they decisively triumphed over the New York Rangers by a 4 to 1 count here last night, thus making a clean sweep of their season's four games against the Gotham sextet.

Bruins Hold Lead.

BOSTON, Mass., March 14.—The Boston Bruins moved closer to the first place bye position for the American division playoffs in the National Hockey League by defeating the Detroit Cougars 3 to 0 here last night. At the same time the defeat set the Cougars one game farther away from a chance to get into post-season money in their third place race with Pittsburgh.

HOUSE TAKES UP FRASER'S CASE

Papers Dealing With Madoc Dentist's Conviction Produced in House.

AT SINCLAIR'S REQUEST.

TORONTO, March 14.—Dr. Grant Fraser, Madoc dentist, has succeeded Magistrate Bradford of Lindsay as a subject for the consideration of the Legislative Assembly. Soon after the opening of the Assembly, W. E. N. Sinclair, leader of the Opposition, tabled a motion for the production of all the records and correspondence dealing with Dr. Fraser's conviction for the third time, last spring, of a breach of the O.T.A.

In accordance with the provisions of the statute, Dr. Fraser was sentenced to one month in jail and fined $100. Mr. Sinclair declared that Dr. Fraser appealed the decision and lost. In spite of this fact, he adds, the sentence was modified to one of a fine of $200 without any jail term.

Yesterday the documents of the case were placed at the disposal of the members. The affair has been complicated by the fact that the case did not come up for decision until the Ontario Temperance Act had vanished into the limbo of legislative dead things. The Attorney-General declared that after the passing of the three months' period which had been assigned for the completion of the consideration of breaches of the O.T.A., the Government had not contested appeals from such decisions unless some point of the law was involved, since the penalties under the new Act were far more drastic.

MODERN TRENDS ARE ARRAIGNED

Rev. W. Harold Young Discusses Deadening Influence of Materialism.

ADDRESSES PAINTERS.

Certain modern tendencies were strongly arraigned by Rev. W. Harold Young of St. Paul's United Church, Toronto and formerly minister of George Street United church in this city in an address at the Carls-Rite Hotel, Toronto, before the Toronto Chapter of the International Society of Master Painters and Decorators, the annual meetings of which came to a close on Saturday.

The deadening influence of materialistic outlook on the character were specially stressed by the speaker. The love of ease and luxury, the desire to possess things for their own sake, characteristic of the age, said Mr. Young, were gradually smothering the finer feelings and were responsible for much of man's inhumanity to man which makes countless thousands mourn.

He urged his hearers to keep to a high level and to resist the tendency to let modern competitive methods crush out the artistic side of their occupation.

.. NOTES OF SPORT

The English university crews are now in steady training for their annual race next month.

The Canadian-American Hockey League, which has had a most successful season, will probably expand its circuit to nine or ten teams next year.

RE-FLOOR WITH SEAMAN-KENT HARDWOOD FLOORING

Want an Extra Bedroom?

Then why not re-floor that upstair store-room with hardwood?

You can make it wonderfully attractive and comfortable, and it will cost you so little!

Let us show you samples, and give you an estimate based on actual measurements.

Peterborough Lumber Company, Ltd. Peterborough

THE BEST THAT'S MADE IN EVERY GRADE

HERE AND THERE

WINNIPEG, March 14 (Canadian Press).—The Manitoba Old Age Pensions Bill passed its third reading in the Legislature yesterday. The sum of half a million dollars will be required to finance the measure during the first year, and this will be raised by a property tax.

Rumania to Make Claim

BUCHAREST, March 14 (Canadian Press). — Reports were current here today that Rumania intends to imitate the Bank of France in lodging a claim against the five million dollars of Soviet gold held in the vaults of two New York banks.

Air Mail Arrives

TOULOUSE, France, March 14 (Canadian Press).—The first air mail from the Argentine reached France last night, when a mail plane which left Casablanca, Spain, earlier in the day arrived at the flying field here.

Purses Going Up.

NEW YORK, March 14 (Canadian Press)—Johnny Risko, Cleveland, and Jack Sharkey, Boston, boxers, received $24,015 each for the fifteen round match in which Sharkey lost the decision. When Sharkey beat Risko three years ago each got nine hundred dollars.

Shoots Wife and Self

EDMONTON, March 14 (Canadian Press)—Metro Oleniuk, Russian miner, shot and fatally wounded his wife, Mary, on the street here yesterday, afterwards turning the gun on himself and dying instantly.

Champion Wins

SAN FRANCISCO, March 14 (Canadian Press)—Champion Jake Schaefer played superb billiards to overcome Challenger Edouard Horeman's big lead and win the third block of their championship match here by the score of nine hundred to eight hundred and fifty-five.

Conservatives Convene

SASKATOON, Sask., March 14 (Canadian Press).—As a step toward the consolidation of the party in the province, Saskatchewan Conservatives are assembling in general convention here today.

THE "CANARY" MURDER CASE

© Charles Scribner's Sons

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

(Continued from yesterday.)

CHAPTER LI.

(Tuesday, September 16; 2 p.m.)

Less than half an hour later we again entered the main hall of the little apartment building in 71st street. Spively, as usual, was on duty at the switchboard. Just inside the public reception-room the officer on guard reclined in an easy chair, a cigar in his mouth. On seeing the district attorney, he rose with forced alacrity.

"When you going to open things up, Mr. Markham?" he asked. "This rest-cure is ruinin' my health."

"Very soon, I hope, officer," Markham told him. "Any more visitors?"

"Nobody, sir." The man stifled a yawn.

"Let's have your key to the apartment.—Have you been inside?"

"No, sir. Orders were to stay out here."

We passed into the dead girl's living-room. The shades were still up, and the sunlight of midday was pouring in. Nothing apparently had been touched not even the overturned chairs had been righted. Markham went to the window and stood, his hands behind him, surveying the scene despondently. He was laboring under a growing uncertainty, and he watched Vance with a cynical amusement which was far from spontaneous.

Vance, after lighting a cigaret, proceeded to inspect the two rooms, letting his eyes rest searchingly on the various disordered objects. Presently he went into the bathroom and remained several minutes. When he came out he carried a towel with several dark smudges on it.

"This is what Skeel used to erase his finger-prints," he said, tossing the towel on the bed.

"Marvelous!" Markham rallied him. "That, of course, convicts Spotswoode."

"Tut, tut! But it helps substantiate my theory of the crime." He walked to the dressing-table and sniffed at a tiny silver atomizer. "The lady used Coty's Chypre," he murmured. "Why will they all do it?"

"And just what does that help substantiate?"

"Markham dear, I'm absorbing atmosphere. I'm attuning my soul to the apartment's vibrations. Do let me attune in peace. I may have a visitation at any moment—a revelation from Sinai, as it were."

He continued his round of investigation, and at last passed out into the main hall, where he stood, one foot holding open the door, looking about him with curious intentness. When he returned to the living-room, he sat down on the edge of the rosewood table, and surrendered himself to gloomy contemplation. After several minutes he gave Markham a sardonic grin.

"I say! This is a problem. Dash it all, it's uncanny!"

"I had an idea," scoffed Markham, "that sooner or later you'd revise your deductions in regard to Spotswoode."

Vance stared idly at the ceiling.

"You're devilish stubborn, don't y' know. Here I am trying to extricate you from a deuced unpleasant predicament, and all you do is to indulge in caustic observations calculated to damp my youthful ardor."

Markham left the window and seated himself on the arm of the davenport facing Vance. His eyes held a worried look.

"Vance, don't get me wrong. Spotswoode means nothing in my life. If he did this thing, I'd like to know it. Unless this case is cleared up, I'm in for an ungodly walloping by the newspapers. It's not to my interests to discourage any possibility of a solution. But your conclusion about Spotswoode is impossible. There are too many contradictory facts."

"That's just it, don't y' know. The contradict'ry indications are far too perfect. They fit together too beautifully; they're almost as fine as the forms in a Michelangelo statue. They're too carefully co-ordinated, d' ye see, to have been merely a haphazard concatenation of circumstances. They signify conscious design."

Markham rose and, slowly returning to the window, stood looking out into the little rear yard.

"If I could grant your premise that Spotswoode killed the girl," he said, "I could follow your syllogism. But I can't very well convict a man on the grounds that his defense is too perfect."

"What we need, Markham, is inspiration. The mere contortions of the sibyl are not enough." Vance took a turn up and down the room. "What really infuriates me is that I've been outwitted. And by a manufacturer of automobile access'ries! . . It's most humiliatin'."

He sat down at the piano and played the opening bars of Brahms's Capriccio No. 1.

"Needs tuning," he muttered; and, sauntering to the Boule cabinet, he ran his finger over the marquetry. "Pretty and all that," he said, "but a bit fussy. Good example, though. The deceased's aunt from Seattle should get a very fair price for it."

He regarded a pendent girandole at the side of the cabinet. "Rather nice, that, if the original candles hadn't been supplanted with modern frosted bulbs."

He paused before the little china clock on the mantel. "Gingerbread. I'm sure it kept atrocious time." Passing on to the escritoire, he examined it critically. "Imitation French Renaissance. But rather dainty, what?"

Then his eye fell on the wastepaper basket, and he picked it up. "Silly idea," he commented, "—making a basket out of vellum. The artistic triumph of some lady interior decorator. I'll wager. Enough vellum here to bind a set of Epictetus. But why ruin the effect with hand-painted garlands? The aesthetic instinct has not as yet invaded these fair States—decidedly not."

Setting the basket down, he studied it meditatively for a moment. Then he leaned over and took from it the piece of crumpled wrapping-paper to which he had referred the previous day.

"This doubtless contained the lady's last purchase on earth," he mused. "Very touchin'. Are you sentimental about such trifles, Markham? Anyway, the purple string round it was a godsend to Skeel. . . What knick-knack, do you suppose, paved the way for the frantic Tony's escape?"

He opened the paper, revealing a broken piece of corrugated cardboard and a large square dark-brown envelope.

"Ah, to be sure! Phonograph records." He glanced about the apartment. "But, I say, where did the lady keep the bally machine?"

"You'll find it in the foyer," said Markham wearily, without turning. He knew that Vance's chatter was only the outward manifestation of serious and perplexed thinking; and he was waiting with what patience he could muster.

Vance sauntered idly through the glass doors into the little reception hall, and stood gazing abstractedly at a console phonograph of Chinese Chippendale design which stood against the wall at one end. The squat cabinet was partly covered with a prayer-rug, and upon it sat a polished bronze flower bowl.

"At any rate, it doesn't look phonographic," he remarked. "But why the prayer-rug?" He examined it casually. "Anatolian—probably called a Caesarian for sale purposes. Not very valuable—too much on the Oushak type. . . . Wonder what the lady's taste in music was. Victor Herbert, doubtless."

He turned back the rug and lifted the lid of the cabinet. There was a record already on the machine, and he leaned over and looked at it.

"My word! The Andante from Beethoven's C-Minor Symphony!" he exclaimed cheerfully. "You know the movement, of course, Markham. The most perfect Andante ever written." He would up the machine. "I think a little good music might clear the atmosphere and volatilize our perturbation, what?"

Markham paid no attention to his banter; he was still gazing dejectedly out of the window.

Vance started the motor, and placing the needle on the record, returned to the living-room. He stood staring at the davenport, concentrating on the problem in hand. I sat in the wicker chair by the door waiting for the music. The situation was getting on my nerves, and I began to feel fidgety. A minute or two passed, but the only sound which came from the phonograph was a faint scratching. Vance looked up with mild curiosity, and walked back to the machine. Inspecting it cursorily, he once more set it in operation. But though he waited several minutes, no music came forth.

"I say! That's deuced queer, y' know," he grumbled, as he changed the needle and rewound the motor. Markham had now left the window, and stood watching him with good-natured tolerance. The turn table of the phonograph was spinning, and the needle was tracing its concentric revolutions; but still the instrument refused to play. Vance, with both hands on the cabinet, was leaning forward, his eyes fixed on the silently revolving record with an expression of amused bewilderment.

"The sound box is probably broken," he said. "Silly machines, anyway."

"The difficulty, I imagine," Markham chided him, "lies in your patrician ignorance of so vulgar and democratic a mechanism.—Permit me to assist you."

He moved to Vance's side, and I stood looking curiously over his shoulder. Everything appeared to be in order, and the needle had now almost reached the end of the record. But only a faint scratching was audible.

Markham stretched forth his hand to lift the sound box. But his movement was never completed.

At that moment the little apartment was filled with several terrifying treble screams, followed by two shrill calls for help. A cold chill swept my body; and there was a tingling at the roots of my hair.

417-19 North George St., Peterborough, Can.

FAMOUS LOVE ROMANCES — George Washington (III) — By Nicholas Afonsky

Washington had a liking and aptitude for mathematics. Lord Fairfax noticed that the boy surveyed some of his brother's land carefully and accurately, and suggested that he cross the mountains and survey the Fairfax land. In this new and congenial occupation Washington for a time forgot his many loves.

He wrote to a school friend: "I have not slept in a bed more than three or four nights this summer. After walking all day I have lain down at night upon a little straw or fodder, or a bear-skin, with man, wife and children, like dogs and cats—and happy he who gets the berth nearest the fire."

In this work Washington grew, in a short time, from boy to man. He was made public surveyor, and passed a year beyond the Alleghanies. Then he went back to Mount Vernon to take his brother Lawrence, who was in failing health, to Barbadoes. But George had smallpox, and Lawrence grew worse, and they soon returned home.

Then Lawrence died, and George, at twenty, with Mount Vernon added to his own heritage, found himself a rich planter. In midwinter he went on a mission to the French, to the north, through trackless forests, infested by Indians. He returned to Mount Vernon unhappy over criticism of his mission—and there again met Sally.

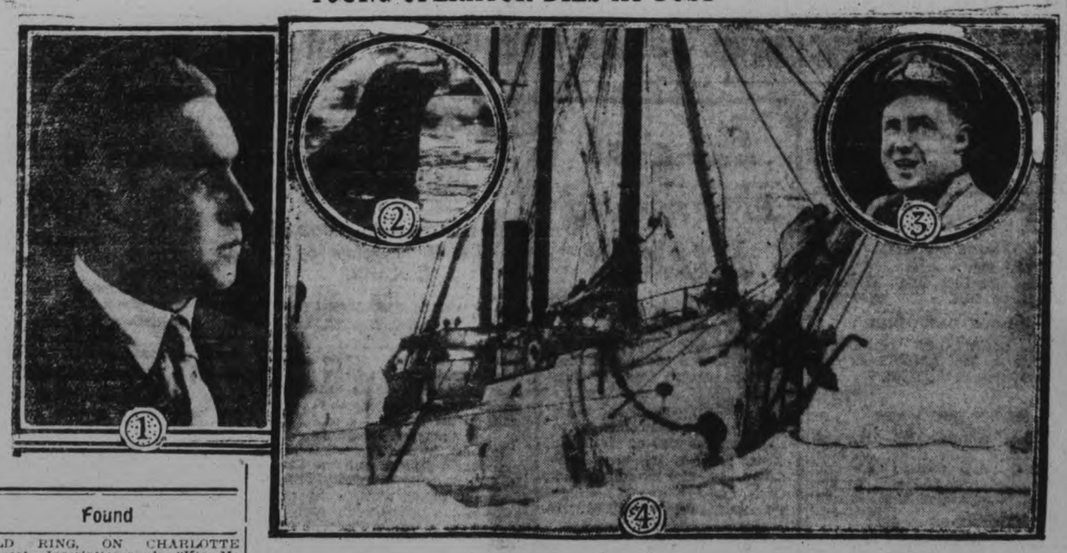
YOUNG OPERATOR DIES AT POST



Here is shown William George Earl, young Ontario wireless operator for the Canadian Government at Belle Isle, who died suddenly at his lonely post. He is shown in civilian clothes and also (inset) in his officer's uniform. The other inset is a seal snapped near Earl's station. He used to throw food to them until they became almost at the point of being pets. Also shown is Capt. Bernier's ship, on which Earl sailed. T he picture was taken at midnight when the vessel was stuck fast in the ice of the frozen north.

MARCH 14, 1915.

Sunday.

MARCH 14, 1916.

Sapper Allan H. Munro, Engineers, reported wounded.

Pte. Geo. Shouldice, 26th Battalion, reported seriously ill.

Pete. F. C. Swait, 20th Battalion, reported died of wounds.

93rd Battalion Orders by Lt.-Col T. J. Johnston; Orderly Officer today, Lt. G. D. Mowat. Orderly Sergeant, Sgt. Rutter. Orderly Corporal, Cpl. Wicker.

Taken on strength: W. E. King.

Anglicans of the 93rd entertained by the Y.F.A.

MARCH 14, 1917.

Pte. Chester Craft (93rd) reported killed in action.

Pte. Wm. McKinstry (93rd) reported killed in action.

Pte. John B. Carvolth reported killed in action.

W. Hampton, W. Teabo, F. Garlick, J. Arnott and P. Tobin have arrived at Halifax on their way home.

247th Battalion Orders by Lt.-Col. C. H. Ackerman; Orderly Officer today, Lt. V. J. McElderry.

Taken on strength: M. Hall, A. Montgomery and Percy R. Sullivan, all of Buckhorn.

Promotions: D. P. Ferguson, W. H. Hall, T. Holden and H. R. Shier, to be Lance Corporals.

Returned Soldiers' Club yesterday took over new quarters in the Barrie Building. The members were entertained by Otonabee Chapter I.O.D.E.

MARCH 14, 1918.

Letter tells that not much hope is held for safety of Pte. Robert Micks, missing since the battle of Passchendale.

Lyrics of Life - By Douglas Malloch

THE NIGHT HE DIED

That day he passed
A little child
And, as he passed it,
Stopped and smiled;
He bought his paper
At the square,
And left an extra
Penny there,
And then went on
And quite forgot
The paper-woman
And the tot.
For many duties
Business brings,
Yes, greater matters,
Larger things.

That night he died
And people said,
Who heard the news,
"So Smith is dead—"
And Smith was troubled
As he lay
Within his little
House next day

His gold was dust;
His fame was dim.
He had no gifts
To take with him.
"What chance," thought he,
"Has one who stands
Before God's gate
With empty hands?"

At last he stood
Before the gate,
As all must stand;
And all must wait,
And then its mighty
Hinges swung,
And welcomes all
The angels sung.
Was it not written
In the Book,
Where Peter, God
And all might look?
Two things they found
Recorded there—
A baby's tear,
A woman's pray'r.

(Copyright, 1928, Douglas Malloch.)

IN PETERBOROUGH CHURCHES

SALVATION ARMY TEMPLE.

Drawing the attention of his congregation to the Scripture reading, Acts of the Apostles, chapter xvii., v. 15 to 34, Ensign Green said: "It seems to me that in this day and these times we need more than ever to preach the fundamental doctrines of the Word of God. Here in the 30th verse of the chapter we read: 'And the times of this ignorance God winked at; but now commandeth all men everywhere to repent.'

"There are many people in the darkness as to the real meaning of repentance, atonement. I often think that many professing Christians, if asked what repentance was, would be in a quandary as to how to answer. Their predicament would be similar to that of the woman who had for many years been resident of a city I was visiting who, when I asked her to direct me to a certain street, could not do so, although admitting long residence, and I sometimes think that many regular attendants of the various churches and of the Army could not really define repentance.

"Before you can become converted you must repeat—it is essential before peace can enter your heart, essential to obtain entrance into Heaven. Until an individual is willing to repent there can be none of the joys of heaven for him. John the Baptist, when he was preaching on the shores of Galilee, you will remember, cried, 'Repent for the kingdom of Heaven is at hand.' If he had left the people there his mission would have failed, but he spoke of the Lamb of God who would come and take away the sin of the world. Then came Jesus Himself with the same message. Then Peter after Pentecost became charged with the Holy Ghost and preached repentance. And there to-night we read of the great scholar, Paul, and his address to the Athenians and his word, 'Commandeth all men everywhere to repent.'

For a moment let us think of more modern men, whose mission has been to preach repentance, Wycliffe, Moody, Wesley and our beloved founder, William Booth, and a whole host of others whose success has been attributable to their efforts to preach repentance.

"Well, what is 'Repentance'? It certainly is not fear—some people think that there must be a fearful feeling come over them. I remember the night of the awful Empress of Ireland disaster, when I, in company of many others, sat on the side of the ill-fated vessel and watched the dawn of day, and in the distance we were able to see the vessel that had collided with us. Amid the harrowing scenes, many ran up and down the side of the 'Empress' and cried to God to save them. And then after the rescue, how many of them forgot their cries to God, and in oaths and wrath, bemoaned their personal losses. Their cry to God was only fear.

"You are all conversant with the terrible plague that visited Egypt, and how the king called on God to deliver the people, and after deliverance forgot the God Who had answered their cries, and then on another plague attacking them ,again turning to God. How often have you seen similar incidents to this—a family visited by death, and it would seem that the whole of the loved ones left would be brought to God, only in a short time to be back, careless and indifferent to the things of God. Feeling is not repentance.

"While in Sault Ste. Marie I was privileged to hold meetings with the men in the penitentiary, and how many of them with tears in their eyes had seemed repentant, and expressed the desire to do right, only in a few weeks to become hardened, and on release go back immediately to the wrong-doings of former days. One man condemned to death asked that the Salvation Army officer might be his spiritual adviser, and it seemed as if he would spend his last days on earth as a devout man, reading his Bible, and praying, but he soon became hardened—his sorrow was not repentance.

"Remorse is not repentance. Remember Judas, following the betrayal of his Master. He went out and hanged himself. It would have been far better if he had got on his knees and prayed for forgiveness. Some people afflict themselves, hoping that physical torture will help them. Others think good deeds will serve purpose, and that is their form of repentance. These things will not do. It is required of all to repent of sin. No form of penance will atone for the soul, the fruit of the body will not also. Repentance is not conviction—many are convicted to such degrees that they cannot eat—or sleep. Many are unable to sit in the house of God and hear His word preached. Such actions are delusions of the devil.

"Repentance is 'turning right about face.' We are all born in iniquity and with our faces turned away from God and true repentance means turning to God. A father sitting with his family who had recently lost their mother took in his hand a piece of wood, and with his knife proceeded to whittle out the form of a cross, and, holding it up, said to his children that that was the emblem of the Cross on which Jesus Christ had died, the Saviour of their mother, and urged that they serve Him too.

"I want to say to you here to-night that Jesus Christ is my Saviour, the Saviour of many here in this service, and we would urge that you accept Him as your Saviour too."

PICKS CANADA FOR ADVANCE

Chairman of Bovril Company Greatly Impressed By Dominion.

At the thirty first annual general meeting of Bovril Limited, held at Old Street, London, E. C., this is what the chairman, Sir George Lawson Johnston says of Canada's prosperity and the part he thinks Canada is destined to play in the world trade in the future.

Canadian Prosperity

Last August and September he himself was in Canada and the States. In Canada great prosperity was evident and should continue unless the aftermath of over-trading and speculation in U.S.A. reflected itself in Canada.

He made certain important arrangements as regards their business in the States but he would defer reference to them until some future time.

It was difficult to exaggerate the extraordinary development that had taken place in U.S.A., and at some stage there must be a check if only because in so many instances improvement and development were already nearly 100 per cent. of the possible. The whole tendency seemed to be towards developing the spending habits of the population; any thrift training was rather taboo.

The Countries of the Future.

If he were asked to say what part of the world would show the highest proportionate advance on the present position during the next fifty years, he would at once say the farthest north and the farthest south countries on the American Continent—Canada and Argentina — the two countries where he believed there was less friction between capital and labor; in fact in both cases every capable laborer hoped to become a landowner or capitalist of some kind even before he was middle aged.

In both Canada and Argentina, revenue was mostly raised by import duties. On the other hand while Canada had a small income tax, in Argentina no such tax existed.

He had spent over a third of his life out of this country and during the bulk of that time he was in Canada and the Argentine, and may be he had become fond enough of them to be a little prejudiced in their favor. Nevertheless he thought the prophecy would not be far wrong.

The characteristic American notice to motorists he quoted on a former occasion, "Go slow and see our city. Go fast and see our gaol" was quite an unnecessary threat along many of the main roads to-day owing to the enormous motor traffic. At the time of the Toronto exhibition last August he motored in what was more or less a loose queue all the way from Niagara Falls to Toronto.

An American said to him that in England they had seven meals a day, they would not have the time to spare for that in America. On being asked to give a list of the meals, he said, early tea, breakfast, Bovril at eleven, lunch, afternoon tea, dinner, and supper.

DURANT AGENTS HOLD MEETINGS

Dealers Of This District Hear Addresses By Company Officials.

HOLD SPRING OPENING.

In its grand Spring Opening, the firm of Selkirk and Elliott, Peterborough Durant sales agency, is an event of more than usual interest, not only to those concerned with its success, but to the general public as well.

Preliminary to the formal opening this evening, the dealers of all Central Ontario district, comprising Lindsay, Fenelon Falls, Cannington, Port Perry, Port Hope, Cobourg, Havelock, Norwood, Campbellford, Hastings and other places gathered for a dealers' convention at which they were addressed by P. J. Duggan, sales manager, and H. J. Moore, service manager, both of Durant Motors of Canada, Limited, Leaside.

The latter chose as his subject the word "Service," as it applies to Durant dealers in their relation to the public: while the former touched on the progress of the Durant Company A chassis demonstration was also given.

However, the main descriptive demonstration of chassis construction and formal introduction of the new Durant cars will take place in the showrooms of Selkirk and Elliott, dealers, at 171-175 Hunter street, this evening.

Obituary

HENRY H. SMITH

Within the last few days, word has reach Peterborough of the death of a former well-known citizen in the person of H. H. Smith, who has passed away at his home in Winnipeg. The late Mr. Smith is remembered by the older citizens here, as a man who held his duties as a citizen ever in the foreground and, though a barrister and solicitor by profession, found time to assume the responsibilities that go with offices of municipal, and in various societies of the city.

After being a member of the Peterborough town council during the years 1877 to 1880, he took office as mayor, and for the next three years worked in harmony with his councillors.

It was in the year 1885 that Mr. Smith received the appointment that determined his departure. He became Inspector of Dominion Land Agencies in the Northwest, and removed to Winnipeg. However, before leaving, he was presented at a public meeting with a magnificent silver tea service, the result of a subscription by citizens in recognition of his valuable services to Peterborough.

Two air routes between Mexico City and the United States are being projected.

"The Left Overs"
Is the name of a three-act comedy to be presented by the Trinity Club in Reid Street Hall on THURSDAY AND FRIDAY, MARCH 15th and 16th, at 8.15 p.m. Tickets, 35 cents.

IT PAYS TO ADVERTISE

PUBLIC NOTICE

NOTICE is hereby given, that the Council of the Township of Smith, on Saturday, the 7th day of April, 1928, at 2 p.m., at the Court House, in the City of Peterborough, intends to take into consideration and pass a by-law to close up the allowance for road, lying between Lots Number 12 and 13 in the 8th Concession of the said Township of Smith, and to convey the same in exchange for neighbouring lands.
Dated the 3rd day of March, 1928.
PERCY T. UDY,
Township Clerk.

BIRTHS.

STANTON.—At Nicholls Hospital, on Monday, March 12, to Mr. and Mrs. C. E. Stanton, 611 Water street, a daughter.

IN MEMORIAM.

WHITE.—In loving memory of Lorne White, who died March 14th, 1927:
The fairest lilies are the first to fall,
The sweetest first to fade,
The fondest, dearest, best of all
At peaceful rest is laid.

As some sweet blossoms droops and dies
When blighted by the frost,
He faded from before our eyes
And all too soon was lost.

But in God's garden free from pain
Where grow His fairest flowers
We know that we shall meet again
This fairest bloomof ours.

IF YOU CANNOT EAT

and enjoy your meals, you can be sure that the activities of your stomach are below normal. The truth is that

YOUR STOMACH NEEDS STRENGTH

and its only means of securing that strength is through the nerves that feed it. A weak stomach has weak nerves. Weak nerves are often the result of spinal derangements which may have resulted from a fall, strain or from sitting in an unnatural position. This derangement can be corrected by

CHIROPRACTIC SPINAL ADJUSTMENTS

and normal nerve force will be restored to the tissues of the stomach. When this is accomplished, your stomach will be capable of digesting food and you will be able to enjoy your meals as a normal person should.

BRITISH FLIERS STILL MISSING

$2,700 DAMAGE TO GREENHOUSE AND CONTENTS

Fire Breaks Out Around Chimney of Peterborough Floral Company's Building.

MANY PLANTS LOST.

Those in Undamaged Part of Building Saved From Frost By Use of Tarpaulins.

Fire breaking out round a main chimney about 8.30 last night caused a total damage of nearly $2,700.00 to the plant of the Peterborough Floral Company, Water Street, the top or front greenhouse suffering the major portion of damage. This morning it presents a spectacle of broken glass, burned benches and confusion of destroyed plants and boxes despite most careful work on the part of the fire brigade. Insurance was carried sufficient to cover most of the loss, and that as little time as possible may be lost, orders have been sent to Toronto for new glass and equipment and the work of repairing the building is even now under way.

Constable Piercy and Vincent Eastwood were probably the first to notice the fire, and they immediately placed the alarm, which was received at the Fire Hall at 8.35 p.m. As it came from the main business area, the pumper, the general purpose truck, the ladder truck and the Chief's car made the run. Two lines of hose were laid and carefully used after access to the building had been gained. The firemen spent some time in locating the source of the blaze, which was found to have started in the flooring near a cement chimney. It had worked through and spread along the wall under a long bench, but was not allowed to reach into the other greenhouses.

C. H. Williamson, of the Peterborough Floral Company, in conversation with The Examiner this morning, stated that the loss in flowers and plants alone would reach a sum in excess of $1,400.00, while the damage to the building would be in the neighborhood of $1,200.00. Insurance covers most of the damage.

Mr. Williamson was grateful to the firemen for the manner in which they had handled their problem. He also expressed appreciation of the precaution taken to save the plants in the other greenhouses by the spreading of a large tarpaulin over the openings from the damaged part so that the cold west wind had no effect on the plants.

One unique specimen which survived fire and frost was shown The Examiner. Three daffodils on one stem are most uncommon, and the stem of this one gives evidence that the three stems have grown together.

At 4.45 this morning the brigade was again called to the greenhouse owing to a slight fire that had started in a pipe downstairs. It had become filled with soot, but the fire was quickly extinguished.

MISSION WORKER TELLS OF ANGOLA

Rev. J. Lloyd Gives Address on Work in East Africa.

The illustrated lecture with slides, given by Rev. J. Lloyd, a missionary from the Portuguese colony of Angola, West Africa, given in St James' Sunday school hall, proved very interesting and instructive.

Mr. Lloyd is a fluent speaker and and he described so vividly the life of the natives of this large missionary field and showed pictures which he had taken.

The mission of Angola, which is a colony larger than Ontario, with a population of over 4,000,000 natives, was formerly under the auspices of the Congregational church, but is now taken over by the United church.

It is forty eight years since the first missionary established a mission in the part where Mr. Lloyd is laboring, and he has been working there for the past five years, and the work is giving splendid results. The people are hungry for the Gospel. In one mission he has seven hundred and fifty members.

He asked for the prayers and help of the people to continue this great work.

BROCKVILLE, Ont., March 15 (Canadian Press). — Before an audience that taxed the capacity of the Court Room, Walter Percival, aged 76, of Burritt's Rapids, was to-day placed on trial before Mr. Justice Logie and a jury on a charge of murder in connection with the shooting and killing of Frank Auger, a neighbor of Percival. The grand jury returned a true bill late yesterday.

Fear is growing for the safety of Captain Walter Hinchliffe and Hon. Elsie Mackay, daughter of Lord Inchcape, who flew on a trans-Atlantic effort. (1) is Miss Mackay in flying togs; (2) Miss Mackay in ordinary dress; (3) Captain Hinchliffe.

JAMES HENLEY 106 YEARS OLD; BORN IN GASPE

Aged Native of Quebec Dwells Peacefully in House of Providence.

WAS FARMER AT APSLEY.

Looks Like Man of Eighty — Has Been Sailor as Well As Farmer.

Peterborough's oldest citizen celebrates to-day the one hundred and sixth anniversary of his birth. James Henley, who lives at the House of Providence, has seen a century of years roll into eternity, he has lived far beyond the Psalmist's allotted span, he has watched generations come and go, and he still looks out at the world with clear eyes devoid of eyeglasses. He looks like a man of eighty years.

It is hard to think that this old man has passed the century mark, but reliable authorities declare that his daughter, who lives near Apsley, wrote away some years ago and procured his birth certificate which establishes his age at this mark.

To most people, seventy years is a lifetime and to many Fate cuts the threads long before that. This old man was born in the year following the death of Napoleon Bonaparte, only a decade after the United States had severed its connection with the Old Country, and started out on the career which has made it one of the most prosperous nations on the face of the globe. If he could have read he would doubtless have followed in print the fortunes of war that have seen countries rise and fall during the generations that have passed since he opened his eyes in the little French Canadian village of Ste. Anne des Monts, in the year of our Lord, eighteen hundred and twenty-two.

The French-Canadian is renowned for longevity, and this old man is a marvelous example of the tenacity of the race. He is almost stone deaf, and this, allied to his brief acquaintance with the English tongue made an interview with him a rather difficult matter. But with the aid of a stout stick, he stands up firm and straight, to a height of about five feet five. He has broad, thick shoulders, a weather beaten face, and a lot of grizzled grey hair, that covers his head and fringes his face with a heavy beard and moustache. His teeth are nearly all gone, and he is very deaf. But his eyes are clear and blue. The eyes that look on moving water have a quality all their own, it is said. Mr. Henley's eyes have this steady, far-seeing look. His mind appears to be perfectly clear and tranquil.

He has been abstemious and frugal during his lifetime according to the standards of the French folk. But he likes tobacco. Breaking into the broad smile that colors his conversation he nodded vigorously when asked if he smoked. He started when he was ten years old. He likes the fresh air and spends much of his time out of doors. He has many friends who come to see him at regular intervals.

Mr. Henley's parents moved to Gaspe, to a little village called Griffin Cove, when he was very young. There he lived for nearly forty years, coming to Peterborough later, and farming near Apsley for many generations. He was married twice and had eight children. His daughter, Mrs. D. Reynolds, lives near Apsley; also one son, D. Henley. Other children live in Toronto and in Mon-

SINCLAIR PRODUCES BALLOTS; CLERK SAYS PAPER IS OFFICIAL

Inquiry Into Finding of Unused Papers in Ottawa Opens in Earnest.

NO CRIME SUSPECTED.

Must Have Been Some Irregularity, Explains Liberal Leader at Probe.

TORONTO, March 15 (Canadian Press).—Nineteen ballots, said to be similar to those used in the South Ottawa Provincial election of 1926 and alleged to have been picked up on an Ottawa street, were produced by W. E. N. Sinclair, Liberal leader in the Ontario Legislature, when the Royal Commission of Enquiry into the matter met today. Mr. Sinclair told of receiving them in a letter from Russell Sparks, defeated Liberal candidate in that election. Neither he nor Mr. Sparks had the letter which accompanied the ballots, but the latter promised to produce a copy if there was one.

Mr. Sinclair explained that he did not think he had gone so far as to say a crime had been committed, but he did have in mind that as he had the ballots in his possession some irregularity had been committed. His counsel pointed out apparent discrepancies in the return showing the number of used, discarded, or unused ballots in the election.

Russel Sparks testified that he received the ballots from Alexander Smith, of the legal firm of Smith and Johnston, Ottawa, and that Mr. Smith had received them from a civil servant who did not want his identity revealed. For the Commissioners, he wrote out the name of this civil servant and others who had told him of having seen ballots lying around the street. One man had told him of a newsboy who had shown him a packet of about a hundred.

C. R. Bulmer, Clerk of the Crown in Chancery, was also examined. He scrutinized the nineteen ballots and declared eighteen of them to be of the same paper as officially sent to Ottawa, while the nineteenth was dirty, and he was not sure of the watermark.

Commissioners Justices Hodgins and Magree, today commenced in earnest their investigation. The commissioners subpoenaed Russel Sparks, defeated Liberal candidate in the election; the returning officer of the constituency and his son, who was clerk; a representative of the printing firm which printed the ballots, and the Clerk of the Crown of the Ontario Legislature in readiness to delve fully into the matter.

Kinkead Attained Speed of 330 Miles

LONDON, March 15 (Canadian Press).—Lieut. Kinkead, killed when his powerful speed plane plunged into the sea several days ago, attained a speed of three hundred and thirty miles an hour along the straight the day before he crashed but the speed was not official.

BRUCE BARTON

Author of "The Book Nobody Knows" and "The Man Nobody Knows." His next book, "What Can a Man Believe?" will appear serially in The Examiner starting on Monday.

Gordon Sinclair Not Aboard Plane

LONDON, Mar. 15.—(Associated Press.)—Captain G. R. Hinchliffe and Hon. Elsie MacKay are the sole occupants of the Detroit Stinson plane Endeavor, which started a trans-Atlantitc flight on Tuesday morning and at midnight last night was becoming one of the tragic mysteries of the North Atlantic.

This became known definitely when Major Gordon Sinclair, close friend of Hinchliffe, and whose whereabouts since the flight started have been a mystery, appeared at Purley, the suburban home of the British war ace. He said that Miss MacKay was the only passenger of the plane.

Mrs. Hinchliffe, dry-eyed but maintaining her fortitude with difficulty, welcomed Major Sinclair and his wife as companions of her vigil. Throughout the day and evening, she scarcely stirred from the telephone, over which she momentarily hoped to hear news of her venturesome husband. I will not give up hope," she said.

VALLEY PEOPLE BITTER AGAINST CITY FOR LOSS

Say Los Angeles Usurped Water Rights of Canyon in Building Dam.

300 STILL MISSING.

Workers Feel That Most of Them Are Buried in Silt Forever.

SANTA PAULA, Calif., March 15 (Canadian Press).—Bitterness against the City of Los Angeles began to show itself in the San Francisquito Canyon and Santa Clara River valley today as interest centred upon the numerous coroners' inquests and other investigations to determine the responsibility for the loss of hundreds of lives and millions of dollars in property in the St. Francis dam break. While the bodies of nearly two hundred valley residents lay in improvised morgues and three hundred or more were still unaccounted for, the issue of responsibility for the disaster was thrust into the foreground when rehabilitation committees charged that the Southern California metropolis had usurped the water right of the valley in building the dam.

Meanwhile, the opinion was expressed by persons in the stricken area that the three hundred still unaccounted for had been buried forever in the miles of yellow silt deposited by the escaping waters as they rolled toward the Pacific. It appeared improbable that many of these would ever be recovered because of the depth. It is nearly 30 feet deep in some places and the tangled wreckage embedded in the quagmire has made digging for bodies a most difficult operation.

Can't Count Homeless

LOS ANGELES, March 15 (Canadian Press).—Estimates of the number of homeless persons in the area of the St. Francis Dam disaster today were as varied as the ever-changing figures on the death toll. The chaotic conditions resulting from the devastating sweep of the flood made it almost impossible to get a definite line on the number of homeless, but hundreds of houses were destroyed.

SCHOOL VENTILATION SYSTEM REPAIRED

Board of Education Has Repairs Made at King George School.

The Board of Education has had the ventilating system of the King George Public school in East City entirely renovated. The work was done by W. R. Turner. For some time there have been complaints about the ventilating system in the school. The Board expected to do the work last summer during the holiday season, but the plans were delayed and the work had to be done during the school term.

YUKON AS HUNTER'S PARADISE

Yukon Territory is the paradise of the big game hunter, and no place in North America today offers greater inducements, not only for the different varieties of game obtainable, but more particularly for the large dimensions of the trophies secured.

Feared Two More Names Added To List of Aviators Who Died Trying Flight Over Atlantic

No Definite Word Heard From Hinchliffe and Miss Mackay Since Take-off on Tuesday — Weather Reports Indicate Storms Encountered.

HAD FUEL ENOUGH FOR FIFTY HOURS OR UP TO 5.40 THIS MORNING, E. S. TIME

Mrs. Hinchliffe Spends Night of Vigil, Waiting With Major and Mrs. Sinclair and Harry Lloyd, Her Husband's Agent—Sinclair Mystery Cleared Up.

NEW YORK, March 15 (Canadian Press).—Fear that two more names had been added to the long list of fliers lost in Atlantic flights grew today as hours passed with no world of the golden-winged Endeavor, en route to America from Cranwell, England No definite word has been heard from Captain Walter Hinchliffe and the Hon. Elsie MacKay since they took off from Cranwell at three-forty Eastern standard time, the day before yesterday.

The most optimistic estimate was that they had fuel enough for fifty hours' flying, enough to keep them in the air until five-forty this morning under normal conditions. But reports from ships along the great circle course and weather developments along the Irish coast indicated that they encountered severe storms which probably reduced their speed and span of time.

As was the case with the other ten fliers lost on the dangerous Atlantic crossing, various rumors have come of the plane being seen or heard, but as the hours passed with no confirmatory evidence, these reports were dismissed.

Definite information that Hinchliffe's companion was Miss MacKay came from Major Gordon Sinclair, who aided her to make a secret getaway by masquerading as him and who laid low after the start of the flight, having promised her to do so. He also revealed that the plane's destination was Philadelphia.

The fact that the Endeavor was a land machine and not fitted with pontoons made doubtful the possibility of the fliers keeping afloat long enough to be rescued if they dropped into the sea. Relatives of the fliers refused to give way to despair outwardly. Dry eyed, Mrs. Hinchliffe sat up all night hoping for news of her husband. Major Sinclair and his wife shared Mrs. Hinchliffe's vigil.

BELIEVE PLANE DOWN.

LONDON, Mar. 15, — (Canadian Press.)—Gravest anxiety as to the fate of Capt. Hinchliffe and the Hon. Elsie Mackay was felt in England today, as the hours ticked steadily by without definite word of the monoplane Endeavor. At two o'clock this afternoon (E.S.T.) when nearly sixty hours had passed since the take-off on Tuesday, it was figured that the Endeavor's gasoline supply must been exhausted for several hours and there was no hope that the plane was still in the air.

Mrs. Hinchliffe was said to be bearing up well under the strain, but in contrast with her willingness to discuss her husband's flight yesterday, she denied herself to-day to visitors. In the absence of Lord and Lady Inchcape in Egypt, watch at the Inchcape mansion was being kept by the household staff and news of the fliers was being awaited with greatest concern.

All England Anxious.

LONDON, March 15. — Canadian Press. — England surged with hope yesterday evening for Captain Walter Hinchliffe and the Hon. Elsie MacKay when a report was received that the drone of an airplane which might have been the "Endeavour" had been heard off Newfoundland.

When this information was telegraphed to Mrs. Hinchliffe in her little home at Purley, she quietly, but with evident effort to control her anxiety, said: "Well, as that is only a report I will not pay much attention to until it is verified."

Harry Lloyd, Hinchliffe's English agent, went to the pilot's suburban home to be with the pale, quiet little wife who hour by hour awaited news of her venturesome husband.

Mrs. Hinchliffe continued her watch, saying: "I shall sit up all night for news and shall not give up hope."

All England takes it for granted that the adventurous Hon. Elsie McKay was in the plane. There is fervid hope that she will somehow ride to safety through the fog which trans-Atlantic advices say is veiling the Eastern American seaboard.

That hope, however, turned to despair as nothing comes across the seas to indicate that the plane has been sighted.

(Continued on page 8).

Prepared To Mitigate Nanking Demands

LONDON, March 15 (Canaian Press Cable).—It is learned here that Britain and other powers are prepared to mitigate the demands presented to the Nanking Government in 1927, following the Nanking outrages. It is felt that the situation is changed in view of the fact that the outrages are considered to have undoubtedly been engendered by the Bolshevik element which has now been expelled from control of Chinese affairs.

The change of views results from the conferences at Canton between Sir Miles Lampson and Li Chai-Sung, the Southern Chinese leader, and Sir Miles' conversations with the Nanking Foreign Minister at Shanghai. There is no indication of the nature of the discussions. It is understood that Britain is keeping the powers concerned fully informed of the progress of the conversations, which are also proceeding through the Consul-General at Nanking.

SEEK RESCUERS LOST IN STORM

Searchers Looking For "Snowmobile" Expedition Near Detour.

PLANE ON WAY.

SAULT STE. MARIE, Mich., March 15 (Canadian Press). — With last night's menacing blizzard abated, a searching party of farmers set out to-day to look for the "snowmobile" expedition believed lost or stalled after leaving here yesterday with a supply of food and medicine for the sixty-mile run to the snowbound village of Detour.

Meanwhile, a dog sled expedition, also halted by the fury of the storm last night, resumed the race for Detour and Raber, a neighboring settlement, carrying food and a supply of medicine for the relief of two persons reported critically ill. The expedition spent the night at a farmhouse after the seven dogs had become exhausted. The snow motor party passed a farm twenty miles from the city last night, but failed to reach Stalwart, the next settlement in their path. It is believed the machine has become stalled in the huge snow drifts.

The stricken region was cheered to-day by reports that a Government airplane despatched by the War Department, was speeding north from Selfridge Field.

DETROIT, March 15 (Canadian Press). — Radio and occasional telephone communications with the outside world serve to cheer the firesides of the six hundred residents of Detour, Michigan, as they wait the breaking of the snow blockade that has isolated the village for fifteen days. How neighbors gather in the homes, churches, lodge rooms, and town stores to discuss the blockade and their food shortage, and to receive radio programs and news bulletins, was told by John McQuire, a village resident, in a telephone conversation with the Detroit News.

MOUNT CLEMENS, Mich., March 15 (Canadian Press). — An army transport plane piloted by Lieut. Soper and carrying four passengers, left Selfridge Field at 10.10 this morning on a flight to the relief of the snowbound villages of the Upp Michigan Peninsula.

Will Test Plane On Quebec Snow

ST. ALBANS, Vermont, Mar. 15 (Canadian Press). — Floyd Bennett and four assistants took off from St. Alban's Bay to-day in the Bellanca monoplane, which will be used by Commander Byrd in his South Pole expedition.

Their destination was Grande Mere, Que., where the plane will undergo trial flights from the snow.

DEGREE TEAM VISITS LODGE

Members of Guiding Star Encampment, Lindsay, Confer Degree.

BANQUET FOLLOWS.

A coach load of enthusiastic Oddfellows, members of Guiding Star Encampment, No. 22, Lindsay, attended as guests the regular meeting of Hiawatha Encampment No 66, in the I.O.O.F. Temple last night, where a large class of candidates received the Patriarchal and Golden Rule degrees.

The Lindsay degree team, in charge of Degree Master Fred Thomas, exemplified the work of the 'Patriarchal Degree,' and acquitted themselves in a highly creditable manner, and at the finish were awarded a hearty round of applause.

Hiawatha Encampment team then took the floor and conferred the 'Golden Rule 'degree, under direction of Degree Captain R. R. Ford, and also received a generous share of applause for their splendid rendition of the work of this degree.

The floor work of both teams, under their respective officers, was worthy of special mention.

A hearty vote of thanks was tendered the visitors, after which the company adjourned to the dining room, where a fine dinner was thoroughly enjoyed, followed by a short toast list, curtailed by reason of the visitors having to leave for home by special coach.

Among the visitors was Charlie Davidson, formerly of Peterborough, and a well known bandsman with Bandmaster Finch Miller.

Mount Hebron Encampment No. 56 was represented at the meeting by a good attendance of its members.

Before leaving for home the visitors expressed their appreciation of the hospitality extended to them, by three hearty cheers and a tiger, for their hosts.

PUZZLE CONTEST SOLUTIONS RECEIVED UNTIL MARCH 17TH

Bad Roads Have Made It Impossible For Farmers To Get In—Saturday Last Day.

The weather the past few days has rendered the roads, especially in the country, well nigh impassable, so that quite a few of the contestants are finding it very difficult to get their solutions in before March 15, so the Contest Department has decided to accept the solutions on the contest up until Saturday night, March 17. This will give many who live outside of the city a chance to bring them in when they came to town on Saturday or to mail them from their nearest post office. But be sure and have your solution in the mails or bring it in by Saturday. 3d, 64

REHABILITATION WORK BEGUN IN FLOOD DISTRICT

Repair Gangs Seek To Restore Stricken Area To Former Beauty.

MORE BODIES RECOVERED.

Estimated Total Property Damage Runs From $7,000,000 To $30,000,000.

SANTA PAULA, Calif., March, 15 (Associated Press). — Rehabilitation work got under way yesterday in San Francisquito Canyon and the Santa Clara Valley, which were laid waste early Tuesday by the breaking of St. Francis Dam with a known death toll of 251.

While searching parties continued to bring in additional bodies recovered from the silt and slime left in the wake of the flood, telephone and telegraph repair gangs, steam shovel, wrecking and bridge crews took the field in the first steps to restore the stricken area to its former beauty and industry.

Meanwhile a committee was organized here to formulate a general rehabilitation program. Speakers charged that the city of Los Angeles, which built the dam as part of its water system, was responsible for the disaster.

Red Cross and county and city organizations kept step with all demands on them for food, clothing and medical attention, and policing forces, augmented by American Legion volunteers, kept the affected territory under strict supervision, amounting almost to martial law.

Orchards Destroyed.

Officials of Ventura County, whose activities are centered here, estimated that 10,000 acres of orchards had been swept by the flood. Accurate damage estimates were impossible, since all competent to judge the situation declared weeks of survey would be necessary to fix the total. Unofficial figures ranged from $7,000,000 to $30,000,000.

Morgues scattered throughout the flood area were focal points for lines of survivors seeking to identify their dead in the long rows of shrouded bodies.

C. C. Teague, resident of Santa Paula, and president of the California Fruit Growers' Exchange, was chosen chairman of the rehabilitation conference, which met at the call of Mayor M. L. Stockel, of Santa Paula.

Teague headed the fight waged against the building of the St. Francis Dam by the residents of the Santa Clara River Valley, the latter charging that Los Angeles, by means of the structure, was usurping the water rights of the valley by diverting the flow of the Santa Clara River.

Legal suits to test the disputed points are still in the courts.

Dr. D. W. Mott, former state senator, declared that one of the first duties was to fix responsibility for the disaster. He said that Governor O. C. Young had asked him to express an opinion on the question of responsibility.

Mott's reply to the Governor, as he gave it to the meeting yesterday, was:

"The responsibility is that of a selfish city that took the water belonging to us."

Promised Investigation.

Mott quoted the Governor as saying that the events of Tuesday proved by the way the water flowed out of San Francisquito Canyon that it was "confluent to the Santa Clara Valley." He reported to the meeting that Governor Young had promised a full investigation into Santa Clara Valley water rights.

The speaker's closing declaration to the meeting was:

"We want Los Angeles to know that it has taken millions from us."

Chairman Teague asserted that "the responsibility of the city of Los Angeles to our community must be determined

"There must be an early and just appraisal of the damage done to individuals.

"The city of Los Angeles will try to minimize the damage and to prove that we are not entitled to anything. We probably will have to appeal the courts."

TRANSFER PASSED.

Peterborough Presbytery Accepts Dr. York-Crichley as Minister at Havlock.

HAVELOCK, March 15. — At a meeting in Peterboro on Tuesday the Peterborough Presbytery of the Presbyterian Church, accepted the transfer of Rev. W. S. York-Crichley of Toronto, from the Home Mission Board to Knox Presbyterian church, at Havelock. Dr. A. S. Thompson represented the session, and H. F. McNichol, the Board of Managers of the Havelock congregation at this meeting.

Dr. York-Crichley has already assumed his ministerial duties here.

EGG CIRCLE SHOWS PROFITABLE YEAR

Eggs Sold at Average Price of 32 Cents During 1927 Season.

MILLBROOK, March 15—The annual financial statement of the Durham "B" Egg Circle (Port Hope and Welcome), as presented at the annual meeting held recently: Number of members, 200; number of dozen shipped 64,998; gross value $20,836.65; cash advance $18,385.99; gross profit, $2,450.66; balance from 1926, $248.60; other receipts $129.00; total profits $2,828.26. Total expenses $2,305.91, leaving a balance of $502.35. The average sale price was 32 cents, while the average net price was 28.3c.

Assets: truck $600; cases and pads, $125; stationery and tags $10; candler $8.00; coops $5.00; cash balance $502.35, making a total of $1,250.35.

This association has been continuously in operation for fifteen years, and is one of the oldest in Ontario. In 1923, it sustained a severe loss when the truck which it had purchased was completely destroyed, with a full load of eggs, being struck by a C.P.R. train; the driver had a miraculous escape, receiving no injury.

The volume of business done by the Durham "B" Circle last year was greater than ever before in its history.

L. B. Symons is the sales manager.

FRIENDS HONOR HAVELOCK LADY

Mrs. Firman Haig Receives Many Gifts On Her 71st Birthday.

HOLDS TEA PARTY.

HAVELOCK, Mar. 15.—Congratulations were warmly extended to Mrs. Firman Haig, on the occasion of her 71st birthday, on Saturday, March 10, when her daughter, Mrs. William Paige, provided a pleasant surprise in her honor by entertaining a few of her intimate friends at tea.

The "birthday guest" was the recipient of many beautiful gifts as a kindly remembrance of the happy occasion, and the entire community, where she has lived for over forty years, joins with her intimate friends in wishing her "many happy returns of the day."

Daffodils made a very attractive decoration for the rooms and also for the table which was charmingly arranged with silk crepe centrepiece and tray cloths with silk crochet lace. The large birthday cake reposed in the centre, trimmed with candles and banked with tulle and large candles on each side in silver holders. Tea was poured by Mrs. E. Fennell and assisted by Mrs. B. Haig, Misses Olive Haig and Adelaide Paige.

During the afternoon two contests added to the enjoyment. A set of salt and pepper shakers was won by the "guest of honor" for making the best apron out of a paper serviette. Mrs. E. Fennell was the winner in a flower contest, the prize being a cut glass dish.

Among those present were: Mesdames A. C. Denike, H. Williams, W. A. McMaster, H. Burnett, C. H. Roberts, H. T. Archer, R. Campney, H. Wing, Sr., J. W. Bryans, E. Fennell, G. W. Chiles, S. Campney, J. Holdcroft, A. J. Plunkett, R. Anderson, B. Puffer, W. Rose, R. Vansickle, B. Haig, Harrison Wing, W. R. Archer, G. Smith and J. Howley, Misses Mary Seeney and Olive Haig.

BIGGER INCUBATOR IN USE THIS YEAR

M. McDowell, of Millbrook, Has One Which Holds 6,000 Eggs.

MILLBROOK, March 15. — Last year M. McDowell, sales manager of the Produce Association installed on his premises an electric incubator of 6000 egg capacity with a weekly hatch of 1500 baby chicks; this season one having a capacity of 15,000 eggs, has replaced the other, the weekly hatch being around 4400 chicks. This mammoth incubator is now in operation in a new building, 16 feet by 32. Custom hatching has become so popular, Mr. McDowell found, that last year's output of around 24,000 chicks, warranted him in branching out on a larger scale this season. He has the incubator started three weeks earlier this year.

The hatch is taken off twice a week, the eggs being taken out on the eighteenth day, candled for dead or infertile ones, and then removed to the hatching compartment at the top, which has a capacity of 2900 eggs. The drum has 72 trays, holding 13,000 eggs; there are four electric heaters, and two auxiliary heaters for emergency use. Water pans are under the drums, and a fan continuously moving, keeps air, heat and moisture circulating in a perfect mixture. The thermometer stays at 100 degrees, the heat automatically shutting off if it goes over that point, and coming on again when the right temperature is reached.

A lever on the side shifted twice a day, turns the drum with the eggs. A coal heater in the room is used now until the warmer weather comes, and if the electric current were cut off, the tempearture could be raised with the stove so that no harm would come to the eggs in the incubator.

Proper feeding of the fowl has a good deal to do with producing eggs of good hatching qualities. Last season Mr. McDowell had an average of 70 per cent. of good, strong chicks from eggs laid by his own hens while those brought in for hatching varied in returns from 60 to 90 per cent.

TALK ON GARDENING IS GIVEN INSTITUTE

Mrs. G. H. Crowe Is Speaker—Roads Blocked By Storm.

WARSAW, March 15. — Mrs. O. B. McIlvena entertained the members of the Women's Institute at the regular meeting held recently. A large number of the members were present and two visitors, Mrs. Gannon and Miss Craig.

Mrs. G. H. Crowe read an excellent paper on home gardening, in which she has been quite successful. It was decided to accept the offer of the Douro young people to present an Irish comedy during Easter week. A solo, "Oh, How I Miss You," was given by Mrs. Rufus Payne, and an instrumental selection by Mrs. George Taylor.

The April meeting will be a social gathering to discuss plans for next year's work. After the meeting, Mrs. McIlvena served tea and a social half-hour was spent.

Traffic of any kind has been difficult for over two weeks, and mail has come in only every other day. Rev. H. B. Herrington was unable to get out to Mr. Puffer's funeral, while Henry Clements could not get beyond Cottesloe with the motor sleigh. Rev. Ira W. Pierce was unable to get through and missed a lecture that he was to give in Pickering that evening. He left for Toronto by way of Lakefield on Saturday morning. The Lakefield Creamery sleigh which was due in Warsaw did not get through until Monday.

Little damage was caused by the fire at the school, though some of the children became badly frightened. During the absence of the teacher in the furnace room, flames came up through the register. Mr. Currie and the pupils had the fire extinguished before neighbors arrived.

It is a difficult building to leave in case of fire, and hereafter there will be a fire drill.

Personals.

Miss Cressa Crowe is attending the nursing class in Lakefield this week.

Mr. William Bell and family have moved to Warsaw, and are occupying the house belonging to the Sneider property.

Mrs. E. R. Hamblin is progressing slowly, being now able to sit up and be moved to another room.

Miss Laura Bowen is in the hospital, having undergone an operation for appendicitis.

PAPER ON YOUTH IS MUCH ENJOYED

Mrs. F. Dafoe Addresses Young People of Trinity Church, Madoc.

MADOC, March 15. — The Tuesday evening meeting of the Y.P.S. of Trinity church, was in charge of the Christian Fellowship Department. In the absence of the president, Rev. Mr. Rivers presided, and the Scripture lesson was read by Mrs. Henderson.

A vocal solo by Mrs. C. N. Whytock, and a reading by Mrs. L. Ashley, were very much enjoyed. The topic was taken by Mrs. F. Dafoe, who chose as her subject "Youth," pointing out its great possibilities for good. Her paper was well prepared and very helpful. "He has achieved success," she quoted, "who leaves the world better than he found it."

A pleasing duet by Miss Kerr and Mrs. L. Ashley and a reading by Miss Rousehorn, brought the program to a close.

Mr. Rivers then called on Miss Kerr and Miss Aylesworth for a few words. Both were workers in the League some years ago and expressed their happiness at being present once more, also speaking words of encouragement to the present workers.

Personals.

Mr. Cleurith Foster of Toronto, is visiting at the home of his parents, Mr. and Mrs. J. H. Foster, in Madoc.

Mrs. Kenneth Foster of Moira, is spending a few days with Mrs. J. H. Foster.

Mrs. W. T. Nugent has returned to her home here after spending several months in Belleville through illness. Mrs. W. H. Nugent of Belleville, accompanied her.

Mr. Karl Whytock of Queen's University, Kingston, spent a few days with Mr. and Mrs. C. N. Whytock.

Miss Grace Aylesworth, R. N., of Niagara Falls, is visiting at her home here.

Mrs. L. Curtin of Port Hope, is spending a few days with her parents, Mr. and Mrs. G. Foote, in town.

12,000 CAKES OF ICE TAKEN FROM RIVER

Work at Trent River Nearly Finished For the Winter.

TRENT RIVER, Mar. 15.—The ice harvesters are finishing their work this week. It is reported that 12,000 cakes of ice taken from the river at this point altogether for supplying Trent River and Havelock.

The members of the Efficiency League are planning to have a play, "Mother Mine," put on some time in the month of May. The first rehearsal took place on Monday evening.

MEMORIAL BY-LAW VOTE NEXT MONDAY

Marmora Hall Expected To Cost $9,000—$5,000 on Hand.

MARMORA, Mar. 15.— Under the chairmanship of the village clerk, E. C. Prentice, Marmora's memorial by-law was widely discussed at a public meeting held in the town hall recently. Among those who addressed the meeting were G. B. Airhart, F. N. Marett, D. E. Bell, A. H. Connor, F. S. Johnston, H. W. Sabine and J. P. Marrin. The by-law states the estimated cost of the proposed building to be nine thousand dollars. Towards this, the council, which is unanimously in favor of the memorial, desires to apply the sum of three thousand dollars refunded from the Hydro Electric Commission. Nearly two thosand dollars has been raised by public subscription. In the event of the by-law being passed next Monday, the project will be carried through without increased taxation to the ratepayers.

Though plans are not yet complete, the dimensions of the proposed building are expected to be 40 by 44 feet. The situation is on part of lot 9, having frontage on the west side of Forsythe street and south of Matthew street. Upon the ground floor, the present plan provides for a post office, a fire hall, a library and a G. W.V.A. Hall.

The upstairs is divided into two apartments, fullest details of which have not as yet been worked out. Polling takes place at Marmora Town Hall on Monday next, from 9 a.m. until 5 p.m.

The Junior A.Y.P.A. received an interesting address from the rector at its last meeting, on some of his personal experiences in the province of Quebec. A debate was arranged to take place next week.

Signs of spring are becoming more frequent, a number of crows have appeared in this district. An owl was seen perched on the steps of Donnell's barber shop on Saturday afternoon. Woodchucks have been observed by several residents.

Personals.

Mr. Floyd Gray is attending the Assizes in Belleville as juror.

Mr. H. Bondreau spent Monday in Belleville.

Mrs. D. Hawley is visiting relatives in Toronto.

Mr. and Mrs. T. Warren attended the funeral of Mr. Barlow in Havelock on Tuesday.

The week end thaw, followed by Tuesday's rain, has caused the roads to be in a very bad condition for vehicles.

Marmora Council No. 279, C.O.C.F., held its monthly meeting at the home of Mr. and Mrs. M. S. Doupe.

Mr. F. G. Cushing, of Belleville, spent Tuesday in town.

Mr. John Holsey, of Belleville, is visiting his daughter, Mrs. Archie Jones.

Mrs. John Bell, Sr., is at present in Nicholls Hospital, Peterborough, suffering from eye trouble, which has necessitated the removal of one of her eyes.

Mr. Joseph Murray is confined to his home through illness.

St. Paul's senior A.Y.P.A. held a "stunt" night on Monday.

GRAND LODGE COMMITTEE URGES GIVING NEW METHOD FAIR TRIAL

Presents Report Favoring Allowing Five Years' Trial.

FERGUSON PRESENT.

Grand Master Thinks Regulation 17 Should Never Have Been Rescinded.

BARRIE, Ont., March 15 (Canadian Press). — The high point of the convention of the Ontario West Grand Orange Lodge was reached today when the report of the Provincial Legislative Committee on the bilingual problem was presented to more than a thousand delegates. The report recommends giving a fair trial of about five years to Premier Ferguson's method of dealing with the question following the withdrawal of regulation seventeen. Premier Ferguson was on hand to expound his attitude toward the matter and outline the methods which had been and were being followed.

Any doubt as to the attitude of Grand Master J. J. Hunter, of the Grand Orange Lodge of Ontario West on the question of Regulation 17 was dispelled when he addressed the public meeting held at the Armories here last night in connection with the Grand Lodge sessions. Although in his "charge" he announced that he would reserve comment on the question until it was brought up for discussion at to-day's session, he came out "flat-footed" and declared that he did not believe that Regulation 17 should have been touched.

"The only language that means anything to me is the English language," he said. "The encroachments of the French cannot be looked upon with anything but fear and dread." Mr. Hunter warned against a repetition of what happened in certain communities in Quebec—"the English were driven from farm after farm by the Church of Rome." In order to prevent these encroachments, he said, every English man, woman, and child who desired to preserve Ontario as an English-speaking Province should take the attitude that no language but English should be used in teaching in Ontario's Public Schools.

Mr. Hunter's pronouncement was greeted with storms of applause from the huge crowd, which almost completely filled the large auditorium.

Situation in North.

L. H. Saunders, of North Bay, Deputy Grand Master, who was the first speaker of the evening, also strongly opposed the abolition of the regulation, declaring that, as a result of observations made in the Northern Ontario county most thickly populated by French-Canadians, he had come to the conclusion that the aspirations of the French people were not, as had been claimed, that their children should learn English. Their aspiration, he said, was the complete recognition of the French language throughout Canada, and he urged that the English people of Ontario insist that the English language should predominate in Ontario.

MINES.

F. G. Oke and Company wire as follows:

TORONTO, March 15. — The North-west Quebec stocks took a little reactionary trend during this morning's market, particularly in Noranda and Amulet. Reasons for these declines are considered the disappointment at the 1927 Noranda report regarding ore reserves which were estimated at approximately $27,500,000 above the 300ft. level. Contrary to expectations no report was given regarding probable ore below the 300ft. level, although very favorable ore lengths and values were mentioned. On the 400ft. level 35 feet of ore running $5.17 gold and 1.11 per cent copper was intersected and on the 500ft. level 30 feet of $3.40 gold and 2.4 per cent. copper. Only a limited amount of exploratory work has been done below the 300ft. level, so that accurate estimates of ore reserves would be difficult. Smelter ore is estimated at 8.18 per cent. copper, $5.42 gold, with one ounce of silver per ton.

During December 10,740 tons of ore and flux were shipped to the smelter. Preliminary production and profits are considered splendid and continued increases in production is expected in the near future to full 1,500 ton smelter capacity.

The easy prices of Amulet are believed the result of an announcement that no official report on ore reserves will be made until after the fiscal year of June 30, 1928.

However, in view of the splendid reports on Noranda and Amulet and the anticipation of an exceptionally promising future for both of these properties, it would appear good policy to buy on the reactions rather than to sell.

Sudbury Basin was the feature of this morning's market opening at $935 and selling quickly to $10.00 per share. Reasons for this advance are sought on street, but as yet no official information is available. Probably it is favorable disclosures during further diamond drilling on the Sudbury Basin property and also the fact that at $10.00 per share a valuation of approximately only $11,000,000 is placed on Sudbury Basin's outstanding stock.

The company is reported to have huge cash reserves and a big block of Sherritt-Gordon stock, besides their important holdings in Sudbury and other mining camps.

The rest of the market remained, for the most part, unchanged, and it appears as though we have very nearly passed through the period of profit-taking afforded by the advances during the past few weeks. As soon as this profit-taking dries up, then the market is confidently expected to resume its upward trend in prices.

Mine Market Weak Noranda Loses Heavily

TORONTO, March 15. Canadian Press. — Sudbury Basin featured a weak list on the Standard mining exchange this morning, selling up to 10.00 for a gain of almost a dollar. Noranda was very weak and the Quebec issues consequently eased down. Noranda settled back to 18.25, a loss of a full dollar. with Malartic losing six at 99. Amulet and McDougal weakened to 3.90 and 60. The Kirkland Lakes started firm but softened in the later trading, with Kirkland Lake gold at 2.03 being just two lower; Wright Hargreaves steady at 5.25; Bidgood twelve lower at 90., an dTech Hughes three easier at 8.65. Treadwell slumped to 26.50.

Speculation Violent With Motors Leading

NEW YORK, March 15 (Canadian Press). — Violent speculation for the advance was resumed in to-day's stock market, with General Motors again in the forefront of the advance. More than a score of specialties were marked up five to eight points on a series of drives against the "short" interest in those issues. The rails assumed increasing prominence, with six issues in new high ground for the year. Trading picked up on the rally, averaging more than 750,000 shares an hour in the first three hours.

General Motors, after absorbing a large amount of profit-taking earlier in the week, suddenly rushed up seven points to a new peak at 164 with buying influenced by reports of increasing sales. Radio held fairly steady around yesterday's final price of 150 during the early part of the session. American Linseed, the spectacular performer yesterday, opened three points lower at 104, rallied to 110⅜, and then quieted down around 109. United Drug was bid up eight points, Houston Oil 7¼, General Railway Signal7, Dupont, Wright Aeronautical, Savage Arms, Mullin's Body and United States Industrial Alcohol, 6½ each, and Midland Steel Products Preferred, American Sugar, International Nickel, International Telephone, Vanadium, and National Tea, five points or more.

Wheat Prices Go Down As Rain Helps Crop

CHICAGO, Mar. 15. — (Canadian Press.)— Further moisture southwest and the relative weakness of Liverpool wheat quotations led to an early setback to-day in wheat values here. Corn was firm as a result of unfavorable weather and of export business at the highest prices yet this season. Opening ¼c. to ⅜c. off, Chicago wheat rallied a little and then sagged lower than before. Corn started unchanged to ⅝c. higher and held near to the intial figures. Oats were easy.

Opening prices were: Wheat, March 137¾, May 136⅞. Corn, March 95½, March 98⅝. Oats, March 57⅛, May 57½.

Toronto Exchange Quiet This Morning

TORONTO, March 15. — Trading on the Toronto stock exchange was quiet this morning. International Nickel was the only active stock and after selling down to 89¾ closed at noon at 93¼ for a net gain of 3 points. Building products and Shredded Wheat after opening strong, closed for fractional losses, while Hiram Walker dropped a point to 45 after opening at 45¼ Canadian Oil continued strong and advanced ½ to 55. British American Oil made a gain of 1-8 at 36¾.

MAYOR GIVES ADDRESS.

Discusses Education at Meeting of King Edward H. and S. Association.

Mayor Denne delivered an interesting address based on Education, at the regular meeting of the King George Home and School Association held on Tuesday evening. The president, Mrs. Ada Craig, was in the chair, and the minutes of the last meeting were read by J. E. R. Munro, in the absence of the secretary. Trevor Miller's room which won the banner for the month presented a dialogue during the social hour, which followed the business session, and in which refreshments were served.

EXAMINATION MAY LAST TILL SATURDAY

General Currie To Return To Cobourg To-morrow Night.

COBOURG, Ont., March 15 (Canadian Press).—General Sir Arthur Currie is expected to return here tomorrow for the resumption of examination for discovery in his fifty thousand dollar libel suit against the Port Hope Guide and W. T. R. Preston, arising from an article in The Guide concerning the attack on Mons just before the armistice. The examination may continue on Saturday. It is understood considerable ground is to be covered.

SALT RHEUM All Over Her Hands and Between Fingers

Mrs. Walter Misner, Midville Branch, N.S., writes:—"I had salt rheum all over my hands, and especially between my fingers. It was impossible for me to put them in water, or do my house work.

"After trying medicines and salves, which did me no good, I heard of

BURDOCK BLOOD BITTERS

being so wonderful, and after taking two bottles I am entirely relieved of my trouble."

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

If you buy out of town, and I buy out of town, and all our neighbors buy out of town, what in thunder will become of our town? Ever think about it?

Sage Tea Turns Gray Hair Dark

By SHIRLEY BLAKE

That beautiful even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture. You can get this famous old recipe, improved by the addition of other ingredients, for only 75 cents, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

Everybody uses "Wyeth's Sage and Sulphur Compound now because it darkens no naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.

JAMES HENLEY 106 YEARS OLD

(Continued from Page 1)

tana. One son fought in the Great War.

Along with his farming activities, Mr. Henley also drove logs on the river and lived in the shanties in the winter time. And he sailed on the deep sea. Not to Europe or across the broad ocean, but from Gaspe to Halifax and the other places, whose names tripped sonorously over his tongue as he thought of those old days. "Aye, my father fished in the blue water, too, for codfish and mackerel and herring He was captain of a deep sea boat, but me—I do not go. My mother wished me to stay at home."

"Why do I live so long? I do not know. Perhaps the good God don't want me yet. When the tam come, I suppose I go like the rest." He smiles at the thought and relapses again into the composed silence that characterizes this quiet, peaceful old man.

Mr. Henley's father lived to be over ninety - six years of age, and his mother was "seventy-five or so." "I do not remember exactly," he says with the vague attitude of the very old toward exact details.

Miss Ernestine McManus, soloist, St. Peter's Cathedral, will sing at the Regent Theatre Sunday evening.

"Skinny" Women Gain Weight

New YEAST and IRON builds up weight and strength

First treatment gives results —or no money

If you are skinny as a rail, with flat chest, gaunt limbs, and you seem to lack all energy, you need the good pounds of "stay-put" flesh and the vitalizing strength that only IRONIZED YEAST can give. Thousands of rundown, weak men and women have regained their normal weight and vigor with IRONIZED YEAST.

Yeast turns your food into flesh and strength

IRONIZED YEAST is two tonics in one—weight-building Yeast and strengthening Iron. The yeast is the same used in making malt, and which makes malt so beneficial.

This yeast is treated with iron taken from fresh vegetables—spinach, lettuce and celery. In this form Iron is easily assimilated by the body, making rich, red blood and toning up nerves and muscles.

Only when *Yeast is Ironized* in this way is it most effective—for Iron is needed to bring out the weight-building values of Yeast. *By this formula IRONIZED YEAST gives you results in half the time required by yeast and iron taken separately.*

Ask your druggist for IRONIZED YEAST and start to get pounds of weight and new strength *today*. You will not only *feel* better, but you will *look* better, as IRONIZED YEAST clears out the old deadening poisons and brings new healthy color to your cheeks and sparkle to your eyes. Comes in pleasant-tasting tablets in a handy bottle. Safe for everybody. Does not upset the stomach nor cause gas or bloating.

Results from first treatment —or your money back

Go now to the druggist and get a single course treatment. If you are not absolutely satisfied with the weight and health benefits gained, money for the bottle will be promptly refunded. If inconvenient to buy at the druggist, send $1.25 to CANADIAN IRONIZED YEAST CO., Ltd., Fort Erie, Ont., Desk 149R

C.I.Y. Co. Ltd.

Avoid GRAY hair with KOLOR-BAK

YES, gray hair can be avoided —if you know KOLOR-BAK —the clean, colorless, liquid which brings color back to your hair, whether it was blonde, auburn, brown or black. KOLOR-BAK gently and gradually brings back a natural appearance. And the hair keeps its life and sheen. Sold on a money-back guarantee by druggists and department stores.

W.M.S. FORMING LITERATURE CLUB

George Street Ladies Make Arrangements For Easter Thank Offering.

The regular March meeting of the Women's Missionary Society of George Street United Church was held in the Board Room on Tuesday afternoon with a good attendance. The president, Mrs. E. W. Coon, occupied the chair and Mrs. Knox, the group leader, took charge of the devotional period. Bible readings were given by Mrs. S. Oke and Mrs. Marshall, while Mrs. MacFarlane, Mrs. J. E. Todd, and Mrs. Knox led in prayer. A very interesting missionary leaflet was read by Mrs. S. R. Armstrong. After splendid reports by the secretary and treasurer had been given and approved, the following reported: Supply Secretary, Mrs. F. Mather; Corresponding Secretary, Miss Might. The sick and visiting report was given by Mrs. J. Spencer; Secretary of Christian Stewardship, Mrs. J. C. Wood; Mission Band Superintendent, Mrs. A. I. Brown; Mission Circle, Mrs. W. H. Morton; Young Women's Auxiliary, Mrs. Knox. The Literature Secretary's report was given by Mrs. A. Mowat, who emphasized Miss Birnie's suggestion that a literature club be formed in connection with the local society, and that members be asked to donate books. These books would be called a missionary library, and be lent to members and exchanged at regular meetings. Miss Birnie was given authority by the society to organize as large a club as she wished. A discussion took place as to when would be the most suitable date for the Easter thank-offering meeting, and a committee was appointed to interview Rev. J. E. Todd to make arrangements, if possible, for a Sunday service for the society in the near future. Invitations were received from Mark Street United Church Missionary Society to attend their Easter thank-offering meting on Thursday, April 12; from the senior girls' classes of the Sunday School to attend a tea and shower of china and silver for the kitchenette in the third floor of the Sunday School Hall on Thursday afternoon; also a tea on Friday afternoon under the auspices of Group D. of the Missionary Society. Mrs. Knox was appointed convenor of a mother and daughter banquet which the society is planning for after Easter, to be assisted by a strong committee, consisting of members of the executive of the society and the group leaders. A splendid paper on the Trinidad work was given by Mrs. J. E. Todd, and Mrs. A. Mowat reported on the Japanese work. Misses Olive Rowe and Elma Tretheway sang a duet, accompanied by Mrs. J. H. Rowe, which was much appreciated.

Miss Geraldine Collins of the Madrical Singers, will sing at the Sacred Concert, Regen Theatre, on Sunday evening.

OBITUARY

MRS. JOHN ARMSTRONG.

The death took place at Springville on Thursday, March 15, of Harriett Armstrong, widow of John Armstrong. She leaves to mourn her loss one daughter, Mrs. H. Cathcart, of Springville, and two sons, Sidney of Bethany and Stanley of Mariposa.

The funeral will take place on Saturday, March 18, from the family residence at 2.30 p.m., proceeding to Little Lake Cemetery for interment. Rev. A. H. McConnachie will conduct the services.

MRS. MARY CAVANAGH.

At the residence of her daughter, 212 Perry Street, there passed away at noon to-day, Mrs. Mary Cavanagh, a former resident of Douro, in her 72nd year. She had come to this city last autumn to live with her daughter, Mrs. Frank McCarthy, and for the past month or so had been in ill-health. A wide circle of friends in the city and in Douro, where she had resided practically all of her life, learn of her death with deep regret as she was possessed of a particularly lovable nature.

Left to mourn are five daughters and four sons, namely: Mrs. Thomas Forsyth, Mrs. Stanley Farlet of Douro, Mrs. F. McCarthy of Peterborough, Mrs. John O'Brien of Indian River, Kathleen of Detroit, Val. and Jack of Buffalo, Tom and Kenneth of Peterborough.

Funeral announcement will be made later.

HAPPY CHILDHOOD

Bobby, four years old, placed his hands across his rounded small chest in an attitude of prayer, and said his "piece" for the visitor. All the bright eyes in a roomful of small boys were fixed on the audience of one. Bobby intoned rapidly:

"Oh, dear, oh dear, I feel so queer.
My heart goes pit-a-pat.
I think I'll only make a bow, if
You'll be satisfied with that."

Then he ducked a little fair head and retired quickly. Freddy took his place, and remarked interestingly, with pantomimic movements, about being the teacher's pet, shook his finger gravely at the audience, and also retreated.

Bobby and Freddy, along with twenty-seven other little boys and fifteen little girls, in ages ranging from three to thirteen years, live at St. Vincent's Orphanage. They had come home from school yesterday to have their piece of bread and butter and to do some of their homework in the school room in the big house on the hill. On other days the boys play outside, but the spring weather has thawed out the pond, where they skate on the lower level, and besides, there was a visitor in the building. They rose and welcomed the intruder with the polite manners that characterize these small lads and lasses, who have separate playrooms, the boys on the third floor, the girls on the second. There are six small boys from three to five years of age, who do not go to school, and one small girlie.

In the boys' desks, each with an individual lock and key of which the owners are exceptionally proud, are locked their "treasures," boxes of colored marbles school books, checker boards and dominoes.

Alvin is one of the number, with long, silky, yellow curls and an amiable, shy countenance that gloomed yesterday with sudden tears when asked to recite for the intruder. He was very frightened at the idea and buried his face in a friendly black skirt. While the other boys performed, he sat with his back turned, refusing to be comforted. Alvin is not always so inarticulate. He had his tonsils removed some time ago. When he returned to the Orphanage he announced at the door: "Here I am again!"

The smallest little boy of all, just three, has adorable black curly hair, and blue eyes. His name, he tells you, is "Lambie."

The older boys take good care of the tiny lads and aid each other also in moments of stress. Jimmy kindly prompted the dark Antony yesterday as the latter fluttered on the introduction of the interesting tale about the "spreading chestnut tree," beneath which "the stubborn auto" stood. One bright youth was very anxious to establish the alibi for his "piece." "Please, Sister, I had it on a paper when I said it," he asserted. The piece of paper not being on hand, he was excused from reciting.

The seventeenth of Ireland, which approaches soon, was remembered in the lusty chorus of three boyish voices, trolling out the melodious stanzas to the "great and glorious St. Patrick."

Downstairs, little dark-eyed Helen, aged three did her best to entertain the visitor. "I was mighty handsome when I was young," she lisped bravely, recounting the story of the lady in "Specially Jim," and later, Helen and a small companion, waltzed to the music of a Hawaiian number played on a gramaphone and six small graceful girls with light footed ease went through the measures of a pretty dance. They do their best to please, these bright eyed children, who lack homes and provision in their tender years. With clasped hands they recited the Grace Before Meat when the supper hour came, and they gathered around the little tables in the refectory, the tiny tots in high chairs, each child with his or her own red and white checked serviette.

To keep the children warm and clean, to feed them wholesomely and teach them in spiritual and mental ways, to train them to be polite, and above all, to make them as happy as possible in strange surroundings that lack the parental love that is sometimes purposely denied, and sometimes taken from them involuntarily is the mission of the gentle Sisters who manage the Orphanage. The quarters are crowded, but advantage is taken of every bit of space. There is only one bath tub, and the children bathe on the instalment plan, so many each night. Contrary to popular belief, they like the bath tub and often ask for their turns ahead of time.

There is one omission in the building. They have no cat. This is not an advertisement for a feline pet, because the Sisters think they are better without one. Pussy's long hair sometimes carries germs. This idea has probably been transferred to the children's minds, because one small feminine lover of tabbies came in one day and assured the Sister gravely that there was a cat outside "without a single germ on it!" But the marvelous animal was not invited in.

Don't Rub and Boil Clothes

YOU DON'T NEED TO!

RINSO will soak them clean. No boiling and little or no rubbing, yet clothes come out whiter than ever.

Isn't that better than spending hard, steamy hours over a washboard?

Time and labor will be saved and you'll need no other soap but Rinso.

Try this easy way to make clothes whiter in wash tub or machine.

AN EASY WAY TO LOSE FAT

Instead of abnormal exercise or diet, they combat a cause of excess fat. They supply an element Nature employs to turn food into fuel and energy. This method was discovered by research men some two decades ago. It has for 20 years been embodied in Marmola prescription tablets. Millions of boxes have been taken, and almost every circle shows the results in new beauty, new health and vitality.

The formula comes in every box, also the scientific reasons for results. So users have no fear of harm. Go learn now what Marmola does for excess fat, and why. Your druggist supplies it at $1 per box. Take four tablets daily and watch the change.

BOOSTING PETERBOROUGH.

Former Mayor T. H. G. Denne is still a Peterboroughian through and through.

Although he now spends the winter in Florida and most of the rest of the year at Stoney Lake, Mr. Denne is always ready to boost the advantages offered by this city and district to everybody with whom he comes in contact and recently he has given evidence of his keen interest in the welfare of this part of Ontario by arranging for the film, "Kelly's Cruise", the Government movie of the Kawartha Lakes to be shown in the theatre at Mount Dora, Florida.

Thus we find the Mount Dora, Fla. Topic referring to the occasion as follows:

T. H. G. Denne, who is a Canadian resident who spends his winters in Mount Dora, announces that the film showing the Canadian playgrounds in the Highlands of Ontario is now being shown at the Princess theatre and urges all Mt. Dora people as well as tourists to witness it.

Mr. Denne secured the showing of the film here through the co-operation of the Mt. Dora Chamber of Commerce. The film shows some wonderful river views on the section in the Kawartha Lake region and between Lake Ontario and the Georgian Bay.

The film is being shown Wednesday, Thursday, Friday and Saturday at the local theatre.

AN OLD CITIZEN GONE.

In the death a few days ago, in Winnipeg, of Henry H. Smith, there passed away a man who played no unimportant part in the development of Peterborough many years ago, yet whose personality and services had long since been forgotten, save by a few of the older residents of the city.

Mr. Smith's connection with Peterborough ended forty-three years ago when he left this community to live in Western Canada.

He was for three years, in 1881, 1882 and 1883, mayor of the then town, and for some four years previous to that time a member of the council.

Mr. Smith thus outlived a long procession of chief magistrates, many of whom served at a much later date than himself.

During his residence in Peterborough where, as a barrister, a member of various societies and as a prominent figure in municipal life he was a well-known and highly respected citizen, Mr. Smith contributed very useful service on behalf of the community, and the intelligence of his death has caused older citizens to remember with gratitude his records in the community.

Few mayors can look forward to forty-five years more of life after relinquishing the responsibilities of office.

FISHED OUT

A straw that shows which way the wind is blowing is the reply made by a member of the staff of a widely circulated United States' magazine, dealing with the outdoor life generally, to a correspondent who inquired as to fishing conditions in the Kawarthas.

The magazine editor's answer was that the Kawarthas are practically fished out.

Now that is close enough to the truth to hurt and it makes decidedly poor advertising for this section of Ontario, inasmuch as the editor's opinion of the local conditions will be read by thousands of people of the class from which we expect our tourists to come.

We can, however, blame ourselves for the situation that is developing.

Our heritage of fish and game has been wasted through our own foolishness and the failure of government after govenment to recognize that these resources constituted assets that should be systematically conserved.

In general we have acted as if there were an inexhaustible supply of fish in our lakes and that no matter what we did it would be impossible to menace seriously these reserves.

Much has been heard of the destruction of pickerel through the development of fishing through the ice on a commercial basis.

It is only one example of wasting our heritage.

The manner in which Catchacoma and other lakes in that district are being depeted of their supply of salmon trout is another glaring illustration.

These fish are not protected by the fishing regulations, in that they may be taken at any period in the year.

The natural result is that a dead set is made on the salmon trout during the spawning season in the fall and damage done through the killing of many fish and the scaring of others from the spawning beds is reflected in the small catches of trout at other seasons of the year in contrast with the showing a few years ago.

There is a matter that might well engage the attention of the Fish and Game Department before salmon trout are numbered among the fish in this district that can be regarded as extinct.

Once let is become generally noised about that this district is fished out the figures of money spent here by tourists will begin to get smaller.

TO HELP RESEARCH.

One of the most important measures to come before the Ontario Legislature at this season is the Government bill to create an Ontario Research Foundation.

Under this measure the members of the Foundation are to be named by the Government and the objects are to carry on research work for the following purposes:

The improvement and development of manufacturing and other industries by the introduction of advanced methods and processes;

The discovery and better development of the natural resources of the Province and the discovery and utilization of the by-products of any processes in treating or otherwise dealing with the mineral, timber and other resources of the Province;

The development and improvement of methods in the agricultural industry and the betterment, welfare and progress of farm life;

Scientific research and investigation for the mitigation and abolition of disease in animal or vegetable life and the destruction of insect or parasitic pests;

Generally the carrying out, with the approval or under the direction of the Lieutenant-Governor in Council, of any other research work or investigation which may be deemed expedient.

It is proposed to finance the foundation up to a total of two million dollars, half to be contributed by the province and the balance raised through public subscriptions.

When $1,000,000 has been subscribed and of which $200,000 has been paid up the Government will pay $200,000 and in each of the four succeeding years will pay a similar sum.

The measure represents a very progressive attitude toward the all-important question of research work along the lines of which good results may be expected.

The members of the Foundation will be given power to expropriate land and erect buildings and will have a real opportunity to serve Ontario in a direction in which Canadians as a whole have not made sufficient progress.

INCOME TAXES.

Captain W. C. C. Innes, of the Retail Trade Bureau of Canada, has for some time been carrying on an aggressive campaign against the federal income tax. Yesterday he addressed the Windsor Kiwanis Club, reviewing various arguments in favor of the reform and calling on the members of the organization to lend their assistance to the Trade Bureau in bringing it about.

The natural question in response to every suggestion for doing away with the income levy is: "From what source will you secure the revenue the tax is now bringing in? What will take its place? Where will the federal treasury get the money necessary to run the country?" To this Capt. Innes promptly replies that he does not propose to substitute anything for the income impost in the event of its being eliminated. It will not be necessary, he adds, for the impetus that would be given to business of all kinds by the removal of the tax would, he contends, result in national activity calculated to produce much more additional revenue than is now forthcoming from incomes.

"Can you imagine a finer national advertisement," Captain Innes asks, "than to have it broadcast to the world that Canada is a country without income tax? Think of the effect on immigration and on capital coming into the country. Think what it would mean to Windsor and her sister municipalities to be able to tell the people across the river that Canada has abolished the tax on income."

One must admit that the picture is alluring. It would have a great appeal to our American cousins even though their own income tax has been greatly reduced since King Calvin ascended the throne. Mr. Coolidge has been whittling it down year after year in accordance with his well-known policy of economy, but the tax is still a considerable burden on millions of Americans who would certainly be interested to know that Canada had abolished the same thing. It is difficult to imagine that a good many persons would like to move here in a hurry. The same argument would apply, of course, to many a man in tax-burdened Europe. Canada could be pictured as a modern Utopia, so far as income taxes are concerned, and the beautiful part of it would be the truth of the story.

Our own income tax has been materially reduced during the last two years and just the other day Mr. Robb, who has made quite a reputation for himself as the author of cheerful budgets, announced another 10 per cent. cut all down the line. Every little bit helps but the tax still bears heavily on business and is said to be approximately half again as high as the income levy across the line. That it retards industry and discourages the expansion of business cannot be doubted. In this way, of course, it is a most unsatisfactory arrangement and a real deterrent to the progress of the country. After all, big projects are usually undertaken because there is a chance to make big returns. When a large part of these returns are liable to be taken by the government in income taxes, however, the ambition of many men takes a slump. They sometimes question if the game is worth the candle, and in the end often do much less than they would have done had there been no brake on their industry.

The federal income tax was introduced during the war. It could never have come into existence otherwise, for public opinion would have prevented. In the war years, however, there was necessity for raising a great deal of unusual revenue in rapid fashion, and the tax on incomes was an easy way in which to do it. Like other expensive habits, it is not an easy one to get rid of, but the day is undoubtedly coming— it may be nearer than we think—when the tax will have to go, for, speaking plainly, it is nothing more or less than confiscation of capital.

The same thing is true, of course, of the iniquitous municipal income tax, to which Windsor aldermen have again been objecting. The provincial statute, which permits the collection of this tax, was on the books for some years before the war, but was a dead letter. Most persons did not even know of its existance. When the federal government started collecting income tax, however, and demonstrated how comparatively easy it was to secure a large amount of revenue by this process, some of the municipalities decided to take advantage of the power lying dormant and make their levy on the same incomes. So now the municipal income tax is being collected—from some persons—in Windsor, Walkerville and a few other municipalities throughout the province. In most places, however, as far as can be learned, it is as unknown today as it was a decade or two ago. There is simply no effort to collect it. The people do not want it and in other cities, officials seem to have the idea that they will be decapitated or something unless they go through with the farce year after year. A handful of people pay the tax and they have good reason to feel that they are discriminated against. The obivious and sensible thing, of course is to have the Legislature repeal the income tax law, or at least make its operation optional with the municipalities. Failing this, it would be a good idea for the municipalities to forget all about it.—Border City Star.

EDIOTRIAL NOTES AND COMMENT.

Sometimes there is something in a name. The Budget speech of W. J. Bragg, M.P.P. for Durham, was chiefly a boost for that constituency.

Mr. Bourassa having blocked the Budget debate is doubtless happy. There are many people who shrink from the limelight much more consistently than does the inimitable Henri.

Children nowadays are not what they used to be, according to J. G. Elliott of Kingston. They never were.

According to Toronto reports the Budget debate in the Legislature is slowly dying, thus contradicting the popular impression that it was dead.

There should be special punishment for the first individual who starts something about winter lingering in the lap of spring.

East Lake, Mich., has elected a mayor who promises to make dances in the village hall pay all costs of local government. That is tax reform that starts from the black bottom.

CATTLE, GRAIN AND PRODUCE

TORONTO LIVESTOCK.

TORONTO, March 15. — With a fair run of cattle offering in the mid-week market, trade opened slow. Packers' buyers were for the most part just "standing by" awaiting developments with the obvious intention of getting prices down on the medium and common quality offering. By noon hour the choice heavies and best butcher steers and heifers were quoted steady and unchanged. Medium and common 25c lower.

Choice heavy steers firm at $10.00 to $11.00, general run of good to choice steers and heifers $9.00 to $10.25.

Fat cows, choice, 25c lower, at $8.00 to $8.25 tops.

Bulls, choice butcher, $7.00 to $7.25.

Hogs, off cars, selects..		9.90

MONTREAL GRAIN AND PRODUCE.

MONTREAL, March 15 (Canadian Press). — Owing to the continued absence of any important demand from exporters the domestic trade in grain here yesterday was slow and confined to odd cars for domestic and country account. The tone of the market was steady and prices were unchanged.

The trade in spring and winter wheat grades of flour was quiet, but values were well maintained.

A fairly active business was done in all lines of millfeed, and the undertone to the market was firm. The trade in standard grades of rolled oats was moderate.

The demand for fresh eggs continued brisk and a large volume of business was done at unchanged prices. The receipts were 2,094 cases.

The inquiry for potatoes was active, but sales were checked owing to the small offerings. Prices were firm.

The tone of the market for imported beans remained firm under a steady demand. Sales of car lots of choice white hand-picked to arrive were made at $3.50 per bushel, ex-track, and broken lots at $3.60 per bushel, ex-store.

Only a small trade was done in butter, but the undertone to the market was steady. The receipts were 411 packages.

A feature of the cheese trade was the renewed inquiry from English importers, which naturally tended to increase the demand on spot between houses, but as the offerings were small no business of importance resulted. The receipts were 51 boxes.

CHICAGO CATTLE.

CHICAGO, March 15 (Canadian Press). — Cattle, 9,000; best choice fed steers, $14.75; long yearlings, $14.50; best light yearling heifers, $13.15; bulk, $11.50 to $12.25; low cutter cows, $5.25 to $5.50 at close; some light kinds carrying $5.00 bid; most sausage bulls, $8.00 downward; outstanding kind up to $8.25; light vealers to big packers, $12.25 to $13.00; small killers, $13.50 to $14.50; few at $15.00.

Hogs, 23,000; late bulk better grade 170 to 220 pounds, $8.15 to $8.45; few choice 180 to 200 pound weight late at $8.50; top, $8.65 early; 230 to 270 pounds, $8.10 to $8.25; good and choice 280 to 340 pound butchers, $7.90 to $8.15; bulk 140 to 160 pound averages, $7.50 to $8.25; choice kind upward to $8.50 and better; choice strongweight, $7.50 to $7.75; pigs largely $6.50 to $7.00; bulk packing sows, $6.90 to $7.40.

Sheep, 10,000; top, $16.60; next highest price $16.25; most wooled lambs, including 91 to 102 pound Colorados, $15.60 to $16.10; good to choice 82 to 88 pound clipped lambs showing full upturn, $13.00 to $14.00; sheep scarce, steady, few fat ewes, $9.50; light supply good feeding and shearing lambs unchanged at $14.50 to $15.25.

CHICAGO GRAIN.

CHICAGO, March 15 (Canadian Press). — Rain and snow spreading eastward yesterday gave a downward trend to the wheat market, but had a directly opposite effect on corn. It was expected that the winter wheat crop would benefit from moisture, whereas the movement of corn would be interfered with.

Closing quotations on wheat were unsettlede at the same time as Tuesday's finish to ½c lower, corn ½c to ⅝c up, oats varying from ¼c decline to ½c advance, and provisions at 5 cents setback to a rise of 10 cents.

Improved growth conditions southwest and west, with numerous points in Kansas and Nebraska, receiving rain, did a good deal to ease the wheat market down early. Afterward with the forecast indicating moisture for the greater part of the domestic winter wheat territory, rallies in price failed to get very far, notwithstanding that March delivery of wheat here is at a premium over May and that European continental buyers were reported as interested in Canadian wheat for quick shipment. About 500,000 bushels of wheat from North America and 50,000 bushels of rye were bought yesterday for Europe.

Predictions of liberal wheat shipments from Argentian this week were circulated, but the effect on the market here was partly counterbalanced by sympathy with corn strength as the day drew to an end. At the finish, old crop months, March and May, were quoted exactly unchanged as compared with 24 hours previous. The new crop deliveries, however, July and September, were both showing a moderate setback in price.

Corn values turned sharply upward in the late dealings when bidders found offerings light. Export business was evidently in progress, and word was at hand both from Kansas City and Omaha that the rural movement of corn in adjoining territory is about over.

Unsettled weather and smallness of receipts gave further incentive to buyers. Oats swayed with corn.

Provisions were somewhat firmer owing to corn strength.

STERLING EXCHANGE.

MONTREAL, March 15 (Canadian Press). — Sterling exchange rates were quoted here yesterday as:

Demand—$4.87 5-16.
Cables—$4.87⅜.

Radio Stock Drops But Recovers Quickly

NEW YORK, March 14 (Canadian Press).—Radio Corporation Common stock, in which several fortunes have been made and lost in its meteoric advance of more than sixty dollars a share in the last eight trading sessions, backslid at the opening of the New York Stock Exchange today. It opened eight dollars a share lower at $138, but started a fresh series of chills running up the spines of bear traders, when it climbed to $142 in a few minutes. The general market opened reactionary and then turned upward, with a jump of nearly six dollars a share to one hundred in American Linseed, a gain of nearly twenty dollars in two days, as one of the early features.

keep a bottle of BOVRIL in the house it is so useful when nourishment is needed in a hurry

86

GOD'S MINUTE

I will extol Thee, my God, O King; and I will bless Thy Name for ever and ever. Every day will I bless Thee; and I will praise Thy Name for ever and ever. Great is the Lord, and greatly to be praised; and His greatness is unsearchable. One generation shall praise Thy works to another, and shall declare Thy mighty acts.—Ps. 145: 1-4.

We thank Thee, our Father in Heaven, for life and health and home. Thou hast brought us this new day, with its new blessings and its new duties. As we go out to our new tasks and pleasures, may we carry hearts full of love to Thee and to everbody. We lay our hands in Thine, and we trust Thee to lead us in the right and safe way. We are glad to know that Thou art with us, and we are going to do nothing that would drive Thee away from us. Teach us to walk in the footsteps of Jesus, Who went about doing good. Bless every member of our family, bless our friends, and if we have enemies, bless them. Help our eyes to see and our ears to hear and our hearts to love that which is true and clean and good. We trust Thy care to bring us safely to our Heavenly home when the day of life is ended. We ask all this for Jesus' sake. Amen.

J. C. Armstrong, D.D.,
Kansas City, Missouri.

A Thought

SERIOUS THOUGHT

A few people write all our books, do all our inventing, make all our discoveries, and blaze out all the new pathways of progress. Considering what has been accomplished by mankind with so few doing any real serious thinking, one is startled at the thought of what might be achieved if we were all as mentally alert and active as we should be.—J. R. G.

3000 BETTER TIRE DEALERS

They save money for their customers because they operate under the time-proven Goodyear Selected Dealer plan.

FOR seven years Goodyear has operated a dealer selling plan which makes it possible to sell the World's Greatest Tire at standard prices.

Out of about 12,000 dealers in Canada, Goodyear has selected 3,000 efficient ones, located to serve all motorists best. Fewer calls for Goodyear salesmen to make. Fewer salesmen needed. Big savings which go back into Goodyear quality.

The dealer saves also. He specializes on Goodyears. He can carry fewer tires—and yet carry more sizes. He gets faster turnover of his stock. He can work on a smaller profit and still make money. He can afford to give service.

Goodyear pioneers in selling policies just as Goodyear pioneers in tire features. The Goodyear Selected Dealer is a good man to know. He always has the newest advantages in selling methods, in service methods, in tire features. There is at least one in every town in Canada big enough to support a good tire dealer.

All Goodyear Tires are built of SUPER-TWIST Cords—61% more stretch and life than old-style cords

Goodyear means Good Wear

Borden's ST. CHARLES MILK (Unsweetened)

IN PETERBOROUGH CHURCHES

BETHANY TABERNACLE.

"To have in this life, joy, through knowing Jesus, is greater than having experienced the keeping, guiding hand or healing touch of Christ" was expressed by Miss Nellie Jones, in her opening address last night, at the annual missionary convention now in progress at Bethany Tabernacle.

Miss Jones has spent eleven years in missionary work in South China, under the Christian and Missionary Alliance. In her address she told of the Lord's wonderful protection in times of danger of capture by bandits, of her coming home broken in health, of her visit to the Mayo Bros.' clinic, and of her final complete healing through faith in our Lord. But greater than all that is the joy of the abiding presence of Jesus Christ.

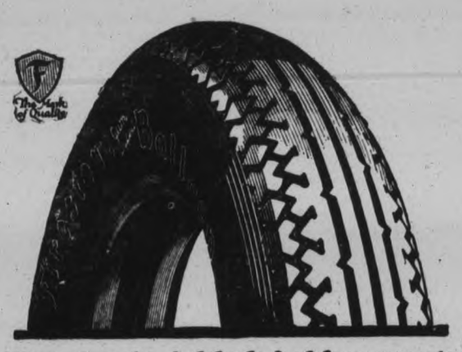
Rev. George M. Blackett of Owen Sound, in his initial message, spoke on the second coming of our Lord, dwelling on the "Judgments" relative to the subject. Mr. Blackett impressed his hearers last night as having a remarkably clear understanding of the Scripture. Mr. Blackett stressed the judgment of the believers' works in his address last night, pointing his hearers to Paul's words in I Corinthians 3:12-15, pointing out that every work will be revealed by the light of that day, and tested by God's fire.

Mr. Watson, Superintendent of the Alliance work in Ontario and Quebec, who will have charge of the convention, clearly defined the purpose and possibilities of this convention in his introductory remarks.

The services of the convention will be each afternoon at three o'clock, and evening at eight o'clock. There will be addresses by each speaker at each service.

SEEING THE ROCKIES ON FOOT.

One of the best ways of seeing any mountain district is on foot. In the Alps it has long been a favorite form of travel but in the Canadian Rockies until recently roads have been few and places of accommodation far between. The extension of the highway system in the Rocky Mountains national park has opened up new possibilities for the pedestrian since it is now possible to traverse the entire length of the park on foot and even to go on to Field and the Yoho valley in Yoho national park.



Firestone's Added Achievements To Serve Motorists Better and Save Them Money

Year by year—since the beginning of the automotive industry—Firestone has been laying the foundation in resources, facilities, methods, and man-power which today is saving motorists millions of dollars annually.

Firestone secures raw materials direct from the sources of supply. Firestone factories are the most modern type and are equipped with special machinery designed by Firestone Engineers. This makes possible the production of the most uniform quality of tires at the very lowest cost.

Firestone's exclusive Gum-Dipping process insulates and impregnates every fibre of every cord with rubber which reduces internal heat and friction and gives thousands of extra miles.

Firestone conducts Dealer Educational Meetings, where Dealers and their repair men are given the advantage of learning latest methods in the care and repair of tires, enabling them to give the service which can be obtained only at a Firestone Service Station.

HOROSCOPE

The Stars Incline, But Do Not Compel

(Copyright, 1928, McClure Syndicate.)

FRIDAY, MARCH 16, 1928.

This is a rather menacing day, according to planetary direction and makes for disappointments as well as delays.

The early hours may present obstacles to business men and especially to merchants.

It is wise not to credit rumors or to accept evil reports of any sorts under this sway which makes for deception.

Trade conditions are to be unusually good as the spring advances, the seers prophesy.

Much litigation is indicated and civil suits may be more numerous than usual.

Under this planetary rule deception is practiced more generally than in ordinary conditions, astrologers believe.

Promoters with overworking imaginations and unsound, optimism will be abroad in the land at this time.

It is well not to speculate or even to lay wagers, although the temptation to try one's luck may be strong.

Startling events are to mark the spring and summer when the stars indicate that what is most unexpected is likely to happen.

Women today should not expect to make a good impression on men, who will be critical while this configuration prevails.

This is not a lucky wedding day, although fortune may smile as the years pass.

According to ancient lore this should be a favorable sway for certain lines of beauty culture since it reveals feminine defects.

Persons whose birthdate it is probably will have a year of average experiences—nothing unusual is to be expected.

Children born on this day probably will have much ability in various lines of effort. They should beware of foolish friends.

WOMEN WHO ARE WEARY.

Gain New Vitality By Taking Dr. Williams' Pink Pills.

There are many women who pass their days in a constant state of weariness. They have barely sufficient energy to enable them to perform their manifold duties. Often they have an aching head, a miserable pain in the back, and limbs that feel as heavy as lead. The whole trouble is due to bloodlessness. This anaemia, or lack of good blood, causes not only pale faces and white lips; it is the root of many of the pains and miseries from which women suffer. It is said that anaemia causes nine-tenths of women's ailments. Lack of blood robs a woman of all her energy; she loses her breath when going upstairs, becomes despondent and irritable; and seems to lose interest in life.

No woman need suffer in this way. It is easy to obtain a supply of rich red blood by taking Dr. Williams' Pink Pills. The new blood created by these pills rapidly builds up the system; headaches and backaches disappear, energy returns and the joy of living is felt once more.

Dr. Williams Pink Pills are sold by all medicine dealers, or can be had by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

HERE AND THERE

CONFERENCE OPENS.

GENEVA, Mar. 15. — (Canadian Press.)— With a newcomer, Turkey, among them, twenty-four countries met here to-day to renew their efforts for a practical start towards disarmament. After a brief discussion they adjourned until to-morrow.

WILL FIGHT FOR FIGHT.

CHICAGO, Mar. 15. — (Canadian Press.)— Backed by the Illinois Boxing Commission, Promoter Jim Mullen, Chicago, to-day said he was ready to employ every means known to the legal profession to prevent the lightweight championship match between Mandell and McLarnin being held in New York May 17.

HOREMANS WINS.

SAN FRANCISCO, Mar. 15.—(Canadian Press.)—Coming from behind, Edouard Horemans, Belgian champion, defeated Jake Schaffer for the world's 18.2 billiard championship last night.

QUAKE IN CALIFORNIA.

SANTA MARIA, Calif., Mar. 15.—(Canadian Press.)—An earthquake of about fifteen seconds' duration was felt here early to-day. No damage was reported.

EXTREMISTS ARRESTED.

TOKYO, Mar. 15. — (Canadian Press.)—Wholesale arrests of extremists were reported from all parts of Japan to-day as a result of investigations conducted since the election when hand bills attacking the present form of government were seized.

FIRE IN LONDON TOWER.

LONDON, Mar. 15. — (Canadian Press.)—When fire broke out in the Tower of London to-day, there was plenty of excitement for a few minutes. The blaze was quickly extinguished with little damage.

TO CLEAN UP SANDINO.

MANAGUA, Mar. 15.— (Canadian Press.)—United States marines today were under orders to make stringent efforts to wipe out the Sandino revolt. Supplies have been moving into the district where Sandino is known to be hiding, and the marines will try to clean up.

LAUNDRY BETTER THAN MINORS.

NEW YORK, Mar. 15.—(Canadian Press.)— Buck Lai, Chinese recruit with the New York Giants, says he will go into the laundry business sooner than go to the Little Rock, Arkansas, baseball team, where Manager McGraw ordered him. He is still in camp.

FLYING TO CAPE

Lady Bailey, wife of the South African millionaire, took off alone from Croydon Airdrome, England, in a tiny de Haviland Moth airplane in a 6,000 mile flight by easy stages to Capetown. Lady Bailey is an experienced aviatrix. Sir Abe and Lady Bailey are shown here.

DON'T SUFFER THE TORTURES OF RHEUMATISM

If you want gratifying relief from those awful knife-like pains and drive out those dull grinding aches take one teaspoonful of Rheuma night and morning. You should soon realize that when Rheuma goes in rheumatic agony goes out.

Rheuma helps to force the dangerous poisons out of the system in the natural way—that's the secret of Rheuma's success.

It matters not whether you are tortured with sore, inflammed joints or distressed with occasional twinges, Rheuma is guaranteed by McDermid & Jury, and all druggists, to end rheumatic suffering or money back.

Rheumatism is a dangerous disease. It often affects the heart and causes death. If you have it in the slightest degree get a bottle of Rheuma today.

IN QUEBEC CONVENT?

Frances St. John Smith, missing Smith college student who is said to be in a convent somewhere in Quebec, according to J. W. Wilkinson of Montreal, C.P.R. conductor, who said the girl rode on his train January 14, the night of her disappearance. He says he is positive of her identity.

Lyrics of Life - By Douglas Malloch

THE ROAD OF OTHER MEN

Oh, what road shall we travel, friend,
What highway shall we choose,
That has contentment at the end,
Whatever else we lose?
Well, I would say it's not the highroad,
It's just a trail, it's just a byroad,
A road so rough, a path so lowly,
That those who travel travel slowly.

You'll try a dozen roads that wind,
And then the right road miss;
For all your life you'll never find
A better road than this
A road that has some roses by it
A cottage, not a castle, nigh it,
No stormy height, some vale or hollow
Where Christ is easiest to follow.

Oh, what road shall we journey then
The joy of life to see?
We'll walk the road of other men,
Of men like you and me—
Some fellows who are worth the knowing,
Going the same way we are going,
The happiest road in any weather
The road that mortals walk together.

(Copyright, 1928, Douglas Malloch.)

BUSINESS MEN DEFEAT RATS

Lakefield Teams Fight Hard on Water-Covered Ice.

FINAL SCORE 5-4.

LAKEFIELD, March 14.—The $50,000 Wrigley swimming contest had nothing on the Lakefieldians on Monday night! One of the fastest games of the season was played on the Lakefield ice between the Barn Rats and the Business Men. The ice was covered with about half an inch of water as a result of a recent thaw.

In the first period some very brilliant playing took place, the Business Men drawing first blood by getting in a well-fought-for goal. The Barn Rats quickly retaliated, to be immediately worsted by the Business Men. The period ended 3-1.

The second period of the game was less fast. Doc. Kennedy made several ineffectual attempts to mow down his assailants, while Doctor Smith, on the opposing line, withstood with heroic bravery the repeated assaults of his opponents. The Barn Rats got one goal and the period ended 3-2.

"Butts" Northey, the left defence man on the Business Men's team, dashed with the puck to the goal of the Barn Rats, and, amidst a shower of water rivalling "The Old Reliable," put the rubber in the net. "Curley" Northey, of the Barn Rats, rushed against the iron barrier, Doctor Smith. The second half of the third period had both teams equal, but Thomas Hampton and "Butts" Northey dashed in another goal and then ensued a melee. The result of this was a free shower bath. When the gong sounded the Business Men lead the Barn Rats 5-4.

Line-up

Business Men—Frank Payne, goal; Butts Northey, l.d.; Doc Smith, r.d.; Carmen Payne, r.w.; Fred Wannamaker, c.; Tom Hampton, l.w. Subs., Warne Payne, Dick Hunter.

Barn Rats—Norman Curtain, goal; Doc Kennedy, r.d.; "Bunny" McKibbin, l.d.; Wilbert Dever, r.w.; Douglas Davis, l.w.; Elwood Northey, c. Subs., Claire Chittick, G. Wannamaker, B. Allen.

BISHOP TELLS OF HIS BETS.

That he spoke from experience when denouncing betting was the declaration of Dr. Stirling Woolcoombe Bishop of Whitby, at a meeting in York, England, recently. "While at Oxford I was lucky, and became extremely interested," he said. "My last bet was ten shillings on a five to one winner of the Chester Cup, yet my friend and I resolved after the race never to bet again not because we had lost—we had won a considerable sum—but because we were finding out that when betting enters into you it saps your higher interests. I believe it would have driven me to hell if I had gone on with it."

Ladies' Ready-to-Wear and Shoes - 392 GEORGE ST.

THE EXAMINER PICTURE PAGE

INDIAN SINGER LOOKS LIKE BRANT

The remarkable resemblance of Oskenonton, Canadian Indian baritone, to Chief Joseph Brant, left, and the fact that he possesses a remarkable voice, makes Launcelot Cressy Servos, librettist, believe he would be the ideal person to fill the role of Brant in the historical opera, "Builders of an Empire." Oskenonton, RIGHT, is shown in full Indian regalia.

Hon. T. C. Norris, who took a prominent part in the reunion of Peel County Old Boys of the Canadian West in Winnipeg. The former premier of Manitoba is a native of Chinguacousy townships, in Peel County, Ontario.

WHERE LINDY HAS FLOWN

Charles A. Lindbergh established a sound claim to fame last year in making the trip from San Diego, California, to Paris France, in three spectacular hops. That put his name on the front pages, but the above map indicates why he continues to be the best-known man in America. During the past twelve months he has been in the air 400 hours ond covered 40,000 miles, the bulk of the total being represented by flights in North and South America. Lindbergh, who has won a reputation among brother airmen as the perfect flier, did not have a single accident himself in all this Odyssey, although one casualty occurred among his aerial escort when he visited Ottawa in connection with the Dominion Jubilee celebrations in July. He was accompanied by twelve speedy pursuit planes from the army station at Selfridge Field, Michigan. Before landing these adopted the manoeuver formation known as a Lufbery circle. Two planes ticked and Lieut. Thadeus Johnson crashed to his death. The illustration also shows a picture of "Lucky Lindy" and of the other half of his famous team of "We," the "Spirit of St. Louis." This monoplane has travelled the whole 40,000 miles without a mishap and without any major replacements or repairs.

BRILLIANT YOUNG JOURNALIST

Miss Dorothy Thompson, brilliant young writer on Russia, made her entree into the journalistic world shortly after her graduation from an American university. During her nine years of journalistic work in Europe she interviewed Terence McSweeney, mayor of Cork, two hours before he was arrested and sent to the prison where he died as the result of his hunger strike. After the collapse of the late Emperor Karl's last desperate attempt to regain the Hungarian throne she eluded the guards surrounding the Estherhazy castle at Tata Varos and secured an interview with the imprisoned Karl and Zeta, his consort. Miss Thompson has also interviewed two queens —Marie of Rumania and her daughter, the queen of Jugo-Slavia.

NEW EARL OF OXFORD

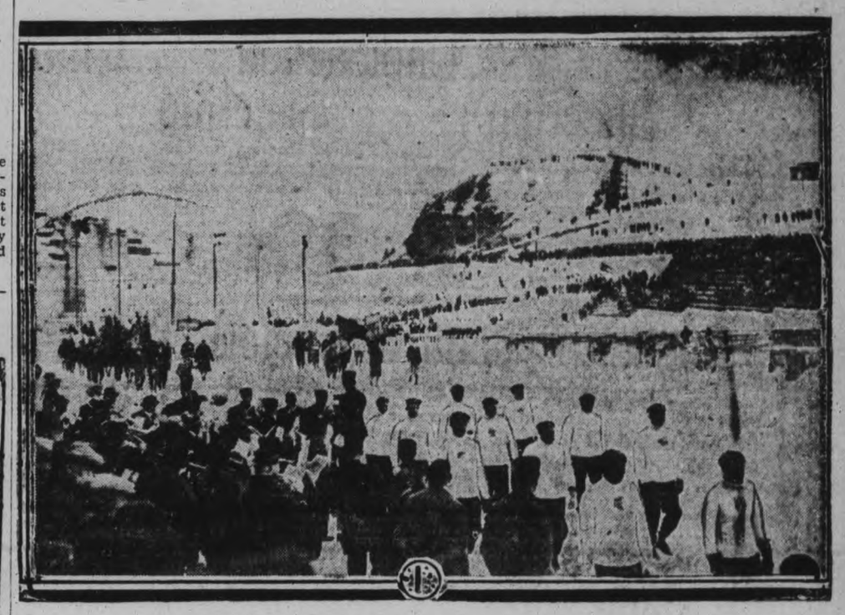
When the venerable Liberal statesman, Lord Oxford and Asquith, died, the earldom descended to his 12-year old grandson, Julian Viscount Asquith. The boy earl is the son of Raymond Asquith, the late peer's eldest son, who was killed in the war.

LADY PSYCHIATRY

Dr. Esther A. Richards, associate professor of psychiatry, Johns Hopkins University, who is recoginzed as the outstanding woman psychiatrist of the world and is in the very front rank of American scientists. Many Canadian specialists have studied under her in Baltimore.

FINNS LIKE CANADA.

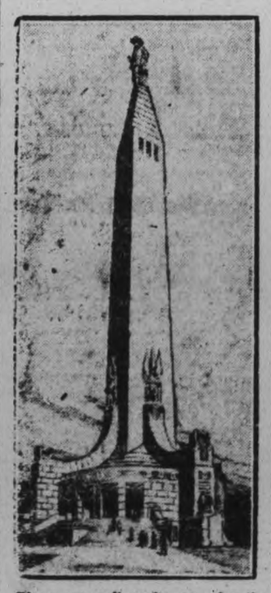
Lauri K. Kelander, president of the Finnish republic, who discussed conditions in Canada at some length with Vice-Consul Adiel Saarimaki of Toronto during the course of the latter's visit to his native land, and said Canada was proving more attractive than the United States to emigrants.



Probably the outstanding feature of the winter sports Olympic contest at St. Moritz, Switzerland, was the exhibition of super-hockey playing staged by the Toronto Grads. This view from St. Moritz shows one of the contending sports teams marching on the ice of the open air rink, with the Alps towering behind.

From Winnipeg to Reindeer Lake, which is 300 miles north of The Pas a total distance of 800 miles, was covered in eleven and a half hours by a plane recently, bearing as one of its passengers Karl Heisey, mining engineer of Kirkland Lake. Heisey and his party are shown here on Reindeer Lake.

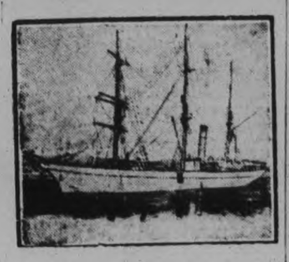
This is the architect's drawing of the new customs house, which the federal government is said to be planning to erect in Toronto.



Plans are well under way for the erection of a $250,000 statue to the memory of Chevalier Robert de la Salle. It will be built on the Niagara river, directly opposite the whirlpool rapids, and will be higher than Brock's monument.

Fort Churchill Harbor on Hudson Bay, which has been selected by Frederick Palmer, British expert, as the terminal of the Hudson Bay Railway, almost completely landlocked, will, when completed, be one of the world's finest harbors. The map indicates its sheltered nature, and the rugged natural breakwater formed by the eastern peninsula and its protection to Churchill harbor are shown by the photographs. Churchill Harbor was the historic destination of the "Company of Gentlemen Adventurers Trading into Hudson Bay."

SHIP BYRD USES.



This is the Norwegian ship which Commander Richard E. Byrd's expedition to the south pole will use. He will also have a three motored plane with which he hopes to fly over the Antarctic zone.

CANADA'S LEGATION.

Canada's Washington home which was purchased, site, property and furnishings, for not much less than half a million dollars by the Canadian government

When the London Morning Post refused to print an advertisement on birth control, Dr. Marie Stopes, noted birth control writer and advocate, wrote the Duke of Northumberland, owner of the paper, asserting that a "small handful of Roman Catholics was manipulating the paper." Howell A. Gwynne, its editor, immediately brought action for libel and yesterday he was awarded £200 damages. Above are shown Dr. Stopes and the Duke of Northumberland, owner of the Post.

Here is Jan Van Empel, the artist, who was born in Holland, but thinks Canada is one of the few places in the world worth the attention of an artist's brush. The picture is a sample of his work, entitled "The Beach Combers", and is a scene north of Prince Rupert, where Van Empel spent some time painting.

HALL'S FRIDAY BARGAINS

Mount Pleasant

MOUNT PLEASANT, Mar. 15. — Misses Helen McLean and Hazel McPherson were visitors in Peterborough on Monday.

Mr. and Mrs. Robert Ruth and son Gordon, and Mrs. Ruth's brother, Mr. D. Kerr, spent Saturday in Peterborough. Mr. Kerr left on Saturday evening for his home in Carberry, Manitoba, after spending the past two months with friends in this vicinity.

Mr. William Elliott, who has been ill at his home in Ida, is very much improved.

Mrs. James Fee spent Monday in Peterborough, with her parents, Mr. and Mrs. Wiliam Shield.

Miss Laurine Best, of Omemee, spent the week end with her uncle, and aunt, Mr. and Mrs. David Dick.

Mr. Robert Henderson spent Monday with friends in Peterborough.

Miss Myrtle Hootan, of Fairmount, was the guest of Miss Alma Downer over the week end.

Mr. and Mrs. Frank Gardiner were recent visitors of Mr. and Mrs. J. Sanderson.

Mr. and Mrs. Austin Best and Mrs. Jennie Best spent Sunday with Mr. and Mrs. John Handley.

Mr. and Mrs. Garnet Shield and daughter Juan were guests of Mr. Shield's parents in Peterborough on Sunday.

Mr. and Mrs. Chester Best spent Saturday in Peterborough.

Mrs. Richard Graham is spending a few days with her aunt and uncle, Mr. and Mrs. W. R. Shield in Peterborough, proior to Mrs. Scott's departure for her home in Manitoba.

Mr. and Mrs. Frank Gardiner and Mrs. George Jamieson were visitors to Peterborough on Monday.

ROADS AND TRAILS IN JASPER PARK.

There are now 115 miles of roads in Jasper national park, Alberta, of which 58 miles are surfaced for automobile traffic. Added to these are some 630 miles of well defined trails leading to various points of interest.

WHITE PINE AN IMPORTANT CONIFER

The white pine is the tallest and most stately of the conifers in the forests of Eastern Canada and one of the most beautiful. Under favorable conditions it not infrequently attains a height of 100 to 150 feet, with a diameter of 30 to 40 inches.

Does baby cry?

Then something's wrong! You should have Woodward's Gripe Water handy to soothe the baby during teething, to correct diarrhoea and to keep the little stomach in a wholesome, healthy condition.

Mothers have found Woodward's Gripe Water a safe sure remedy. Get a bottle to-day.

The most famous of all correctives for Colic, Teething, Indigestion, Flatulence, Looseness, Disordered Stomach, Acidity, Peevishness.

WOODWARD'S "Gripe Water" KEEPS BABY WELL

KEENE OLD PEOPLE ARE STILL ACTIVE

Scientist's Pronouncement Not Upheld By Five Over 90.

KEENE, March 15. — Some years ago a sensation was created by a great medical man who insisted that few men were capable of much work after they were forty years of age. There is, however, a very long list of men and women who have worked hard and to good purpose when they were far past that age.

In Keene it looks as if the age of forty were only in the primary department. There are, in the neighborhood of Keene, five persons over ninety, mostly Scotch, with just a suggestion of Irish, and as keen mentally as at forty years of age. They range from 90 to 96. There is also an additional list of fourteen "young people" from 80 to 88. Is there anything in rural Ontario to squal this?

As the result of the membership campaign of the W.M.S. of the United Church, 46 new members have been added. The society was divided into two groups captained by Mrs. F. D. McIntyre and Mrs. J. H. Nelson.

Mrs. McIntyre's team won the contest with the result that Mrs. Nelson and her team will supply the opposing team with a banquet at which the new members will be installed. This will take place at their Easter meeting.

Personals.

Miss Zetta Wood, of Peterborough, was the guest of Miss Winnie Edwards for a few days.

Miss Hazel Browne spent a few days with her mother at Keene.

Mrs. Alice Browne has returned home after spending several days with friends in Peterborough.

Mr. and Mrs. Alex. Thompson returned home on Tuesday after visiting friends in Peterborough.

Mr. John Edwards, Sr., returned home after spending a week with Mr. and Mrs. Andrew Brown, of Peterborough.

INDIGESTION TORTURE.

Pain and Suffocating Pressure Until Tanlac Brought Relief

Only those who are tortured by Indigestion cramps after eating, and suffocating pressure of gas, can realize the relief, the joy, which came to Mrs. Odelle Langlois, as Tanlac freed her of every trace of Stomach Trouble.

For 25 years, she suffered. "Food was like poison", she writes from 710 Arthur Street, Windsor, Ont. "It would cramp me and gas would bloat me up so I could hardly catch my breath, and I would become dizzy and faint. I became so weak and nervous that my daughter had to do my housework. I spent enough on treatments to buy a home; and it almost breaks my heart to think that I did not use Tanlac before. Because four bottles of this grand medicine made me a well woman. I could feel the very first spoonful helping me; and now after only four bottles, I have regained my health and strength. My husband also used Tanlac for Kidney Trouble and it has made a new man of him."

If you are suffering, don't wait. Get Tanlac today. It is pure and good—and it must help you or your money will be promptly refunded. It costs less than 2c a dose—less than 6c a day to get well. Ask your druggist.

TUXIS BOYS' SOCIAL TWICE POSTPONED

Storm Interferes With Cavan Square's Party—Mailmen Delayed.

CAVAN, March 15. — The Tuxis Boys had postponed their social evening from Tuesday evening until Friday, but they were disappointed again, for Friday was one of the stormiest days of the winter. So much snow fell that the roads were filled. The rural mail carriers did not start out that day. The warm weather and bright sun is packing down the roads, so that they are in good condition again.

On Sunday evening in Cavan Church, the pastor, Rev. J. O. Totten, preached on Temperance. Next Sunday evening the ladies will form the choir and supply special music.

Mr. T. Staples visited his brother, F. M. Staples, for a few days last week.

Mr. David White was a visitor to Peterborough on Monday.

Col. Earchman, of Toronto, spent the week-end with Mrs. Earchman at the home of her sister, Mrs. R. Vance, Franklin.

Mrs. N. Lamb arrived home on Saturday from a visit with her daughter, Mrs. W. White, Daventry. Mrs. White accompanied her home.

Miss Ingram, R.N., of Peterborough, is the guest of Mr. and Mrs. N. Lamb.

Bailieboro

BAILIEBORO, March 15. — Mr. Sidney Lang, who has been convalescing at the home of his parents, after having undergone an operation in Oshawa, has returned to Oshawa.

Owing to the absence of Rev. H. W. Foley, Rev. Mr. Mears of Port Hope, conducted the services on the Fraserville United Church Circuit on Sunday.

Messrs. Charles Barnard and Aylmer Dawson, motored to Toronto on Saturday.

Arthur Butters of Plainville, visited friends in South Monaghan on Sunday.

Mesdames B. Perrin M. Parker, T. Skitch, W. Bateman and Mr. W. Perrin have returned from a visit to Toronto.

Messrs. B. Wood and M. Foley of Fraserville, were visitors to the village on Sunday.

The Oshawa-Peterboro bus did not make its daily trip on Friday and Saturday.

Owing to the extremely disagreeable weather that prevailed on Friday evening the members of the guild of the Anglican church did not present their play "A Rustic Romeo" at Garden Hill.

Several poultrymen of Toronto have been going through the vicinity buying all the poultry they can get.

FORMS INTERPROVINCIAL BOUNDARY

The Ottawa river, which, from lake Timiskaming to Point Fortune, forms the interprovincial boundary between Ontario and Quebec, has large and important power possibilities.

"We all take Kruschen."

Read this Letter

"I would like to say that as a family we have used your famous Kruschen Salts as a family medicine with the best results.

My mother first suggested it, and since that time (3 or 4 years ago) I have enjoyed excellent health and spirits, in spite of having to go through some trying times.

We all take Kruschen, and you should see me mounting the stairs in the morning with 5 cups on a tray—each with its little dose of tasteless magic Kruschen."

A. W. S. R.

Original letter on file for inspection

Kruschen Salts

Good Health for a Half-a-Cent a Day.

Kruschen is a perfect blend of those six natural salts which are vital to your bodily well-being. The analysis is on the bottle. There are sodium and magnesium to clear away the waste matter that clogs your system and poisons your blood. To feed your tissues, there's the tonic potassium. Every drug store sells Kruschen at 75c. the bottle. A bottle contains 120 doses—enough to last for 4 months.

Canada Is One of Great Manufacturing Countries of World, Amery Tells Commons

LONDON, March 15 (Canadian Press)—"Canada today is one of the great manufacturing countries of the world with her water powers, her vast mass of raw materials and the enterprise and inventive ability of her people, there is nothing can stop her from becoming an industrial country on a level with Great Britain," declared Lt-Col. L. C. Amery, in the House of Commons yesterday afternoon. The Secretary of State for the Dominions was speaking in the debate on a motion by Barclay Hervey, Conservative, Kincardine, urging a vigorous policy of developing Imperial resources. The motion was adopted.

Rt. Hon. J. Wheatley, Labor, Shettleston, had urged the creation of an imperial industrial parliament representing the governments of the Empire to bring into concert disinterested Empire trade policy. Lt.-Col. Amery pointed out the difficulty of attempting to regulate prices by state action, and drew attention to the growth of manufacturing industries in the dominions, giving Canada, as an example.

Canada's growth as an industrial country, he said, in nowise diminished the strength of the case for Imperial economic co-operation. . British trade could experience few disasters greater than that which would result if the Dominions adopted free trade, dropping the British preference. Great Britain enjoyed a most valuable trade with the Dominions, particularly in relation to the comparative smallness of their populations, and if preferences were valuable anything Britain could do to help the Dominions' trade was worth doing.

JUNIOR PUPILS ATTRACT MANY WITH ORATORY

Overflow Crowd Attends Campbellford High School To Hear Speeches.

MALCOLM HUTCHEON WINS.

Eleven Young Speakers Choose From Wide Variety of Canadian Subjects.

CAMPBELLFORD, March 15.—The junior oratorical contest held in the High School auditorium last night proved much more popular than had been anticipated by the staff. The result was that extra seating capacity had to be arranged before everyone could be accommodated. There were approximately four hundred interested people, which is a much larger number than came to hear the senior contest. Throughout the eleven speeches, there was scarcely a stir save for a continual commotion in the region of the two back rows. In spite of significant looks from several people who occupied the surrounding seats, the disturbance continued till the end of the program.

Unlike the senior event, there was a wide range of subjects from which the contestants might choose. Of the eleven three spoke on Canada, the Land of Opportunity, three on the History of the Canadian Pacific Railway, one on the Indian Tribes and their part in Canadian History, one on the Canadian Water Power Development, one on Sir Wilfred Laurier, one on the Royal North-West Mounted Police, and one on the United Empire Loyalists. The judges were the same as for the senior contest, Mrs. F. C. Bonnycastle, D. J. Lynch and A. J. Jenkins. Their decision was given in favor of Malcolm Hutcheon, who spoke on Canada. George Sloggett won second place with his oration on the building of the C.P.R. Helen Thomas, who spoke on the same subject, was awarded third place.

The prizes were presented by Walter Fowlds, Hastings, the first prize, a beautiful silver cup, being donated by his brother, J. M. Fowlds, Oshawa, a Campbellford High School old boy. In presenting the cup and prizes, Mr. Fowlds explained that he was taking the place of his brother, who was unable to be present for the occasion. A. J. Jenkins gave the judges' report, and remarked in a very pleasing manner on the speeches and addresses he had been privileged to hear. In his opinion, they had been almost on a par with the senior speeches of a few days ago.

The first number on the program was a piano solo by Miss Hilda Jones, Hastings. Between the fourth and fifth speeches, Ronald Richardson played a violin solo, with Miss Irene Stephens at the piano. After the eighth speaker, Miss Roxie Wilson's piano solo was very much appreciated. After the final speech, Miss Ruby Townsend played a piano solo, and while the judges were arriving at their decision, Miss Cherrie Turner and Miss Irene Stephens sang "Poor Little Jesus," and to them goes the spotlight for the most popular number. After three distinct encores being signified by the applause, they returned to the stage and repeated their number. Miss Isabelle Bygott played the piano accompaniment. Miss Irene Stephens, vice-president of the Literary Society, occupied the chair for the evening.

Miss Ivey Ray, the first speaker, chose as her subject, the Indian tribes and their part in Canadian History. She began by accounting for the various seemingly undesirable traits of the red man and enumerating his virtues. He was bold in war, skillful in the chase and eloquent around the council fire, she declared. Nor was he deprived of a fair share of the gentler affections. There were Indians who had played a very important part in the history of the country. Among those she mentioned were Joseph Brant, whose name is commemorated by the name, Brantford, borne by a city in Ontario, and Tecumseh, the noted Indian chief and statesman, who fought in the wars of the earlier days of Canada. Pauline Johnson, Indian poetess and authoress, had done much toward the good of her country.

Chairs Carried In.

Before Malcolm Hutcheon, the second speaker, and winner of the cup, could begin, it was necessary to place about forty chairs in the aisles in order to afford seating capacity for the unexpected overflow. "Canada, the Land of Opportunity," was his subject. Although she was a comparatively young country, he asserted that Canada had already took her recognized place among the great nations of the world. It is estimated that she can support a population of one hundred million in her broad expanse, measuring 3,500 miles from east to west and 1,400 miles from north to south. She is a link between Europe and Asia and a thoroughfare and market for both. Her opportunity would increase ten-fold by to-morrow, he thought. The moral standing of the Canadian people was higher than that of any other nation. He concluded his remarks by a quotation from Pauline Johnson.

Miss Fern Weatherill, third speaker, also spoke on Canada, touching on the foresight of the fathers of Confederation, some sixty years ago, which had been so instrumental in making Canada the brightest gem in the crown of Great Britain. Half the population of Canada is of British descent, she said, one-quarter are French, and the remainder are from every country on the face of the earth; but she thought that all were uniting to maintain, and if possible advance, the standards of the Canadian Dominion. Canada, she declared, had passed the stage of her infancy, and is on the high road to prosperity. Canada possesses an area of more than 3,000,000 square miles, unlimited resources, the greatest educational system in the world, the highest morals and the best form of Government, since it effectively eliminated the Red element from entering the country.

Miss Annie Spooner also spoke on Canada. She declared that there were few countries that could compare with the Dominion and none could excel. No other country had been able to equal Canada's growth and expansion during the last few years. Sixty per cent. of the available farm lands remained still untilled. The mineral belt was more than 3,000 miles in length, and many other statistics were mentioned. The St. Lawrence drainage system, the thousands of miles of railroads, the scenery and the wonderful opportunities for artists and lovers of the out of doors, were also factors in the opportunity which awaited the people of the Dominion. The comparatively small number of criminals contained in the country, she said, was due to the immigration policy, by which only the better class of immigrants were allowed to enter. The greatest asset of all was the spirit of youth, which was still Canada's and which many of the older countries has already forfeited. She finished her oration by quoting Pauline Johnson.

Talks on C.P.R.

Harry Fowlds, Hastings, the fifth speaker, based his remarks on the History of the C.P.R. The development of the Dominion hinged about the construction and development of this great railway, he said. Step by step he traced the progress of the road from the year 1873 up to the present time. British Columbia had agreed to enter the confederation on conditions that she be given railroad connections. This was not done immediately and she appealed to England, with the result that a company was formed and the road constructed and completed from coast to coast in the year 1887.

In 1878 there were only 278 miles of disjointed track laid. In 1884, all the funds had been spent and a further loan of $22,500,000 was raised and paid back in two years. In 1886, Donald Smith, later Lord Strathcona, drove the last spike which connected the steel from coast to caast. Now the C.P.R. company owns more than 20,000 miles of railroad, 138,000 miles of telegraph wire, thousands of miles of cable, ocean and lake going vessels, hotels, summer resorts and many other properties of almost inestimable value. This, he claimed, was the result of an enterprise which the the Mackenzie government said would not be able to buy grease to run its wheels.

Water power development was the subject selected by Lorne Scott, the sixth speaker. He had at his finger tips, a list of figures marking the horsepower development over a period of years. More than fifty per cent of the Canadian homes use electrcity, he declared. This was in marked contrast to the methods of heat, light and energy used sixty years ago at the time of Confederation. In place of the candles and oil lamps of that day, light is now obtained by simple methof of turning a switch on the wall. Of Canada's developed horse-power, eighty-two per cent is in Ontario and Quebec, while sixty per cent of the estimated power of the Dominion is located in these two provinces, he said. Ontario also leads the world in the number of government and municipal owned power plants. Sir Adam Beck had done much toward the development of the power and there was still much to be done.

George Sloggett, winner of the second prize, and the seventh speaker, carried the subject back again to the Canadian Pacific Railway. In a dramatic manner he pictured the progress of the giant monsters of the rails from one coast to the other. The miles of railroad in the system between Halifax and Vancouver constituted the greatest system in the universe. The prospect of the great system had first been visualized in 1871 and in 1878, Van Horne had become the master builder. In 1882, there were still two gaps to be closed, one along the north shore of Lake Superior and the other through the Rocky Mountains. In closing, he quoted a suitable poem from the works of Pauline Johnson.

Sir Wilfrid Laurier

Sir Wilfrid Laurier formed the subject for the eighth address, which was given by Martin Russeau. Beginning with his birth on November 20, 1841, Russeau traced the life of the great statesman throughout the various stages of his career till his sudden death in 1919. Born of a French family, Laurier was the first man of that nationality to become Prime Minister of the Dominion. His primary schooling was received in his native parish and his middle schooling was received at New Glasgow, Que. Later he attended the college a L'Assumption, and received his college degree from McGill University. On the occasion of his graduation from McGill, Laurier read the valedictory address, and it was the subject of much favorable comment. In 1871 he delivered his opening speech in his native tongue in the Quebec Legislature. Laurier's time as Prime Minister was, Russau recalled, the longest of any minister to date. His trans-Atlantic trip on the occasion of the Diamond Jubilee of Queen Victoria was the first time the great statesman had crossed the ocean and visited the continent. On this occasion he was received warmly by the Queen and met with the greatest kindness from every quarter. Some of the great questions with which Sir Wilfred dealt were the Riel Rebellion (1885); the tariff question, religious matters then much to the fore, Canada's naval defence, and the building of the C.P.R. When his sudden death occurred in 1919, parliament adjourned immediately after the reading of the speech from the throne, and attended his funeral, which was solemnized in both English and French.

George Smith, the ninth speaker, traced the history of the Royal Nothwest Mounted Police, now known as the Royal Canadian Mounted Police. Sir John A. Macdonald was, he said, known as the Father of the Force since he had done a great deal to have it brought into being for the purpose of protection from the savage Indians during the construction of the C.P.R. and for the same benefit to the settlers which would follow after the railroad. The force had so impressed the Indians that there was little trouble with the different tribes, save that of Sitting Bull, a chief from the United States, who was known as the outlaw chief.

During the rebellion of 1885, the police became soldiers and police as well. At the first stampede into the Yukon, they entered that territory and were mainly responsible for enforcing the law there. It was there that they got their name, he said, and became noted for their high standard of efficiency. Michael O'Leary V.C., was a member of the force. Another achievement was the handling of the Winnipeg strike immediately after the war, when it had been apparently a lost cause. Recently the name of the force had been changed to Royal Canadian Mounted Police and the duties increased in proportion. Instead of operating only in western and northern Canada, they now operate throughout the entire dominion.

The tenth speaker was Miss Helen Thomas, winner of the third prize. She spoke on the C.P.R., mentioning how it had been planned by the Fathers of Confederation, a coalition government. At that time there were only four of the nine provinces included in the Dominion, but provision was left for the others to join. British Columbia entered in 1871 with the promise of a railway. When the Macdonald party returned to power in 1878 the promise was almost fulfilled, but British Columbia would not be satisfied with the arrangement for two gaps connected by wagon roads. One was across the North Shore and the other through the Rocky Mountains.

The stock for the initial company was mostly sold in England, the first lot at par, and the second at 52 per cent. The road was finally completed in much less than the specified time and showed a complete victory over what had appeared impossible. There had also been trouble with the Indian uprisings, but the road now stood as a factor of Canadian power and strength.

Bernard Crosson, the last speaker, spoke on the United Empire Loyalists. From the time they had arrived in the Bay of Quinte, close to where the city of Belleville now stands, they had been an asset to both Canadian life and Canadian character, he declared. They had surmounted the barriers caused by their privations in the wilderness and had displayed remarkable resourcefulness. The British North American Act had been made necessary by their settlement in Upper Canada. Theirs was a most romantic story, and from their veins came some of the best blood of the land.

Racked by Rheumatism

"Fruit-a-tives" Brought Speedy Relief

MR. S. FLOYD.

Read this honest letter:

Nanaimo, B.C.—"I had been suffering with rheumatic pains in my shoulders. Decided to try 'Fruit-a-tives.' In a very short while I had relief. Also had a touch of bleeding piles, 'Fruit-a-tives' worked like a charm. I think they are really marvellous."

—Mr. S. Floyd.

"Fruit-a-tives" is composed of fresh fruit juices intensified and combined with tonics. The easy, natural action corrects constipation, stomach, kidney and bladder troubles, rids the system of poisons, purifies the blood, and banishes rheumatism and kindred pains. "Fruit-a-tives" is sold everywhere. 25c and 50c a box. Test it—to-day.

FEARED TWO MORE NAMES

(Continued from Page 1)

The great house in Mayfair where Lord Inchcape, her father, lives, is without any news whatever of her. Yesterday her parents, who are visiting in Egypt, welcomed Princess Mary and Lord Lascelles to Port Said.

He added a belief that it was yet possible for the plane to have enough petrol left to complete the journey.

At midnight a member of the household staff at the Inchcape residence said:

'We now have no doubt that Miss MacKay is aboard the plane and we are very anxious."

Ready at New York

NEW YORK, March 15 (Canadian Press).—Every possible preparation was made at Mitchel Field, Long Island, last night for the arrival of the trans-Atlantic monoplane, Endeavor, but army aviation officials acknowledged they had little hope that the plane would arrive.

The landing lights were ordered kept burning all night and fifty soldiers were assigned to remain under arms to police the airport in the event that Captain Walter Hinchliffe and his companion, generally believed to be the Hon. Elsie Mackay, should arrive.

The Endeavor took off in England for an attempt to fly the perilous Western air lane to America at 3.. Eastern standard time, Tuesday morning. Enough gasoline was carried to keep the plane in the air, under normal conditions, only until seven o'clock last night.

The Endeavor's cruising speed was 100 miles an hour and it was expected to reach Newfoundland about dawn yesterday. But after its take-off, not one definite report was heard of its progress. No liner saw anything of it, and watchers in Newfoundland scanned the skies all day in vain.

Before the Endeavor set out, other planes had attempted the Western passage, but none had ever succeeded and five persons, one a woman, had paid for their daring with their lives.

The expedition was sponsored by Miss MacKay and was shrouded in the greatest secrecy. Associates of Hinchliffe explained that this was necessary because Miss MacKay, herself an experienced aviator, feared that if her father learned of her plan to fly the ocean, he would not permit it.

As the hours passed in which reasonable hope could still survive, vague reports began drifting in from Newfoundland of a plane heard at night. But these reports came from parts so widely separated and at times so conflicting that little credence was placed in them.

The one hope felt for the fliers last night was that they had landed either near a ship unequipped with wireless or somewhere on land where communication with the outer world is slow.

Sinclair in London

LONDON, March 15 (Canadian Press).—Major Gordon Sinclair arrived late last night at the Hinchliffe suburban home to wait with Mrs. Hinchliffe and Mrs. Sinclair for news of the fliers.

MAY BE IN IRELAND.

BELFAST, Mar. 15. — (Canadian Press.)— The possibility that Capt. Hinchliffe may not have been able to get far out to sea because of a snow storm raging when the plane passed over Ireland on Tuesday has been advanced here. The civic guards of Kerry and Cork are on the alert.

SUNSET SOAP DYES

ON THE IMPORTANCE OF READING DIRECTIONS

Please, ladies, read the Direction Sheet which is included in every package of Sunset Dyes—and read it carefully. Guessing doesn't get one anywhere. And guessing in home dyeing is apt to bring disastrous results.

The Sunset Direction Sheet is simply and clearly worded. You will have dependable and beautiful results if you read it through *before* dyeing your material.

The process of *making* Sunset Dyes is scientific and protected by patents; but the process of *using* Sunset is *simple* and *everyone* can use it.

Do not trust expensive fabrics to ordinary dyes—use Sunset and you'll be glad you did so.

Sunset is quick, clean and easy to use—dyes silk, wool, cotton, linen (and mixtures of these fibres) all in one dye bath. And the color is fast.

Read the Direction Sheet—not only is it important but there are points of interest in it too.

OBITUARY

JONATHAN BARLOW.

HAVELOCK, March 15.—The death occurred at the residence of his daughter, Mrs. George Frost, Frankford, on Sunday, March 11, of a former highly respected resident of the village, in the person of Jonathan Barlow.

The remains were brought here on the afternoon express on Tuesday for burial. The service was held in the United Church and was conducted by Rev. W. R. Archer. Interment was made in Maple Grove Cemetery. The pall-bearers were his four sons, Messrs. John, James, Jesse and Robert Barlow, and two sons-in-law, James Beatty and George Frost.

The deceased was in his 91st year, and had continued in good health until a few days before his demise, when he contracted a cold. He was born in Belleville, and his wife prede ceased him eighteen years ago.

There are left to mourn his loss eight daughters and four sons, all of whom attended the funeral but two daughters in the West. They are: Mrs. J. McLean of Brandon, Man.; Mrs. M. Mason, Killarney, Man.; Mrs. W. Cooper of Thomasburg; Mrs. D. Kennedy of Kingston; Mrs. J. Burkitt of Bonarlaw; Mrs. J. Beatty of Trenton; Mrs. W. Rombough and Mrs. G. Frost of Frankford; James of Kingston; Jesse of Bonarlaw; Robert of Toronto, and John of town. One sister, Mrs. Watson, resides at Donajiac, Mich.

Those from out-of-town who attended the funeral: Mr. and Mrs. D. Kennedy, Mr. Alex. Kennedy, Miss Viola Kennedy and Mr. and Mrs. Jas. Barlow of Kingston; Mrs. C. Timmerman of Smith Falls; Mrs. J. Neal, Mr. and Mrs. J. Eastwood, Mr. George Rombough, Mr. and Mrs. W. Barlow, Mr. M. Barlow, and Miss M. Barlow of Bonarlaw; Mr. and Mrs. George Frost, and Messrs. Cecil and Thomas Frost of Frankford; Mr. and Mrs. J. Beatty of Trenton; Mr. and Mrs. John Clark, and Mrs. W. Cooper, Thomasburg; Mrs. A. Young and Mr. Jonathan Barlow of Belleville; Mr. and Mrs. T. Warren of Marmora.

Quick as a Flash it stops the Cough

UNTIL you've tried it, you cannot realize how *quickly* Buckley's Mixture relieves any Cough. The very first dose of this delightful, different remedy stops a spasm of coughing—and there are 40 doses in a 75-cent bottle! Children like it—and so will you.

Just say "Buckley's" to any druggist, and he'll hand you a *guaranteed* remedy that has, for years, been giving positive relief to sufferers from Coughs, Colds, Bronchitis, Irritated Throats, Whooping Cough or Croup. Try it today.

CANADA BROKE OFFICIAL TRADE RELATIONS WITH RUSSIA BECAUSE SOVIET HAD NOT KEPT PROMISE

Matter Disclosed in Documents Tabled in House at Ottawa.

DESCRIBED IN DETAIL.

Documents Comprised of Telegrams, Letters and Several Resolutions of Protest.

OTTAWA, Ont., March 15 (Canadian Press).—Canada broke off official trade relations with the Soviet government in May, 1927, because of a conviction in the minds of the Canadian government that the Soviets had not fulfilled their promise to refrain from hostile action against the institutions of the British Empire. This is disclosed in the documents tabled in the House of Commons yesterday dealing with the quarrel between Great Britain and Russia, which resulted in the British government and Canada breaking off relations with the Soviets. The documents bring out that the British government drew attention to the fact that the terms of the Russian agreement of 1923 in relation to the United Kingdom would not necessarily terminate the operation of the agreement as between Russia and Canada. But it was suggested by Mr. Amery that "uniformity of action by the various members of the Commonwealth concerned would present great advantages."

The documents are voluminous comprising 20 telegrams, 6 letters, 4 despatches, several resolutions of protest from Canadian bodies—the Independent Labor Party of Canada, the Sinn Fein Club of Toronto, the Workers and Farmers of Central Ontario—blue books and white papers issued by the British Government.

Given in Detail

The entire situation is gone into in great detail. The documents show that on February 23, 1927, the British government was contemplating sending a note of protest to Moscow on the continued propaganda in violation of the 1923 agreement, and this protest is enclosed. The Soviets are requested to refrain "from interference with purely British concerns and to abstain from hostile action or propaganda against British subjects."

Sir Austen Chamberlain's note to M. Rosengloz, Soviet trade commissioner in London, is enclosed, together with the reply of Maxim Litvinoff.

Subsequently the raid on the Arcos trading concern at 49 Moorgate, London, took place and the details of this are given exhaustively. The famous photostat room conducted by Robert Koling, at one time engaged in carrying on illegal Communist agitation as a member of the Red Union of Sailors is described, as also are the documents found there.

Several communications were interchanged between the Canadian and the British governments, and the home government were informed on May 26, 1927, that Canada had decided to terminate official relations for the reasons already given. Longin F. Gerus, Russian trade commissioner in Montreal, was instructed to remove himself and office, and his request for a reconsideration of these instructions was not acceded to.

WAITS 15 YEARS TO EAT FRIED ONIONS

"After 15 years I eat anything I want—even fried onions. Adlerika ended gas and sourness, and I enjoy life now."—Mrs. L. Branton.

Just ONE spoonful Adlerika relieves gas and that bloated feeling so that you can eat and sleep well. Acts on BOTH upper and lower bowel and removes old waste matter you never thought was there. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. McDermid & Jury, E. L. Payne, and McDermid Drug Co.

Obituary

MRS. E. NORTHEY

STIRLING, March 15.—Word was received by relatives here of the death of Mrs. E. Northey, only daughter of Mr. and Mrs. Harford Sine, Toronto, after a brief illness.

ROBERT GIRDWOOD

STIRLING, March 15. — Death claimed another of Stirling's older citizens when Robert Girdwood passed away on Monday morning at the age of seventy-three. He had been in poor health for the past three years, having undergone an operation at that time. Mr. Girdwood had resided here all his life, being one of the firm of Girdwood Brothers, wagon makers, who succeeded their father in an old-established business.

He was a member of St. Paul's United Church and leaves a widow, two sons and a daughter, also a sister, Mrs. George Wilson of Chicago, and a brother in Trenton, to mourn his loss. The funeral was held in St. Paul's cemetery on Wednesday afternoon.

DEVASTATION OF SPRUCE BUDWORM

One of the serious enemies of the balsam fir in the forests of Eastern Canada in recent years has been the so-called spruce budworm (Cacoecia fumiferana). The larvae of this insect have been responsible for the defoliation and subsequent death of immense stands of balsam fir and spruce, the greater damage apparently being done to the fir. Strenuous efforts to control this pest have been made for many years by the Canadian departments of Agriculture and the Interior, including last year the dusting of infested areas with insecticide from aeroplanes.

True Bill Returned Against Aged Ma

BROCKVILLE, Ont., Mar. 15. (Canadian Press.) — After two hours' deliberation the Grand Jury at the spring assizes of the Supreme Court, which opened here yesterday with Mr. Justice Logie presiding, brought in a true bill for murder in the case of Walter H. Percival, the 75 year old Burritts Rapids man, charged with having shot his neighbor, Frank J. Auger, a barber, in February following a dispute over the closing of a gate. The accused was arraigned and pleaded not guilty through his counsel, G. A. Styles, K.C. ,of Cornwall, and T. K. Allen, of Kemptville. W. H. Williams, K.C., of Pembroke, is acting as Crown prosecutor. Hearing of evidence in the case will proceed at 9 o'clock to-morrow morning.

IF YOU ARE THIN, WEAK AND NERVOUS

Try This New Home Treatment Without Cost Unless Satisfied

$1,000.00 REWARD FOR FAILURE ACCORDING TO GUARANTEE

No matter what your age may be or how many treatments you have tried without success, don't get discouraged and think your case is hopeless—until you have tried the amazing new 20-day Erbac treatment!

Double Strength Erbac, endorsed by Doctors and praised by hundreds of grateful users, is a special private formula designed to build life-giving, age-defying Nerve Force, abundant Vitality and solid, healthy flesh. Its action is direct and positive and should not be confused with ordinary tonics or "so-called" body builders.

And, in order that you may prove its value, without risk or obligation—here's the amazing Erbac offer! If you are thin and weak, easily tired, nervous and rundown; if you can't sleep nights; if you lack the ambition, energy and actual strength to accomplish the things you would like to do—go now to Bond's or your druggist and get a package of Double Strength Erbac, take it regularly according to directions for the full 20 days and if you are not pleased with results, you can have your money back.

GUARANTEE: The Woodward Products Co., London, Ontario (distributors of Double Strength Erbac) offers $1,000 reward to any dissatisfied user who can prove they refused to live up to their money back if not satisfied guarantee.

Steamer Was a Mile And Half Off Course

BOSTON, Mass., Mar. 15.—(Canadian Press.) — Testimony that the Eastern Steamship Company's steamer Robert E. Lee was about a mile and a half off her course when she struck Mary Ann Rocks off Manomet Point last Friday night was given by Captain Garland W. Robinson, of the Lee, yesterday. He was a witness at a hearing before Captain Herman T. Parker, and Inspector John Stewart, United States' steamboat inspectors.

The steamer's usual course in going from Boston to New York, Robinson said, was three quarters of a mile outside the Mary Ann gas buoy.

"I can't quite understand," he said, "how I got in that far."

Voice of the People

Letters to be printed in the Voice of the People column must be received at The Examiner Office on the day before it is desired to have them published.

THE TRENT WATERWAY EXHIBIT.

Hastings, Ont

News Editor, Peterboro Examiner,
Peterboro, Ontario.

Dear Sir:

Some one in Peterborough, in a public speech, recently deplored the location given our Trent Waterway Development Association Exhibit recently held in New York City at the National Motor Boat Show which was a marked success. We were most favorably received and every courtesy possible was extended to us by the secretary, Mr. Hand, and the management generally. This we appreciate very much.

We were given free floor space in the Educational Department on the third floor. Our location was not just what we desired, but we could not object too much when it was free. We understand a site we would have selected for ourselves would have cost us from $400 to $800. We had a corner space about 30 x 15 feet, well lighted and ample aisle room.

Our exhibit was quite attractive and was well received, as was evinced by the crowds of interested enquiring people that constantly crowded about asking questions of every description, which with the assistance of our worthy secretary-treasurer, Mr. Frank Stinson, we were always able to answer.

We feel very much indebted to The Peterborough Chamber of Commerce for arranging to have Mr. Stinson go down and put the exhibit over in the splendid manner in which he did.

The daily paid attendance to the Motor Boat Show was 22,000 people. From this you can readily see the vast amount of people we were daily coming in contact with, and we are quite safe in saying that only interested people would come and pay the admission. On the whole it was a wonderful show and much direct benefit must eventually come from our efforts. We feel satisfied our good people in Central Ontario, and we hope more particularly in the Kawartha Lakes district, will, this coming summer, feel they have been compensated in a great measure for the money they have paid our organization, which made it possible to put on the exhibit we did. In my opinion there is no money spent in publicity work that is returning more real value than the money spent by our organization. Every dollar put into the organization goes for publicity purposes—our only paid official is our secretary-treasurer.

Ours is the only organization of the kind in Central Ontario that is doing anything in the way of advertising to the world our wonderful tourist advantages and our wonderful playground possibilities. There is no other sheet of fresh water connected up as ours is, covering a length of 250 miles that has such beautiful scenic advantages, boating and fishing advantages and restful, invigorating conditions as we find in the Kawartha Lakes district. We are proud of it and are proud to tell the world, and our American cousins to the south of us are waiting to be directed to just such place. They will come here, and when they do come we want to have even more attractions than scenery. We have our fishing, which is unequalled any place, but we must conserve it and must not permit the slaughtering of fish, which has been going on this winter, to continue. We are, however, told that the Department of Game and Fisheries is drafting legislation that will take care of this condition. Our fish, and that means pickerel, will be protected in the future. For the further safety and propagation of our fish, sanctuary zones should be reserved for the further protection of the small fish and during spawning season.

Let us all co-operate and endeavor to make the Trent Waterway district Canada's greatest playground and tourist resort.

Yours very truly,
WALTER POWLDS.
President, Trent Waterway Development Association.

CONGRATULATES MR. DENCH.

To the Editor:

Allow me to congratulate Frank Dench, of Lakefield, for his achievement of the O.A.C. 144, at the Seed fair, at Guelph. You will note in the special prize for the best decorated sheaf of oats at the Peterborough Exhibition, judged by a standard of points, the 3rd prize went to Dench. The scale of points was as follows:

1st, Carl, Fraserville—Victory variety: Grain, 40; straw, 20; decorations, 19; neatness, 19; total, 98. Prize, $5.

2nd, Helson, Warkworth—Empire variety: Grain, 39; straw, 19, decorations, 18; neatness, 18; total, 96. Prize, $3.00.

3rd, Dench, Lakefield—O.A.C. 144 variety: Grain, 38; straw, 18; decorations, 19; neatness, 19; total, 94. Prize, $2.00.

So much for Peterborough Exhibition of agricultural products, second to none in Ontario.

I have sent the results of this competition to Prof. Squirrel at the O.A.C. so that he might see the necessity of getting behind the best results for the farmers regardless of the O.A.C. or the Svavoloff School, Sweden, which is the best pure seed school in the world.

Thanking you, I remain,
Yours truly,
W. H. MERRILL.

ECZEMA BROKE OUT IN RASH

Child Very Cross and Fretful. Cuticura Heals.

"When my little sister was four months old eczema broke out in a red rash which later formed blisters. It itched and burned causing her to scratch. She was very cross and fretful, and used to lay awake half the night. The trouble lasted six months.

"A friend recommended Cuticura Soap and Ointment so my mother purchased some and after using five boxes of Cuticura Ointment and three cakes of Cuticura Soap all signs of the trouble disappeared. She was healed." (Signed) Mrs. Thomas Canning, Clarksville, N. S.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample Each Free by Mail. Address Canadian Depot: "Potterain, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Loosen Up That Cold With Musterole

Have Musterole handy when a cold starts. It has all of the advantages of grandmother's mustard plaster without the burn. You feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief.

Made of pure oil of mustard and other simple ingredients, Musterole is recommended by many nurses and doctors. Try Musterole for bronchitis, sore throat, stiff neck, pleurisy, rheumatism, lumbago, croup, asthma, neuralgia, congestion, pains and aches of the back or joints, sore muscles, sprains, bruises, chilblains, frosted feet, colds of the chest. It may prevent pneumonia and "flu."

The Musterole Co. of Canada, Ltd. Montreal

MUSTEROLE
WILL NOT BLISTER

Better than a mustard plaster

AN OLD RELIABLE

Spring-time Medicine

Molasses, Sulphur and Cream of Tartar

It cleans the blood and relieves that tired feeling. This is that old-time remedy that grandmother used to make. Put up in convenient jars and maxide in the proper proportions to give the best results.

WOMEN'S PAGE

PERSONALS

Miss Marjorie Sayles of Millbrook, who has been employed here in the office of the Nashua Paper Co., has accepted a position with the Wood-Gundy Co., stock brokers, Toronto, and left on Sunday to assume her new duties.

• • •

Mr. J. McNabb has returned from a business trip to Montreal.

• • •

Mrs. R. T. E. Hicks-Lyne held a delightful post-nuptial reception yesterday afternoon at her residence at 530 Gilmour Street. She was assisted in receiving by her mother, Mrs. D. M. Neeve of Toronto and her two bridesmaids, Mrs. W. G. Barker and Miss Dorothy Neeve of Toronto. Mrs. Hicks-Lyne wore her wedding dress of white satin with a corsage bouquet of roses and lily of the valley. Mrs. Barker and Miss Neeve were in their bridesmaids' frocks of pink lace and net with hats of pink trimmed with choux of velvet. Tea was poured by Mrs. W. M. Cruthers and Miss Winifred Hicks-Lyne of Toronto, assisted by Mrs. L. M. Scott, Mrs. D. Lawrie, and Miss M. Hatton. The table was charming with a large silver bowl of spring flowers and pink candles in silver candlesticks. The reception room was done with pink roses.

• • •

A delightful St. Patrick's tea was held at the home of Mrs. M. Sauer, Park Street, yesterday afternoon, under the auspices of the Rotary Annes. The guests were received by Mrs. Sauer, assisted by Mrs. Gerald McClelland, while little Katie Bell Sauer, charmingly attired as an Irish colleen in a green and white dress, attended the door. Mrs. D. H. Thompson was at the entrance receiving the collection in a tall paddy green hat. The guests were ushered to the tea-room by Mrs. J. W. McDermid. The table was very attractive with a Madeira lace cloth, green candles in silver candle-holders, and a silver basket of daffodils and tulips. The room was decorated in St. Patrick colors. Mrs. A. L. Killaly poured tea and assistants in the dining-room were Mrs. Gerald Wood, Mrs. Claude Rogers, Mrs. R. Harding, Mrs. J. Gillespie and Mrs. J. H. Seels. The program consisted of vocal solos by the Misses Alma Blanchard and Bertha Hill, and Mr. Douglas Carlisle, and a fancy dance by Sophie Yeotes. Miss Gwen. Donley acted as accompanist.

• • •

Messrs. Gerald Collins and Earl Waterman, both of Romaine Street, spent a few days in Belleville last week, the guests of the former's cousin, Mr. James McAvoy, Octavia Street.

• • •

Mr. W. Blackwell spent yesterday in Toronto.

• • •

Messrs. Selkirk and Elliott, local Durant dealers, entertained at the Downyflake last evening at supper for the delegates to the Durant Motors convention here from Eastern Ontario district. The twenty guests were welcomed by Mr. Charles Elliott, Mr. Selkirk acting as toast-master for the occasion. Brief speeches were made by P. J. Duggan of Toronto, sales representative for the district; Howard Moore of Toronto, service manager; Mr. E. S. Martin, manager of the local branch of the Bank of Montreal; Mr. David Leach, who bought the first Durant car in the city; Mr. Arthur Metheral, who bought this year's first model, and Mr. Daniels, Durant dealer of Fenelon Falls, who moved the vote of thanks to the hosts. The decorations of the table were very attractive, and were appropriate to the occasion and the season, the centre being a tiny automobile, surrounded by shamrocks.

• • •

Mr. and Mrs. R. C. Heard announce the engagement of their daughter, Pauline Grace, to Lionel F. Lipsett, son of Mr. and Mrs. George Lipsett—the marriage to take place quietly the early part of April.

• • •

A very successful Irish Tea was held at the home of Mrs. Fred Elliott, 303 Rubidge Street yesterday afternoon, under the auspices of the Prince of Wales Home and School Association.

• • •

The guests were received by Mrs. Elliott assisted by Mrs. G. L. M. Kirkwood, president of the Home and School Club.

• • •

Mrs. George Worboy ushered the guests to the tea-room which was attractively decorated in appropriate green color. The table was lovely with a Cluny lace cloth with sprays of shamrock, and a silver basket of carnations. Green candles were in silver holders. Mrs. R. J. Murduff and Mrs. J. Wilson poured tea. The guests were ushered to the tea room by Mrs. A. McWilliams, Mrs. C. Wiley, and Mrs. Fisher, and assistants were Mrs. S. Watson, Mrs. W. Howe, Mrs. H. L. Watts, Mrs. Harold Wilson, and Miss B. Wilson. The program, which was arranged by Mrs. George Rowe and Mrs. Knott, a fancy dance by Audrey and Maxine Elliott, small daughters of the hostess; and instrumental numbers by Verna Huffman, Howard Botnick, and Allen Austin.

• • •

Miss Kathleen Cavanagh, R.N., of Detroit, Michigan, is at home, nursing her mother, Mrs. D. Cavanagn, Perry street, who is seriously ill.

• • •

Mr. Patrick Conroy of Otonabee is celegrating today the seventy-sixth anniversary of his birth.

• • •

Mrs. Mathieson of Havelock and Mr. Giddy of Port Hope were in the city yesterday for the Durant Motors convention of representatives in the Eastern Ontario district.

• • •

Miss Margaret Davidson, daughter of Venerable Archdeacon and Mrs. Davidson of Toronto, is being married in Karachi, India, to-day, to Captain J. O. L. Mason, 2nd Punjab Regiment, son of Canon and Mrs. Mason of Toronto. A cable has been received by the bride's parents, announcing Miss Davidson's safe arrival in India, where she has been a guest of the Padre and Mrs. England, at Karachi. The marriage is taking place in Holy Trinity Church and Captain and Mrs. Mason are going to Mount Abu for their honeymoon.

• • •

Mr. and Mrs. W. J. Telford of Bridgenorth are in Toronto, called there by the illness of their daughter, Miss Ferne Telford, who recently underwent a serious operation at Toronto General Hospital. Friends will be pleased to learn that the operation was successful and that Miss Telford is progressing favorably toward recovery.

• • •

Alvin King, who sustained a broken leg while playing recently at the Queen Alexander School, has been removed from Nicholls Hospital to his home at 210 Antrim street.

• • •

Mrs. Carl McLean, Downie street, is visiting friends in Buffalo, N.Y.

• • •

Mrs. J. B. McIntosh and baby Eleanor, of Toronto, spent the week-end with Mrs. J. N. Watson, Chambers street.

• • •

A very enjoyable progressive euchre party was held at the home of Mrs. J. Bradley, 299 Sherbrooke Street, on Tuesday evening, under the auspices of Vimy Ridge, L.O.B.A. Lodge. Nine tables of cards were played, first prizes being won by Mrs. White and Mr. George Porter; consolation prizes going to Mrs. Chambers and Mrs. Bradley. The aggregate prizes for the season were also presented, Mrs. F. Millard winning the high ladies' score, and Mr. George Porter the gentleman's prize. The lucky number prize went to Mr. Ball. Dainty refreshments were served by the hostess assisted by her two daughters, and the social committee composed of Mrs. G. Foster, Mrs. P. Campbell, and Mrs. S. Ferguson. Among those present were Mesdames P. Campbell, G. Foster, S. Ferguson, Among those present were Mesdames P. Campbell, G. Foster, S. Ferguson, Childerhose, E. Women's Ills Often Yield To 48 Hour Test

Thousands of women who suffer from disturbed sleep, bladder weakness, burning or itching sensation, backache or leg pains would be delighted if they would only make the simple, Cystex 48 hour test.

Just step into any drug store and ask for Cystex. Put it to a 48-hour test. If you soon feel like new, full of pep, able to sleep soundly with pains alleviated it will cost you only 60c, otherwise nothing.

Don't give up. Don't wait. Feel better tomorrow. Learn the joy of healthful living. No need to risk a penny on unproved things because you are the sole judge of your satisfaction under the Cystex legal, binding, money back guarantee.

DRESS
By MARY MARSHALL

The backward tilt has taken the place of the debutante slouch and the panther glide—at least among the mannequins. The one sketched here is wearing a sand colored crepe de chine frock with a scarf yoke in a darker shade.

For every age and every year or season of the age there is some favorite posture or manner of walking. And if you could once understand the reasons for the various changes of fashion in these matters you might understand a good deal of the psychology of the various periods to which they belong.

In one epoch women take quick little mincing steps, fluttering as they go—at another time they glide and the greatest compliment you may pay them is that they appear to go from place to place like goddesses without actually walking at all. At another time the ideal gait is something like that of a panther. First they hold themselves with chests amazingly high like pouter pigeons—then they affect the kangaroo bend and later they slouch along as if no one had ever been taught to stand with heads erect, shoulders back and chins up.

Usually these various changes come about so gradually that a new walk or posture is actually upon us—we ourselves are even conforming to it—before we realize that there has been any change at all.

For some time I have been impressed with the fact that the French mannequins held themselves with considerable more erectness than women in this country. But it was not the erectness of former years. In fact, there was a sort of backward bending that gives the effect of increased development to the upper part of the back.

And gradually the fashion for this new sort of erectness has been gaining ground. Well, it may not be the gymnastics instructor's idea of a perfect posture but it is a whole lot better than the debutante slouch of a few years ago that made our young girls look as if they were trying to see how completely they would contract their lungs.

What Your Want In the WANT ADS

HERE'S TO YOUR HEALTH

BY DR. McCOY

PREVENTING BALDNESS

If a man's or a woman's hair loses its luster and becomes thin at forty, or if it starts turning gray or begins falling out, it is a sign of general body degeneration.

Everyone wishes to keep as attractive an appearance as possible, and, although there is nothing repellent about a clean bald head, it can certainly not be considered a mark of beauty. The main point to remember however, is that falling hair is a sure sign of failing health and a warning which can be observed in many cases many months and even years before an impending serious disorder develops.

The best way to check failing hair-health is through properly regulating the diet. All devitalized food must be avoided, and an increase made in the use of the tissue building foods containing the valuable hair-building minerals.

One who wishes to get the quickest results from changing to these vital foods will do well to start off by giving the body a chance to cleanse itself of any accumulated toxic wastes. A few days on a fruit diet will be very helpful at the start. The good effect of this will not be apparent for several weeks, but as the blood is enriched by the new diet there will be a slow but sure change as the hair becomes stronger and more abundant.

I believe that a great deal of good coming from this fasting and diet treatment is because of the change made upon the ductless glands. Old age and degenerative diseases probably have their beginning from a lessening of the normal functions of these glands because of injury to the glands from the effects of an over-abundance of toxic poisons. As these are freed from the system through a blood-cleansing and blood-building diet, the glands are then able to perform their normal functions. This surely has an effect upon the growth of hair.

The tone of the whole body as well as the health of these glands is influenced by systematic physical culture. Calisthenic exercises should be taken twice daily so as to exercise every muscle of the body. This is even more important at middle age than it is during growing youth.

At the same time that the diet is corrected, and the increased physical exercise is taken, every measure should be used to increase the circulation of blood to the hair roots. Frequent combing and brushing of the hair, with clean comb and brush, is stimulating to the scalp. Pulling the hair and massaging the scalp with the fingertips is also helpful.

It is important to keep the scalp as clean as any other part of the body. During the first part of the treatment it is a good plan to wash the scalp thoroughly each day with soap and water, rinsing the hair carefully so as to remove all traces of the soap. After the hair is thoroughly dry rub in a small quantity of cocoanut oil or almond oil. Massage well into the scalp.

An excellent treatment I have found very effective for bringing a surging supply of blood to the scalp is to treat every place where the hair is thin with the application of ice. Hold a piece of ice directly against the spot and allow it to remain for a minute or two, or until it no longer feels cold, which will be when enough blood has come into the parts to protect against the cold of the ice. Use this treatment each day before the hair is washed. Keep up the washing and ice treatment for a week or two at first, then about every other day. The combination of dieting, exercising, and local treatments is bound to produce good results in the cultivation of more abundant and luxuriant hair.

Questions and Answers.

Question J. G. F. asks "What causes a person to jump rather violently several times just before getting to sleep? This is a nightly occurrence with me."

Answer These jumping symptoms are doubtless due to some kind of nervousness. Search to find the cause of the nervousness; which you will usually find in wrong habits of eating, and destructive habits of thought.

Question Mrs. W. B. W. writes "You say in an article that the patient suffering from nephritis may have a little lean meat. Will you please print a list of the lean meats he may have?"

Answer The leanest meats are beef and mutton. Fish, chicken, turkey and rabbit may also be used in place of these other meats.

Question M. I. F. writes "Will you please advise what I should do for my little boy two and a half years old, weighing thirty pounds? He has no desire to eat at all and at mealtime I have to force him and then he takes very little at that. I give him cod liver oil three times a day. He is very pale and rather dark under the eyes. Would it be worms? Kindly tell me the symptoms and how the child would act."

Answer Give your child a fruit diet for a few days. Let him select any one kind of the acid fruits he likes and have him take nothing but this until he is hungry for regular meals. You can easily find out if he has worms by giving him a worm remedy which your druggist can supply. Leave out the cod liver oil for a while, as this may be spoiling his appetite for other foods.

AN OFFER to every housewife SEE

To-day fabrics are more fragile

THINK of the clothes in your mother's wardrobe—your grandmother's. To-day, women wear fewer clothes at a time, perhaps, but they need more of them. They change them oftener. The fabrics themselves are more fragile.

To give these pretty things the care they need, your first necessity is a fine laundry soap. One that you are sure about.

Be warned. To-day the *poor* quality of cheap soap is more difficult to detect—until too late. Never was there a time when the *certainty* of safety in laundry soap—its freedom from even the slightest possibility of harm—was more important than it is right now.

That's why Surprise Soap is the leading laundry soap of Canada. It cleanses thoroughly yet is pure and mild. Quick, rich, generous suds.

If your standards of cleanliness are higher than most people's, Surprise Soap will satisfy you and keep you satisfied.

Surprise Soap was first made in St. Stephen, N.B., 44 years ago on the policy that quality should be the first consideration.

This policy has never been altered and quality has improved with advancing knowledge, keeping pace with the modern requirements.

South Porcupine Puts Out Port Colborne Team

O.H.A. INTERMEDIATE CHAMPIONS LOSE AT TORONTO BY 4-0 SCORE

Port Colborne Crack Under Northerners' Body-checking Barrage.

5,000 FANS PRESENT.

N. O. H. A. Champions Meet Kitchener in Next Allan Cup Round.

TORONTO, March 15. — Cracking under the strain of a strenuous schedule which has forced them to play almost every second night for three weeks, and under a battering barrage of body blows in the present series, Port Colborne, champions of the O.H.A. intermediate series, were eliminated from the Allan Cup competition by South Porcupine at the Arena last night by a 4 to-0 count. Five thousand fans saw the climax of the most interesting set of engagements between the Northern representatives and the O.H.A. secondary titleholders in many years. The winners play Kitchener here Friday and Saturday.

It was the body checking of that sturdy little bands of North Countree hornets that sent the Lakesiders crashing down to a decisive defeat. In the first game of the series the Ports snatched a two-goal lead early in the opening period, but Allen Murray and his mates jolted the opposing attackers into submission, and came back to even the count at 2 to 2. Then the scene shifted to Niagara Falls for the second game. Again the Ports eked out a slim lead and again they were battered back and forced into a 1-1 deadlock.

Lead for First Time

The deciding game was set for last night, and it was not long before the striped Northerners gave indications that they were on the trail of victory at last. In the two previous encounters the Ports had forced the North Countree lads to fight from behind, but Murray turned the tables when he sent the Porcupiners into the lead midway in the first period. Again before the gong sounded the persistent hornets drove the puck into the Ports' citadel.

In the second period the Northerners twice swarmed over the Lakesiders' defence, and all was over but the shouting. The third period was little better than shinny. The Ports pressed gallantly, driving their wearied bodies into that jolt-studded Porcupine defence for twenty minutes, but not a goal rewarded their efforts.

DOG JUDGE.

Norman K. Swire a Canadian who is celebrated as an international judge of all breeds of dogs. He has officiate many times at the Westminster Kennel Club Show, New York, the Canadian National Exhibition and countless other fixtures.

RICKARD GETS MANDELL BOUT

Sign Contract For 15-Round Match at Polo Grounds.

ON MAY 17TH.

NEW YORK, March 15 (Canadian Press).—The promotorial battle of Tex Rickard and Jim Mullen for the right to stage a lightweight championship match between Sammy Mandell, the title-holder, and Jimmy McLarnin, Pacific Coast sensation, ended yesterday in a complete victory for the czar of Madison Square Garden.

While the flashlights of photographers boomed in Rickard's office and Mullen boomed threats of injunction suits in Chicago, the managers of both fighters signed a contract for a 15-round match on May 17, at the Polo Grounds here. The contract awarded Mandell 37½ per cent of the gate receipts, McLarnin 12½. Rickard believes the bout will draw about $200,000.

Inter-city dickering for the bout became heated following McLarnin's sensational one-round knockout of Sid Terris here several weeks ago. Mullen, who had Mandell's signature to a contract calling for a fight with McLarnin in Chicago, June 21, failed to tie the baby-faced Irishman to an agreement before Rickard gained an option on McLarnin's service. After weeks of negotiation, Rickard finally won the champion to his side when Mullen's constantly rising offers failed to lure McLarnin back to Chicago.

Eddie Kane, manager of Mandell, declared that he accepted Rickard's offer only when convinced that Mullen could not secure McLarnin's services. Mandell has a forfeit of $5,000 posted with the Illinois State Athletic Commission binding his June match for Mullen.

"Mandell will fight for Jim in June just as he agreed to," Kane said yesterday. "But there is nothing in our contract with Mullen that prevents the champion fighting here in May. I have the choice of fighting McLarnin here for Rickard or losing the shot entirely, so I made the only decision I could."

ST. MARK'S VENICE, RESTORED.

St. Mark's of Venice, Austria, is the first of the three national Cathedrals of Europe to be restored. The workmen have just completed their task of twenty years in making it safe for use. The cathedral was built in 1063 and decorated and faced with marble by the Venetians after the fall of Constantinople. The structure was very weak however and large cracks appeared in the wall. Workmen have been filling in the cracks, repairing the vault and replacing the damaged stones and mortar with concrete. The other cathedrals being restored are St. Paul's in London, and that at Mayence, Germany.

ELECTED PRESIDENT.

Lieut.-Colonel G. F. McFarland, who for the third time has been elected president of the Canadan Kennel Club.

McCoy's Puts Weight On Weak, Skinny Men

Hollows in cheeks—hollows in the sides of neck,—flatness in chest—why don't you do something to make yourself look like a real man.

McCoy's Cod Liver Extract Tablets puts on weight where weight is needed—not ony that but they build up your general health and you grow stronger, more energetic and get plenty of ambition.

One woman gained 15 pounds in six weeks.

McCoy takes all the risk—Read this ironclad guarantee. If after taking 4 sixty cent boxes of McCoy's Cod Liver Extract Tablets or 2 one dollar boxes any thin, underweight man or woman doesn't gain at least 5 pounds and feel completely satisfied with the marked improvement in health—your druggist is authorized to return the purchase price.

Ask McDermid & Jury, Bond's, Lynch's, Giles' Drug Stores, or any good druggist.

LARGEST LEAD AND ZINC DEPOSIT.

Much the greater part of British Columbia's lead and zinc is derived from the Sullivan mine at Kimberley, one of the world's largest known deposits of these metals, the output from which is practically all treated in the refinery at Trail.

BEWARE THE COUGH OR COLD THAT HANGS ON

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with two-fold action, it soothes and heals the inflamed membranes and inhibits germ growth.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the infected membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble, and checks the growth of the germs.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis, and other forms of respiratory diseases, and is excellent for building up the system after colds or flue. Money refunded if any cough or cold is not relieved after taking according to directions. Ask your druggist. Creomulsion Co., Limited, Toronto, Ont.

SMALL TOWN TEAMS MAY REACH FINALS

Trail and Destile Teams May Spring the Prize Upset.

REGINA, March 15.—Western Canada is slowly recovering from its biggest jolt of the current hockey season. After picking Fort William as certain finalists for the Allan Cup and conceding the club a bright chance of restoring the silverware to the Lake's Head, the railbirds of the west have been obliged to swallow a man-sized pill in the unexpected and dramatic eviction of the Thundering Herd at the hands of Manitoba University. The ignominity of the thing is every bit as disappointing as the fact that the Forts are through, for they were trimmed in the playoff for the championship of their own circuit without sinking the net for a single goal, after easily outstripping Varsity, Port Arthur and Brandon during the regular schedule. In a period of western playoff upsets, the elimination of the Thundering Herd capped everything in sight and romped off with the entire cake factory.

The Herd, having ceased to thunder, Western Canada fans are now asking one another which team will represent the wheat-growing belt in the cup classic in Ottawa later in the month. There is a general disposition to smile upon the chances of the Forts' conquerors, Manitoba Varsity, for having trounced Eddie Carpenter's all-stars, it seems quite reasonable that the "Studes" should be first in line for the trip east. On the other hand, however, a lot of the wise birds are lying low and saying nothing, for there is more than a remote possibility that the same unkind fate that has waylaid Fort William, the Regina Aces and the Vancouver Monarchs—(three of the west's best bets two months ago)—may trip the students up by the heels also and send either Trail, B.C., or Delisle, Sask., into the final bracket against the pick of the east. On paper, Varsity looks the best of the three clubs still surviving in the west, but in this month of hockey upsets anything is liable to occur.

Of the five western provinces that set out after the Allan Cup at the start of the winter, only Vancouver, Saskatchewan and Manitoba are still in the running. Alberta, represented by the mining town of Canmore, hit the skids in their far-western series against Trail, champions of British Columbia, and the crack squad from Thunder Bay went under to Manitoba Varsity without scoring a goal in two games. As the western playdown will see a process of elimination carried out in an easterly direction this winter, the Trail team will appear in Saskatoon next week to lock horns with Delisle, the champions of Saskatchewan, the winning aggregation will go on to Winnipeg to meet the "Studes." For the survivors of the latter series, upon which hinges the championship of the west, the cue will be given: "On to Ottawa!"

Never having witnessed the Delisle sextet play, local fans cannot say how far the provincial champions will go, but they have high hopes of hearing of a victory over the British Columbia representatives at the least.

PLAYOFF BERTHS ABOUT DECIDED

Canadiens, Maroons, Senators, Bruins and Rangers Sure of Place.

ONE OPEN SPOT.

TORONTO, March 15. — Tuesday night's N.H.L. results just about settled all disputes regarding play-off positions with the possible exception of third place in the American group. The Maple Leaf-Ottawa Senators 1-1 tie game here squelched the Leafs' chances of getting into the play-offs, and cinched the berth up there for Dave Gills' hired men Canadiens' 4-1 victory over the New York Rangers down in New York settled all questions as to which team would wind up on top of the Canadian group and, combined with Boston Bruins' 3-0 defeat of Detroit, gave Bruins a safe lead on top of the Sammy group. Montreal Maroons' 5-0 win over N. Y. Americans at Montreal, leaves them safely ensconced in second place in the Canadian group, but they have no hope left now of ousting Canadiens from the leadership. That means that they will be left in the same position as Canadiens were last season—the position of having to face a hard battling rugged team in the play off series with, if they win, a final series against the most brilliant team in the league. Last year Maroons battered Canadiens so badly in the semi-finals of the group that they were easy victims for the Ottawas in the finals for the group title. The only open spot now is for the third place in the American group.

Detroit lost to Boston and are now tied with Pittsburgh with 38 points each. Detroit has to face Canadiens in Montreal to-night, while the Pirates with a four day rest under their belts take on Boston in Pittsburg on Saturday night. Detroit has a mighty small chance of beating Canadiens the way they are going now, but the Pirates might turn the trick on Bruins.

QUICK PILE RELIEF

Dr. Leonhardt's Hem-Roid is guaranteed to banish any form of Pile misery, or money back. It gives quick action even in old, stubborn cases. Hem-Roid is a harmless tablet that removes blood congestion in the lower bowel—the cause of piles. It brings joyful relief quickly and safely or costs nothing. McDermid & Jury, Bond's Drug Store and druggists everywhere sell it with this guarantee.

HANKINS ON WAY TO LEAF CAMP

Leaf's New Detroit Acquisition Announces His Readiness To Report.

FISHER ON JOB.

ALBANY, Ga., March 15.—One by one, by train and motor, the Leafs are straggling into camp and before the end of the week Manager O'Hara is hopeful of being able to place two full teams on the field.

Among new arrivals was Clarence Fisher, submarine slinger, who is one of the dependables of the staff. The veteran lost no time in getting down to work, being the first on the field and the last to leave, although the session was of almost four hours' duration.

Fisher apparently has fully recovered from the effects of the accident which curtailed his activities last fall. It will be recalled that he broke a bone in his left arm as a result of a collision with another player in the last month of the season. The injured member has knitted well and is giving him no trouble.

Should Be Winner

Fisher is being counted upon to win a large percentage of his games this year. He didn't have a very good season last summer due to a hangover from the 'flu, and was just coming into his own when he was disabled. Fisher was one of the main reasons why the Leafs won the championship in 1926. He couldn't lose after Dan Howley secured him from the Bisons, and Billy Clymer had every reason to throw a fit or two when his name was mentioned.

Nothing has been heard from Rip Collins, but his running mate, Don. Hankins, is on his way to the camp. The former Newark pitcher, who was bought by the Leafs from Detroit along with Collins, got into touch with Manager O'Hara over long distance from Florida and conveyed the intimation that he would be on the job by today at the latest.

Fred Burchell, who had Hankins on his staff at Newark, is confident that he will have little trouble in convincing the sturdy right-hander that it will be to his own best interests to accept the Toronto club's terms.

With Hankins in line it is thought that Collins will not be slow in following the example of his pal.

Southpaw Recruit

Don. Songer, the left-hander who was turned over to the Leafs in the Faulkner deal by the Giants last fall, hasn't come along as yet, but Billy Martin, the stalwart southpaw from Pittsburgh, who has been on the Leafs' list since 1926, is here. He will be given a thorough trial. The youngster has quite a reputation gained in semi-pro ball around the Smoky City and comes highly recommended. He was signed by Dan Howley originally but refused to report because of the fact that he hated to pass up his banking berth. At his own request he was placed on the ineligible list. His suspension was lifted this spring and Martin will make a belated attempt to prove that he is good enough for Class AA company.

A VAST OUTLAY.

Bell Telephone Company Spent Eighteen Millions On Additions.

The Bell Telephone Company of Canada, in one item of its annual report, puts at $18,206,339 the 1927 expenditure for gross additions to its property in Ontario and Quebec—land, buildings, central office equipment, outside plant and subscribers' apparatus. Plans for 1928 will involve an outlay of more than 22 millions. This is said to be the largest continuous expenditure for extension of facilities made by any Canadian enterprise.

ALEX. IRELAND WINS EUROPEAN HONORS

Tommy Milligan Disqualified For Foul in Middleweight Championship Match.

EDINBURG, Scotland, March 15 (Canadian Press Cable). — Amazing scenes were witnessed here last night in Waverley Market when Alex Ireland won the European middleweight boxing championship from Tommy Milligan, the titleholder. Milligan fouled in the ninth round and was disqualified. He was well ahead on points when the bout was ended.

A queue a mile long formed outside Waverley Market hours previous to the start of the bout and the doors were closed an hour before it began, when 20,000 people were crowded inside. It is believed to be the only occasion when two Scots fought for a European title.

Milligan was shaken in the first round by a right to the jaw, but thereafter steadily outpointed Ireland, using uppercuts with telling effect. Milligan was cautioned in the first round for holding and when he floored Ireland with a body blow in the fifth for the count of nine there was an outburst of booing and cries of "foul." In the subsequent rounds the referee twice cautioned Milligan for hitting low, while the titleholder was steadily outboxing his opponent.

Ireland collapsed in agony when the final blow was struck and had to be carried from the ring. Milligan stood bewildered in his corner as the challenger was awarded the title.

ADMITTED THAT P.C.I. PLAYERS GOT RAW DEAL

Belleville Papers Very Frank About Doubtful Counters.

THAT WATER TRICK.

Unsportsmanlike and Small Potatoes Says Quinte Journals.

The Belleville papers are quite frank in admitting that the Peterborough Collegiate hockey team got a raw deal in the Interscholastic final the other night. The Ontario declares that it is doubtful whether one of the goals given to Belleville was scored and that it is nearly certain that Peterborough scored a goal that was not allowed. The Intelligencer also refers to the dubious nature of the goal umpire's decisions on two occasions ,and both papers condemn the unsportsmanlike conduct of those who were responsible for establishing a water and slush defence for the Belleville team in the last period.

Even this mean action would have done no harm had the Petes received justice in the matter of the goals scored. The correct score should have been 2 to 1 for Belleville instead of 3 to 0, and the P.C.I. would thus have won the round by one goal. It was a doubtful victory, and the Belleville students are welcome to all the satisfaction they can get out of a win that down in their hearts they know full well was undeserved.

The Belleville Ontario says:

The boys were lucky to cinch the round and on the play a tie on the round would have represented the game much better. It is doubtful whether one of the goals given to Belleville was scored and it is nearly certain that Peterborough scored a goal which was not allowed. The other two goals secured by Belleville were cleverly-earned and would have beaten any team. Another act which did not show the best sportsmanship although the students were not to blame happened at the end of the second period. A great deal of water lay on the east side of the rink and during the intermission some of the fans took scrapers and brought the water up to the west end of the rink in which Peterborough was using to get goals in the last period. Belleville had this end to score the three goals in the second period and the boys from the north expected with the fairly good ice to reduce the margin in their period, but was denied by a large amount of water on the ice which made the carrying of the puck a hopeless task.

The Doubtful Goals.

The second counter came midway in the period when a scramble took place in front of the Peterborough cage. The players were in a heap and when the players were untangled the puck was in the net. The goal umpire claimed a goal and it stood and the round was tied. It looked as if the goalies feet were in the net alright but that the puck was under his chest in front of the blue line. Midway in the third frame a scramble took place in front of Colling and Dunkerley drove a hard shot at the corner of the twine. Colling went to his knees, the puck lodging very close to the line. Another swipe was made and the Peterborough players protested the goal was scored. The goal umpire was firm that it was on the line and thus went the best chance Peterborough had to get back into the championship class.

The Belleville Intelligencer comments as follows:

The game was marked by disputes from the start. The second goal counted for Belleville was almost invisible, as the puck was found underneath the goalies paraphernalia. Whether he was beind the blue line is a matter of conjecture, but nevertheless the referee, Bill Green, upheld the goal judge's decision and the goal was scored. In the third period Peterborough kept up a constant fire on Colling and one of the shots struck his pads and he went down to make the save. He lost sight of the puck and in reaching down it appeared as though he went inside the blue line to pick it out. A howl arose from the Peterborough section when Bill Green disallowed the goal.

Bill Green handled a good game and kept a strict watch on off-sides. He had no other course to take in regard to the goals as he was not in a position to see either one of them while the goal judge appointed was directly behind.

It did not appear to be a sporting move at the end of the second period when some of the local supporters seized the ice scrapers and directed the water at the east end to the territory defended by the Belleville team.

Naturally this would make it hard for the Petes to carry the puck in to the goal. Small potatoes, some called it.

TRAVEL TOURIST third cabin to EUROPE and BACK $184.50 and up

CANADIAN RECORD HOLDERS

Outlucked, but they'll be back. Left is Lella Brooks, outstanding Canadian girl skater and holder of ten world's records, who is recovering from an illness which caused her defeat recently in the Canadian skating championships. Centre, Joe Wright, Jr., who lost the diamond sculls at Henley by an unfortunate accident but who is already in the shell preparing for the next Olympic sculling contests in which he hopes to win for Canada. At the right is Jimmy Good, aged 13, holder of more skating medals for his age than anyone else in the dominion. In the Canadian skating championship races in his class he forced M. Rowan, who out-ighed him sixty pounds to skate to a record to beat him. In many Canadian contests, young Good, who comes from a family of prominent sportsmen, has never been unplaced in indoor or outdoor races.

PUTS AN END TO BUNION PAINS

No Need To Suffer Another Day.

There is one simple yet inexpensive way to reduce inflammation of swollen toe joints and help get them down to normal and that is to apply **Moone's Emerald Oil** night and morning.

Ask Bond's Drug Store, C. M. Moncur, Bert McLeod, McDermid Drug Co. Ltd., McDermid & Jury or any first class druggist for an original two-ounce bottle of **Moone's Emerald Oil** (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces lasts a long time and furthermore if one bottle **Emerald Oil** does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of **Moone's Emerald Oil** at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal.

Bowling

A new high single score of 415 at the Duffus Alleys stands to the credit of Police Sergeant Arthur Thomas. The previous mark which he has boasted was 391. On the first six frames Sergt. Thomas ran off six strikes, dropped to a spare and then struck out. He is working the night shift at present and is off duty in the day time. The other afternoon by way of recreation he went down to the alleys with no other intent than getting a little exercise, and in his second game almost made the possible score of 450.

The Monday night group at the K.C. club shows the following scores: Pepe 52, Roach 22, Donovan 58, Hurtubise 28, Minogue 28, Daly 8, Merrill 26, Shaughnessy 46.

Monday night's scores were: Daly 8, Merrill 0, Shaughnessy 4, Minogue 4, Roach 2, Donovan 6, Hurtubise 2, Pepe 6.

Daly is the present league leader, and had been extending the gap in his recent games.

Comedy: "SHOULD A MASON TELL?"

THEATRES

AT THE REGENT.

STOVE PIPE WELLS IN "THE BRUTE"

Monte Blue and the Warner Bros. company, on a location trip through Death Valley, for "The Brute," came upon Stove Pipe Wells which is eighteen miles from the nearest water hole, and the place where the bodies of old John Le Moigne and his faithful bronco were found, a quarter of a century ago.

Le Moigne came to Death Valley as a prospector in '72 and discovered a silver deposit which made him fabulously wealthy. The love of the desert country and the towering snow-capped mountains—of silence and loneliness and the stars held him, and he wandered from end to end of the desert, always on the quest of something still to be located. He was eighty-five when he was found dead among the sand dunes of Stove Pipe Wells.

The sombre regions of the desert are locale for but part of this stirring picture of the Old West, many of the scenes being in the midst of the hills. Monte Blue plays the part of a quiet, sure-shot cowboy, known to his fellows as "Easy-Going" Randall, and, on occasion, as "The Brute."

The grimness of the desert scenes are offset by some taken in the foothills, others on the ranches, and in the wild lurid atmosphere of the oil rush days in Oklahoma. The photography is surpassingly good. The story is one of great dramatic power and the direction and cast are beyond criticism. "The Brute" will rank as one of the greatest Westerns ever filmed. It is truly deserving of that great title—epic!

The beautiful Leila Hymans is cast as the dance hall girl who is rescued by the Brute after the overcoming of many and terrific obstacles. Others in the cast are Claude Cook, Carrol Nye and Paul Nicholson. The play is an adaptation of the novel of W. Douglas Newton. Harvey Gates wrote the scenario and Irving Cummings directed "The Brute, now playing at the Regent Theatre.

IS HE GOOD OR WICKED?

"An Unknown Assassin," chapter two of the Pathe serial, "The Masked Menace," is an added attraction today to Saturday at the Regent Theatre. Though Faith Newton, played by Jean Arthur, quarrels with her grandmother and with Keats Dodd, played by Larry Kent, over reopening the old mill, work goes on regardless. And as they work to bring prosperity from ruin, Still Face sits before his crystal and turns a calm, beautiful and spiritual face to all. But, behind that placid mask, what hideous thoughs, what ghastly plans are formulating?

Hobby Show Features.

Championships in three games are to take place—1, Ping Pong; 2, Checkers; 3, Chess.

The directors of this department are Zimel Levine, Ross Gillespie, Bob Ross, Max Glover, Ted Nasimok, and Clifford Horn.

Regulations must be followed carefully. The rules for the Ping Pong are: Boys fifteeen years and under are eligible for one contest, and boys over fifteen for the other.

Boys sixteen years and under are eligible to enter the checker competition.

Boys any age are allowed to enter the chess competition. This is one of the outstanding features of this department. Hobby Show Certificates of Merit will be presented to the section winners.

To receive Departmental Medal winners must have played at least four opponents. Contestants will be notified of time of play.

Contestants will be notified through the press of the program which will take place at the show.

ST. JOHN'S W.A. STUDYING AFRICA

Monthly Business and Devotional Meeting Is Well Attended.

The Women's Auxiliary of St. John's church held their monthly devotional and business meeting on Tuesday afternoon, March 13. There was the usual large attendance. The chair was taken by the president, Mrs. A. W. Turner who, in the absence of the Vicar, the Rev. Dr. R. C. Blagrave, conducted the devotional exercises.

The Bible reading was taken by Mrs. F. M. Dela Fosse, who also conducted the literary study of Africa, which the members find very interesting month by month.

All branches gave satisfactory reports.

Observing the Lenten season no tea was served, but at the close of the meeting the members adjourned to the church, where the weekly Lenten service was held.

KERR-BYRSON TOURS—1928.

The Canadian National Railways have much pleasure in announcing that the Kerr-Bryson Tours have now completed arrangements for their 1928 summer tours across Canada.

This year's plans provide for a delightful trip from Toronto to the Pacific Coast and return, with stop-overs at the cities of Winnipeg, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Seattle; two or three days in each of those famous tourist resorts of the Canadian Rockies, Jasper National Park, Banff and Lake Louise; the famous scenic triangle tour trip of the Canadian National Railways, by rail from Jasper to Vancouver, steamer through the 550 miles of sheltered waters of the Inside Passage of the North Pacific Coast and rail through the wonderful valleys of the Skeena and Bulkley Rivers back to Jasper; and finally a visit to Minaki Lodge, a magnificent summer resort, a short distance east of Winnipeg in the beautiful Lake of the Woods district.

Arrangements have also been made for an extension of this trip, for those who may so desire, from Prince Rupert north to Skagway and Alaska, and those fortunate enough to be members of this extension party will, on the return journey, enjoy the added feature of the delightful sail through the Great Lakes from Duluth to Sarnia, with a short stop-over at Duluth and also at the Twin Cities of Fort William and Port Arthur.

These trips as usual will be personally conducted and on an all-expense basis. Descriptive booklet is now in course of preparation, and is expected to be available within the next week, and copies of same will be promptly furnished upon request to the organizers of the tours, Mr. Martin Kerr, 4 Beulah Avenue, Hamilton, Ont., Mr. A. E. Bryson, 44 Silverthorne Avenue, Toronto, or any Canadian National Agent.

THE "CANARY" MURDER CASE

Charles Scribner's Sons

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

(Continued from yesterday.)

CHAPTER LII.

After a short silence, during which the three of us remained speechless, the same feminine voice said in a loud, distinct tone "No; nothing is the matter. I'm sorry. . . Everything is all right . . . Please go home, and don't worry."

The needle had come to the end of the record. There was a slight click, and the automatic device shut off the motor. The almost terrifying silence that followed was broken by a sardonic chuckle from Vance.

"Well, old dear," he remarked languidly, as he strolled back into the living-room, "so much for your irrefutable facts!"

There came a loud knocking on the door and the officer on duty outside looked in with a startled face.

"It's all right," Markham informed him in a husky voice. "I'll call you when I want you."

Vance lay down on the davenport and took out another cigaret. Having lighted it, he stretched his arms far over his head and extended his legs, like a man in whom a powerful physical tension had suddenly relaxed.

"'Pon my soul, Markham, we've all been babes in the woods," he drawled. "An incontrovertible alibi—my word! If the law supposes that, as Mr. Bumble said, the law is a ass, a idiot.—Oh, Sammy, Sammy, vy worn't there a alleybi! . . Markham, I blush to admit it, but it's you and I who've been the unutterable asses."

Markham had been standing by the instrument like a man dazed, his eyes riveted hypnotically on the telltale record. Slowly he came into the room and threw himself wearily into a chair.

"Those precious facts of yours!" continued Vance. "Stripped of their carefully disguised appearance, what are they? Spotswoode prepared a phonograph record—a simple enough task. Every one makes 'em nowadays—"

"Yes. He told me he had a workshop at his home on Long Island where he tinkered a bit."

"He really didn't need it, y' know. But it facilitated things, no doubt. The voice on the record is merely his own in falsetto—better for the purpose than a woman's, for it's stronger and more penetrating.

"As for the label, he simply soaked it off of an ordn'ry record, and pasted it on his own. He brought the lady several new records that night, and concealed this one among them.

"After the theater he enacted his gruesome little drama and then carefully set the stage so that the police would think it was a typical burglar's performance. When this had been done, he placed the record on the machine, set it going, and calmly walked out. He had placed the prayer-rug and bronze bowl on the cabinet of the machine to give the impression that the phonograph was rarely used.

"And the precaution worked, for no one thought of looking into it. Why should they? . . Then he asked Jessup to call a taxicab—everything quite natural, y' see. While he was waiting for the car the needle reached the recorded screams. They were heard plainly it was night, and the sounds carried distinctly. Moreover, being filtered through a wooden door, their phonographic timbre was well disguised. And, if you'll note, the enclosed horn is directed toward the door, not three feet away."

"But the synchronization of his questions and the answers on the record. . . ?"

"The simplest part of it. You remember Jessup told us that Spotswoode was standing with one arm on the switchboard when the screams were heard.

"He merely had his eye on his wrist-watch. The moment he heard the cry, he calculated the intermission on the record, and put his question to the imagin'ry lady at just the right moment to receive the record's response.

"It was all carefully figured out beforehand; he no doubt rehearsed it in his laborat'ry. It was deuced simple, and practically proof against failure. The record is a large one—twelve-inch diameter, I should say—and it requires about five minutes for the needle to traverse it.

"By putting the screams at the end, he allowed himself ample time to get out and order a taxicab. When the car at last came, he rode direct to the Stuyvesant Club, where he met Judge Redfern and played poker till three. If he hadn't met the Judge, rest assured he would have impressed his presence on some one else so as to have established an alibi."

Markham shook his head gravely. "Good God! No wonder he importuned me on every possible occasion to let him visit this apartment again. Such a damning piece of evidence as that record must have kept him awake at night."

"Still, I rather fancy that if I hadn't discovered it, he would have succeeded in getting possession of it as soon as your sergent-de-ville was removed.

"It was annoyin' to be unexpectedly barred from the apartment, but I doubt if it worried him much. He would have been on hand when the Canary's aunt took possession, and the retrieving of the record would have been comparatively easy. Of course the record constituted a hazard, but Spotswoode isn't the type who'd shy at a low bunker of that kind. No, the thing was planned scientifically enough. He was defeated by sheer accident."

"And Skeel?"

"He was another unfortunate circumstance. He was hiding in the closet there when Spotswoode and the lady came in at eleven. It was Spotswoode whom he saw strangle his erstwhile amoureuse and rifle the apartment.

"Then, when Spotswoode went out, he came forth from hiding. He was probably looking down at the girl when the phonograph emitted its blood-chilling wails. . . My word! Fancy being in a cold funk, gazing at a murdered woman, and then hearing piercing screams behind you! It was a bit too much even for the hardened Tony.

"I don't wonder he forgot all caution and put his hand on the table to steady himself. . . And then came Spotswoode's voice through the door, and the record's answer. This must have puzzled Skeel. I imagine he thought for a moment he'd lost his reason.

"But pretty soon the significance of it dawned on him; and I can see him grinning to himself. Obviously he knew who the murderer was—it would not have been in keeping with his character had he failed to learn the identities of the Canary's admirers.

"And now there had fallen into his lap, like manna from heaven, the most perfect opportunity for blackmail that any such charmin' young gentleman could desire. He doubtless indulged himself with roseate visions of a life of opulence and ease at Spotswoode's expense. When Cleaver phoned a few minutes later, he merely said the lady was out, and then set to work planning his own departure."

"But I don't see why he didn't take the record with him."

"And remove from the scene of the crime the one piece of unanswerable evidence? . . Bad strategy, Markham. If he himself had produced the record later, Spotswoode would simply have denied all knowledge of it, and accused the blackmailer of a plot.

"Oh, no; Skeel's only course was to leave it, and apply for an enormous settlement from Spotswoode at once. And I imagine that's what he did. Spotswoode no doubt gave him something on account and promised him the rest anon, hoping in the meantime to retrieve the record.

"When he failed to pay, Skeel phoned you and threatened to tell everything, thinking to spur Spotswoode to action . . Well, he spurred him—but not to the action desired. Spotswoode probably met him by appointment last Saturday night, ostensibly to hand over the money, but, instead, throttled the chap. Quite in keeping with his nature, don't y' know. . . Stout fella, Spotswoode."

"The whole thing . . it's amazing."

"I shouldn't say that, now. Spotswoode had an unpleasant task to perform, and he set about it in a cool, logical, forthright, business-like manner. He had decided that his little Canary must die for his peace of mind she'd probably made herself most annoyin'. So he arranged the date—like any judge passing sentence on a prisoner at the bar—and then proceeded to fabricate an alibi.

"Being something of a mechanic, he arranged a mechanical alibi. The device he chose was simple and obvious enough—no tortuosities or complications. And it would have succeeded but for what the insurance companies piously call an act of God.

"No one can foresee accidents, Markham. they wouldn't be accidental if one could. But Spotswoode certainly took every precaution that was humanly possible. It never occurred to him that you would thwart his every effort to return here and confiscate the record; and he couldn't anticipate my taste in music, nor know that I would seek solace in the tonal art.

"Furthermore, when one calls on a lady, one doesn't expect that another suitor is going to hide himself in the clothes-press. It isn't done, don't y' know. . . All in all, the poor johnny was beaten by a run of abominable luck."

"You overlook the fiendishness of the crime," Markham reproached him tartly.

"Don't be so confoundedly moral, old thing. Every one's a murderer at heart. The person who has never felt a passionate hankering to kill some one is without emotions. And do you think it's ethics or theology that stays the average person from homicide? Dear, no! It's lack of courage—the fear of being found out, or haunted, or cursed with remorse.

"Observe with what delight the people en masse—to wit, the state—put men to death, and then gloat over it in the newspapers. Nations declare war against one another on the slightest provocation, so they can, with immunity, vent their lust for slaughter. Spotswoode, I'd say, is merely a rational animal with the courage of his convictions."

KRAFT MACLAREN CHEESE COMPANY LIMITED : : MONTREAL

FAMOUS LOVE ROMANCES — George Washington (IV) — By Nicholas Afonsky

In the meantime George Washington had fallen in love with Mary Philipse, and she, too, had turned him down. Why was he repeatedly refused? He was good-looking. Smallpox had not even marred his skin. Some of his biographers say he was seeking a rich marriage. Knowing this, the rich beauties he proposed to refused him.

But one woman loved him. It is only his recent biographers who have disclosed this romance in his life—a romance that makes him the more human and the more likeable. In the Fairfax estate of Belvoir he and Sally Fairfax passed many happy hours together—his happiest, he called them.

But Sally was married, married to a member of a family connected with Washington's by marriage. So, apparently, Washington and she decided that their love—if indeed they acknowledged it—should go no further. In the meantime, when he led Braddock's defeated troops to safety, he had gained great military repute.

When he was about twenty-five he was making one of his military trips on horseback and stopped to rest at the home of a friend. There he met a rich and charming young widow—Martha Custis—visiting there with her two small children. He said he must hurry on, but he tarried for hours, and asked permission to see Martha at her own home.

MANY ATTEND OPENING OF DURANT MOTOR SHOW

New 1928 Models On Display in Selkirk and Elliott Show Rooms.

LUNCHEON HELD.

Dealers From District Attend Salesmen's Convention Held During Afternoon.

A dealers' convention in the afternoon, a happy supper meeting attended by the dealers, and a grand opening at eight o'clock in the evening, marked the spring opening of the Selkirk and Elliott Durant car selling campaign of 1928. Known as a descriptive demonstration of chassis construction and display of the new Durant models, the show in the Selkirk-Elliott building last evening attracted a large and enthusiastic number of people, and young and old alike went away filled with a new conception of the good that is in the Durant product. The show rooms, neatly arranged to show off the new cars to best advantage, the decorating scheme being kept well in hand, while on the two main floors awaiting inspection stood a Durant "4" coupe and sedan, a "55" sedan (six-cylinder), a "65" sedan, and a stripped chassis, which, during the evening, attracted almost as much attention as the other more attractive models.

Afternoon Meeting.

As previously mentioned, there was a most profitable convention of dealers held during the afternoon, salesmen being present from Lindsay, Fenelon Falls, Cannington, Port Perry, Port Hope, Cobourg, Havelock, Norwood, Hastings, Campbellford, and other places in Central Ontario district. At this gathering, the delegates were addressed by P. J. Duggan, sales manager, who gave a most comprehensive resume of the progress made by the Durant Motors of Canada during the past years, and by the service manager, H. J. Moore, who, with Mr. Duggan, came from the plant at Leaside. Mr. Moore dealt chiefly with the value of service as applied to the dealer in his relation to the public. Mention was also made of the various features of the new models in a chassis demonstration talk by William Kerby, of the service department also. Chiefly, he dealt with the new Durant "4" model, its many improvements being touched upon.

Luncheon Enjoyed.

The luncheon tendered by Messrs. Selkirk and Elliott, local dealers, was attended by some twenty-five dealers, as well as the company officials, Messrs. Duggan, Moore and Kerby, and friends of the Peterborough business. After all had enjoyed a splendid supper provided by the Downeyflake management (the supper was held in this restaurant), John Selkirk assumed office as director of ceremonies, and for a half hour or so brief, impromptu addresses, which, nevertheless, were of a most helpful nature, were delivered by the speakers of the afternoon, various dealers, and members of the Peterborough firm. Not too much formality and plenty of fun made the affair a most enjoyable one throughout, and at its close those present voiced their appreciation in no uncertain terms.

Evening Show.

The opening proper, at eight o'clock, was a most successful event in every detail; the attendance was good, interest in the new cars high and a general spirit of friendliness promoted. The company officials were present, and, assisted by Messrs. Elliott and Selkirk, were most courteous in their reception of the public. Throughout the evening the visitors came and went at leisure, and it is safe to say that, as a result, the local firm have made many new friends—many of them prospective customers.

Mr. Kerby again gave his demonstration address, pointing out new features, improvements and general good features of his Durant products. He also answered many questions from interested auditors. In fact, the show was a complete success in every detail and, best of all, Messrs. Selkirk and Elliott have decided to hold "open house" for the remainder of the week, that the public may become thoroughly acquainted with the new cars. A flash-light photo was taken during the evening, that the occasion might be recalled the better.

The new Durant "4" is entirely different in appearance to any previous four-cylinder models built by Durant Motors of Canada, having a distinctive European type radiator exclusive to all Durant cars. A new and larger Durant built Hayes-Hunt body, with exceptionally comfortable seating arrangement, wider, larger doors, clear vision front pillars, cadet type visor, and a great many other features are easily appreciated and seen in an examination of the car.

The chassis has been improved by the addition of Bendix four-wheel brakes, smaller wheels and larger tires, and a great many minor improvements. The fenders are of the new low full crown type with a long sweep, giving the car a heavy massive appearance.

The whole car is larger than immediate previous models, the wheelbase having been lengthened to 107 inches.

There are three six-cylinder cars in the new Durant line. The Durant "55," the Durant "65," and the Durant "75."

The Durant "55" is on a 107-inch wheelbase chassis, is painted in an exclusive two-tone brown combination, with upholstering to match; Cowl's nickelled headlamps and cowl lamps, shock absorbers and other equipment generally considered as necessary to make the complete car of to-day.

The Durant "65" is on a 110-inch wheelbase chassis, and is painted, upholstered and equipped equal to cars selling at $1,000.00 more. It is beautifully painted in two-tone bloc Duco with genuine mohair upholstering to match, has electric gasoline gauge, electric heat indicator, electrically operated coincidental lock, complete set of shock absorbers, extra heavy bumpers and bumperettes, very large and beautiful nickel-plated headlamps and cowl lamps, the headlamps being exclusively designed and built for Durant Motors. They have the new Golden Glo beam.

The cowl lamps are attached by means of a special nickel bar running completely around the cowl and adding materially to the front end beauty of the car. The Durant model "65" is capable of a speed of from 5 to 65 miles an hour in high gear, and has an abundance of power for any and all conditions of driving.

The Durant "75" is the highest achievement of the new Durant line. It is a large, beautifully upholstered "fine car." The chassis is 120 inches in length. The motor is 70 horsepower, capable of a speed of 80 miles an hour. There is a special four-speed forward transmission which gives increased economy and speed with longer life to the motor. It is particularly adaptable to country driving.

A complete set of hydraulic shock absorbers, extra large Bendix four-wheel brakes, heavy bumpers and bumperettes are all safety features built into this car and, while not exclusive, are not found as standard equipment on cars selling for many hundred dollars more. It is necessary to see, ride in and drive the Durant "75" to really appreciate it.

All Durant cars are powered by the universally approved Red Seal Continental motor which, with its full force feed lubrication and Morse silent timing chain leaves nothing to be desired.

NOTICE OF REGISTRATION OF BY-LAW.

Notice is hereby given that a by-law was passed by the Council of the Corporation of the City of Peterborough on the 5th day of March, 1928, providing for the issue of debentures to the amount of $5,600.00, for the purpose of paying for the extensions and improvements made in the Waterworks System of the City of Peterborough, in the year One Thousand Nine Hundred and Twenty-seven, and that such by-law was registered in the registry office of the County of Peterborough on the 7th day of March, 1928. Any motion to quash or set aside the same or any part thereof must be made within three months after the first publication of this notice and cannot be made thereafter.

Dated the 7th day of March, 1928.

S. R. ARMSTRONG,
Clerk.

3d-8,15,22-562.

NEWSPAPER NIGHT IS HELD BY A.Y.P.A.

Young People Enjoy Contributions of Various Editors.

Something novel in the way of entertainment was a newspaper night held in the Guild room by the A.Y.P.A. of All Saints'. The editors of the different departmetns were Homer Lundy, C. Lewington, Miss J. Maconomy, Miss D. Worboy, Ted Rye and Jack Hope. Special mention may be made of Mr. Lundy, who was editor of the personal column, it being especially funny. The Annie Laurie column by Miss J. Maconomy solved the difficulties of some of the members. During the evning a splendid solo was rendered by D. Lucas, accompanied by Miss M. Rome.
Mr. Hope took charge of the paper.

IN MEMORIAM.

LOGAN. — In loving memory of Mrs. James W. Logan, who died March 15th, 1927:
'Twas just one year ago to-day
Our loved one dear departed;
No one knows nor can they say
How our hearts with sorrow smarted.
She's gone to a better world than this,
And there we hope to meet her,
And there to join the eternal bliss,
Where we will n. et with Christ the Saviour.
—Inserted by Father and Son.

LOGAN. — In loving memory of Mrs. James W. Logan, who died March 15th, 1927:
There is a friend unseen by all,
Whose body lies beneath the sod,
Who answered to the final call,
The spirit is reserved with God.
For just one year ago to-day
A call to higher realm was given
And there forever more to stay
Till we meet around the throne in Heaven.
—Inserted by Sister-in-law, and Brother-in-law, Mr. and Mrs. C. H. Luffman.

LATE WANT ADS.

A GILT-EDGED INVESTMENT — An ideal Home, 543 Gilmour Street, for Sale. A moderately priced Dwelling, desirably situated; all modern conveniences; economical to heat. 'Phone 473. 3d-66-676D

SKATING!
BROCK ST. RINK
FRIDAY NIGHT
Good Sheet of Ice — Good Band Concert

WE ASK YOU

BUSINESS MAN: Do you appreciate your evening spent at home or in recreation?

UNION MAN: Do you appreciate a union which regulates your hours?

GENERAL PUBLIC: Do you appreciate real service?

We candidly believe this service can be rendered only by salespeople who enjoy their work, and this is not possible without recreation?

Drug Clerks have no union, and thus are dependent upon the fairness of their employer.

In view of these facts and many others, we shall OPEN THREE NIGHTS to render you Service, and CLOSE THREE NIGHTS in fairness to our Staff.
OPEN : TUESDAY, THURSDAY, AND SATURDAY
Other Nights We Close at 6.30.

We would like to hear your opinion on the stand we have taken.

MEN NEEDED TO HELP BOYS SAYS WORKER

Jim Findlay, of Provincial Boys' Work Board Gives Address.

TO LOCAL WORKERS.

Peterborough Board Members Guests of Y's Men's Club.

"There is a dearth of men willing to share their lives with a group of boys," declared Jim Findlay, Field Secretary of the Ontario Boys' Work Board, addressing the members of the Peterborough "Y" Men's Club and their guests, the members of the Peterborough Boys' Work Board, at the Y.M.C.A. last night. "Many men are willing to pay to help work for boys; many groups of men, though fortunately not so many as in the past, are willing to put a bunch of boys into a bus and bundle them off to a camp under, at times, practically no supervision; few are willing to give up an hour on a Sunday afternoon and an evening a week to a group of boys."

It is not enough, Mr. Findlay asserted, to tell a boy about Christ, but to form a proper character he must be helped practice His principles in every day life. Too many people can quote long portions of scripture who do not put the principles they quote into their relationships with other people. The Great War was an example of this among nations. Countries nominally Christian did not practice the principles of their religion toward each other, and that great cataclysm resulted.

Character Doesn't Happen

Character doesn't happen, he continued. This is a universe in which things happen in order, with cause and effect, and character is like everything else. The boy must respond with his whole being, not merely with his body. Many a boy is taken regularly to church until he is old enough to be independent, when he refuses to go. He has not been building up a love for it, but a revulsion against it. While his body has been in church he has been somewhere else in his thoughts.

"Making Jesus walk and live to a vital living boy is our job," continues Mr. Findlay. "It is more than telling about Him. You notice that Jesus never used the word religion, or similar words. He said 'I am come that ye might have life'."

Mr. Findlay referred to the presentation, by Howard Macdonald, member for Peterborough in the Ontario Boys' Parliament, of medals to the boys who had sold a certain quota in the annual bond selling campaign. These, he impressed upon the boys, were not prizes for beating some person, but a recognition that they had learned the principle of sharing. He called the attention of the older men present to the fact that the Boys' Parliament does a great task in thinking and giving expression to the thoughts of the boys of the province. Nothing is done by the boys, and the annual bond selling campaign to raise funds for the carrying on of the work of providing leadership is one place where the boys accept the responsibility. While the money is raised by the help of fathers and other men, it is work done by the boys.

President Tom Dutton of the Y's Men's Club presided last night. After the welcome of the members had been expressed by Don Crawford, he called upon Howard Macdonald to present the medals, mentioning as he did that the member for Peterborough had done much toward arousing interest in this phase of the work and that Peterborough had raised its full share of the first time in several years.

Medals Presented

In presenting the medals Mr. Macdonald gave all the credit to the boys, disclaiming any great accomplishment himself for their success. The medals were given to Garnet Dalnard, Grand Breckenridge, Charles Clark, Russel Rowan, and Jack Kirkwood. Medals were won by Gordon Cuthbertson, Eric Shiner, and Hugh Waddell, who were not present to receive them.

Y's Man Bill Giles then exposed what Howard had kept quiet, that he had sold fifty-three bonds himself and qualified for a gold medal.

A violin solo by Arnold Spencer was much enjoyed and an encore demanded. Arnold Lillow led the community singing, which included some Irish songs in honor of the near approach of St. Patrick's Day, which was also commemorated by the green streamers used for decorations. Harry Northrop was pianist.

Ald. G. A. Macdonald expressed his concurrence with Mr. Findlay's plea for leaders, and the thanks of the Boys' Work Board to the Y's Men's Club for providing the supper. Trevor Miller moved a formal vote of thanks to the club and also to Mr. Findlay for his splendid address.

106 YEARS OLD.

JAMES HENLEY,
Formerly of Apsley, and now of the House of Providence, who celebrated his 106th birthday yesterday.

1,532 MOTHERS' LIVES WASTED

At Least 1,000 Could Have Been Saved, Says Dr. Sutton.

ADDRESSES WOMEN.

"If we lived in Denmark instead of in Canada, we would have saved one thousand of these mothers," was one of the remarks made in the course of the address on "Canada's Maternal Mortality," given by Dr. N. H. Sutton, District M.O.H. to the members of the Local Council of Women at their regular meeting, held yesterday afternoon, with a good attendance, in the green room of the Y.W.C.A.

The talk given by the speaker was very informative and outlined in detail the scope, the causes and the remedies for the very high rate of maternal mortality in Canada. In speaking of the spread of information as to means of combating the evil, Dr. Sutton remarked that gossip, while usually a destructive force, might be turned to a good end if the tongue were used to disseminate knowledge with regard to this situation.

From a survey of Canada's maternal mortality statistics, gleaned from leading physicians and taken over a period extending from July 1st, 1925, to July 1st, 1926, it was discovered that 1,532 mothers had died within that time, either in childbirth or by reason of pregnancy. In a total of nearly 250,000 living births, this meant a percentage of 6.4 deaths for ever 1,000 living births. These were all women between the years of fifteen and fifty, and they left nearly 5,073 motherless children behind them.

In that year, the survey showed that only tuberculosis took more mothers than child-bearing, that poor or bad general health conditions prevailed in 153 cases, heart disease in 126, 'flu or pneumonia in 132, tuberculosis in 96, exhausted through care of home and children, 67; exhausted through want of sleep and rest, 27; exhausted through too frequent pregnancy, 26 ;and poverty, 68. Dire poverty was the cause of 68 of these deaths, while exhausted conditions accounted for a large number. Those lost because the physician was not called until the last minute were 128, dying when doctor arrived, 27; doctor not called until some days later, 91, and no doctor called at birth, 101.

"Most physicians will not consider a case to which they have not been called before the last minute, and this is right. It is a terrible thing for a doctor to have confront a case where the patient is in convulsions or some such desperate plight. A man can easily lose ten pounds in a few hours in attending such a condition and he thanks God if he is able to save the patient's life."

The survey disclosed that 1,342 of these women died because they had no pre-natal care, the youngest being fifteen years of age and the oldest forty-eight.

"Fifteen hundred and thirty-two women going to their graves in Canada because of childbirth, in the fifty-ninth year of Confederation. And we have no surety that conditions will be any better in 1928, unless we try to grapple with the evil and remedy it in the proper way. I do not think your local Council resembles the French king who, on listening to a tale of woe from one of his subjects, answered: "Take him away. He is breaking my heart," and did nothing to help the sufferer."

"The crux of the whole problem is pre-natal care," said Dr. Sutton, going on to advocate the efficacy of a thorough medical examination and the importance of dissemination of knowledge of the proper type.

Dr. Sutton was accorded a hearty vote of thanks by the president, Mrs. C. H. Edwards.

The routine business of the meeting included an announcement of a

BRIDGEMAN REBUKES LABORITES IN BRITISH COMMONS DEBATE

Clashes With Opposition in Discussion on Geneva Naval Conference.

INTRODUCES ESTIMATES.

Emphasizes Present Year's Naval Policy Mainly One of Replacement.

LONDON, March 16 (Canadian Press).—Hotly rebuking the Laborites, W. C. Bridgeman, First Lord of the Admiralty, last night demanded to know why the Opposition persisted in pretending that failure of the Geneva naval disarmament congress was a great tragedy and was going to lead to war.

The debate came after Mr. Bridgeman had explained the naval estimates in the House of Commons, his own speech being devoted largely to the Geneva Conference and the naval qustion as affecting Great Britain and the United States. The estimates were adopted.

The minister was severely criticized and cross-examined by the Laborites who tried to blame him for the Geneva failure. He answered hotly and protested he had done everything possible to obtain an agreement. He said the course of the Laborites would tend to spoil whatever further opportunities there might be to work out desire limitations. He distinctly declined to be alarmed over the United States naval program, which, he said, was even rather less than the Americans had proposed at Geneva.

"To my mind," he went on, "the adoption of this program certainly was not due to the failure at Geneva." Mr. Bridgeman was emphatic that the Geneva failure respecting armaments would not lead to any strained relations or the shouting of bellicose words across the Atlantic. On the contrary, both nations were sincerely desirous of peace.

"I find great encouragement," he said, "to believe that the conditions, interests and common sense of both countries will lead us before long into further naval limitations."

On the general question, the minister contended that nobody could accuse Great Britain of failure to give a good lead in disarmament, as before and since the Washington conference, Great Britain has scrapped, roughly, 2,000,000 tons of warships to a half million in the United States.

Policy of Replacement

Introducing the navy estimates in the House of Commons yesterday afternoon, Rt. Hon. W. C. Bridgeman, First Lord of the Admiralty, emphasized that the present year's policy was mainly one of replacement. Great Britain had not dropped three cruisers because she had not done her full share of disarmament, he said, but on the contrary Britain had disarmed more than anybody else.

"We scrapped 1,300,000 tons before the Washington conference and since then we have scrapped about the same as the United States," Mr. Bridgeman said. "We had 644 ships in July, 1914, 1,887 at the Armistice, and now have 405, the respective tonnages being 2,276,000, 3,136,000, and 1,329,000. We have scrapped over two million tons and the United States has scrapped 500,000."

The First Lord of the Admiralty condemned the "erroneous and oft-repeated" idea that at the Geneva conference the Unitd Stats had suggested a total cruiser tonnage of 400,000 while Great Britain insisted on 600,000. He explained that the United States demanded twenty-five 10,000 ton cruisers, and that Britain retorted that if all cruisers were to be 10,000 tonners Britain would require a total cruiser tonnage of 600,000 because she required numbers not size.

Will Not Enter Competition

Mr. Bridgeman pointed out that Britain had dropped three cruisers mainly for the benefit of the exchequer, but also to show that what-

Alleged Won Prize Money By Trickery

WINNIPEG, Man., March 16.—Canadian ress. — A plot between a local man and his sister-in-law in Ontario, which is alleged to have defrauded the One Big Union Bulletin, of $400, was charged in the city police court yesterday. Mrs. Una McLaughlin who was brought from Dundas, Ont., to answer the charge of collusion, appeared in court, but the case involving Stanley Corner, her brother-in-law, was remanded to Monday.

The Bulletin, owned by the Winnipeg Central Labor Council, conducted a guessing contest and it is charged that the man and woman collected the prize money by trickery. The closing date of the contest was extended for out-of-town replies, and Corner is alleged to have procured an Ontario-stamped envelope and enclosed his reply; then it is charged, he dropped the letter on the street, and drew the attention of a postman to it, who picked it up.

All-Time Record Set For Sale of Baby Beef

BRANDON, Man., March 16.—An all time Canadian record for the sale of baby beef was made at the winter fair yesterday afternoon when R. J. Speers of Winnipeg bought Miss Emma Hamilton's first prize calf for $3 a pound. As the calf weighed 940 pounds, Miss Hamilton got $2820.

RETURNING OFFICER UNABLE TO EXPLAIN LOSS OF BALLOTS

Might Be His Fault, He Admits —Ballot Box Seals Missing.

WAS WOODEN BOX.

Ballots Either Weren't Issued or Were Lost By D.R.O., He Says.

TORONTO, March 16 (Canadian Press). — F. M. Scott, returning officer for Ottawa South in last provincial election, told the Royal Commission inquiring into cases of straying ballots to-day that wax with which had sealed the wooden box containing the returns had been broken off. He had been asked by Commission counsel to see of the box was in the same state as when he shipped it from Ottawa. He could not say how many pieces of string he had sealed over the top of the box, but certainly there were none remaining on the box now. He admitted that sealing wax would not stick very well to wood.

"You can't tell whether the book found on the streets of Ottawa is one which you issued to a deputy returning officer or not. So it may be your fault it was found lying around," suggested Mr. Justice Magee, one of the Commissioners. "Can you help us at all?"

Mr. Scott: "No." He said after further question, "It may be his fault it was found on the street."

"Do you think that is a very satisfactory way of doing business?" Mr. Justice Hodgins interjected with a query as to how the book of ballots could be lost, assuming it was Mr. Scott's fault.

"Only two ways," Mr. Scott replied. "They are either ballots I didn't issue or were lost by some D.R.O."

RADIO OWNER PAYS $2 FINE

William Carter Convicted of Operating Set Without License.

FIRST CONVICTION HERE.

The first conviction for operating a radio without a license was registered in the police court this morning when Magistrate O. A. Langley fined William Carter $2.00 and costs for failing to take out the required license.

Joseph Wearing prosecuted for the Department, and asked His Worship to impose a small fine as it is the object of the department to let people know that they must secure their licenses. "The government is spending a large amount of money endeavoring to do away with interference, and in order to accomplish this they must know where the radios are," said Mr. Wearing.

His Worship in imposing the fine said: "People must understand that when the government puts an act on the statute books it must be kept and in this case the penalty is any sum up to $50, but it being the first case brought before me, I will impose a fine of $2.00, and $4.76 costs."

The radio inspector has been very busy in the city recently checking up on radio sets, and finding out those who have not taken out their licences.

O.M.L. PRESIDENT TO ADDRESS CLUB

R. A. Staples Will Speak at Annual Banquet Here.

Richard A. Stapells, president, Ontario Motor League, and Past President Toronto Board of Trade, will address the annual general meeting of the Peterborough Automobile Club which will be in banquet form, held in the main dining room of the Empress hotel, on Tuesday evening, April 3rd. Arrangements with Mr. Stapells were completed yesterday in Toronto by Alderman Harry Huffman and the secretary of the Automobile Club.

ST. JOHN'S MEN.

The Men's Club of St. John's Church will meet in the Parish House on Monday evening. A. Mowat, B.A., will be the speaker of the evening and refreshments will be served.

NEW TYPE OF ATLANTIC PLANE REVEALED IN FRENCH CAPITAL

Young Inventor's Tri-Motored, 5-Passenger Ship Ready For Tests.

RADIO SET INSTALLED.

Experts Laud Giant Monoplane, Built Secretly By Frenchmen.

PARIS, March 16.—The "mystery plane" which many experts in France believe will be the first to accomplish a non-stop flight from Paris to New York, was revealed for the first time Wednesday to 50 French and foreign journalists after nearly a year's construction work on it behind guarded gates in the little town of Meudon just outside of Paris.

With it was disclosed one of the most romantic stories in European aviation since the war. The central figure is a Frenchman not yet 24, who last summer conceived a new idea for a transatlantic airplane but not not possess a single franc with which to carry it out. Discouraging as this was Rene Couzinet the youth ful engineer in question, went doggedly ahead and Wednesday was able to demonstrate a plane described by experts as one of the finest ever built in Europe and the first ever made in France for the sole purpose of a transatlantic crossing.

The money—nearly 700,000 francs—had been gathered together from the four corners of France in amounts ranging from 5 to 5000 francs on the enthusiasm, youth and assurance of success, which were all M. Couzinet had to commend his project.

At one time, with 100 men working in his little hangar he found his total capital down to exactly 50 centimes—2 cents. Still undismayed he called his workmen together and explained the situation. They agreed to continue until he would be able to raise more cash.

The money was soon forthcoming, and all that now remains is a series of test flights and then the great attempt, probably at the end of April.

Calls Plane "Rainbow."

Barely large enough to house the giant plane the hangar in Meudon presented a unique sight. M. Couzinet has named his ship the "Rainbow," although in its construction it more closely resembles an immense bird than any plane yet built in France. The Rainbow is a monoplane, largely metal construction, and carries three Hispano-Suiza motors, each of 180 horse-power.

One of its many original features is the ability of the ship to remain in action with one of the three motors not running. Two motors are in the wings on either side of the fuselage. The third rests in the nose of the fuselage just below the pilot's seat. Each of the three may be reached for repairs by a small pas-

Continued on page 10.

REPORT FLIERS SAFE ON ISLAND WITHOUT PROOF

Coastguard Vessel Enquiry Dispels Rumor From Old Orchard.

MAKE CAREFUL SEARCH.

Slight Hope Held May Have Been Picked Up By Passing Steamer.

BIDDEFORD, Me., March 16 (Canadian Press). — Hope that the monoplane Endeavour, in which Captain Walter Hinchliffe and the Hon. Elsie MacKay essayed the east to west trans-Atlantic crossing had landed on Saratton Island, near here, was dispelled late yesterday when coastguardsmen returned from a search of the island.

Captain R. A. Morton, of the Biddeford Pool Coastguard Station, and three members of his crew, after circling the little island in their motorboat, reported that they had seen nothing resembling a plane. Stratton Island lies three miles out to sea from Old Orchard Beach.

The report that the Hinchliffe plane with its passengers had landed on the island, grew out of a story told by R. Courtney Page, proprietor of a summer hotel at Old Orchard Beach, and his wife and daughter. They reported to the coastguard station that, examining the island through a field glass, they had seen a glistening object resembling the golden wings of the Endeavour. After a more careful scrutiny of the island they said, they thought they saw two persons circle about the bright spot and then move away towards the only building on the island

Captain Morton expressed the opinion that the glistening object seen through the field glass was the reflection of the sun on the windows of the farm house. This building is owned by John Davis of Boston, who makes occasional visits to the island during the summer months. So far as is known here, the only permanent resident on the island is Fred Harding, a caretaker.

Hinchliffe's Parents Not Giving Up Hope

LIVERPOOL, March 16 (A.P.).—The father and mother of Captain Walter Hinchliffe, although they have slept but little since their son left for the Western world, are buoyed up in their hopes for his safety by a vision and a dream.

The mother, brooding over her son's perilous undertaking, had a vision in which she saw him flying low over the ocean. He was confronted with a huge white cloud—interpreted as a good omen—and went to the left, the direction which the cloud seemed to indicate.

The father dreamt that his brave son had reached America with a woman as a companion.

Mrs. Hinchliffe remarked that it was strange that Walter began his flight on the 13th.

"All his life," she said, "he had avoided the number 13."

Mr. Hinchliffe insisted that after all the dangers and hardships his son had endured in the war, he did not believe that Providence intended him to perish in the ocean.

"Although things look black," said the father, "we have not given up hope."

SEARCH PARTIES DESPATCHED TO INVESTIGATE NEW REPORTS

Lumbermen Says Plane Passed There Early Yesterday Morning.

BRILLIANTLY COLORED.

Appeared To Be In No Trouble When Seen Near Greenville.

WASHINGTON, Mar. 16.— (Canadian Press.)—The Canadan Legation to-day informed the State Department that the Candian Pacific Railway had reported to Ottawa that a Mr. Dean, of Hollingsworth and Whitby Company of Greenville, Maine, had received a report from their camp at Roche's Farm yesterday that a large plane had passed Roche's farm at six a.m. The report said the plane was supposed to have descended about 25 miles north-east of Greenville. The Canadan report said that it was understood searching parties had been sent out.

Plane Flying Low.

GREENVILLE, Maine, Mar. 16. — (Canadian Press.)—Deputy Sheriff A. Rogers was informed to-day by the postmaster at Kodadjo, that at six o'clock yesterday a plane was seen passing over that vicinity. The plane was of a "brilliant color," but in the early morning sunshine the exact hue could not be told. It was flying low, with the motor whirring loudly and appeared to be in no trouble.

Landing Reported.

OTTAWA, Mar. 16.— (Canadian Press.)— A telegram stating that a plane believed to be that in which Capt. Walter Hinchliffe and the Hon. Elsie Mackay started a trans-Atlantic flight from England last Tuesday, was believed to have landed near Greenville, Maine, had been received at the office of the Hon. P. J. A. Cardin, Dominion Minister of Marine and Fisheries. The information contained in the telegram has been forwarded to the Federal authorities at Washington for investigation.

Story Doubted.

MONTREAL, Mar. 16. —(Canadian Press.)—Word has reached the offices of the C.P.R. here from Greenville, Maine, that a number of people reported hearing the engine of an aeroplane in that neighborhood on the morning of March 15. The company's officials have attempted to find out if any one actually saw the plane. If seen yesterday morning, the plane could hardly be that of Capt. Hinchliffe, as his gas supply must have been exhausted at least twelve hours before that time, but officials think perhaps a mistake was made on the date the machine was heard.

MAY HAVE BEEN PICKED UP.

LONDON, March 16 (Associated Press). — England's slender hope that the monoplane Endeavour may yet survive its trans-Atlantic flight venture depended last night on the chance that Captain Walter Hinchliffe and the Hon. Elsie MacKay were rescued by some ocean vessel without wireless apparatus.

Memories of the rescue of Harry Hawker on his trans-Atlantic attempt many years ago are revived in an effort to stave off despair. Veteran pilots find it hard to believe that their old comrade, a hero of a hundred aerial exploits in war and peace, has been conquered by death.

Among the few who refused to abandon hope is Mrs. Hinchliffe, who is enduring the terrible strain with marvellous courage. Although pale and looking ill, the young mother of two little girls attempts to carry on the routine of her home. In three days and two nights she has scarcely slept at all.

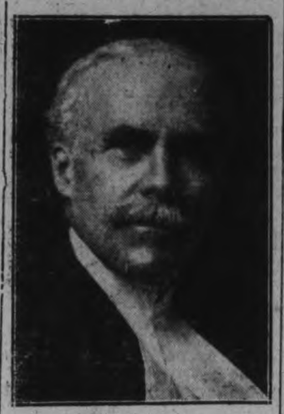
"We are still waiting," she said quietly, "but there is no news, although we have tried every possible source."

The most bitter opponents of Captain Hinchliffe's proposals in recent months to fly the Atlantic were his father, Richard, an artist, and his mother, who spent weeks at Cranwell last fall during the preparations being made when Captain Hinchliffe was serving as pilot for Charles A. Levine.

"We hope that no one for a moment thinks that because we are here we countenanced the flight," the mother told the correspondent at that time. "We are always against adventurous undertakings of this kind, and argued against it or any others from the start, but without result. Walter had his heart set on making a non-stop record and all our pleadings hadn't the slightest effect. So we came here to make the best of it, never mentioning the subject again."

One big reason for the veil of secrecy about the start of the flight purported to be revealed by a friend of Miss MacKay. The friend said that Miss MacKay knew that her father, Lord Inchcape, would forbid her journey, and feared that to enforce his stand he would stop the payments that she was making on the expenses incidental to the flight, including the purchase of the airplane in the United States. To avoid detection, said her friend, Miss MacKay drew the money for the necessary funds in the name of another.

MANY HAPPY RETURNS.



HIS HONOR JUDGE HUYCKE,
Whose Birthday This Is.

AUTHOR TELLS ABOUT SEARCH

Frederick Philip Grove's Account of His Own Life Proves Interesting.

HAS GROWN IN WEST.

Frederick Philip Grove, author of "A Search for America," "Over Prairie Trails," and other equally interesting books, was the speaker at the meeting of the Women's Canadian Club held yesterday afternoon in the Public Library. Mr. Grove, filled with an abundant knowledge of travel and the world, gave an address in a most interesting way on his own life. His address differed greatly from many other biographies, as the speaker spoke of himself in the third person which held the interest of his audience in a very unique way. Although he talked about himself it was doubtful in his listeners' minds when he got through whether he had been talking about himself or the great Canadian West or Literature, everything was blended so splendidly together in his talk.

He was born in Malmoe, Sweden, of wealthy and cultivated parents. His mother was Scotch and although she could read many languages she always talked in her native tongue. She was fond of travel and Philip spent most of his boyhood years travelling. He received a smattering of an education at the different stops that his mother made while travelling through the various countries of Europe. At the age of twenty four his parents died, and his family fortunes failed, and he set forth without resources, without experience, to earn a living, to find himself, and discover a soil in which he could grow. That soil after many wanderings and trials he at last found in Canada, and for many years he has been a school teacher and writer on the prairies of the west.

His story was that of a cultivated mind facing the struggles of an immigrant, and is full of significance and interest for the awakening of national consciousness of the Canadian people. He spent years with the humblest of workers on the outskirts of society. He was a salesman, laborer, farmer, school teacher and high school principal.

In 1894 he came to the Canadian West and found work with an Irish farmer in the bush country north of the prairie. Here he worked for 50 cents a day getting up at 5.00 a.m., and going until dark. In the winter he taught the neighbor's children and in the long evenings with sheep skin coat and mitts on, he wrote part of his book "A Search for America." For eighteen years this was his occupation, and it was thirty-two years from the time he started writing until the book was published.

One day he started on a 200 mile tramp to Winnipeg to see a man. He entered the office in Winnipeg, in overalls, a farm hand; he came out in overalls, a high school principal. He started to study to take certain examinations, and at the age of 50 he graduated from Manitoba University. In 1918 he went back to the pioneer districts.

But his search ended, as far as any spiritual search is ended, in western Canada. In Western Canada he found a spirit, an individuality, to which his own responded, and there his literary talent has been developed. He is a voluminous writer. He has nineteen novels in manuscript. His published works represent but a fraction of his writings, and his writings spread over thirty years represent but a portion of his great work. Recently he has made it his task to assist newcomers to Canada to find themselves and to see the distinctive characteristics of the Dominion.

Grand Opera House Tonight St. Patrick's Eve Prices $1.00, 75c, 50c, 25c PEG O' MY HEART

MARCONI AND EASTERN FIRM TO BE UNITED

Cable War Between Rival Companies To Be Brought To An End.

DISAPPROVE SPECULATIONS.

Associated Concerns To Continue Operations Under Separate Identity.

(By H. Bailey, British United Press).

LONDON, March 16.—The fusion of the interests of the Marconi Wireless Telegraph Company and the Eastern Telegraph Company with its associated lines is in order to avoid competition, and it is believed the companies have agreed to the delimitation of their spheres of operation and also to the sharing of the traffic on a co-operative basis. The British Government is understood to be favorable to the fusion because the cable companies, by the new agreement, have been preserved for future use and strategic purposes, but it is not known what views the dominions will take or whether Marconi shareholders will agree to the plan. However, it is stated that in any circumstances the associated concerns will continue to be operated as separate undertakings.

Disapprove Speculation.

London financiers suggest that the present burst of speculation is Marconi shares is likely to prove somewhat unjustified when the final fusion agreement is reached.

The London Chamber of Commerce has passed a resolution to the effect that both cables and wireless are necessary to healthy competition and also that communications outside Europe ought to be left to private enterprise, the government contenting itself with protecting the public against excessive charges.

Grenfell Orphanage Destroyed By Fire

BOSTON, Mass., March 16 (Canadian Press).—Sir Wilfred Grenfell, famous medical missionary, was informed by telegraph yesterday that his northern orphanage at Gordon, North Labrador, has been destroyed by fire. The 50 children living there were saved and are being cared for by fishermen, but all clothing, food and other supplies were ruined.

Sir Wilfred, now in Boston, said that the orphanage building was of wood, "since that was all the International Grenfell Association could afford." It was only partially insured, he said, because insurance rates on wooden buildings in North Labrador were very high.

REBEKAH EUCHRE IS WELL ATTENDED

Dance Concludes Successful Social Event at Millbrook.

MILLBROOK, March 16.—The Rebekahs of Golden Sheaf Lodge, No. 176, held another of their delightful euchres in the I.O.O.F. Hall on Monday evening, with over one hundred and thirty in attendance.

Play continued until about 11 p.m. when supper was served by the committee in charge, and afterward some of the guests resumed play at the card tables, and a large number of the younger folk enjoyed dancing for an hour or two.

The prize winners were: Mrs. Ingram ladies' first, and Mrs. Melville Ball the consolation; A. A. Needler gentlemen's first, and J. Bothwell consolation.

W.M.A. Meets.

The March meeting of the Women's Missionary Auxiliary of the United Church was held at the parsonage on Tuesday afternoon, with over thirty members and visitors in attendance.

Mrs. F. H. Howard was in the chair for the business session when a number of items came up for discussion, among these being the allocation for supply work this year. The matter of a time for special prayer for all W.M.S. workers and undertakings at home and abroad was taken up, a period between ten and eleven o'clock each Friday morning being the suggestion of the president, Mrs. Roberts of Grafton. The holding of one or two sectional W.M.S. rallies was considered. June was the month suggested, and two rallies were considered best for the Presbyterial.

Mrs. C. C. Garside took charge of the formal program, Mrs. H. Ross Edmunds reading the devotional leaflet, and Mrs. J. H. George taking up the chapter in the study book, "New Paths for Old Purposes."

A duet by Mrs. W. H. Johnston and Mrs. F. P. Stinson was much enjoyed, and there was a pleasant social hour at the close when light refreshments were served.

Personals.

Mrs. Charles Sled and two children, John and Mary, who have been making an extended visit with her parents, Mr. and Mrs. H. A. Elson, left for their home in Regina on Wednesday of this week. Mr. George Elson accompanied his sister to the West.

Mrs. Wilbert Thorne was in town this week, taking her position as Noble Grand of the Rebekah Lodge at its regular session on Tuesday evening.

Miss Isabelle McCarthy, R.N., who has been taking a two weeks' holiday with her mother, Mrs. E. H. Barnes, has returned to her professional duties in Buffalo, N.Y.

Mrs. F. W. Burnham of Peterborough is spending this week at the home of Mrs. E. S. Burnham, on account of the latter's illness from a severe attack of 'flu.

KNOWN DEAD REACHES 285

Official Figures Indicating Toll in St. Francis Dam Disaster.

FAULTY CONSTRUCTION.

LOS ANGELES, Calif., Mar. 16. —(Canadian Press.)— Official figures indicating a known death toll of 285 in the St. Francis Dam disaster, and the charges of the California state engineer that the foundational weakness in the dam's abutments caused its collapse, stood out conspicuously yesterday in the aftermath of Tuesday's flood.

Eddie Hearne, deputy sheriff of Ventura county, testifying at an inquest over the bodies of nine victims at Moorpark, declared that 225 bodies had been recovered in Ventura county alone. These, with 52 bodies in the morgue at Newhall, in Los Angeles county, and eight at Bakersfield, fixed the total at 285.

The Moorpark coroner's jury found that the nine had come to their death by "accidetnal drowning due to the breaking of the St. Francis Dam."

A second inquest at Fillmore over 46 bodies resulted in the verdict of "death by drowning or being struck by floating objects, caused by the breaking of the St. Francis Dam."

Neither jury attempted to fix responsibility for the disaster to fix reoner at Fillmore saying that the time for doing that had not yet arrived.

The charge of faulty construction of the dam came from Edward Hyatt, Jr., state engineer, after he had inspected the structure's ruins in San Francisquito Canyon.

HASTINGS RESIDENT KICKED BY HORSE

Wilbert Simpson Meets With Painful Accident While Exercising Horse.

HASTINGS, March 16.—Mr. Wilbert Simpson, son of Robert Simpson, met with a very painful accident on Wednesday night. Wilbert, who has been assisting in work at a summer hotel on Margaret's Island for the past year, was exercising one of the horses when the animal kicked with great force and caught Mr. Simpson on the side of the head. He suffers a broken jaw and the loss of a greater part of his teeth. One shoe calk cut his head open just above the temple, while the other calk badly lacerated his cheek.

Mr. Simpson is in a critical condition, and was taken to Peterborough hospital for treatment.

WOULD BREAK GRAIN MONOPOLY

Divert Shipment of U. S. Grain From Montreal to New England Ports.

PROTEST CANADIAN RATE.

PHILADELPHIA, Mar. 16.—(Canadian Press.)— An organized movement to divert shipments of United States' grain from Montreal to United States' Atlantic ports and against the Canadan rate on grain to the seaboard has been initiated here by representatives of the ports of Boston, Philadelphia, Baltimore, Portland and other North Atlantic ports. They met at the invitation of Hubert J. Morgan, president of the Commercial Exchange to Philadelphia, to take what is described as "concerted action to break the grain shipping monopoly long held by Canada."

Appeal will be made to Secretary of Agriculture William J. Jardine to change the United States' standards of inspection as may be necessary to protect the American farmer, merchant marine and ports against Canadian and other foreign Commerce competition. In addition, appeal will be made to the Interstate Commerce Commission through Congressional representatives of the North Atlantic ports in an effort to have the commission order American rail carriers to meet the competition of the nationally-owned Canadian railroads, which are now assessing a rail rate of 3 cents a bushel lower than the American rail rate to the seaboard.

Senator Walsh, Massachusetts, in a telephone conversation with Frank S. Davis, representing the Maritime Association of the Boston Chamber of Comercem, agreed to undertake to bring together the senators of Maine, Pennsylvania, Maryland and Virginia at a conference to be held with representatives of the ports in Washington, March 19.

Hold Monopoly.

Through the disparity in rail rates and the difference in the inspection of grain between the United States and Canada, Canadian railroads are annually carrying approximately 90,000,000 bushels of American-raised grain to Montreal for export to the disadvantage of American ports, railroads and industries associated with shipping and transportation, it was said.

The committee voiced its alarm at the decreased movement of export grain through American North Atlantic ports and fears the effect it may have on the general shipping situation through these ports. It was

FAREWELL PARTY GIVEN AT WOOLER

Mr. and Mrs. Allan Tackabury Are Leaving the District.

WOOLER, March 16.—The home of Mr. and Mrs. Allan Tackabury was the scene of an enjoyable evening when about seventy of their friends gathered to bid them farewell before their departure from the neighborhood. During the evening, an address which was signed by Mr. and Mrs. W. J. Lawson and Mr. and Mrs. S. L. Terrill, was read, and a gift presented to them. The evening was spent in game, after which lunch was served.

Personals.

Mr. and Mrs. L. H. Rowe accompanied by Mrs. E. McConnell and Mrs. S. L. Terrill attended the sacred concert at Trenton on Sunday evening.

Mr. and Mrs. Percy Gooding and Nancy spent Monday with Mr. and Mrs. L. H. Rowe.

Mr. and Mrs. Lyal Leavitt entertained a few young people on Sunday afternoon.

Mrs. Esli Terrill spent Tuesday in Frankford with her brothers, S. B. and Lewis Herrington, of Hilton.

Mrs. Etta Rowe received a wire stating that her son-in-law was seriously ill in Belleville Hospital.

Mrs. D. S. Austin received word that her brother, Edgar Shaw, of Sault Ste. Marie, is in Wellesly Hospital, Toronto, undergoing an operation for goitre.

Mr. and Mrs. Lorne Mitchel and family are moving to the James McQuoid farm, near Trenton.

Mr. J. J. Rapple, representing the Ontario Tractor Co., was given a hearing by the Murray Council regarding the renting and buying a caterpillar tractor.

Mr. Babe, representing the Pedlar people, was also given a hearing re metal culverts.

Mr. and Mrs. Irvine Scott spent Sunday with Mr. and Mrs. Arthur Scott.

Mrs. Maynard Sharpe spent the week-end with her sister, Miss Helen Terrill, in Belleville.

Mr. and Mrs. Charles Hains of Castleton spent Sunday with Mrs. Hains' parents, Mr. and Mrs. William Forbes.

Owing to the warm sunshine on Monday and the sun and wind on Tuesday, the sleighing is practically gone.

Because of many accidents due to reckless driving by bus chauffeurs, Mayor Massip of Guanabacoa, Cuba, has started a campaign against speeders both in the city and on country roads.

was spent in cards and dancing.

Miss Helen McLean spent a few days with Miss Kathleen Sisson, of Ida.

Lesson No. 9

Question: Can rickets be prevented?

Answer: Yes, by assuring plenty of the rickets-preventing vitamin of cod-liver oil in the diet of mother and baby.

SCOTT'S EMULSION contains all cod-liver oil vitamins in great abundance.

ROADS IMPASSABLE FOR HEAVY LOADS

Thaw Puts Those Near Mount Pleasant in Bad Condition.

MOUNT PLEASANT, March 16.—The roads in this vicinity are in a bad condition owing to the recent thaw and are not at all passable for heavy loads. There was a great depth of snow on the level and many feared a bad flood in the spring but the thaw of this week has lowered it considerably. The county snow plow was over the middle road on Wednesday making much improvement for traffic.

Spring is not far off, numerous crows have been heard and several robins have been seen.

Farmers are busy hauling logs, wood, etc., before the breaking up of the roads. A number are getting in a good supply of chop.

Miss Mable Eggleston entertained a large number of her friends on Wednesday evening at the home of her uncle, Mr. Walter Windram, Cavan, on the occasion of her seventh birthday anniversary. The evening

TRENT RIVER ICE BREAKING

Stretch in Campbellford Now Open—Trappers Not Out Yet.

MARSHES STILL FROZEN.

CAMPBELLFORD, Mar. 16.— The warm weather during the last few days has opened the ice on the river in several spots and the volume of water has increased considerably during that time. For the last few winters, there has been no ice on the west side of the river immediately below the Bridge street bridge, but this year the entire surface has been frozen. The part now open is where the water seems to be comparatively swift and is invariably the last part to freeze. If the present high temperature continues, the stretch through the town limits should be clear of ice in a very few days.

Although the river itself is opening up gradually, this is not the case with the marshes, and the trappers have not been able to make any noteworthy catches to date. There seems every indication of a late season again this year. In an interview with the local fish and game inspector, The Examiner learns that there is no evidence of the law regarding muskrats being broken so far this season, nor during the winter. He has not found any of their houses molested in any way during his frequent trips up and down the river. He also says that the trappers have been unable to make any sets in the marshes on account of the ice. He also reports that there are a number of new houses along the river at various places which have been known as likely feeding grounds for water animals.

INSPIRING ADDRESS GIVEN YOUNG PEOPLE

Mrs. Richards Speaks at Regular Meeting of St. Andrew's Y.P.A.

WARKWORTH, March 16.—"How can I help others to follow Jesus" was the paper given by Mrs. Richards at the weekly meeting of St. Andrew's A.Y.P.A. Jesus is depending on us to bring others to His Kingdom. "No doubt all of us during our school life have played the game 'Follow the leader' and we realized when we had a good leader or a poor one. We are commanded to go out into the highways and compel others to come in that My house may be filled. Tell others about the Christian life", continued Mrs. Richards, "invite them to church, Sunday school and Young People's meetings. Pray for our fellow men. More things are wrought by prayers than this world dreams of."

Mrs. Carlow gave a paper on the Scottish covenanters, while a piano solo was given by Esther Wright, vocal solo by Marguerite Nelson, reading by Stewart McCubbin, duet, Mr. Maycock and Everett Maycock, and a recitation by Margaret Richards.

The society accepted the invitation from the Campbellford Society to spend a social evening with them on March 26, and plans were made for a program.

MUSKRAT SEASON WILL OPEN SHORTLY

Some Trappers Have Already Taken Rats in Hastings Area.

HASTINGS, March 16—The muskrat trapping season, is again about to commence. Several of the local trappers are already obtaining a few rats, but most of the are awaiting the departure of the ice from the shores of Trent River and the adjoining marshes. Several of the farmers rent their land along the river during this season to trappers. The ice is very thick, but is rapidly disappearing and hopes are held for an early opening of the rivers and marshes, consequently a good catch.

Last season there were some seven or eight hundred pelts sold from Hastings, the highest price obtained being $2.65.

Personals.

Mrs. William Warner who was operated on in Peterborough some time ago, returned to her home on Monday.

Mrs. Iden Bond is spending a three weeks' vacation with her daughter, Mrs. Fred Scriver, in Buffalo, N.Y.

Mr. John Fairman recently was the finder of a pearl larger than a kernel of wheat, in a jar of oysters.

Mr. Norman McKelvie of Norwood is spending a few days in town.

Mr. and Mrs. Alex Merrill of Warkworth were recent guests of Mr. and Mrs. John Oliver.

Mr. James L. Irwin of Belleville was a visitor to town on Tuesday.

Mr. E. L. Sackville, district manager of the Manufacturers' Life Insurance Co., was a business visitor in town on Wednesday, being the guest of Mr. George B. Stevenson.

Rev. A. C. Hie spent Monday in Belleville.

Mr. Albert Brooks is spending this week with his daughter, Mrs. Venters, of Lindsay.

The final game of hockey that perhaps will be played this season, was between the married and single men, the latter winning by 5-3.

PEN PRESENTED RETIRING OFFICER

Mrs. Robert Lewers Has Been Ladies' Aid Secretary For 21 Years.

FRASERVILLE, March 16.—Mrs. Robert Waterman entertained the members of the Fraserville Ladies' Aid at the March meeting when Mrs. Robert Lewers was presented with a fountain pen, on her retirement from the secretaryship, which she has held for twenty-one years. Mrs. Lewers was taken completely by surprise but responded suitaoly.

There were over thirty present, and the sympathy of the ladies was extended to Mrs. Fred Clarke, vice-president, who was unable to be present through illness. A good afternoon's work of quilting was accomplished after which a sumptuous supper was served.

Miss Olive Carl was given a farewell party by the Young People's League, at the home of Mr. Arthur Carl, recently, before leaving for Peterborough, where she will enter Nicholls Hospital as a nurse-in-training. During the evening, Miss Carl was presented with several pieces of pearl and amber, the address being read by Miss Bessie Wood, and the presentation being made by Miss Ethel Cunningham. The remainder of the evening was spent in games and music followed by refreshments. Miss Carl's many friends wish her every success in her new vocation.

Personals.

Mr. Frank Foley of Toronto University spent a couple of days with his parents, Rev. H. W. and Mrs. Foley.

Miss Mildred Moncrief was the guest of her sister, Mrs. H. White, Bethany, over the week-end.

Miss Mary Wood spent the week-end at Campbellcroft, as the guest of Miss Emmeline Bannister.

Mr. and Mrs. T. Willan have moved back to their farm after spending the winter in Peterborough.

Miss Mary Foley, of Campbellcroft, spent the week-end with her parents, Rev. W. H. and Mrs. Foley.

TOOK DOCTORS' ADVICE —COLD GONE NEXT DAY

Advise Hospital Tested Method for Home Use—Many Here Relieved in Few Hours

A quick, pleasant and inexpensive method—endorsed by physicians for home use—brought to Robert H. Sullivan the same speedy relief which druggists here say has been experienced by so many Peterborough people who have used it for head colds, chronic coughs and deep seated chest colds.

Mr. Sullivan had neglected his cold for two or three days and it had settled in the nasal passages and bronchial tubes. He was unable to breathe through his nose; his stomach became upset and he coughed so his mother-in-law called a physician.

On advice of the doctor he started regular hourly doses of Ayer's Cherry Pectoral—a concentrated mixture of ingredients which hospitals have found to be the quickest, safest and surest to end colds. With the very first pleasant swallow he felt its comforting, healing warmth—from his nose passages deep down into his chest. Relief came almost immediately and in a day or so he was completely rid of the cold.

Note: Other cases reported daily—all certified by the physicians who treated each case.

Doctors find that this hospital medicine does far more than stop coughing instantly. It is absorbed by the whole system. This quickly checks phlegm, heals irritation and drives out the cold from the nose passages, throat and chest.

Just a few pleasant spoonfuls of Cherry Pectoral now and you'll feel like a different person tomorrow. Hospital directions with each bottle.

AYER'S Cherry Pectoral For COLDS and COUGHS

Store Magnate Left $50,000,000 Estate

PHILADELPHIA, March 16 (Canadian Press).—The estate of the late Rodman Wanamaker, head of the Wanamaker Stores in Philadelphia and New York, it is said, will be placed in the hands of a board of trustees of three persons who will work in conjunction with a board of advisers.

The estate is believed to be valued at about $50,000,000. The will, which is being prepared for probate, is said to create a vast trust for the benefit of relatives and business associates.

The business of the Wanamaker stores, it is authoritatively stated, will be operated under the present management exactly as it was before Mr. Wanamaker died.

The THRILL of BRIMMING HEALTH

GET the thrill of brimming health by having the right kind of breakfast—a breakfast that "stands by" you and sustains all through the forenoon. For 70% of the day's work falls in the four morning hours.

Quick Quaker is the perfect cereal food. Its 16% protein constantly builds and rebuilds worn tissues. Its 65% carbohydrates supplies abundant energy. Minerals tone the blood. Bulk ensures easy digestion. Necessary vitamines make assimilation complete.

No one ever tires of the pleasing nutlike flavour. It has been developed by more than fifty years of milling experience. Yet Quick Quaker costs but a cent a meal.

Be sure to ask your grocer for Quick Quaker. You will know it by the picture of the Quaker. Packages contain coupons with which you can secure silverware and other household and personal articles you need. Fastest cooking cereal—cooks in 2½ to 5 minutes and doesn't require watching. Big, family package, and small 10-cent size, both wrapped and sealed.

Get Dainty China

In each package of Quick Quaker, marked "Chinaware," is a piece of fine china, prettily decorated in blue and gold. It's fun to open a package and find a cup, a saucer, a plate or bowl. All lovely things, beautifully designed.

Window Shades 69c Each

Choice of white, cream or green, in standard size, 37 x 70 inches. All are first quality Shades with rollers made by Hartshorn.

AID PROMISED TO TOWNSHIPS

Government Will Not Assume Full Responsibility For Rural Roads.

MINISTER EXPLAINS.

TORONTO, Mar. 15.—The Ontario Government is ready to provide additional relief to the townships and counties from taxation for Provincial and other highways in proportion to the increase of traffic which is not of a local nature, but it will not assume the full financial responsibility of Provincial highways, since this would mean, in fairness to all, taking over the entire road system of the province, and entering upon a new field in which highways would be constructed and maintained by means of direct taxation.

This was in effect the reply given by the Minister of Highways in the Legislature yesterday to the budget amendment as remarkable, and ex-Liberal party by R. F. Miller, Haldimand, "that this House regrets that the Government, notwithstanding the increased revenues, has failed to afford relief to local municipalities by assuming the total cost of construction and maintenance of the Provincial highways."

Expounds New Theory.

Hon. Mr. Henry described the amendmetn as remarkable, and expounding a theory new to that or any other responsible Legislature, namely, that as soon as revenues became buoyant, Governments should immediately enter upon proportionate expenditure. It was the duty of any government, he pointed out, to take from the people only that which was necessary to provide for efficient administration.

The Minister of Highways, speaking for some two hours, reviewed the progress of highway development in the province, and interspersed into his address another ultimatum to reckless motorists, who refused to obey such traffic regulations as providing themselves with spare bulbs for headlights. He called upon the police to deal severely with any motorists found driving on the highways with only one headlight.

The tendency toward speeding and reckless driving also came in for a few timely words from the Minister, who urged that these men be given the full penalty which the law allowed. He did not exempt from this the bus operators, a mong them the employes of the Toronto Transportation Commission, who, he said, were infringing on the laws as much as private citizens.

The Minister discussed at some length the present highways organization in force in the counties and townships, urging the appointment of efficient road supervisors in every township, rather than continue carrying on the work in the piecemeal manner which was evidenced in some instances.

No Statute Labor Grants.

"We are as a people conservative," he declared, "and we cling to old things with tenacity. Statute labor was established in the province 130 years ago, and we still have it in some parts of the province to-day. There are some municipal councils who seem to think that this is the only system. The Government, in assuming the responsibility for a portion of the roads has discouraged this system and will not pay grants on work so done. I am looking forward to a session in the not far distant future when I will wipe out statute labor, not because we have not any respect for the old things, but because when they have outlived their usefulness they should be abolished."

The Minister reviewed the progress of highway legislation into the Province by which in 1920 it had taken over 80 per cent. of the provincial highway costs and in 1925 had assumed 50 per cent. instead of 40 per cent. of the county road costs. The Province of Ontario, he said, had spent approximately $161,000,000 to date on its roads, of which $150,000,000 had been spent in the last ten years, or about $15,000,000 annually. Last year's figure had gone above anything, in the previous history of the province with a total expenditure of $18,900,000. Including the $4,500,000 spent on the northern roads this made an approximate expenditure of $25,000,000. "To my mind one of the problems which lies before us now," he added, "is that in years to come we will need at least this $25,000,000 annually for the development of our road system in this province.

"The department during 1927 had laid 239 miles of road, of which 130 miles had been concrete, 63 asphalt, 32 penetration, and 14 macadam.

Tax on Gasoline

There had been a great deal of criticism, Mr. Henry went on, in connection with the increase of the gasoline tax by citizens who could not see that they should pay for roads outside the cities which they claimed they never used. He wished to remind such critics that though they might not go outside the city, others might come and visit them and that visitors might bring business.

The Minister did not believe that the increase of accidents on the Ontario highways was due for the most part to the speed at which cars travelled.

"My own impression is," he said, "that speeding in itself is not dangerous if the driver has control of his car. I am not advocating, however, rates of 40, 50 and 60 miles an hour, because the control of any vehicle at that speed is exceedingly difficult.

"I think I can report with confidence," the minister continued, "that the use of the driver's license in the province is having a good effect."

The Minister explained further the new legislation brought down in the House which eliminates the use of spotlights. "We are not proposing," he pointed out, to "prohibit anything in the line of a ditch light properly placed in the car. These may be placed under the fender of the front wheel or under the headlight and will fulfill the purpose for which they are intended of lighting up the ditch at the side.

Glaring Headlights

While not satisfied with the conditions in the province with regard to glaring headlights the Minister believed progress was being made.

"I do not know what we can do," he declared, "to arouse the people to a sense of their responsibility. I would say to all the police in towns and counties that every man who attempts to drive around with only one headlight should be hauled up and given the maximum penalty which the law provides. "The department, the minister declared, intended to keep after the speeder and to see that he got the penalty which was due to him in this respect.

JOLLY JINGLES By Graham Hunter

ONE YEAR FOR SHOOTING.

Indian Sentenced To Reformatory For Wounding Man in Brawl.

BELLEVILLE, March 15 (Canadian Press). — One year in the Ontario Reformatory at Guelph was the sentence imposed by Mr. Justice McEvoy to-day upon David Maracle, an Indian, found guilty of shooting and doing bodily harm without intent. His Lordship pointed out that the prisoner might have been found guilty on the more serious charge of attempted murder, but that he was probably the innocent victim of a drunken brawl. The charge arose from the shooting of Percy Haynes, a mute, at Maracle's home on October 17 last.

WINS BET, LANDS IN JAIL

Walking down one of the principal streets of Glasgow, Scotland, on a chilly winter day, wearing nothing but a bathing suit and shouting loudly, Michael Casey was arrested. He explained to the judge that he had wagered that he could do the feat despite the weather. Casey was sentenced to 42 days in jail for disturbing the quiet of Glasgow.

TO TEACHERS!

Come to Niagara Falls in July—don't wait for your "honeymoon" to see the Great Cataract. Children in public and parochial schools who write best essays on "Wheat" come with their teachers at our expense. The conditions are easy.

FRIDAY, MARCH 16 1928.

WHAT CAN A MAN BELIEVE.

In presenting in series form Bruce Barton's latest book, "What Can a Man Believe?", The Examiner is actuated by the desire to make available to its readers the newest production of the man who wrote "The Man Nobody Knows" and "The Book Nobody Knows", believing that a newspaper which aims at serving its community from all angles should naturally give its readers something along religious lines about which to think.

In his other books Mr. Barton's sparkling, unconventional and clear treatment of his subject presented Jesus with new light and force and interpreted the Bible for this generation in a fresh and impressive manner that aroused intense interest.

In "What Can a Man Believe?" readers of his other contributions will find their keenest hopes gratified inasmuch as Mr. Barton's style has lost none of its force and sparkle and the topics he discusses are alive and vital.

Just a few chapters taken at random may be mentioned: "Would the world be better or worse off if it should abolish religion?" "Of the various religions now extant which is the best?" "Has the church done more harm than good?" are some of the questions Bruce Barton answers.

They furnish light upon the nature of his book which The Examiner is sure will be welcomed as a new feature of absorbing interest.

It begins on Monday.

MR. RICKARD IS DISGUSTED.

The shrewd promoter Tex Rickard who has developed prize fighting into a major industry is described as leaving the scene of the Heeney-Risko fight the other night before the contest was over.

Mr. Rickard was obviously disgusted and the reason was not difficult to locate.

His elimination series, while supposed to be for the purpose of producing a fighter capable of giving Champion Gene Tunney a hard battle, has really been intended to locate a warrior colorful enough to be put over on the public as a million dollar proposition, somebody that could be played up as a box office attraction of more than average brilliancy.

No wonder the impressario is disgruntled.

So far his quest has completely failed.

It has evolved two battlers of remarkable endurance and stamina who should stage a memorable fight when matched against each other, but who are a dead loss so far as being a box office magnet in a match with Tunney is concerned.

Both Heeney and Risko can fight—in their own way and style—but they fail to fill the bill so far as the "bally hoo" is concerned.

The shrewdest press agent in the world could hardly sell the idea to the public that a contest between either of them and the champion should draw one of those big gates that Mr. Rickard has shown so much skill in building up.

But the promoter really should conceal his feelings; his dissatisfaction may serve to make the public realize the amount of hokum that goes with these battles of the century.

THE HUMANE SOCIETY.

With the object of raising funds for the carrying on of its splendid work in this city and district the Peterborough Humane Society has been holding a series of Sunday evening sacred concerts in the Regent Theatre.

Another of these concerts is to be held on Sunday and it is hoped that the attendance will be such as to be regarded as a vote of confidence in what the Society is endeavoring to do in Peterborough and as to provide a welcome addition to the funds of the organization.

Without a great deal of fuss or publicity the Humane Society has been rendering a very efficient community service on behalf of dumb animals.

It has been surprising to read the reports of the Society's inspector and realize the number of cases in which his assistance, advice, warnings or legal action have been necessary.

Those who have felt that there was really no need for such a work, and that the police could take care of all the cases that presented themselves will find in such reports conditions that will undoubtedly cause them to change their minds.

Many of the cases investigated might be regarded as trivial in themselves but the cumulative effect of existence of an organization aiming at the alleviations as far as possible of pain and suffering among dumb animals can readily be grasped when the extent of the inspector's activities is grasped.

Funds are needed and a large attendance at Sunday's concert, for which an excellent program has been prepared, will be of material assistance.

BEWARE THE ICE OF MARCH.

Every grown-up boy between the years of thirty and ninety remembers the March ponds of his youth, those few swift years that seemed in boyhood so long.

Orion in March was in full retreat, but fighting at every ditch. Mornings found his defiance on the ponds that had been spread out and deepened overnight by the freshets of Spring. By noon his ramparts were reduced to the consistency boys still welcome as rubber. It billowed beneath your feet as you ventured across it, and your steps must be as light and mincing as if you were walking on eggs, lest you break through and get wet.

Skating on thin ice had none of the thrills of skimming and sliding over "rubber" ice. Thin ice either broke with you or it didn't; the yielding rubber sank under your weight at every step and threatened a wetting at every foot from shore to shore. Often it broke under you. Sometimes your boot filled with water, and again not even the nimble sole was wet.

There was a risk or temptation about it that was irresistible to the spirit of recklessness.

Past thirty, all the way up the years, in spite of experience and wisdom and morality, boys that look like men and certainly consider themselves manly, even gentlemanly, if that distinction is worth introducing, yield to the lure of tip-toeing across symbolic perils of "rubber ice." Their maxim is "don't get wet", in other words "don't get caught.". In positions of trust they stoop to peculation, a euphemism for plain, ugly theft. And an alarming number of them have taken a chance of late on that pond. Other commandments and conventions are flouted in much the smae spirit of "getting away with it", unmindful of the first lessons of boyhood when the penalty for wet feet from the forbidden ice of March was an application of the parental slipper or shingle.

Figurative rubber ice is the playgrounds of fools.

FORTUITOUS CIRCUMSTANCE.

(From Toronto Saturday Night.)

On Jan. 30th three episodes were recorded in the press which illustrated the problem of fortuitous circumstances—the unforeseen things which occasionally defeats all efforts aimed at security. These occurrences comes under the category of what used to be known as "Acts of God." History is replete with them, incidents like the iceberg which suddenly loomed up and destroyed the "Titanic," at that time the greatest achievement in ship-building since the beginning of time, or the peculiar combination of the elements which destroyed Sir Ernest Shackleton's "unsinkable ship" a few years later.

On the day in question a runaway team attached to a farmer's sleigh, unnoticed by anyone, accidentally pried open a switch at Limoges, Ont., and wrecked the special train bearing President Cosgrave of the Irish Free State to Ottawa—pure chance which nobody could have anticipated.

On the previous night some poor old women who had been allowed to stay in the Metropolitan Church, Toronto, and make tea in the little kitchen used for church socials, forgot to turn off the heater when they went home. As a result the proudest monument of Methodism in Canada was a few hours later destroyed by fire. This was, of course, a preventable disaster had such an occurrence been foreseen—but the chance was very remote.

On the same night, according to belief which cannot be definitely proven, a heater used in connection with an experiment where prolonged heat was necessary, set fire to the great medical building of the University of Toronto, and did costly damage which seriously embarrasses studies for the rest of the term. If such an occurrence had been foreseen, due precaution would certainly have been taken, but all was considered secure.

These episodes illustrate the absolute impossibility of providing against all contingencies, and the margin of chance that must be allowed in spite of all measures of safety. Of course, they do not furnish an excuse for abandoning precautions and leaving things to fate—emphatically the reverse. But it is clear that while we may minimize we cannot absolutely avert disaster.

UNCLE SAM'S CORNS.

Sir Robert Horne, a former British Chancellor of the Exchequer, has incurred the wrath of the St. Catharines Standard because, in a moment of ebullience over the arrival of Bert Hinkler in Australia, he said the British aviator's feat was greater than Lindbergh's. The Standard takes him to task for such language on the ground that it is "not conducive to international goodwill."

Hoity toity! Why this solicitude for Uncle Sam's feelings?

Sam has a habit of banging the big drum and ballyhooing to the world that all his geese are swans. Usually he claims the biggest and fastest of everything, except when the fact is too well known to be disputed.

Ever see a United States editor chide a fellow-citizen for boosting or boasting?

There was a "hundred percenter" in this office a short time ago who apprised a reporter that, next to New York, the greatest shipping port in the world was Galveston, Texas. Where Galveston is in that respect the almanacs don't even mention. But our Texas friend no doubt believes it, and his manner of speaking is typical of the people.

Lindbergh accomplished a wonderful feat, and anything that is done by any other aviator will not harm its lustre. He made a world's record, and in attempting it he might have fallen into the ocean and never been heard of. Hinkler made five world's records, and in attempting his flight he might have fallen into one of many seas and lakes, down a mountain crevasse, into a jungle, or landed in the middle of a desert and never been heard of.

No wonder that even the usually complacent British, who regard U. S. boasting with an indulgent smile, ventured to whoop a little louder than is their wont.

Will the St. Catharines Standard take the U. S. financier to task for saying the other day that it was the Federal Reserve Banking Act that won the war? That sort of twaddle is "not conducive to international good-will."

At the risk of adding fuel to the flames, we would even seize this occasion to rub in the forgotten fact that two British airmen, Alcock and Brown, flew the Atlantic in an airplane nearly nine years ago, at a time when machines were primitive compared with the mechanical marvel that Lindbergh used.

And we don't care if it makes Sam sore to be reminded that a British liner crossed the Atlantic faster than any other ship afloat; that a British airship is the only one that has ever crossed the Atlantic and back again; and that a British inventor was the first to broadcast pictures across the Atlantic, one week after U. S. patriots were shouting "Zip, boom, bang, rah-rah, zowie, whoops," and all the rest of the superiority complex stock-in-trade because a U. S. inventor had broadcast pictures a distance of twenty-five miles.

Sam's epidermis is tough but sensitive, yet if it gets a prod with the stick that he is always using on other people, why should a Canadian paper get mad about it?—St. Thomas Times-Journal.

EDITORIAL NOTES AND COMMENT.

Remember the orphans tomorrow.

A new sport for members of the House of Commons this week has been putting the "Boo" in "Bourassa."

Hon. G. S. Henry is still hurling warnings at traffic act violators; he should try a few police court summons for a change.

All this propaganda about the rapidly vanishing fish makes our last year's fishing record look a little more creditable. You can't catch them if they are not there.

To put it mildly, some of Toronto's officials have been a little careless in money matters.

Why blame Mr. Bourassa for calling attention to a rule, the passing of which he had opposed.

The trans-Atlantic air passage has claimed two more lives. The game is not worth the candle.

If the spotlight is to be cut out what will some of the politicians do?

CATTLE, GRAIN AND PRODUCE

LOCAL HOG MARKETS.

Live hogs, thick, smooth, $8.50 cwt.; select graded, $9.00; dressed hogs, head on, $14.50; head off, $15.50 per cwt.

TORONTO LIVESTOCK

TORONTO, March 16.—With only four loads of fresh receipts, market cleared steady at Wednesday's of 25c on all medium and common grades of butcher cattle.

Choice heavy steers firm at $10 to $11, general run of good to choice steers and heifers $9 to $10.25.

Fat cows, choice, 25c lower, at $8.00 to $8.25, tops.

Bulls, choice butcher, $7.00 to $7.25.

Calves steady, $14 to $14.50 tops.

Receipts.

Union Stock Yards—Receipts: Cattle, 53; calves, 8; hogs, 90; lambs, 2.

Sheep	7.00 8.00
Hogs, f.o.b. thick, smooth	8.25
Hogs, selects, f.o.b.	9.00
Hogs, off cars, selects	9.90

MONTREAL GRAIN AND PRODUCE.

MONTREAL, March 16 (Canadian Press). — The export trade in Canadian grain here yesterday was extremely dull owing to the fact that foreign buyers failed to respond to the prices asked by local exporters.

A feature of the domestic cash grain trade was the good demand for Manitoba feed wheat and sales of some fair quantities were made at 27c per bushel under the Winnipeg May option, ex-store here. The trade in oats was moderate and the tone of the market was firm.

The inquiry for spring and winter wheat grades of flour continued quiet, but values were unchanged.

The demand from the United States for all lines of millfeed was good, but owing to the small supplies available from millers, the volume of business was checked. The local trade was active and firm. The market for standard grades of rolled oats was quiet but steady.

An active business was again done in all grades of fresh eggs and prices were firm. The receipts were 1,727 cases.

The undertone to the potato market continued firm under a good demand from all sources.

The trade in imported beans was fair and prices were steady. Sales of car lots of choice white handpicked were made at $3.50 per bushel, ex-track, and smaller quantities at $3.60 per bushel, ex-store.

The demand for butter was again of a limited character, but the prices were firmly maintained. The receipts were 24 packages.

Owing to the small stocks of cheese held in first hands a stronger feeling prevailed in the local market and the prices scored a fractional advance. The demand was quiet. The receipts were 49 boxes.

Quebec potatoes, per bag, car lots, $1.70 to $1.75.

CHICAGO CATTLE.

CHICAGO, March 16 (Canadian Press). — Cattle, 7,500; best heavy steers, $14.40; yearlings, $13.50; heifer yearlings, $12.50; meagre fat cows supply strong; cutters weak; bulls steady to strong; vealers steady to 25c lower; most low cutter cows, $5.15 to $5.25; few light shelly kinds, $5.00; light vealers, $12.00 to $13.00; some 95 pound average, $11.50; small killer and shippers, $13.50 to $14.50; few, $15.00.

Hogs, 40,000; top, $8.60 paid for sorted 200 to 210 pound weight; bulk better grade 170 to 220 pound averages largely, $8.20 to $8.45; desirable 230 to 260 pounds, $8.05 to $8.15; good and choice 280 to 320 pound butchers largely, $7.90 to $8.15; bulk medium and good 140 to 160 pounds, $7.50 to $8.25; best up to $8.40; pigs largely, $6.50 to $7.25; choice strongweight up to $7.75; packing sows steady, bulk, $6.90 to $7.40; few up to $7.70.

Sheep, 10,000; good to choice handyweights, $15.50 to $16.50; best Colorados at inside little good enough to pass, $16.35; bulk 90 to 97 pound Colorados, $15.75 to $16.10; extreme weights throwouts, $14.75 to $14.85; good 78 pound clipped Montana lambs, 30c higher than Wednesday, $13.80; sheep scarce firm, small supply feeding and shearing lambs strong to 25c higher; good to choice kinds, $14.75 to $15.50; shearing lambs carrying few killers, $16.25.

CHICAGO GRAIN.

CHICAGO, March 16 (Canadian Press). — Activity in the corn market took on large proportions yesterday, and export business widened out at the highest prices yet, on the present crop. Decreasing receipts of corn and unfavorable weather for corn movement were contributing factors in turning the corn market upward.

Closing quotations on corn were firm ¼c to ¾c to ⅞c net higher, with wheat ¼c to ⅞c off, oats at ¼c decline to an equal advance, and provisions varying from 7 to 10 cents setback to a rise of 2 cents.

Corn traders gave special attention to the circumstances that foreign buyers appeared to be following advances in price and that premiums being paid to obtain immediate delivery of corn have increased to a material extent within the last week. Particular notice was also directed to messages indicating that export business not only in corn but in oats as well as being done at the season's highest quotations. Meanwhile, primary arrivals of corn yesterday totalled only 906,000 bushels against 1,661,000 bushels a week ago.

Another stimulus to buyers in the corn market was an assertion that some corn taken in on March contracts here had been ordered sent to Baltimore and Philadelphia for export. The bulk of the corn sold abroad yesterday, however, was understood to have been obtained at the Gulf of Mexico, where bids were at a new top figure, 8 cents over the price of Chicago May delivery.

Beneficial rains and snow west and south-west, especially in Kansas, Nebraska and Colorado, had a bearish effect on the wheat market. During the last part of the day, however, there was no decided selling pressure on wheat, the strength of corn acting as more or less of a counter-balance. Besides, Argentine wheat exports for the week showed a falling off, compared with the week previous and also with a year ago.

With a good export business under way in oats and also in barley, the oats market averaged higher.

Provisions were somewhat easier as a result of hedging sales for packers.

STERLING EXCHANGE.

MONTREAL, March 16 (Canadian Press). — Sterling exchange rates were quoted here yesterday as:

Demand—$4.87 3-16.
Cables—$4.87⅝.

SHE COUGHED NIGHT AND DAY COULD NOT SLEEP

Mrs. Leonard Haywood, Victoria Corner, N.B., writes:—"Last fall I took an awful cold which I caught while driving in an open car on a cold day.

"I coughed night and day, could not sleep at night, and my eyes ran water so that I could hardly see a thing.

"My husband got me a bottle of

Dr. Wood's Norway Pine Syrup

and before I had taken the whole of it my cold had disappeared."

"Dr. Wood's" has been on the market for the past 39 years; price 35c. a bottle, large family size 60c.; put up only by The T. Milburn Co., Limited, Toronto, Ont.

GOD'S MINUTE

When I call to remembrance the unfeigned faith that is in thee, which dwelt first in thy grandmother Lois, and thy mother Eunice, and I am persuaded that in thee also. Wherefore I put thee in rememberance that thou stir up the gift of God, which is in thee by the putting on of my hands. For God hath not given us the spirit of fear, but of power, and of love, and of a sound mind.—2 Timothy 1:5-7.

Our Father, we thank Thee for binding this family together by the sacred tie of common blood. We remember with how such sacrificial love its life has been created and sustained. We bless Thee for a mother's travail and tenderness, for a father's faithful toil. Knit us together by our common joys and sorrows, so that even if we are far removed from one another, nothing may estrange our hearts. When the youngest of us is old and gray-headed, may the memories of our home still be sweet and dear. May the children's children of this family still have vigor and virtues of our best forefathers, and may the faith, too, of our fathers burn brightly in their hearts. Deal graciously with our loved one. Give us our daily bread and strength for our daily tasks. To Thee we commit the life and destiny of each, through Jesus Christ, our Lord. Amen.

Prof. W. Rauschenbusch, A.B. D.D. Rochester, New York.

Fine flavour and low Cost are combined in every package of Chase & Sanborn's SUPERIOR TEA

A Thought

THE JOB OF LIVING.

Thrills! We seek them everywhere; in the theatre, in the "movie-show", in books, in all the by-paths of existence. We get them vicariously, suffering with the hero or heroine in their misery and adversity, rejoicing with them in their final victory. But seldom do we seek them where they certainly should be found, at first-hand, in our workaday existence. We, as a general thing, seek second-hand thrills. Yes, and many of us go through life wailing Ben King's lines of "The Pessimist", and groaning wearily that there is,

"Nothing to do but work,
Nothing to eat but food,
Nothing to wear but clothes
To keep one from going nude."

and we imagine we are really living. We get no thrill out of The Job of Living—out of our own job of living. So we bewail our hum-drum existence.

Our lives will be much fuller, much happier, when we learn to sense The Thrill of The Job. To quote from Angela Morgan's "A Song of Life"—and to close:

"Say not, 'I live!'
Unless the morning's trumpet brings
A shock of glory to your soul,
Unless the ecstacy that sings
Through rushing worlds and insects' wings,
Sends you upspringing to your goal,
Glad of the need for toil and strife,
Eager to grapple hands with Life—
Say not, 'I live!'"

—Arthur F. Barker.

THREE TRAPPED 10 WEEKS.

Three men were trapped for more than 10 weeks in the famous Lonship's Lighthouse at Land's End, Scotland, during the recent storms. The men ordinarily do a month's duty at the lighthouse, but rough weather and stormy seas made it impossible to get a boat to traverse the mile and three-quarters to land. A relief boat waited in Sennen Cove with a stock of supplies, but was helpless during that time. The lone vigil of the men to keep the light burning was not even relieved by radio, for their receiving set had been sent to shore for repairs just before the storm broke. All three were in good spirits when rescued.

ARTISTS' WORK IS RECOGNIZED

Montreal Gallery Specializes in Paintings Done By Canadians.

COMMERCIAL ART.

MONTREAL, Que., March 16 (By The Canadian Press).—The recent inauguration by one of the leading commercial art galleries of Montreal of a continuous exhibition of paintings by Canadian artists provides a fresh indication of the steadily widening interest in the productions of native painters. The innovation has been so favorably received by the public that it is expected that other galleries will follow suit next season.

Some regret has been expressed that thus far the academic school of painters has been favored, rather than that vigorous body of younger men and women whose remarkable landscape work brought the individuality of Canadian pictorial art so prominently to the attention of international critics when exhibited in London and Paris. But it is confidently expected that this condition will now be early remedied and that the work of several pioneers in the new movement, resident in Montreal, will receive its full share of attention.

The gallery which introduced this idea locally plans to vary its Canadian exhibition month by month, selecting a new group of artists for each showing. In this way those interested in pictures will be afforded the opportunity of studying the different aspects and trends of Canadian art. Already the advent of a fresh group of landscapes and portraits is looked forward to with keen interest.

Although the initial showing smacked overstrongly of the academy to appeal to the younger spirits, a number of painters were represented who have contributed to the new movement and whose creative expression is still developing along distinctive lines. Life studies and portraits by Randolph Hewston stood out by reason of the assurance and freedom of the artist's handling of color. Compromise never enters into this painter's approach to a subject. As a consequence he secures effects which are at once decorative and striking.

Francis Holgate, another Montreal artist given a place along with the elder masters of the brush, has a charming group of landscapes, each rendered in his distinctive style. While Mr. Holgate's landscapes are always pleasing, it is with the wood-cut that he has accomplished his finest work. In this field, rather neglected by Canadian artists, he takes a leading place. His figure studies, some simple and notable for their economy of line, others highly ambitious, frequently strike a sharp note of satire. At other times a more mellow spirit prevails, but always these wood-cuts express intellectual emotion —which can be said of the work of few exponents of the wood-cut and color print.

Omemee

OMEMEE, March 15.—Mrs. Kenneth Griffin, of Bobcaygeon, visited friends in town on Saturday.

Mrs. William Henderson was the guest of her son, Mr. Neil Henderson, in Toronto over the week-end.

Mrs. Stalter has returned to her home in Oshawa, after visiting her son, Mr. O. R. Stalter.

Mrs. A. Franks, of Frank Hill, is the guest of her daughter, Mrs. L. Brooks.

Miss Irene Faulkner, of Peterborough, was the guest of her parents over the week-end.

Mrs. Thomas Magee has returned home after an extended visit with her sister, Mrs. J. Donaldson, of Peterborough.

Miss A. Barris and Miss Madeline Gray, spent Saturday in Peterborough.

Miss Thurston, of Dunsford, visited her sister, Mrs. Cyril Elliott last week.

Mrs. D. Deyell and son John, are spending a few days with the former's brother, Mr. Albert Ford, of Havelock.

Misses Edith and L. Curry were visitors to Peterborough on Tuesday.

ESCAPED SLAVE DIES AGED 104

Lloyd Graves Made Perilous Trip To Canada in 1842.

SUCCESSFUL GARDENER.

ST. THOMAS, Ont., March 16 (By the Canadian Press).—Attaining a grand old age in the security of a Canadian farmland, Lloyd Graves, one-time negro slave of Kentucky, died here recently. He reached his 104th birthday a week before his death at Mount Salem, and had been ailing only a few months.

In 1842, at the age of 18 years, Graves decided to escape from serfdom, and made his way to Canada. Accompanied by another negro called "No Account George," he made a long and perilous journey northward. Travelling by night, hiding in barns and other outhouses by day, sometimes for days at a time, until the coast seemed clear, they proceeded along the Pawtucket River, through Cincinnati, and thence to Cleveland.

They stowed aboard a boat at Cleveland and headed across the lake for Port Stanley, Ont. Graves came on to St. Thomas, Ont., and was hired by a wholesale firm to drive their delivery wagon. He was with them for five years, and while he was in St. Thomas it somehow leaked back to Kentucky where he was. His former owner came up to St. Thomas, promising Graves many concessions and the best of treatment in trying to persuade him to go back. But the ex-slave decided to stay in Canada where his freedom was assured by law.

Nearly 70 years ago, Graves moved to Mount Salem and worked on farms. Sixty years ago last August he married, and his aged widow, who is an octogenarian, survives. Mr. and Mrs. Graves had their own market garden, and made a success of it. Graves gave up gardening a few years ago, but it was only recently that he ceased his duties as caretaker of Mount Salem school, a position he had held for over a quarter of a century.

Scout News

FIFTH PETERBOROUGH TROOP.

The weekly meeting of the Fifth Peterborough Troop was held on Thursday evening at 7.15 sharp. The meeting opened with flag break, under the supervision of our S. M. Scout silence was observed and then the S. M. called for any remarks. "Parents' Night" was discussed and it will be one of the big annual events in the future of our troop. The Fifth Peterborough Troop hockey team was heartily congratulated by the S. M. and the troop in general. The troop was then called up in the inspection formation and were inspected. There were found to be twenty-five present.

The patrols then broke away to their corners and entered on second class work. Later the troop was called up in horseshoe formation and two recruits were invested in the great Brotherhood of Boy Scouts. Scouts Vic Millard and Bill Wheeler we welcome you and let's see you climb in scouting. Scouts Peary, Smedmor and Barry were presented with their second class badges. Well done, fellows.

A. S. M. Wilkes took the boys up in scouting signs, and if the lads get lost now it's not the A. S. M.'s fault. Games followed and a jolly time was had by all.

Camp fire followed immediately, under the guidance of the Crow patrol. A very interesting talk on scouting was given by P. L. Peters. We are very sorry to say that the troop is losing this very valuable and worthy scout. Good luck, Everett, in your new troop, and we are sure sorry you are leaving.

The troop was dismissed and Court of Honor followed.

WHERE SLIDE KILLED 200

At least 200 persons are believed to have lost their lives during a landslide which partially covered the city of Santos, Brazil. More than 100 bodies were recovered by 1,500 workmen who were constantly in danger of losing their lives in a second and greater slide, expected at any time. Residents of the district were warned to leave immediately. The photo shows Santos Harbor, Brazil, and the bottom of Mount Serrat where the landslide occurred.

"THE SMARTEST SHOP IN TOWN"

McNABB'S SPRING DRESS SALE

Surpassing all our Previous Dress Sales in Quality, Quantity and Low Prices

8 Manniquins, All Members Peterborough Robinson Chapter, I.O.D.E.

Last Chance!

Tomorrow the sale that has thrilled all Peterborough ends. Prices are burst wide open for the final plunge

Slaughter, slaughter everywhere, not a single price has escaped the knife. We've torn down the walls of price and you are going to get high-grade clothing at prices that would spell ruin to the ordinary store. Snap into it men, but do it NOW. Coats, Suits, Hats, Caps, Sweaters, Sox, Work Goods, Fine Shirts—everything in the store is going for what it will bring. Get here before the biggest crowds arrive if possible.

THIS IS THE END

MEN'S $30 NEW SPRING SUITS

Slash—Bang—Out they go. A wonderful lot of snappy looking Suits. Not old, undesirables, but good smart Suits, in the best of materials and colors. While the quantity is fairly large, it is not large enough to take a chance on coming late. Get here early and take your pick.

18.95

Boys' Caps — Good serviceable tweed Caps in good colors. Worth three or four times the price..... **19c**

$2 & $3 Shirts — Good new patterns and colors. Soiled but otherwise perfect **95c**

Work Shirts — Heavy quality, blue and khaki materials. Values up to $1.50 for **79c**

Men's Suits — Also Boys' Suits, good quality tweeds. Small sizes only. Going at.. **3.95**

Flannel Pants — These are fine grade Flannel Trousers that sold at $4.50; to be cleared at **1.79**

Mens $5 Derbies — Everybody's wearing Hard Hats, but they're paying $5.00 for them. These go at..... **50c**

Spring Gloves — A choice of several of the finest leathers. Less than Half Price at **98c**

Little Boys Hats — Odds and Ends of large stocks. Soiled, but washable. To go at **5c**

White Shirts — REGULAR $2.50. Beautiful quality white broadcloth, collar attached or separate. Going at **1.65**

$4.50 Odd Pants — About 60 pairs of real good Trousers thrown on a table for Saturday at **2.95**

Spring Hats — REGULAR $4.50. Wonderful quality hair Felts, in all the good spring colors. To clear **2.95**

Men's $2 Caps — Smart new Caps in good tweeds and fine colors. A limited number at **95c**

Men's $25 Suits — About 15 only of these Suits. They must all be sold at **$11.95**

We're not going to spend a lot of time telling you about them. We'll just say they are here, they are good quality and ridiculously low in price. That ought to be enough for the smart fellow who appreciates a bargain when he sees it. It's your move now, men. This is the final notice. Don't blame us if you miss it.

Men's $25 Overcoats — Only about ten lucky men will get them the last day at **$15.95**

Here's a chance to save a lot of money on a swell coat to finish the winter with, and one that will wear and look well next winter. If you wait till next year to buy it will cost you at least $25.00. To-morrow they are $15.95.

A Sensational Sale of Men's New SPRING TOPCOATS

New, Smart, Snappy—everything about them right up to the minute. There is a wonderful set of fancy tweed patterns to choose from, as well as serviceable gabardines. But, remember fellows, there are only about twelve of them, so it is advisable to get here as soon as you can. We don't want to carry them to our new store; so away they go at **$11.95**

Men's Oilskin & Rubber Slickers — Not the ordinary cheap grade, but Coats of pure rubber that will keep you dry as a bone. Good looking garments any man might be proud to own. About half a dozen of them only will be shot out tomorrow at the ridiculously low price of **$7.95**

WILL INCLUDE EASTERN FUEL

Nova Scotia Coal To Enjoy Special Railroad Rate Also.

ORDER DELAYED.

OTTAWA, March 16. — An Order-in-Council which will confirm a seasonal rate of $6.75 per ton on Alberta coal, pending a three-year test, is being delayed because of the intention of passing with it a similar order respecting Nova Scotia coal.

There is no desire to discriminate between these two sources of production, although the situation in respect to them are different. The Nova Scotia coal, in a large part of the season, is hauled by water and rates are thus favorable. Their problem is to secure such rate assistance by subsidy or otherwise as will permit of the movement by rail to the central markets in winter. The latter project is now being worked out and the two orders will be made in a few days.

JUNIOR SOCIETY HOLDS MEETING

Miss Freida Kilchire To Head Humane Society For Next Year.

REPORTS READ.

The Peterborough Junior Humane Society met Thursday, March 15, in St. John's Parish Hall. The meeting was called to order by President Howson and the members sang "The Marching Song." The pledge was then repeated. The minutes were read and approved. As a result of the strenuous appeal for new members, which was made at the annual meetings last Saturday, four more new members were enrolled.

As the election of officers was postponed from the annual meeting to this one, this became the next matter of business. The results of the election were as follows: Honorary president, Rev. R. C. Blagrave, D.D.; president, Miss Freida Kilchire; first vice-president, Donald Howson; second vice-president, Miss Lily Bull; secretary-treasurer, Miss Vera Kilchire; press correspondent, Warren N Turner. The following were also elected to the executive committee: Miss Thelma Buller and Fred Constable.

Next week's program was then arranged. Many reports were read and the song, "The Snowbirds" was sung, while the meeting was closed by singing of the National Anthem.

ST. JAMES' W.M.S. HEARS FINE PAPERS

Talk On Mission Work In South America Is Feature.

The March meeting of St. James' W.M.S. Auxiliary was held on Tuesday afternoon in Wesley Hall, with Mrs. E. L. Woodley, the president, in the chair.

Despite the almost impassable streets, there was a fairly large attendance.

The session opened with the usual devotional service of singing and prayer. The study and devotional part of the program, in charge of Group Number Two, was considerably curtailed owing to the unusually large amount of business to be transacted.

Mrs. F. D. Elliott, leader of the group, then took charge. A very impressive Scripture lesson, in which several members took part, consisted entirely of Bible promises.

Mrs. Bert Cutmore contributed a pleasing vocal solo, and a season of sentence prayers followed, led by Mrs. A. Wilson.

The study of the month was "Christian Missions and America's Racial Attitudes," given clearly and concisely by Mrs. Hugh McCullough in her very excellent paper.

The meeting was favored by the presence of Miss Jackson, of Murray Street Baptist Church, who gave an address on "South America as a Mission Field." Her thorough knowledge of the work and conditions in this comparatively new field, presented many possibilities, and kept her hearers intensely interested throughout.

The program was interspersed with singing in harmony with the subjects of prayer and study, and was closed with prayer, offered by Mrs. (Rev.) J. H. Dudgeon.

Mrs. F. Armstrong, leader of Group 3, will have charge of the Easter meeting.

Daily Mishaps

MAKE ZAM-BUK A DAILY NEED

QUICKLY soothing and splendidly healing, Zam-Buk is indispensable in every home. This pure herbal balm is as good for cold-sores or chapped hands as it is for more serious troubles like eczema, ulcers and piles. Zam-Buk stops pain and irritation, prevents a wound going the wrong way, allays inflammation, and grows new healthy skin.

As a first-aid and all-round skin treatment Zam-Buk stands alone. Don't waste time and money experimenting with crude ointments containing animal fats and coarse mineral drugs. Zam-Buk is absolutely reliable. It heals surely because it heals with the aid of Nature's herbs, in Nature's own way.

Sample FREE & Post-Paid

Try Zam-Buk for yourself on any cut, burn, wound or sore. A postal addressed Zam-Buk Co., Toronto, brings a Free Sample Box of this famous soothing and healing balm by return. Mention this paper.

Zam-Buk

50c. box, 3 for $1.25, all druggists.

Voice of the People

Letters to be printed in the Voice of the People column must be received at The Examiner Office on the day before it is desired to have them published.

WHAT'S THE MATTER WITH PETERBORO?

To the Editor of The Examiner:

Sir: I met an old friend of mine from Peterboro a few months or so ago, and he says: "Have you many tourists up north here?" I says "No. They all go north through Lindsay, cutting across to 'Caygeon, or they go north from Belleville and Marmora Some goes up the Burleigh road and goes north from Apsley. But wherever they come or go it ain't from Peterboro You say why, and I can't say why. It's all talk in Peterboro You are the greatest board of trade or town council or exhibition board on earth, and you have more societies for promoting things that never come off I ever see, and you can get up a banquet and have more speakers than all the rest of creation combined, but when it comes down to doing something practical to get tourists in here and making this a highway to the north you ain't in it. No, the north which is north from Buckhorn and Burleigh Falls and 'Caygeon and Marmora right clear through to Algonquin Park, is not fit for farming. It is a great ranchin' country, a great game and fish country, and a great wolf country. No man with sheep, calves, or pigs can live up here at all on account of the wolves. Think of a civilized country next door to the great city of Peterboro, where all the talkin' machines are, with wolves all over everywhere, killing the game and no good to anyone. Think of it! It's been that way ever since the lumbermen left it and it started to grow up again. What would I advise? I'd advise the rocks to be taken out of the north roads so the tourists could get through. The Lindsay and Hastings members got it done for them but no one seems to be able to get anything done at Toronto for North Peterboro. You can't get through to the great tourist country from Peterboro. It's blocked by a bad road north of the Catchecoma Lakes. It was all right for lumber teams and could be made all right for automobiles but no one in Peterboro seems to know that if you want some of the tourists' money you have got to give them good roads. In all our great north country from Marmora and Bannockburn clear across to the Muskoka district the roads are good except for the few rocks here and there that could be easily blown up if there was anyone which could stop talkin' long enough to do it. You say there is great interest in our north Peterboro. Well! it don't look like it. We ain't in it with Victoria and Hastings for preparing for the tourist. In a few years no tourists will come through Peterboro county at all. There ain't no enterprise here. They go through the motions all right, but there's nothing to it. I tell you if north Peterboro roads had a few rocks removed tourists would just flow through Peterboro, where they would outfit, and on up north but now they all go by Lindsay and Belleville or Havelock. It's all 'which is the way to Havelock and Marmora?' They all want to get into a county where they can get through to the greatest game country in Canada. But it ain't no use. Nobody seems to care. We're dead in this county—government and people. No wonder the old settlers are getting out. Lindsay does a big outfitting business for tourists, and so does Belleville.

ONE WHO KNOWS ALL ABOUT IT

SAYS WALTZ WINS OVER JAZZ

"In Vienna the waltz is now again competing with jazz—and winning the fight", declared Herr Johann Strauss, orchestra conductor of Vienna, Austria, and nephew of the waltz composer, recently. "Jazz will change as surely as the style of women's clothes." Strauss is touring Europe as guest conductor.

Miss Alma Blanchard, soloist, Trinity Church, will sing at the Sacred Concert in the Regent Theatre Sunday evening.

INDIANS HOLD UPPER HAND

Pigeon Lake Guide Testifies Before Fish and Game Committee.

FEAR OF REPRISALS.

TORONTO, March 16.—J. R. McIntosh, guide of 20 years' experience, explained to the Fish and Game Committee of the Legislature yesterday that fear of reprisals is what stops him and his guide friends from informing on Indian violators of Ontarios fishing and hunting regulations. Rather than run the risk of having buildings burned, canoes smashed, and equipment of various kinds stolen, they keep their mouths shut, so to speak.

"Above the Law."

Mr. McIntosh operates around Pigeon Lake, in the Victoria district. Curve Lake Reserve Indians, he charged, are responsible for 90 per cent. of the lawbreaking in that locality. "They are," he said, "above the law. You have already asked in this committee why we guides don't inform on them. Well, just let me say, by way of an answer, that no guide is anxious to come home at night to find his buildings burned or his property damaged."

Mr. McIntosh cited a case in which he had spotted a couple of Indians at illegal "rat" trapping. He had passed the information to some farmers of the neighborhood, who had relayed it to the game warden. The latter official had come down and seized traps and rats. But nothing had been done to the Indians.

"In fact," said Mr. McIntosh, "the only one who suffered in the case was myself. My canoe was ripped open from bow to stern one night, and it doesn't take much of an imagination to guess who did the job."

Support Charges.

Mr. McIntosh's charges were supported to a considerable degree by George Potts, representative of the Victoria Fish and Game Protective Association. He termed the Indians the 'biggest encroachers' on the game laws with which the Province has to deal. "Right now," he said, "you will find them taking lunge through the ice in contravention of the law."

It was Mr. Potts' understanding that orders had been issued from the Department of Game and Fisheries to its inspectors throughout the Province that no Indian was to be haled into court without instructions from Queen's Park. He wasn't sure if that was the correct situation, but he knew for a fact that the Indians did pretty near anything they wanted with the game laws and got away scot-free.

"We have no protection in our waters", he complained to the committee. "We should at least have a permanent inspector on Pigeon Lake."

SIXTH PETERBOROUGH TROOP.

The regular meeting of the Sixth Peterborough Troop took place on Monday evening. Promptly at 7.15 the Troop assembled for flag break and general inspection. The troop was then dismissed to their corners for general instructions by their patrol leaders.

This was followed by several lively games, for half and hour. The scoutmaster then gave an instruction period on how to transport the injured or unconscious without stretchers. During this period the boys were honored by the arrival of J. John, president of the local association. Mr. John in a few words gave the boys a short talk on the forward movement of scouts, together with reference to the scout uniform. He also wished the troop continued success in scouting. The boys expressed their thanks to Mr. John, who is doing so much for them and their brother scouts. Another game period followed, after which the council fire was prepared.

A short play was given on the first scout law by the Beaver Patrol. Several lively songs were sung, at the conclusion of which the scoutmaster read a short account of Dr. Fisher's address delivered at the Ontario Scout Leaders Conference.

The meeting concluded with the singing of "God Save the King", and scout silence.

A court of honor was held during which many questions were discussed in regard to the troop.

DOG AT FUNERAL OF ACTRESS

The chief mourner at the funeral recently of Miss Gladys Ffolliott, a prominent actress in England, was "Delphie", a Scotch collie, who was a favorite pet of the star. Miss Ffolliott was exceptionally fond of dogs, possessing five. "Delphie" was so named because her mistress, when playing in the original production of "Outward Bound", found her one wet night outside the stage door. After the funeral the dog was taken to spend the rest of her days with a friend of Miss Ffolliott who has a farm near Norwich. "Starr", another of the actress' pets, accompanied "Delphie" to the country.

KERR-BRYSON TOURS—1928.

The Canadian National Railways have much pleasure in announcing that the Kerr-Bryson Tours have now completed arrangements for their 1928 summer tours across Canada.

This year's plans provide for a delightful trip from Toronto to the Pacific Coast and return, with stop-overs at the cities of Winnipeg, Saskatoon, Calgary, Edmonton, Vancouver, Victoria and Seattle; two or three days in each of those famous tourist resorts of the Canadian Rockies, Jasper National Park, Banff and Lake Louise; the famous scenic triangle tour trip of the Canadian National Railways, by rail from Jasper to Vancouver, steamer through the 550 miles of sheltered waters of the Inside Passage of the North Pacific Coast and rail through the wonderful valleys of the Skeena and Bulkley Rivers back to Jasper; and finally a visit to Minaki Lodge, a magnificent summer resort, a short distance east of Winnipeg in the beautiful Lake of the Woods district.

Arrangements have also been made for an extension of this trip, for those who may so desire, from Prince Rupert north to Skagway and Alaska, and those fortunate enough to be members of this extension party will, on the return journey, enjoy the added feature of the delightful sail through the Great Lakes from Duluth to Sarnia, with a short stop-over at Duluth and also at the Twin Cities of Fort William and Port Arthur.

These trips as usual will be personally conducted and on an all-expense basis. Descriptive booklet is now in course of preparation, and is expected to be available within the next week, and copies of same will be promptly furnished upon request to the organizers of the tours, Mr. Martin Kerr, 4 Beulah Avenue, Hamilton, Ont., Mr. A. E. Bryson, 44 Silverthorne Avenue, Toronto, or any Canadian National Agent.

You can leave a stone in the dishwater ALL DAY

It will cost you nothing But it will do nothing.

You shouldn't leave a cake of soap in the dishwater; even common hard soaps . . . . . and least of all, Sunlight. It would be so utterly wasteful,

For Sunlight Soap is so made that it is a naturally quick dissolver.

No waiting— no hard rubbing to make lather. You get plenty of lively, lasting suds, at once.

There is no other soap quite like Sunlight for the kitchen and the laundry—and it is always easy on the hands.

Sunlight is pure. It is *all* soap and nothing but soap.

Every particle is ready to make that magic Sunlight lather, which cleanses thoroughly, harmlessly and so economically.

LEVER BROTHERS LIMITED, TORONTO

FURNITURE FROM FACTORY TO HOME

McBride & Franks 5th BIRTHDAY SALE

One Day Only, Saturday

St. Patrick's Day, March 17, 1923, saw the birth of this Factory-to-Home Furniture Store. Some women age so young

YOU'VE known them . . . women who start out in life radiantly fresh and alive. . . . Then something happens. Almost before you know it —their bloom and freshness have gone. . . . Youth without health! What a pathetic thing it is! Pinched, wan cheeks and pain-dulled eyes when, by every right, they should be just *beginning* to live!

Constipation wrecks health and happiness for thousands of women and men. Stealing beauty. Thieving vitality. It is the cause of untold disease and suffering.

And more's the pity when it can be so surely prevented. Kellogg's ALL-BRAN is guaranteed to relieve constipation safely. To prevent it ever beginning its deadly work.

It takes ALL-BRAN *to be* 100% *effective*

Kellogg's ALL-BRAN is rich in bulk—and it is "bulk" that relieves constipation. It absorbs moisture and carries it through the alimentary canal. Gently distending the intestines—sweeping out poisons and wastes. In a part-bran product, there is seldom enough bulk to do this work effectively. That is why doctors recommend ALL-BRAN. Because it is 100% bran.

Totally unlike habit-forming drugs

ALL-BRAN is infinitely better than dangerous pills and laxatives—which become useless unless the dose is constantly increased. A *naturally* healthful cereal. Delicious with milk or cream—with fruits or honey added. Use it in cooking too. Sprinkle into soups. Mix with other cereals. Eat two tablespoonfuls daily—chronic cases, every meal. . . .

Be sure you get genuine Kellogg's—the original ALL-BRAN. Don't risk part-bran substitutes which, at best, can be but partially effective. ALL-BRAN is sold by all grocers. Served at hotels, restaurants. On diners. Made by Kellogg in London, Ont.

Guaranteed! *Kellogg's ALL-BRAN is sold with this definite guarantee: Eat it according to directions. If it does not relieve constipation safely, we will refund the purchase price.*

Kellogg's ALL-BRAN

SOCIAL WORKERS PLAN CONFERENCE

Will Meet in Montreal in April To Discuss Work.

MONTREAL, Que., March 16 (By the Canadian Press).—The First Canadian Conference on Social Work, for which Social Workers from every province are expected to gather, will be held in Montreal from April 24 to 27. Nearly $100,000,000 a year, it is estimated, is expended in Canada by public and private social agencies. Personal maladjustment of the individual to the community, and community failure to fulfil its duty toward the individual, occasion this enormous yearly expenditure.

E. W. Beatty, K.C., President of the Canadian Pacific Railway, endorsing the conference, says "If we admit, as I think we must, the importance of the work being done by social workers in Canada, the only point is whether or not this work can be improved by conference and the opportunity of interchange of views based on experience in the work. It seems to be clear beyond peradventure that these conferences have many advantages and add to the effectiveness with which the work is carried on."

Four national organizations are co-operating to promote this conference The Social Service Council of Canada; Canadian National Committee for Mental Hygiene; Canadian Association of Child Protection Officers, and the Canadian Association of Social Workers. These organizations forego their own conferences this year.

Details of arrangements are in the hands of the executive as follows: President, Dr. C. A. Dawson, Montreal; Vice-Presidents, Judge E. H. Blois, Halifax; Dr. A. Grant Fleming, Montreal; Rev. Father Haley and Rev. M. C. MacLean, Toronto, and A. P. Paget, Winnipeg.

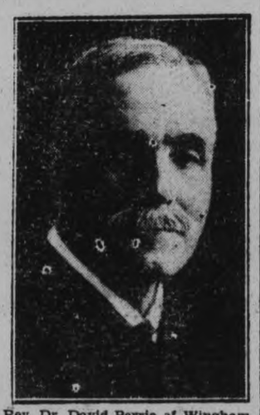
The chairmen of Divisions are Rev. J. Phillips Jones—"Community Forces"; Dr. O. M. Hincks—"Health"; F. N. Stapleford—"Family"; Robert E. Mills—"Children."

C. Jean Walker is secretary-treasurer.

People of France are buying fewer automobiles this year, and French factories are turning out a lesser number of carts than usual.

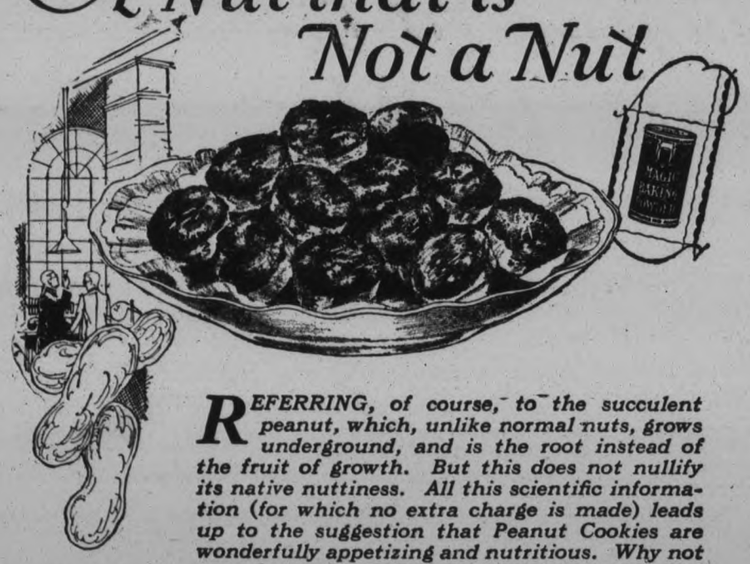
The game of golf has of late years become a source of worry to the makers of submarine cables. The cables are coated with gutta percha, which is the best insulator known, but the demand for gutta percha for golf balls is so enormous that it has permanently put up the price of this commodity.

MAY BE MODERATOR.



Rev. Dr. David Perrie of Wingham, Ontario, who has been nominated by the Toronto Presbytery for election for moderator of the next general assembly of the Presbyterian Church in Canada.

A Nut that is Not a Nut



REFERRING, of course, to the succulent peanut, which, unlike normal nuts, grows underground, and is the root instead of the fruit of growth. But this does not nullify its native nuttiness. All this scientific information (for which no extra charge is made) leads up to the suggestion that Peanut Cookies are wonderfully appetizing and nutritious. Why not try a batch for that afternoon tea you are planning. Here's a recipe that gives fine results:

½ cup butter
1 cup sugar
1 egg
2 cups flour
3 teaspoons Magic Baking Powder
½ teaspoon salt
2 cups chopped peanuts
½ cup milk
2 teaspoons lemon juice

Cream butter and sugar, add beaten egg; sift together flour, baking powder and salt, add to first mixture alternately with milk, then add chopped peanuts and lemon juice. Drop on greased baking sheet by the spoonful and bake from 12 to 15 minutes.

"Bake your own" with
MAGIC BAKING POWDER
for greater satisfaction and economy

SAILORS PREPARE FOR OPEN SEASON

Lake Mariners Say Most Damage Done to Vessels in Early Fall.

TORONTO, March 16 (By the Canadian Press).—With the rapid approach of spring, Canada's inland mariners are once again waiting eagerly for the opening of navigation, but this year many of them will have to wait two weeks longer than usual. At a recent meeting of American and Canadian ship-owners it was decided to postpone the "official" opening of navigation from April 15 until May 1, and the decision has aroused considerable discussion among the steamboatmen.

It has been claimed that vessel owners have suffered so much damage during the past by "bucking the ice" that they have decided not to take the risk this year, and to the sailors, waiting patiently till the time when the whistles blow, this step has proven far from popular. They point out that in the average year more damage is caused during the last two weeks of navigation, and any one of them can produce records to prove his case. For instance, the fall of 1927 proved particularly disastrous. On December 6 all the lakes felt the icy blasts of winter. Strong northwest winds whipped the inland seas into a fury, while furious snowstorms blinded the mariners. In three days four ships had been wrecked, while a fifth had disappeared and has never yet been sighted nor heard of.

The Agawa ran aground on Advance Reef, Manitoulin Island, on December 7, and after four days' efforts the crew was finally rescued. The steamship Altadoc ran aground on Keewenaw Point, Lake Superior, on December 8, and the crew had a narrow escape from death. The Martian was the third victim of the Storm King's fury, and she was forced aground on Hare Island in Thunder Bay. The first fatalities of the storm, so far as is known, were the deaths of two men of the steamer Lambton, aground on Isle Parisienne, who attempted to swim ashore. To the many mysteries of Great Lakes storms is added that of the steamer Kamloops. With a crew of 20 men and two women, she was sighted near Parisienne Island on December 6, and from that time she disappeared.

Navigation on the lower lakes will probably open unofficially as soon as the Welland Canal is passable. The B. B. McColl, an oil tanker which plies the lower reaches, will be fitted out within the next three weeks, it has been announced, and will start her season's run just as soon as she can get through the canal. This is also the last word of other steamer captains around Toronto, and they are already making preparations.

From Sault Ste. Marie comes word that the agreement will not have any great effect on conditions in that vicinity. It is pointed out that the first boats to reach the Sault from the lower lakes have arrived any time after April 15, and as a rule most of these have come up light, bound for Lake Superior ports to load either grain or ore for Lower Lake ports. While some of them carry coal on the upbound journey, the fuel situation is so well handled that it would not be much affected by a later opening. Several of the companies, in agreeing to the "later opening" plan, have made exceptions based on the requirements of their customers, and the ice conditions and weather generally will probably rule the "opening" after all.

SWEDEN TO ISSUE BOOK ON RIKSDAY

Will Commemorate 500th Anniversary of Calling of First Parliament.

STOCKHOLM, Sweden, March 16 (By the Canadian Press).—The Swedish Riksdag (parliament) has decided to celebrate its 500th birthday by publishing a big literary work of unique proportions. In 1435 the first general Swedish parliament was convocated, and in 1935 a series of monographs, consisting of 13 quarto volumes, each of 400 pages, describing the origin, development and activity of the Swedish Riksdag will be completed. For this work, which is unique in its line in the world, a number of prominent historians have been appointed by a special committee, headed by Nils Eden, a former prime minister and professor of history, now governor of the county of Stockholm, and Dr. Karl Hildebrand, chairman of the Commission on National Debt.

During the Viking period and in the beginning of the Middle Ages parliamentary representation existed in Sweden, but only local meetings for each province were held, though the landthings at Upsala, the then capital, exercised powers resembling those of a parliament of the realm. In due course of time the gentry were summoned by the King to special meetings, where the knights of the whole country met and discussed state affairs. Those lasted up to 1434, when Engelbrekt, a Swedish folk hero and leader, summoned the knights to a meeting at Vadstena and forced them to depose the ruling sovereign who then joined Sweden, Denmark and Norway under his sceptre. Next year, January 6th, 1435, Engelbrekt, himself a Swedish nobleman, called together a meeting of representatives of all classes of society at Arboga, thus laying the foundation of the present democratic Riksdag institution. The development of later periods shows that since then the Swedish people never submitted to any infringement of their inherited rights of democratic parliamentary representation, the history of which will be fully illustrated in the huge work now planned.

It is pointed out in this connection that Sweden as a national and sovereign political unit was mentioned by Tacitus, the Latin writer, in the first century after Christ, and that Sweden is the oldest sovereign and independent kingdom in the whole of Europe.

German Flier Will Try Ocean Flight

BERLIN, March 16.—Captain Herbert Koehl, director of the Lufthansa Commercial Service night flights, will be the first German aviator to try a trans-Atlantic flight this spring, it was announced yesterday.

Captain Koehl attempted the venture last August in the Junkers plane Bremen, accompanied by Pilot Friedrick Loose, chief of the Bremen airport, and Baron von Huenefeld, press director of the North German Lloyd steamship line, but was forced to return to Dessau by a furious storm over the Irish Sea.

The Junkers Company has placed a new one-motor airplane of the same type as the Bremen and the Europa at the captain's disposal. The machine, which is able to carry a load of 2,300 kilograms and has a range of 7,700 kilometers, or about 4,800 miles, arrived at the Tempelhof airport here Wednesday and trial flights are to be started immediately. The American flight will be undertaken as soon as preparations can be completed and weather conditions permit. It is understood that Captain Koehl's companions again will be Pilot Loose and Baron Huenefeld.

COASTGUARDS DIE TO SAVE PASSENGERS

Two coast guards paid the supreme penalty in their daring efforts to rescue passengers and the crews of the grounded coast-wise steamer Robert E. Lee, totaling 263, when the ship was driven on to the treacherous Mary Ann reef in Massachusetts Bay during a 70-mile gale. One life-saver was "lost at sea" and the second died of exposure after their surf boat overturned, throwing nine into the water. The other were rescued. Captain William H. Cashman, left, and Surfman Frank Griswold, right, shown in insets, were the victims. Upper shows the Lee aground and lower is one of the attempts to launch the surf boat into the angry waters.

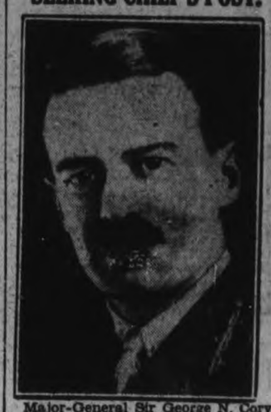
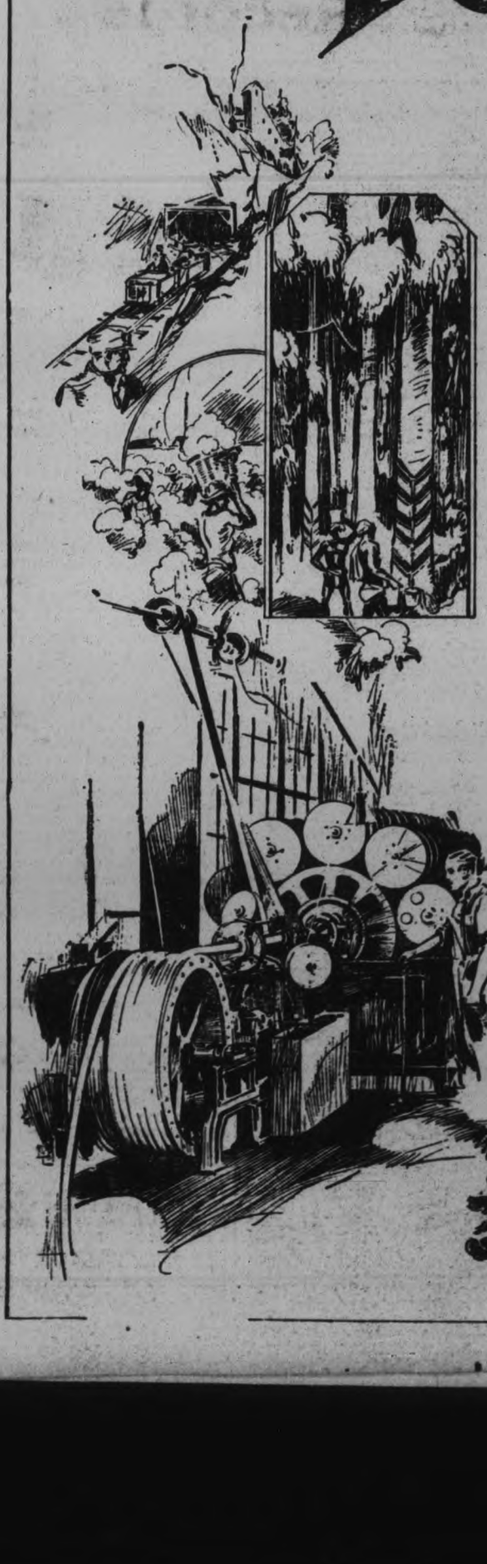
SEEKING CHIEF'S POST.



Major-General Sir George N. Cory, Toronto, who is thought to be the Canadian-born army officer who has cabled his application for the chief of police position to the Toronto police commission.

Power ...in **TRANSIT**



RUBBER from tropical jungles, sturdy poles from northern forests, cotton from the south, and copper from many mines are all necessary in making the equipment which, carrying the power of the waterfall to the outlets where it is to be used, makes electric power the servant and not the master of man.

The maintenance of adequate electrical service depends to a large extent on the care with which these raw materials are selected and manufactured into equipment for the transmission of power.

In the Cable Department of the NORTHERN ELECTRIC COMPANY, where the high-tension cables for the transmission of power to the distributing stations are made, skilled craftsmen combine the raw materials garnered from the four corners of the world to manufacture cable that will bring the current safely from the generating plant to a distributing plant situated conveniently to serve your needs.

Eloquent of the ripe experience that these workers bring to the manufacture of NORTHERN ELECTRIC cable is the fact that ninety-two workmen in this department have been employed between fifteen and twenty years in the manufacture of cable.

Information . . .

Every year, more and more NORTHERN ELECTRIC *cable is used to distribute Canada's great resources of hydro-electric power for the use and development of Canadian industry and to serve Canadian homes. The* NORTHERN ELECTRIC COMPANY *appreciates the opportunity to help this way in the creation of the greater industrial Canada of tomorrow.*

PROGRAM OF WORK ALWAYS CHANGING

New Activities Added To Chamber's List as Old Ones Are Finished.

"The program of work of a Chamber of Commerce should be a concise statement of those projects which the organization proposes to undertake," Secretary F. G. Stinson points out. "Some of these activities may be of short duration, and others may require a period of years for their completion. While it is a common custom to re-write the program each year, striking out those things which have been done and adding new plans, the probable length of time required for the completion of an activity is in no wise a basis for its inclusion or exclusion from the program.

"A member of a Chamber of Commerce has the privilege of suggesting activities or work for his Chamber. His application for membership is an indication, on his part, of a desire, not only to serve the organization but the community at large.

"A member of a Chamber of Commerce may have resided in a certain city for most of his life. He can pour into the Chamber the benefit of his life-long observation of local affairs. On the other hand he may be a newcomer—and to a newcomer there is no better medium through which to form proper contacts on arrival in a new city. There he will find in the membership the live, aggressive and progressive business men and women of the city. The newcomer can give the local Chamber of Commerce the benefit of his experience elsewhere, perhaps in a broader field. He may bring to the Chamber the larger vision and adaptability necessary in the putting over of a new and delicate project. Everybody, in and out of the membership may do something for the Chamber of Commerce, Peterborough and surrounding district."

The old members of the Chamber and the new ones are to be asked, in the interests of the growth and development of the city, to answer the following questions, mailing their replies back to the Chamber, along with their nominations for the executive council:

"What do you expect the Peterborough Chamber of Commerce to do for the promotion of your own line of business or activity?"

"What, in your opinion as a citizen, is the thing of first importance to be done for the good of the community as a whole?".

Answers to the above questions should pretty clearly define the immediate personal and community needs, and should provide the material for constructive activity on the part of the Chamber.

If replies are mailed promptly, Secretary Stinson will be enabled to preface a summary for the Council meeting in the latter part of March.

FACTORY BURNED AT MERRICKVILLE

Canada Brass Plant Fire Follows Mysterious Explosion.

MERRICKVILLE, Ont., March 16 (Canadian Press).—Following an explosion which rocked the neighborhood and awakened the entire village shortly after midnight, the factory of the Canada Brass Company burst into flames, and by 1.30 this morning was a smouldering mass of ruins, with only fragments of the stone walls remaining. The cause of the explosion and fire has not yet been ascertained. The loss may amount to thirty thousand dollars, partly covered by insurance.

Lyrics of Life - *By Douglas Malloch*

THE CHEATERS

The world is full of honest men,
Their honesty their pride,
Who paid the slightest penny, then,
Their greater debts denied.
They had their names embossed above
The places where they trade,
But cheated women of their love
And brothers of their aid.

Yes, honest men are every place,
Who pay their honest due,
That no one ever needs to chase
And no one needs to sue.

They thought they laid up treasures here
And laid up treasures there;
Yet cheated sorrow of their cheer
And children of their care.

The world is full of honest men;
And honesty I praise,
And yet they cheated now and then,
They cheated lots of ways.
They did not cheat with crafty arts,
Or goods upon their shelves;
They cheated only human hearts—
And, most of all, themselves.
(Copyright, 1928, Douglas Malloch.)

The Sensation of 1928

A BARGAIN CLOUDBURST WILL VISIT THIS FAIR CITY NEXT WEEK THAT WILL TURN GEORGE STREET INTO A VERITABLE FAIRYLAND. NEVER IN THE HISTORY OF PETERBOROUGH HAS THERE HAPPENED SUCH AN AN EVENT—WE'LL SHOW YOU HOW TO SPEND YOUR DOLLAR ON BOTH SIDES—HOW TO STRETCH IT TO TWICE IT'S USUAL LENGTH.

Proclamation!

To the Wise and Thrifty Folks of Peterboro and 50 miles around, take heed to what I say: Cancel all dates—Be Prepared—Watch Tuesday's Examiner—and above all hang on to every dollar you have, and when you see the Big Announcement, act — and act quickly, for Time and Tide wait for no man. So prime yourself up for this Big Event. Where is it, you say? Ha—that's the question. Order your paper in advance—make sure you get it early Tuesday evening. Read it through and through for—the magic of Alladin's Lamp will be as nothing compared to this compelling event.

? ? ? ? ? ?

I'm the Man Of Mystery!

Watch this Paper Next Tuesday Night I'll show you how to

SAVE

ST. ANDREW'S Y.P.S. ELECTS OFFICERS

Alex. Donnelly Chosen President—Interesting Paper Given.

The weekly meeting of the Young People's Society of St. Andrew's church was held on Monday evening, March 12.

A very interesting feature of the program was a paper on "The Spirit of God in the Church" by Miss Helen Ross.

A program, consisting of violin selections by Mr. Ellis, a piano solo by Miss Shearer, and vocal solos by Miss Maybee, was well rendered.

The organization of the society being completed, the officers are follows:

Pres.—Alex. Donnelly.
Vice-Pres.—Miss Jennie Saunders.
Secretary—Miss Mae Petrie.
Treasurer—Walter Cox.
Group Leaders— Miss Helen Ross, Miss Jean Anderson, Miss Margaret Cameron, Victor Barry.

Following the business meeting, the young people participated in two contests, "The names of streets and avenues in this city," and "Things our grandmother missed."

1,532 Mothers' Lives Wasted

(Continued from page one.)

League of Nations Day, to be held from coast to coast in Canada on April 17, for which a drive for membership in the League of Nations Society will be made, also an Empire Shopping Week, to encourage the purchase of Empire-made products, from April 21 to 28. In connection with this last project, Mrs. A. Mowat spoke of the co-operation to be afforded by the Chamber of Commerce. Speaking of Harry R. McKeen's address on community work to the Local Council, she wondered why the local Chamber of Commerce didn't include a woman member on its committee.

Reference was also made to a pilgrimage to the war cemeteries in France, in charge of Mrs. W. R. Jackson of Toronto, leaving Montreal on June 8 and returning there on July 8, the cost for the round trip to be approximately $439.

Announcement was also made of the desire of the National Council of Women that a special exhibit, demonstrating women's work in the Dominion, be made at the C. N. Exhibition in Toronto.

A report from the Catholic Women's League, following out the reports from affiliated societies made at the last regular meeting, was presented by Miss Norah Shevlin. This covered a period of sixteen months, and showed total receipts of $3,505.98 from various activities of the society and $120 from membership fees. The sum of over $200 was expended in relief work and $131.66 remains in the bank at present.

Mrs. C. H. Edwards, convenor of the committee on Mental Hygiene, gave a splandid, concisely-worded report of the endeavors of this committee, disclosing some interesting facts with regard to this important subject. It is estimated by experts that only four per cent. of children are doomed from birth to the insane asylum, but there are numberless children of the moron and mental defective classes for whom much might be done to save them from mental disorders later in life, if proper precautions were taken in their tender years. Classes for the instruction and training of these children are now being established everywhere and expert surveys have been made of the best methods in correcting their mental ills.

IN MEMORIAM.

LOGAN. — In loving memory of Mrs. James W. Logan, who died March 15th, 1927:
'Twas just one year ago to-day
Our loved one dear departed;
No one knows nor can they say
How our hearts with sorrow smarted.
She's gone to a better world than this,
And there we hope to meet her,
And there to join the eternal bliss,
Where we will meet with Christ the Saviour.
—Inserted by Husband and Son.

IN MEMORIAM

MILLAR.—In ever loving memory of our darling "Roddie" Donald Roger Millar, who fell asleep in Jesus, March 16, 1926, only son of Mr. and Mrs. D. B. Millar, Lakefield, Ont. He was called from this world of sorrow,
Leaving sweet memories of love;
But his soul shall live on forever
In the beautiful world above.
Death cannot dilide us from dear ones
Nor sever the cords of love;
He is just resting sweetly in Jesus,
In that beautiful home above.
—Sadly missed by Mother and Daddie, and baby sister, Jean.

Officials of Prince Albert Bank Unable To Tell Correct Amount Taken.

MAKES GETAWAY.

PRINCE ALBERT, Sask., Mar. 16.—(Canadian Press.)— Officials of the local branch of the Bank of Montreal have not yet ascertained the amount of the currency taken by the lone bandit who shortly after noon yesterday entered the institution and looted the till in the teller's cage.

Leo Reger, the teller and Norman McLeod, ledger keeper, were in the rear of the office when the bandit entered. McLeod went forward to the counter and was greeted with the command "put up your hands," enforced by the display of a revolver by the bandit.

McLeod and Reger were asked by the man if there was any money in the vault. They replied that there was not and were commanded to enter it. The bandit closed the door on them, but neglected to throw the bolts. He then proceeded to loot the till.

While the bandit was thus engaged, Otto Taylor, the junior clerk, returned from his lunch and unsuspectingly entered the building. The bandit, alarmed by Taylor's approach, rushed outwaving his revolver.

Taylor gave the alarm, and the police were on the scene a few minutes later, but there was no sign of the desperado who is described by the teller as being a roughly dressed man of short stature. His features were hidden during the hold-up by a scarf which he had fastened around his head, leaving only his eyes visible.

C. O. Gamble, manager of the local branch, stated that no figures concerning the amount taken by the gun man would be available pending a check-up which is now in progress.

MEN PAST 40 SHOULD READ THIS!

Must Old Age Mean Torture, Annoyance, Embarrassment, Worry, Bladder Weakness, Nervousness, Getting-Up-Nights?

It is claimed that 7 out of 10 men near or past middle life are subject to Bladder Weakness, which, if neglected, may mean years of suffering and daily annoyance.

First signs of such condition may come in early life, but they are usually more noticeable after 40—pains in back, headaches, nervousness, a feeling of weight in groins, itching, burning, painful urination, too frequent calls and getting-up-nights.

While serious, if neglected—it is ordinarily a simple matter to relieve these troubles by the pleasant home use of Dr Southworth's URATABS, which have been victorious in thousands of cases, after other treatments had failed.

No matter how serious or of how long standing your condition may be, you can quickly prove the value of URATABS without risk of cost—for any good druggist will supply you on an absolute guarantee of satisfaction or money back. If "URATABS" bring you quick and certain comfort, you will be greatly pleased. If they do not fully satisfy, their use will cost you nothing. Try URATABS today!

NEW MONOPLANE IS REVEALED

(Continued from Page 1)

sageway leading from the pilot's post.

M. Couzinet believes that if the plane does not respond in a satisfactory manner after 24 hours flying, it will be quite easy to empty part of the fuel, turn around and come back for another start. The emptying process is carried out in another novel manner.

Drain pipes extending from the tanks to the extreme tail of the ship will carry off the fuel and drop it at a point from which there is a minimum danger of fire. This feature of construction has been extremely well planned, M. Couzinet having tried to benefit by mistakes made by his flying colleagues.

The trans-Atlantic expedition will comprise two pilots, the first of whom will be Maurice Drouhin, one of the leading French airmen who was engaged by Charles Levine last year when the Brooklynite announced his plans for a return crossing. M. Drouhin had at that time previously signed to fly a Farman plane to New York.

The second pilot will be M. Couzinet himself, and the French navy will supply a navigator. A mechanic, radio man and a journalist will complete the crew.

Radio Set is Very Complete

The radio will be the most complete ever carried by an airplane. It will make possible communication with two ships at the same time over a radius of 700 kilometers. M. Couzinet feels that the presence of an experienced radio operator will insure much more prompt and sustained air reports than in previous attempts which depended for communications upon the pilots or mechanics of limited radio knowledge.

An idea of the giant proportions of the airplane can be gained from the following figures: The supporting surface is 272 square feet, the wing length, 81 feet; the length of the fuselage, 45 feet; the capacity of the fuel tanks, 6,200 litres and of the oil tanks, 280 litres. The speed is 180 to 230 kilometres an hour.

The weight empty is 7,800 pounds and with a full load, 18,000 pounds.

"I have tried to eliminate every element of chance that can be eliminated from an undertaking of this kind," said M. Couzinet. "Ours is not a sporting affair but a serious attempt to span the Atlantic with the idea of following up the achievement with a regular commercial air line. I am confident that my plane will prove the best type for such service, and when Americans see our ship this spring I know we shall find backers for a Paris-New York air line."

M. Couzinet has impressed observers here as being of much the same type of a young man as Colonel Lindbergh. His confidence in flying and in himself and his courageous effort to achieve his ambition recall to French aviation circles America's ambassador of the air.

M. Couzinet studied in the Ecole Superieur D'Aeronautique and later served with distinction as a Lieutenant in the Thirty-fourth Regiment of the Aviation Corps at Le Bourget.

Is Your Stomach Troubling You?

Hamilton, Ont.—"Dr. Pierce's Golden Medical Discovery is a remedy for stomach and liver trouble that I can highly recommend. Before I took it I would have spells of intense suffering, but through its use I gained in weight and health and felt just fine. My friends even commented on my changed appearance—my complexion was better and my eyes brighter."—Mrs. Caroline Nelson, 74 Steachen St. E.

People in every walk of life today say Dr. Pierce's Golden Medical Discovery has restored them to health. It is a reliable medicine made from roots and herbs, sold by druggists, in both fluid and tablets. Send 10c for trial pkg. tablets to Dr. Pierce's Laboratory in Bridgeburg, Ont.

BRIDGEMAN CLASHES WITH OPPOSITION

(Continued from Page 1)

ever had happened at Geneva and elsewhere, it was not going to drive her to a great naval building competition with the United States or anyone else. He referred to the United States naval building program announced by Secretary of the Navy Wilbur in January, and then cut down in February by the House of Representatives naval committee. He said that eight large cruisers already had been atuhorized and if a further fifteen were completed the United States would have twenty-three, which was two less than they demanded at Geneva.

Stressing the Mother Country's heavy burden of naval defence, Mr. Bridgeman alluded to New Zealand's generous contribution to the Singapore naval base. "At the last Imperial Conference," he continued, "most of the delegates were very much impressed with the weight of the burden falling on Great Britain. Any contribution like this is a very satisfactory proof that some parts of the Empire not only realized this heavy burden as a thought but carried it out as a deed. Some already have made very considerable contributions, notably Australia and New Zealand, and I venture to hope that all through the Empire it will be recognised that the weight of this burden on the Mother Country is heavy and that this contribution from New Zealand, though belated, will not be the last."

The net total of the British navy estimates for the coming year, announced on March 9, is £57,300,000 (roughly $286,500,000).

This provides for new construction up to £9,629,857 ($48,149,285) against £9,983,448 ($49,917,230) in 1927. Had the full program been proceeded with the provision required for new construction in 1928 would have been £10,700,000 ($53,500,000). The reduction is due to the fact that the government reduced the program by three cruisers.

Owing to a reduction in the building program and other items it has been possible to reduce the naval personnel. The final figure for 1928 will be 100,986 or a reduction of 1,289 when compared with 1927.

WOULD BREAK GRAIN MONOPOLY

(Continued from Page 1)

pointed out that grain is a basic cargo, essential to general cargo ships, because of its weight and bulk.

The committee discussed the effect of Federal regulations governing the grading and inspection of grain passing through North Atlantic ports as compared with the same practice in Canada.

Because of these inspection methods and grading of American grain, shippers can move their product through Canada 3 cents a bushel lower than through the United States' ports.

More United States' grain was shipped from Montreal last season than Canadan grain, the difference being 297,987 bushels. The grand total of deliveries of Canadian grains of all kinds being 91,832,931 as compared with 92,130,918 bushels of United States' grain.

NOCTOVISION FOR AVIATORS

The noctovision will enable hostile airplanes to be located after dark without their pilots knowing they are under observation, say European experts. A beam of invisible "light" will be focused on the aircraft and its movements followed by observers on the ground tracing its flight on a receiving screen.

Stubborn Coughs

For many years PERTUSSIN has been widely used as the most effective remedy for whooping cough.

Physicians and pharmacists have confidence in this safe and harmless medicine. Being entirely free from "dope," it can be given to young and old with perfect safety for any cough or bronchitis.

At all drug stores, bottles 60c. and $1.20.

PERTUSSIN
Safe for Every Cough

SPRING OPENING

IMAGINE woollens that are sheer and sometimes lacy; silks besprinkled with the gayest of jazz, Indian and floral themes; dresses that combine moulded lines with rippling, uneven hems; coats that do wholly surprising things with tweed and you have a fairly accurate idea of what the mode for Spring is like. And here, freshly unwrapped, are scores of smart new frocks and hats awaiting to perform this miracle. Trig coats that may be donned immediately. A review of the advance modes will give you a definite idea of what is going to be worn by style leaders this coming season. A special invitation to all is given to visit our new "Redfern" Shoppee—Second Floor—Ready-to-Wear Section.

Obituary

MRS. JOHN WALSH.

HASTINGS, March 16.—The death occurred in Asphodel Township on Friday, March 9th, of a highly respected resident, in the person of Annie Elmhirst, widow of John Walsh. The late Mrs. Walsh was born on January 24th, 1855, in the Township of Asphodel, and was the daughter of the late Mr. and Mrs. John Elmhirst, early pioneers of this district. She was married to the late John Walsh in 1878, and has lived in Asphodel ever since. The late Mrs. Walsh had been in failing health for the past three months, but had only been confined to her home a few days previous to her death.

She leaves to mourn her loss three daughters and two sons, Mrs. Lee of Belleville; Mrs. Harry G. Lewis, New York; Miss Mary Walsh, Atlantic City; Mr. J. R. Walsh, Otonabee, and David H. Walsh at home. Five brothers and two sisters survive: Frank of New Haven; Richard of Oswego; Philip of Toronto; Henry of Manitoba; William of Syracuse; Mrs. John Lobb and Mrs. William Dixon of Westwood.

The funeral, which was very largely attended, was held from the residence of her son, David, at 10 a.m. on Sunday, March 11, to the Church of Our Lady of Mount Carmel.

The pall-bearers were: Messrs. J. F. McCarthy, F. Warner, Willis Gilchrist, T. J. Lynch, T. A. Walsh and P. J. Crowley.

MRS. MARY CAVANAGH.

The funeral of the late Mrs. Mary Cavanagh, whose death occurred at the home of her son-in-law, Frank McCarthy, 212 Perry street, on Thursday, will take place from the above address on Saturday morning, March 17th, at 9 o'clock, to St. Joseph's church and cemetery, Douro.

CANADIAN V. C. GETS NEW SHIP

GLASGOW, March 16.—Canada's only naval V.C., Captain R. N. Stuart, V.C., D.S.O., R.N.R., will sail from here on Saturday for Victoria, B.C., with the new passenger steamer, Princess Elaine, which has been built at Clydebank for the Canadian Pacific Railway Company's coastwise service in British Columbia waters. The Elaine will go on the Vancouver-Nanaimo run early in May.

More than 670,000 boxes of grapefruit were shipped from Porto Rico to America in the past year, a gain of about 250,000 boxes over the previous season.

CHILD COOKED BY LIME BATH

Attempt To Heal Little Cripple Causes Horrible Death.

BEING INVESTIGATED.

DETROIT, March 16. — Crippled from birth, deaf and dumb, a four-year-old girl was literally cooked to death on Wednesday night over a boiling steam bath in which unslaked lime had been placed by her father upon representations from "faith cure" neighbors that the "treatment" would restore the ailing child to health. The girl was Alma Stema, and she lived with her parents at 3366 Sargent Avenue.

According to Major John F. Roehl, investigator for the Board of Health, the little girl was placed in a chair above a tub of scalding water into which fresh lime had been dropped. She was wrapped in a blanket, only her head being left exposed.

In this position she was left and the family went to bed. Yesterday morning when the mother attempted to arouse Alma she found her cold, death apparently having occurred some hours before. The effect of the lime upon the little body had been to cause the flesh to literally drop from the bones in great lumps. Unable to make an outcry and swathed so tightly in the blanket as to be unable to move, the child had been boiled to death.

No action has yet been taken by the authorities. A physician called after the body was found, and notified the health officials.

RESCUES WIFE AND 4 OTHERS

Fort William Man Badly Burned Saving Family From Fire.

CHILD LIKELY TO DIE.

FORT WILLIAM, March 16—Awakened by smoke, F. A. Babin rescued his wife, three children and his brother, [illegible] destroyed his home. He was seriously burned himself, and little hope is held out for the recovery of his infant daughter.

After getting his wife and two-year-old son out, Babin groped back through the smoke to the infant's crib. He tried to throw her out the window to a snowbank. Not till he got outside did he realize that the child had fallen inside the room. He jumped back into the flames and the second time effected the rescue, but the little girl was so badly burned that hope for her life has been abandoned.

After rescuing the child he dashed to the rear of the house and got out his 14-year-old son and the boy's uncle.

ST. PATRICK'S TEA DRAWS BIG CROWD

Standing Room Filled at Concert and Social at

CAMPBELLFORD, March 16. — St. John's United Church established a record for attendance at church entertainments last night when the ladies of the east side of the town held a St. Patrick's tea. Standing room was unavailable before the curtain rose on the first number of the program, and the audience which consisted of members of every congregation in town, indicated that for future events of this kind an auditorium of larger seating capacity would be imperative. The ladies who were responsible for the Irish decorations are deserving of great parise for the success of their efforts. After the program lunch was served by the ladies in charge.

The most popular numbers on the program were the debate: 'Resolved that the Blarney Stone has done more for the Irish than oatmeal porridge has for the Scotch,' and the little two act play, 'When Husbands Interfere.' In the debate the affirmative was victorious. It was upheld by Miss McGirr and S. A. Maguire. In an attempt to gain a point for the Irish, Mr. Maguire contrived somehow to arrive ten minutes late. In the meantime, while the other three speakers waited patiently on the platform, the chairman, the Rev. Ernest Harston, announced that there would be community singing. Mrs. G. A. Kingston and R. J. Allan were the speakers for the negative, and Scotch interests. The judges were E. H. Greig and J. H. Bell. Their decision was given in favor of the Irish.

The play 'When Husbands Interfere,' centred around the fact that one husband thought his wife should be more economical, but the entire trouble came when she coaxed him into being her dress model. The parts of Mr. and Mrs. Alexander Dabbleton, the leading characters, were taken by Hilton Coxwell and Mrs. Arthur Armour, Mr. and Mrs. Bird Plover, newly weds, by E. C. Dolman and Miss Lulu Gay; the doctor by J. N. Stone, and the Irish maid by Miss Hammond.

The opening number of the program was a piano duet by Miss Roxy Wilson and Miss Muriel Kingston. The chairman's address by the Rev. Ernest Harston was brief and quite suited to the occasion. The third number was a vocal solo, Killarney, by Mrs. William Witthun, St. Catharines. Cecil Searles' violin solo was the first number to be encored. Mr. Hazel's vocal solo, which was the next number, was also encored. As a closing number Tipperary was sung by a mixed choua of 16 voices, Mrs. Witthun singing the verse as a solo. The members of the chorus were dressed in white with green ties and hats. The ladies also wore green pinafores of distinctly Irish design.

Before lunch could be served it was necessary to ask the audience to move so that narrow aisles might be formed to allow those who were serving to move with as much despatch as possible. The members of the church state that the number in attendance last night is the largest yet noticed at an entertainment of this kind here. The proceeds amounted to between ninety-five and one hundred dollars, with the price of admission set at twenty-five cents.

PERCIVAL IS GIVEN TWO-YEAR SENTENCE

Jury Returns Guilty Verdict With Strong Recommendation For Mercy.

BROCKVILLE, Ont., March 16. — Canadian Press. — Taking into consideration the "very strong recommendation for mercy" made by the jury, which found the prisoner guilty of manslaughter, his age previous good character, the "considerable provocation" that he had, which the Judge said was shared by the deceased, and the fact that the shooting had been done in the heat of passion, Mr Justice Logie late yesterday afternoon sentenced Walter H. Percival, aged 76, of Burritt's Rapids, to two years less one day at the Ontario Reformtory, Guelph, for having shot Frank J. Auger, one of his neighbors, on February 12 in a dispute over a gate, Auger dying two days later in the Smiths Falls hospital.

The jury was out for slightly over one hour considering a verdict. Mr. Justice Logie, while concurring in its verdict and in its recommendation for mercy, declared that Percival had been "a very foolish old man," and that the jury on the evidence might have found him guilty of murder. He expressed the hope that during the period of his incarceration Percival would really repent, because he had formed the impression while the prisoner was in the box that he was not really regretful of taking Auger's life. Justice Logie declined to entertain the suggestion of defence counsel that Percival should be sentenced to a short period of imprisonment in the common jail, but said that he preferred to send him to Guelph rather than to the Provincial Penitentiary because of a belief that at the prisoner's age there would be little chance of Percival leaving the institution alive.

FILM STARS WILL BE HEARD ON AIR

Douglas Fairbanks, Norma Talmadge and Charlie Chaplin Included.

NEW YORK, Mar. 16. — (United Press.)—A radio program, with Norma Talmadge, Douglas Fairbanks, Charlie Chaplin, John Barrymore, D. W. Griffith, Paul Whiteman and Dolores Del Rio, will be broadcast over a nation-wide net-work of stations on Thursday evening, March 29. More than 40 stations associated with the National Broadcasting company, from coast to coast, will put the feature on the air, Edward L. Bernays, acting on behalf of Dodge Brothers, said.

The program will utilize two transcontinental telephone lines and is said to rival in expense that $60,000 Dodge hour which was heard several months ago over a similar chain of stations.

Griffith to Direct.

Paul Whiteman and his orchestra will play in the New York studios and the balance of the program will come direct from Pickfair, the Hollywood home of Mary Pickford and Douglas Fairbanks. John Barrymore will recite Hamlet's soliloquy, Fairbanks will give a talk on keeping fit, and the other movie stars will speak. Griffith will act as master of ceremonies.

QUART OF WATER CLEANS KIDNEYS

Take a Little Salts if Your Back Hurts, or Bladder Is Troubling You.

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Eating too much rich food creates acids, which excite the kidneys. They become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood. Then we get sick. Rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys, or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, begin drinking a quart of water each day, also get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast, and in a few days your kidneys may act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush and stimulate the kidneys; also to help neutralize the acids in the system so they no longer cause irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive; makes a delightful effervescent lithia-water drink which everyone should take now and then to help keep the kidneys clean and active and the blood pure, thereby often avoiding serious kidney complications.

WOMEN'S PAGE

PERSONALS

Mrs. P. L. Allison, King street, was hostess to the members of the Guild of Arts and Crafts of the Women's Art Association, at a meeting held at her home last evening. A demonstration of handicrafts was given by Mrs. Allison, Mrs. B. L. Barns and Mrs. J. H. Seels. Each member responded to the roll call by mentioning a hobby.

• • •

Friends of Mrs. Edward Pym, of Maitland avenue, will regret to learn that she is ill in Nicholls Hospital.

• • •

Friends of Mr. Francis Sutton, of Bowmanville, formerly of this city, where he was organist of Murray Street Baptist Church and a member of the teaching staff of the Conservatory of Music, will be interested in the announcement of his marriage, which took place on Monday of this week, to Kathleen Burk, daughter of the late Mr. and Mrs. Marvin Burk, of Bowmanville. The ceremony was performed by the Rev. Dr. Best, assisted by the Rev. Mr. Robins, in St. Paul's Church at Bowmanville.

• • •

Mr. W. J. Martin, King street, is celebrating a birthday anniversary today.

• • •

A very pleasant and well-attended Shamrock tea was held yesterday afternoon at the home of Mrs. Clarence Cooke, 184 Dalhousie street, under the auspices of the South End Sewing Circle of Knox Church. Mrs. Cooke was assisted in receiving by Mrs. William McDonald and Mrs. R. Johnson. Mrs. W. G. Lockie was in charge of the musical program, which included vocal solos by Mrs. T. E. Curvin, Mrs. H. Wood, Mr. A. Pitchford, with accompaniments played by Miss May Pollock, readings by Mrs. G. H. Rowe, Mrs. McLaughlin, Mrs. W. Wedlock and Miss Margaret Pitchford, piano solos by Miss May Pollock and a piano and violin duet by Miss Katie Robertson and Mr. Alex. Robertson. Tea was poured by Mrs. J. Robertson and Mrs. E. Benson, assisted by Mesdames J. Ego, A. Long, J. Whitfield, J. Buckham, E. Johnson, F. English, A. Pitchford, W. Johnson, J. Dinsdale and Miss McDougall. Mrs. J. J. Pollock ushered the guests into the tea room where the table was charming with Irish linens, a central green vase of daffodils and green candles in silver candlesticks. Green streamers and shamrocks made an attractive note of seasonal color throughout the rooms.

• • •

Little Lillian Morrow of 563 Walnut street, entertained eight of her small girl friends at a birthday party yesterday. The table was prettily decorated in pink and white and the evening was spent in playing games.

• • •

His Honor Judge E. C. S. Huycke is celebrating a birthday to-day.

• • •

In the account of the Prince of Wales' Home and School Association tea, held on Wednesday at the home of Mrs. F. Elliott, omission was made of the readings given by Mrs. C. Rowe and Mrs. Knott. Mrs. G. Davis had charge of the program.

• • •

Mrs. Harry Strickland, of Toronto, has gone to Winnipeg to visit her daughter, Mrs. Walter J. Blackburn. She expects to return about the first of June with Mrs. Blackburn and take a house at Stoney Lake for the summer.

• • •

Mrs. J. R. Magee, of Janetville, is the guest of her sister, Mrs. M. J. Richardson, Bolivar street.

• • •

Members of the Excelsior Men's Club and of Mr. Cecil Wasson's class, both of George Street United Church, about forty in all, had a bowling party at the Duffus' Recreation Academy last evening, followed by the service of dainty refreshments in the Sunday school parlors of the church.

• • •

Miss S. A. Tomkins has gone to Ottawa to spend some time with friends.

• • •

A number of young people gathered at the home of Mrs. L. C. Deyell last evening in a surprise party for her daughter, Margaret, who celebrated a birthday anniversary yesterday. A very enjoyable evening was spent in music and games.

• • •

Mr. James Findlay of St. Thomas, Field Secretary, of the Ontario Boys' Work Board, who spoke in the city last night, was the guest of Howard Macdonald, Peterborough's member of the Boys' Parliament.

• • •

The 57th Regimental Chapter, Imperial Order of Daughters of the Empire, held a very delightful birthday party in the armouries yesterday afternoon in celebration of their sixteenth birthday. The guests were received by the Regent of the Chapter, Mrs. R. G. Cottrell, assisted by Mrs. E. B. Clegg. Mrs. W. H. Young gave each guest a small silk flag as a souvenir. The reception room was decorated with spring flowers and potted shamrocks. Mrs. C. S. Stapleton ushered the guests to the tea room. The table was very attractive with a Cluny lace cloth, yellow daffodils in bud vases surrounding the lovely birthday cake, surmounted by a Union Jack, which was surrounded by sixteen small lighted candles, and tall green candles in silver candle holders. Mrs. Vincent Eastwood and Mrs. J. H. Eastwood poured the tea, and tea room assistants were: Mrs. G. H. Hall Mrs. D. Loomis, Mrs. Earl Clark, Mrs. H. Gilgour, Mrs. A. Clysdale and Mrs. Langford. The program consisted of instrumental solos by Misses Pearl Carruthers and T. Gladman, and two vocal solos by Mrs. W. H. Hohner. Miss Gladmanp layed the accapfaniments.

• • •

Mrs. S. Newhall and Mrs. J. S. Fanning were convenors for the tea and Miss Rogers had charge of the program.

• • •

Mrs. W. J. Little, Lakefield, announces the engagement of her daughter Florence Beatrice Christine, to William Carl, son of Mr. and Mrs. William Steinkrauss, of Peterboro. Marriage to take place quietly this month.

• • •

A delightful tea and shower of furnishings for the third floor kitchenette of George Street United Sunday School Hall was held in the auditorium of the Sunday School yesterday afternoon, under the auspices of the senior and intermediate classes of the school. The guests were received by Mrs. J. E. Todd and Mrs. E. W. Coon. The gift table, which was attractively decorated with a basket of spring flowers and pussy willows, was loaded with pretty gifts of fancy china, glassware, crockery, cutlery, and everything necessary for the furnishings of a fully equipped kitchen. Mrs. P. Hetherington was in charge, with Mrs. Homer Borland, Misses Addie Batten, Miriam Rutherford, C. Phillips, Pearl Carruthers, and Ethel Robinson assisting. The central tea table was lovely with a silver basket of pink double tulips and yellow daffodils draped in pink tulle and pink candles in silver candleholders. Mrs. C. E. Smith and Mrs. H. Foote poured tea, and assistants were: The Misses Dorothy Bamforth, Margaret Walker, Margaret Vance, Irene Cox, Miriam Purdy, Irene Bell, Lenore Routley, Florence Weese, Lily Taylor, Mary Vance, Gertrude Butcher, Olive Elcombe. Tea was served to over two hundred guests at small tables, prettily decorated with yellow and mauve fluted runners and vases of yellow daffodils. A table of home-made cooking was in charge of the Misses Helen Robertson and Kathleen Cooney. A delightful program arranged by Miss Dick's Sunday School class consisted of piano solos by Miss Pearl Carruthers and Miss Musa Cox, piano duets by Misses Irene and Alma Mark and Misses Alda Bartlett and Lorimer, readings by Miss Evelyn Miller and Miss Irene Cox, vocal solos by Misses Olive Howland, Freda Allison, Dorothy Cooney, and C. Philips. The Misses Mary Elliott and Leta Brownscombe were general convenors of arrangements.

Miss Ethel Maybee, Gold Medalist, Kiwanis Musical Festival, will sing at the Sacred Concert in the Regent Theatre, Sunday night, 8.30.

Musical instruments made in America and sent to the outside world last year were valued at $17,673,000, an increase of nearly $1,700,000 in 1926.

EYES, POISE and ACCIDENTS

There is an appalling increase in the number of deaths due to automobile accidents, and the number of injuries creating temporary or permanent disabilities is, of course, even hundreds of times larger than the actual number of deaths. A certain number of automobile accidents must be expected, for the automobile will doubtless always be a dangerous instrument.

Great changes could be made at once if laws were made and enforced, to compel eye examinations of everyone driving automobiles, motorcycles, or other fast moving vehicles. In some communities those applying for chauffeurs' licenses are compelled to pass eye examinations, but this law is usually not extended to include owners of automobiles, who make up the greatest number of automobile drivers. While making so much other restrictive legislation, our public officials could do well to see that such eye-testing laws were passed and enforced.

Each city should employ as many optometrists as necessary to give examinations without cost to all who apply for automobile licenses. A little money spent in this way would save much more in the reduction of needless accidents, the results of which cost the tax payers of America millions of dollars each year.

There will always be a certain number of accidents due to nervousness and carelessness on the part of the driver. It is difficult to see how any law can be passed to control this, but each individual can help a great deal by understanding the mental causes which lead to the accidents caused by nervous persons. There are few people who can have perfect poise under all kinds of trying conditions. The one whose nerves are jerky is one who has not retained control over the vital energies which are surging through his nervous system.

The out and out neurotic is always in danger of creating an accident, but even those who do not consider themselves nervous are stimulated to a kind of nervous ecstacy when riding behind the steering wheel of an automobile. The hum of the motor and the ease with which the machine can be speeded up have undoubtedly a definite affect upon the nervous system, and a peculiar wild desire to "get there first" possesses the driver. Before he knows it he is stepping too hard on the gas, cutting in and out, as well as cutting corners, and doing other unreasonable things which he seldom feels like doing while sitting on the back seat. Standing on a corner, he curses and condemns all the "fools" who race past; but once behind the steering wheel he too often loses all of his accustomed poise and becomes as foolish as the rest.

I hope not one of my readers will think I am only referring to the "other fellow," but will take the suggestions I am giving you to heart. Learn to stay as poised while driving a machine as you are at other times. Don't race, hurry, or try to "make time," and don't let the hum of the motor make you so nervous that you drive recklessly.

Don't think of other worries when driving. You will have enough to think about to avoid injuring yourself and others.

Have your eyes examined by a competent optometrist, and use your influence to get the necessary laws passed to compel everyone who applies for a license to drive an automobile to submit to an eye examination.

Questions and Answers.

Question W. B. K. writes "I have been reading your articles on health with interest, and wish your advice in regard to my grand-children, ages 3½ and 5 years. They are very healthy looking children, but the older one quite frequently eats his breakfast and vomits it up almost immediately. They both grind their teeth at night till one can scarcely sleep in the same room with them. Will you kindly tell me the cause, and what should be done for them?

Answer Your grand children are probably overeating, and using bad combinations of food. The grinding of teeth at night is usually caused by some form of indigestion. The older child who vomits his breakfast doubtless does so because his stomach is still upset from the meal of the evening before. Try giving the children a lighter dinner, and I am sure these troubles will disappear.

Question Thank You asks "Will you tell me through the Question and Answer column what it is that makes me dizzy when I turn my head? When I lay down or turn over in bed everything seems whirling around."

Answer There are many causes of dizziness, but from your short description it would appear that your trouble is caused by some lesion or congestion in the vertebrae or in the muscles of your neck. Consult some doctor from one of the schools of manipulative therapeutics.

Question Reader asks "Is salt fish a good food in rheumatism, where the most misery is in the swelling of the joints, and continuous pain?"

Answer I do not advise the use of salt fish at any time if fresh fish is available. In a case of rheumatism it is better to almost entirely eliminate salt, so salted fish could not be considered a good protein food for the rheumatic patient.

HOROSCOPE

The Stars Incline, But Do Not Compel

(Copyright, 1928, McClure Syndicate.)

SATURDAY, MARCH 17, 1928.

Astrologers read this as a configuration that favors journeys, writing and children.

There is a sign encouraging to all who seek work and it is believed to be especially favorable to women.

All the aspects seem to presage continued power for old political leaders and little chance for younger men or for women of any age.

Startling developments in the motion picture and the theatrical worlds are forecast. Far-reaching combinations are prophesied.

This is an especially promising day for brainworkers. The planetary influences are supposed to stimulate thought.

Newspapers and magazines will undergo changes, but they will profit greatly in the coming year, according to astrologers.

Great dailies will form new political alignments and hard fought contests may be expected.

This is interpreted as rather an uncertain wedding day, for lovers may expect crotchety old age unless they wisely apply life's lessons.

This year's first eclipse which the Sun will be obscured, which takes place May 19, is foretold as most sinister in its portent.

Newspapers are to gain added influence in world affairs it is foretold.

Persons whose birthdate it is may expect small changes that mean real progress in the coming year.

Children born on this day have the augury of success in life through industry which reinforces talent.

DRESS

By MARY MARSHALL

The new coat silhouette that suggests the empire mode—made of beige kashmir with baby leopard cuffs and scarf collar.

Season after season new coats have remained very much the same, and usually the reason why a last season's coat has had to be discarded has been because it has looked shabby or because the owner has grown weary of it—not because it has actually gone out of fashion. There have been changes, to be sure—but they have come gradually and almost always a coat could be worn two seasons in succession with perfect satisfaction.

Straight line coats of full length—that is long enough to cover the short skirted frock—have been with us for quite a while, and though flares have appeared from time to time there has never been a time when the straight line type of coat has not passed muster.

Now there seems to be a definite desire on the part of fashion to make real changes in coat silhouette. Some of the new models are of seven-eighths or three-quarter length. In some there is a decided flare, and the most strikingly different of all are cut with a new straight line from the shoulder that suggests the old-time box coat.

But while the full box type of coat is seen here and there some of the dressmakers are working in favor of a coat with a defined waistline. Martial et Armand of Paris uses a rather wide belt on some of the spring capes and Lucien Lelong makes the under-arm seam of some of her new coats curve abruptly in at the waistline and then just as abruptly out again.

The uneven hemline assumed by so many of the new evening gowns presents a really difficult problem for the coat makers. Quite obviously to have a coat that takes on precisely the same eveness as the frock skirt is out of the question. A coat long enough to cover the skirt at its longest extension would sometimes mean a coat reaching the ankles. The only thing to do a it is to let the uneven skirt hang down here and there beneath the coat. There is an increasing fashion for evening wraps that makes no attempt to cover the frock at any place.

A London vicar has proposed the charging of an extra fee of $1.25 for weddings where confetti is used, to pay for the extra work of cleaning afterward.

An artificial lake three miles long and as beautiful in its surroundings, as any natural lake in the country, is part of the North Wales scheme for providing electric power.

Who Wrote This?

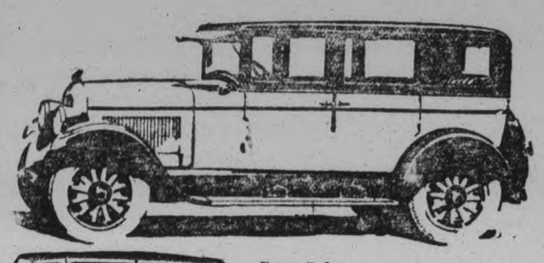
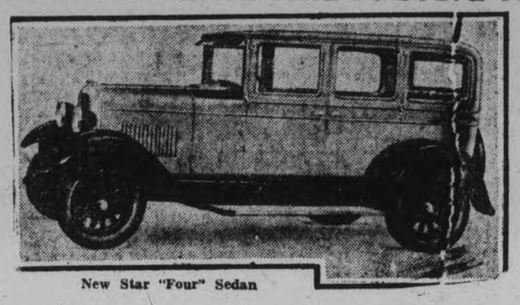
CLOSES MARCH 15, ONLY A FEW DAYS LEFT IN WHICH TO SEND IN YOUR SOLUTION.
REMEMBER YOU STILL HAVE TIME TO SOLVE THE PUZZLE AND ENTER INTO THE CONTEST

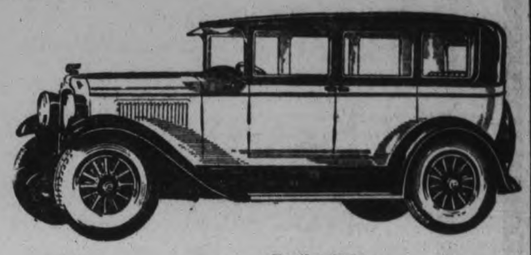


Essex Sedan



New Star "Four" Sedan

Dodge Sedan



Pontiac Sedan

Ford or Sedan

Peterboro's Famous Lift Lock

Chevrolet Sedan

GENERAL CONTEST RULES

How to Enter

1. The contest is open to everyone except:
   (a) Employees of The Peterborough Examiner, Ltd., or their immediate family.
   (b) Prize-winners in any similar contest who have won any of the major prizes.
2. Additional puzzle-charts may be obtained free by writting to the Contest Department or by calling at The Examiner Office.
3. Every figure in the puzzle is complete and entirely free from tricks or illusions. If any contestant is in doubt about any of the figures, send in the chart with the figures marked and the Contest Department will gladly give a ruling on the figure.
4. When you have solved the puzzle, fill in completely the solution blank, which must be accompanied by a remittance for at least a six months' subscription at the regular rates to The Evening Examiner. (See subscription rates.) See also the prize-list and note how the **value of your prize is increased** by paying for a year's subscription and by getting subscriptions from your friends. Renewal subscriptions, or subscriptions in arrears, if paid during contest period, count the same as new subscriptions and will be extended from the present expiry date, but not more than $15.00 will be received on any one solution or subscription.
5. In order that subscribers who pay carrier boys weekly may participate in this contest, books of tickets containing 22 weekly tickets for $3.00, or 44 for $6.00, will be sold. These remittances must be made direct to the Contest Department with your solution. Otherwise it cannot be registered. Each ticket is valued at 15c and will be redeemed from the carrier boy at that price.
6. Readers who give their subscription to some other contestant and later want to send in an answer themselves, may do so providing they fill in the coupon, giving the name of the person they paid their subscription to and the amount paid. No further payment is necessary.
7. The contest will close on March 15, 1928, but send in your solution as soon as possible as we are offering special prizes for the first correct solutions. (See full details under "Special Prizes.") There is nothing gained by holding back your answer once you have solved the puzzle, as a contestant may make several remittances on any answer sent in while the contest lasts up to a total amount of $15.00.
8. Contestants may send in a different answer to the puzzle with each remittance, but if one of your answers is correct the money sent in on your other answers will not increase the total value of your prize, and not more than one regular prize will be paid to one family.
9. Everyone has an equal chance. You can win the first prize and extra cash for only a six months' subscription, but note how the value of the first five prizes increases if you send in more money. Aim to win the maximum Grand Prize. The Evening Examiner is now recognized as the leading daily in Peterborough district and surrounding counties and no difficulty should be found in getting your friends or neighbors to subscribe for it.
10. Contestants who remit by mail or pay at the office should see that these remittances and answers are made on a proper contest coupon to ensure them reaching the Contest Department.
11. If the correct answer is not sent in by any contestant the prizes will be awarded for the nearest correct solutions. In the event of a tie a second puzzle will be presented which will be as practicable and solvable as the first. Only those tieing will be permitted to solve the second puzzle. Should two or more persons be tied in the second puzzle the prizes will be divided equally among those tieing. No cash will be accepted on the second puzzle.
12. In entering the contest, contestants agree to abide by the rules of the contest and to accept the decision of the judges as final. The Contest Department reserve the right to alter and amend its rules as necessary for the protection of contestants or The Peterborough Examiner. It also reserves the right to reject any subscriptions and to disqualify any contestants whom they consider should not be in the contest. Contestants are assured of the same impartial treatment which characterizes The Examiner in all its dealings.

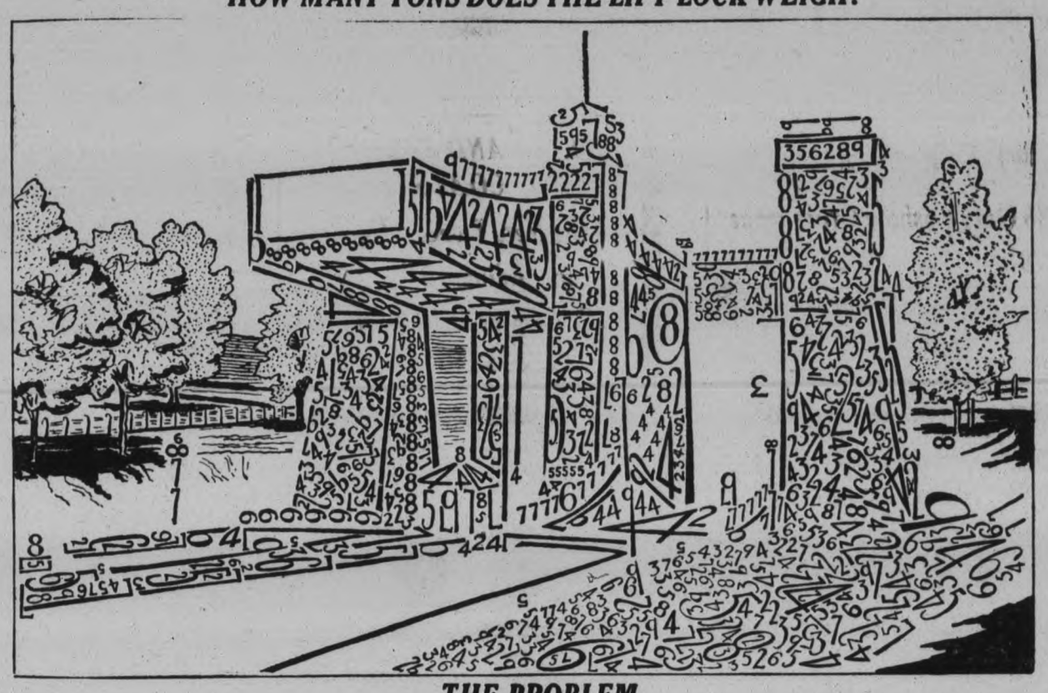
HOW MANY TONS DOES THE LIFT LOCK WEIGH?



THE PROBLEM

The problem is to add together all the figures shown above, which, when added together, represent the total number of tons that the Lift Lock weighs.

The puzzle is entirely free from tricks or illusions, every figure is complete and stands alone. The figures range from two to nine. There are no ones (1) or ciphers (0) in the puzzle. The sixes are curved, while the stem of the nines are straight.

We wish it clearly understood that every figure can be plainly seen. There is nothing hidden in the trees or shadows, but the problem of adding these is a real test of accuracy.

Remember, each figure is added separately. For example, 9777 is counted 9 plus 7 plus 7 plus 7, or, in other words, simply add them as if each figure stood one above the other in a single column.

REMEMBER, NO ONE KNOWS THE CORRECT ANSWER UNTIL THE CONTEST CLOSES

To ensure this we had Mr. E. M. Elliott, County Treasurer, and Mr. Frank Adams, City Treasurer, each erase one or more figures from the original drawing, which they carefully noted and sealed in an envelope and gave to the manager of the Royal Bank for safe keeping until the contest closes.

USE THIS COUPON FOR YOUR SOLUTION AND REMITTANCE

My answer to the problem is.....tons. Please place to my credit the sum of $.....
for the subscriptions given below; if this is a winning answer, send the prize to:

NAME..... ADDRESS.....

SUBSCRIBER'S NAME AND ADDRESS	New Sub.	Ren. Sub.	Amount

Is this your first answer to the puzzle?..... How much money have you sent in to date?.....

If your subscription was sent in by another contestant you must put his or her name below.

Note—Please answer all the questions and address your correspondence to—

THE CONTEST DEPARTMENT, OF THE PETERBOROUGH EXAMINER

SUBSCRIPTION RATES:
Six Months, by City Delivery, $3.00; by Mail, $2.40. One Year, by City Delivery, $6.00; by Mail, $4.80.
By Weekly Payments to Carrier Boys, See Rule Number 5.

$2,500 IN PRIZES
50 Free Prizes

FIRST GRAND PRIZE (Total Value, $1,350.00—Being choice of a Car, any make or design, up to a value of $1,200.00, plus $150.00 in cash, being at the rate of $10.00 for every dollar sent in up to $15.00. In order to qualify for this prize the contestant must send in at least $9.00 worth of subscriptions. If the winning contestant does not qualify for the above prize the contestant will then get

FIRST PRIZE (Total Value, $800.00)—Choice of any Car, value $720.00, plus $10.00 for every dollar sent in up to less than $9.00; if contestant sends $9.00 they qualify for Grand Prize.

SECOND PRIZE (Total Value, $400.00)—Being choice of Radio Set or Victrola, any make up to value of $200.00, and $80.00 cash, plus $8.00 for every dollar sent in up to $15.00.

THIRD PRIZE (Total Value, $175.00)—Being $100.00 each, plus $3.00 cash for every $1.00 set in up to $15.00.

FOURTH PRIZE (Total Value, $95.00)—Being $50.00 in cash, plus $3.00 cash for every $1.00 sent in up to $15.00.

FIFTH PRIZE (Total Value, $60.00)—Being $30.00 in cash, plus $2.00 cash for every $1.00 sent in up to $15.00.

SIXTH TO FIFTEENTH PRIZES—$20.00 in cash each.

SIXTEENTH TO TWENTY-FIFTH PRIZES—$10.00 in cash each.

TWENTY-SIXTH TO FIFTIETH PRIZES—$5.00 in cash each.

SPECIAL PRIZES—While the contest will not close until March 15, we are offering Five Special Prizes for the first five correct, or nearest correct, solutions secured by us. The prizes will be: First Prize, $8.00; Second Prize, $7.00; Third Prize, $5.00; Fourth Prize, $3.00; Fifth Prize, $2.00.

A TIP ON HOW TO WIN

Take a pencil and put down the numbers as you stroke them out, then add them up. Some suggest that you cut the chart into dozens of pieces, then check them from all sides; or if you wish, try blotting them out with colored ink or pencil. Others think the best way is to pick out all the twos, threes, fours, etc. Any they miss the first time they find later. Or suppose you try taking a combination of figures which, when added together, makes a total of ten. For example, 5 and 3 and 2 make 10. Tens are not only easily added together, but there is less danger of making a mistake.

1. Everyone has the same opportunity. A person sending in only $3.00 in subscriptions has the same chance of winning the first prize as a person sending in more money. The advantage of sending in more money is to increase the value of the first five prizes.
2. This is a contest for Central Ontario district, or to any subscriber of The Examiner, no matter where he resides.
3. Don't forget to answer all the necessary questions on the solution blank.
4. If you collect a subscription from a friend or neighbour, that person can also submit an answer to the puzzle without further payment.

THE JUDGES

In order that each Contestant shall have fair and impartial treatment, we have arranged with Mr. Roland Denne, Mayor of the City and Alderman Nagel Phelan to act as judges for the contest. Any complaints in this connection will be referred to these judges whose decision will be absolutely final.

JEWISH YOUTH IS CONFIRMED

Traditional Ceremonies Mark Reception of Isadore Black Into Synagogue.

BANQUET IS HELD.

Confirmation ceremonies for Isadore Black, thirteen-year-old son of Mr. and Mrs. P. Black, were carried out in traditional Jewish fashion at their home, 476 Charlotte Street, with every Jewish family of the city represented and many relatives and friends from outside present. A banquet was held, with M. Fine as toastmaster. After a welcome song by little Aaron Black, four years old, Morris Black, elder brother of Isadore, made a speech in Hebrew, congratulating his brother on attaining full membership in the synagogue. He was followed by Meyer Atkin, who conveyed the best wishes of the smaller children. Isadore himself made a long address in which he thanked and blessed all those who had helped him in his education and in other ways. He promised that he would do his best to be worthy of his parents and his country. His father replied, urging him to be a good citizen. Mrs. Black also said a few words, while addresses were given by Rev. A. Fine and many others. A social evening was held afterwards, during which a presentation was made to Mrs. Black. Isadore received many presents in honor of the event, while, in accordance with Jewish custom to think of others while having a good time, a collection was taken for the poor.

MANY WORKERS HAVE INVESTED

Recent C. G. E. Stock-Selling Campaign Very Successful.

841 SHAREHOLDERS.

Many new shareholders have taken an interest in the company in the course of a stock selling campaign held in order that the employees of the Canadian General Electric Company might be afforded an opportunity of investing their savings in the company with which they were employed.

At the completion of the year 1927, there were 602 shareholders fully paid up, yet at the completion of the campaign on Thursday, there were 841 while the number of shares subscribed for this year was 2761 as compared with 2,669 at the close of the last campaign. Comparison of the par values shows an increase from $133,450.00 to $139,050.00. Sixty per cent of the eligible employees have subscribed, an average of six shares being held by each.

Another savings and investment plan will go into effect after the first day of April as a result of the success which has attended the one now closing.

HUMOR REIGNS AT KIWANIS CLUB

Adrian Macdonald Is Speaker at the Weekly Luncheon.

Humor and plenty of it seemed to be the keynote at the noon hour luncheon of the Peterborough Kiwanis Club held in the Empress Hotel today. Possibly it was the nearness of spirit of St. Patrick's Day with its happy Irish touch. At any rate, Art. Reynolds appeared sporting an undeniably Irish head-piece; Mrs. Hazel Davidson McClelland, elocutionist, had selected several sketches with Irish characters; Frank Stinson made use of a number of humorous anecdotes during his announcements relative to the Chamber of Commerce, and the main speaker, Adrian Macdonald, enclosed a "barrel of chaff" with his grain of wheat, the grain being a particularly thoughtful talk on "seeing ourselves an Canadians" rather than seeing ourselves as others see us individually. It was a happy gathing, indeed, and the large number of Kiwanians and guests present profited accordingly.

Among the guests introduced were Mrs. McClelland, Joseph Colling of Minneapolis, T. G. McNar of Toronto, and Mr. Macdonald of the Peterborough Normal School.

In his booster speech of two minutes duration, Harry Boyle issued an invitation to the club members to visit any of his stores, and concluded by calling out the numbers which gave his prizes to Mrs. McClelland and Tom Mark. President Joe John made mention of the fact that next week Walter Kidd will be back in his place after a lengthy illness.

Among the other announcements were those of Dr. F. C. Neal, relative to the father-and-son luncheon next week; Frank Stinson's regarding the nominations for the Chamber of Commerce directorate of 1928; and Vern. Morphet's reference to the Kiwanis play that is to be put on. He called for volunteer actors and met with a fair response.

There followed an elocutionary number of Mrs. McClelland, depicting the trial and tribulations of the bargain hunter and "bargain haunted," which was so well received that she was called back for two encore selections. He return to any future luncheon will be heartily approved by the Kiwanians.

"As Others See Us"

As mentioned elsewhere, the address of Adrian Macdonald of the Peterborough Normal school staff, proved what he termed "A barrel of chaff followed by a grain of wheat," and their values one to another were brought out in masterly fashion. Mr Macdonald was introduced by Jack McKone.

Announcing his subject, "Seeing Ourselves As Others See Us," the speaker went on to say that it had been suggested by a poem of Burns, which is not overly well known and might have passed into oblivion but for the last stanza of it, which ends:

"O wad some po'er the giftie gie us
To see oorsel's as ithers see us."

There is something in human nature which makes one wish to see oneself as others do, but whether the reason is a sincere desire to know the truth or a desire to gain an inverted compliment is not always easy to decide. At any rate, the result is not always pleasing. It may be quite disappointing. (The speaker gave a humorous illustration at his own expense.) Just how much either or both of these desires count in the photographer's business is indicated by the slogan of one in Western Ontario:

"If you have beauty, we take it;
If you haven't beauty, we make it."

Passing from the humorous part of his address, Mr. Macdonald went on to apply the "seeing ourselves" theory to Canadians as a people rather than individuals and drew attention to Canadians' conservative attitude toward life and how they have, in some ways, held them back. He instanced the fruit grower who lost a large sale by refusing to depart from custom to pack his fruit in cases rather than barrels. He also drew attention to the tendency of not giving the young man a chance to show what he can do and of a certain lack of faith in the ability of those with whom one may be well acquainted; in this case, too well acquainted. He told of a lady who had not faith in a young doctor simply because she had gone to school with him and known him in his youth However, there is one thing that Canadians are to be congratulated upon, and that is their respect for the laws of the land and the manner in which they are enforced which promotes that respect. The speaker referred to the fact that we are sometimes apt to make comparisons of our methods with those of the United States in this regard—unfair comparisons because of conditions which are not like ours.

At the conclusion of his address, Mr. Macdonald was accorded a hearty vote of thanks by R. T. E. Hicks-Lyne, of the Dominion Bank, as was Mrs. McClelland.

PLAY PRESENTED.

Murray Street Young People Put on Comedy Production.

The "Dutch Detective," a three-act farce, was successfully presented before an appreciative audience at Murray Street Baptist Church last night under the auspices of the Baraca Class.

Every member of the cast took his or her part well, reflecting credit upon themselves as well as the careful coaching of the director, G. Walter Fitzgerald.

The Characters.

Otto Scmuitz, a correspondence school detective—Jack Pritchard.

Plunk Jarleck, escaped from the asylum—Sid Drury.

Jabo Grabb, the police force of Splinterville—Roland Scott.

Major Hannibal Howler, on the war-path—John Ward.

Augustus Coo, a newly-wed — Bill Ward.

Gladys Howler-Coo, his bride, the Major's daughter—Alice Johnston.

Ambrosia McCarty, the queen of the lunch room—Phyllis Rome.

Miss Araminta Sourdrops, who loses her Jabo—Hilda Taylor.

Hortensey Smatters, escaped from the asylum—Mildred Irons.

Katrina Kraut, from Hamilton Cidy, by her Schtate of Ohio — Dorothy Irons.

The play will be repeated this evening.

IN POLICE COURT

Edward Gordon of the Township of Belmont appeared before Magistrate Langley this morning charged with a serious offence against a Havelock girl between the age of 16 and 18. Gordon, through his lawyer, J. A. O'Brien, elected summary trial before the magistrate, and pleaded not guilty to the charge.

G. W. Hatton, K.C., was not prepared to give evidence as the information had been laid by the girl's father, and on investigation by the Crown he had found out from the girl's own admission that she was not of a previously chaste character, so he asked that the charge be dismissed.

Gordon is a married man, 36 years old.

Ottawa Senators Clinch Position in Play-Offs

OTTAWA SENATORS MAKE SURE OF FINISHING IN THIRD PLACE

Get Two Points By Defeating Tail-end New York Americans 5-2.

BOSTON WINS AGAIN.

Detroit Moves Ahead of Pittsburgh in American Section.

NEW YORK, March 16.—The Ottawa Senators administered the fifth consecutive defeat to the tail-end New York Americans in a National Hockey League game here last night by the score of 5 to 2. The Americans, who took the ice with only two substitutes, fought gamely, but were outclassed by the champions throughout.

The game was very rough. A major and seven minor penalties were meted out to each team. Bowcher, American defence player, drew a major and four minors. In the third period he crashed into Alex. Connell, Ottawa goalie, flattening him, and Alex. Smith, Ottawa defence player, got into the mix-up by hitting Bowcher. Smith also drew a five-minute rest.

Frank Finnigan, Senator right-winger, was the star of the game, scoring three goals, while George Boucher scored one and assisted in another. Hector Kilrea netted one counter. Bowcher and Leo Reise counted for the Americans.

Bruins Hold Lead

CHICAGO, Ill., March 16. — The Boston Bruins, leaders of the American Hockey League, defeated the crippled Chicago Blackhawks, 3 to 1 here last night.

Gainor, reserve Bruin winger, figured in all the Boston scores, shoving across two and assisting Gordon. Taylor made the lone Hawk tally in the second period.

Detroit Now Third

MONTREAL, March 16. — Detroit Cougars stepped into third place in the standing of the United States section of the National Hockey league by scoring a 1 to 0 victory over Canadiens here last night. The only goal of an uninteresting contest was scored by Reg. Noble, husky Cougar defence man, in the second period, when his pass out from behind the Canuck net was deflected past Holmsworth by Herb Gardiner's stick.

Canadiens played indifferent hockey throughout and were in disfavor with a capacity crowd. Their usual dashing and boring-in tactics were missing, the entire squad giving the appearance of being off color. Detroit did not show anything out of the ordinary, with the exception of their defensive play, which looked strong throughout.

The Governor of Michoacan, Mexico, has ordered all owners of industrial mining and agricultural establishments to maintain elementary schools whenever there are more than 50 children of school age in the vicinity.

Rowing Crews Are In Full Training

LONDON, March 16 (Canadian Press Cable).—The Oxford University rowing crew arrived at Putney yesterday and watched the Cambridge crew launch their craft. Particular attention was directed to the Light Blues' new bow oar, Mitchell, who is the only oarsman of either crew who has not been awarded the blue.

As the popular college rowing classic will be contested on March 31, both crews are preparing for the full course trials. Cambridge will row over the course today, while Oxford will workout on Saturday. Both crews will row on ebb-tide.

NORTHERN WINNERS GETTING SYMPATHY

Seem To Have Just Reached Top of Form in Recent Came.

TORONTO, March 16. — The South Porcupine "Porkies," conquerors of Port Colborne Sea Hawks in a stubbornly fought three-game series, are receiving sympathy on all sides over having to play Kitchener Green Shirts to-night and to-morrow afternoon to decide which team shall meet Montreal Vics or Arnprior in the Allan Cup eastern finals.

The Green Shirts have not played any hockey since they defeated Varsity for the O.H.A. senior championship on March 6, while the Quills, when they get through to-morrow afternoon will have taken part in five bruising battles in one week.

But the champions of the N.O.H.A. played only six games to capture their title and it appeared in the Wednesday night clash with the Sea Hawks as if they were just reaching the top of their form.

They skated faster and showed more effective combination than in the two previous tilts with Port Colborne, while their checking was clean, hard and effective. Make no mistake, the Green Shirts are going to have some difficulty subduing Jimmie Jamieson's squad.

Man For Man.

Taking the rival teams man for man the Green Shirts do not appear to have anything on Porcupine. Thornton's playing in the Port Colborne series stamped him just as good a goaltender as Berner, while Cain and Murray, the Quills' defence pair, certainly halt the opposing charges harder than do Karges and Schneider of the O.H.A. senior champions.

Cammie Seagram, one of the outstanding forwards in amateur hockey, may give Kitchener the edge up front. Seagram, big and fast, is at his best, when the going is the hardest and unless the "Porkies" can bring his thrusts on goal to a stop then their task is a hopeless one.

Jemmett, the Porcupine centre ice man, is a clever performer, however, and he perhaps has more speed than Seagram, but he does not bore in on the opposing defence as strongly as the Kitchener star.

Along the wings Kitchener will not show any superiority. Spence and McHutchion will hold their own with Molson and Roth, while in relief players the Quills, with Saunders and Gagnon, will hold their own with the two Hellers.

Stan Burgoyne will referee the game and the other officials have been appointed as follows:

Goal umpires—Wirey Hagan, Toronto ,and Lou Walker, Brantford.

Timekeepers— W. Long, Toronto, and Ernie Wortley, Toronto.

Penalty timer—Glen Armstrong.

In expectation of increased travel, railway lines between Riga and Indra, the Soviet Russian frontier, are to be strengthened.

Auckland, N.Z., plans to hold its "Auckland Winter Show" in July or August this year, those being the cold months of that country.

Plans are being made to rebuild business houses in Puetro Plata, Dominican Republic, that were destroyed recently when eight city blocks were swept by fire.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion. Stop worrying. Whenever you need quick stomach relief, take a little Bisurated Magnesia—powder or tablets. It breaks us gas, neutralizes acids and keeps the stomach sweet and strong, and digestion perfect. At good drug stores everywhere. Not a laxative.

Regina Monarchs Reach the Finals

WINNIPEG, Mar. 16—Showing rare courage in the face of a hopeless cause, Kenora Thistles healed their wounded pride here last night by defeating Regina Monarchs four goals to three in the second game of the western Junior finals. However, as Regina won the first game, 8 to 0, they captured the series and Abbot Memorial Trophy, 11 goals to 4, and will travel east in quest of national honors.

NEW ACQUATIC SPORT FOR GREAT LAKES

Great Lakes this year will take up the latest thing in aquatic sport hydroplane racing with outboard motors. These hundred pound 14 foot boats are driven from 28 to 35 miles an hour on 8 to 10 horsepower outboard motors. The cut above shows a girl champion driving her boat at the start of a race at Miami, Florida, and a close-up of one of these little hydroplanes making 33.032 miles per hour. Toronto already has twelve of these boats ready. Across the line, these little racing machines, costing less than $500 in all, have almost superseded expensive big racing boats. They not only cost less but produce much better racing.

Hockey Scores

Hockey games played yesterday resulted as follows:

National League.
Ottawa 5, Americans 2.
Detroit 1, Canadiens 0.
Boston 3, Chicago 1.

O.H.A. Memorial Cup.
zKenora 4, Regina 3.
z—Regina wins round, 14-4.

Senior High School.
zHumberside 3, Parkdale 1.
z—Humberside wins championship.

Jnior High School.
zJarvis 5, Humberside 3.
z—Jarvis wins championship.

South Pert Final.
zMitchell 3, Downie 0.
z—Mitchell wins championship, 10-4

Canadian-American.
xPhiladelphia 1, Boston 0.
x—5.14 minutes overtime.

MULLEN BATTLES FOR TITLE BOUT

Will Take Legal Means To Stop Mandell-McLarnin Bout.

CHICAGO, March 16.—Backed by the Illinois Athletic Commission, Promoter Jim Mullen of Chicago yesterday said he was ready to employ every means known to the legal profession to prevent the lightweight championship match between Sammy Mandell and Jimmy McLarnin of Vancouver, B.C., at Madison Square Garden, New York, May 17.

Mullen has the signature of Mandell and his manager, Eddie Kane, to a contract calling for a titular match in Chicago, June 21, between the champion and an unnamed opponent. Wednesday Kane signed for the McLarnin bout under the promotion of Tex Rickard.

If Mandell goes through with the McLarnin fight he will be suspended in the 23 states belonging to the National Boxing Association, Mullen and members of the Illinois commission promise. He will also forfeit $5,000 which he has deposited with the Illinois commission as a guarantee he will defend his title for Mullen on or before June 21.

TORONTO MAN WILL HEAD ASSOCIATION

Walter J. Barr Re-elected President of Canadian Jewellers' Association.

REGINA, Sask., March 16 (Canadian Press). — Walter J. Barr, Toronto, was re-elected president of the Canadian Jewellers' Association at yesterday's session of the ninth annual convention being held here. This will make Mr. Barr's second term as head of the Dominion jewellers.

Invitations to hold the 1929 convention in Quebec City and in Toronto were received from these places. The decision was left to the executive.

The entire staff of officers for the ensuing year, brought in by the Nominating Committee and adopted by the convention, was as follows:

Honorary president, Thomas Roden, Toronto; president, Walter J. Barr, Toronto; first vice-president, B. M. Chapman, Toronto (re-elected); second vice-president, J. S. Bliss, Niagara Falls (re-elected); hon. treasurer, James Ryrie, Toronto; past presidents, A. E. Rowland, Winnipeg, A. C. Skinner, Sherbrooke, J. A. Caron, Montreal; retailers, Norman Andres, Winnipeg, R. M. Todd, Vancouver, I. R. Finklestein, Montreal, W. H. Fontaine, Three Rivers Walter Tilers, Regina, C. E. Johnson, Halifax, F. M. Kinnear, Kingston, Norman Patterson, Sault Ste. Marie, W. H. McCreery, Windsor, R. L. McGill, Galt, H. O. O'Dell, Toronto, I. St. Jean, Montreal, J. E. Wilmot Ottawa, and J. E. Letellier, Lake Megantic.

Manufacturers — B. E. Ekbad, Toronto; T. K. Pickering, Toronto; S. H. Lees, Hamilton; Sol Lorie, Toronto; John McKnight, Toronto; R. Roughton, Montreal; R. Raphael, of Toronto.

Wholesalers — George W. Barrington, Montreal; E. H. Gunther, Brantford; A. M. Harvey, Toronto; F. J. Levenston, Toronto; A. S. Levy, Hamilton; F. J. McKinney, Winnipeg; Julian Schwob, Montreal.

Provincial Officers.

Provincial vice-presidents — British Columbia, Allan Carruthers, Vancouver; Alberta, Bert Knowles, Edmonton; W. G. Agnew, Calgary; Saskatchewan, Howard Downing, Moosomin; G. W. Harrington, Saskatoon; Manitoba, G. F. Thompson, Minnedosa; Ontario, E. H. Flach, St. Thomas; Quebec, Arthur Duquet, Quebec City; New Brunswick, J. T. Mayor, Fredericton; Nova Scotia, Stanley Hood, Halifax; Prince Edward Island, L. E. Wellner, Charlottetown.

Canadian Jewellery Travellers' Association — President, G. P. Shortreed, Montreal.

FLATS HAVE DICKENS NAMES

Names made prominent by Charles Dickens are being given to new blocks of flats being constructed in clearing and rebuilding the slum districts of Kensington, London. Many of the scenes of "Oliver Twist" are said to have been laid in the district. The blocks known as "Pickwick" and "Oliver" Houses have been completed.

Offer Co-operation To Conservative Side

SASKATOON Sask., March 16. — Canadian Press. — A formal offer of political co-operation with the Conservative party of Saskatchewan, was made by Dr. C. E. Tran, leader of the Progressive group in the Legislature, in a telegram read at yesterday afternoon's session of the Provincial general convention of the Conservative convention.

The telegram, reads as follows:

"Heartily concur in the spirit of your deliberations and gladly accept any democratic principles working towards co-operation."

At the outset of the afternoon session the delegates adopted a re-draft resolution relating to co-ordination of political action. As endorsed the resolution condemns the extravagance of the Liberal administration in the province, its "partisan nature of public services, and invites the support and co-operation of all parties, groups and individuals opposed to the government, in accomplishing its defeat.

WHITE SOX HAVE INFIELD PROBLEM

Chief Difficulty Apparently Centres About Second Base Berth.

SHREVEPORT, La., March 16.—Like the Cubs, the Chicago White Sox have an infield problem on their hands. The Cubs have a little more of it in fact than their city rivals, though both appear handicapped.

The greater part of the Sox problem is at second base. Aaron Ward has gone to Cleveland to join Peckinpaugh. The Sox thought Ward was going to make a fine player for them, but Ward found it as hard to play ball in Chicago as he did in New York—partly because of his peculiar way of figuring upon the importance of baseball to himself. So the Sox asked waivers and Cleveland, needing someone badly with Spurgeon handicapped by a sore arm took him.

Hunnefield probably will play second in his place for the Chicago team. This young man has a chance to make himself a high-class ball player and get a high-class reputation because he will work with an infield having more speed than the Sox have had in a long while.

If Hunnefield falls down there is an infielder by the name of Redfern who has played around a lot and who might do things if he is quite cured of stomach trouble. There also is another candidate for second by the name of Mann, who has had something or another the matter with him. Beats all how this year's crop of youngsters have the "hypos." That is half of what ails baseball.

Out of that bundle of fodder presented for the surveillance of Ray Schalk it is likely that a second baseman can be found to uphold the cause for the south side. But if only there was a second baseman in sight the sure equal of what Kamm is, or what Cissell promises to be the Sox would have a reel of chain lightning. Clancy at first base has one bad habit for a first baseman. He has not learned to throw underhand and his hitch and jerk cost him too much time. It gives runners a step, and a step is a lot in baseball these days.

Also there appeared on the field a 16-year-old school boy by the name of Davis, a resident of Shreveport, and crazy about baseball. This boy plays first. Only sixteen and without experience, he can give cards and spades to three National league first basemen without cailing the roll further. He is not a Hal Chase, but it is doubtful if Chase at first when sixteen was nimbler or faster. If this boy bats as well four years from now as he should be expected to bat, he will be a topnotcher.

The Sox hope that Cox, righthand pitcher, will pull through for them. If their old-timers come back to form the team will have little to worry about so far as pitchers are concerned. Blakenship says he is better fit to pitch this spring than last year. Faber either should be good or he will be near the parting of the ways, as he has been in service a long time.

What the team needs is catchers. What every team practicing in the west—except the Chicago Cubs—needs is catchers. There are none being tutored in the bushes. Mike Kelly has the best of the lot in Kenna. This means that major league clubs are on the trail of Kelly now for Kenna, because the Sox dickered and didn't like the price. Yet he is some bargain even at a substantial price if he can catch every day for a major league club as he can catch now for Minneapolis.

WILSON'S BACHELOR

TEX RICKARD HAS NO HEAVY BOXER

Fight Promoter To Confer With Tunney Concerning June Match.

NEW YORK, March 16. — Feeling anything but cheerful after thinking about his heavyweight merry-go-round, Tex Rickard was Florida-bound yesterday, leaving an impression that Gene Tunney would be without an opponent on June 14, the date projected for a heavyweight title at the Yankee stadium.

Although Rickard did not make any definite announcement that the June bout was off, he said he would confer with the champion at Miami Beach before trotting any more heavyweights.

At the present time Tom Heeney and Johnny Risko stand out as the principals of his final in the eliminations, but their victories over Jack Delaney and Jack Sharkey respectively lacked the quality he seeks to put on a championship affair. Tunney is reported to be of the opinion that Tom Heeney looks like the best opponent and cites Heeney's triumphs over Risko and Delaney and his draw fights with Sharkey and Paulino as the best record of the elimination group.

It was Tunney's own idea to defend his title twice this year, in June and in September, and he may persuade Rickard that a June bout with Heeney will pay. But if Tex proves set in his intention to pass up the June 14 tilt, Gene may have to bury his dream of two half-million dollar purses in a year and content himself with philosophical research.

The pocket surgical case used by David Livingstone, the great explorer, in his daily work in Africa, was recently presented to the Royal Faculty of Physicians and Surgeons of Glasgow, Scotland.

CURLING SEASON COMES TO CLOSE

Final Games of the Year Held at the Hastings Rink.

PRIZES GIVEN.

HASTINGS, March 16.—The curling season is over for this year, as far as schedules are concerned. The final games of the honorary presidents, presidents, and vice-presidents knock-out was played on Monday night.

The ice was very wet and curling was strenuous. President George Stevenson's rink captured the first prizes, while T. A. Coughlan's rink was runners-up. Stevenson's and Coughlan's rinks played three games of eight ends each to decide the winners, and some good shots were made nothwithstanding the condition of the ice. The curling season has been one of the most successful seasons of the Hastings Curling club.

The prizes for the winning rink were four silk ties, while the prizes for the second rink were four pairs of worsted socks.

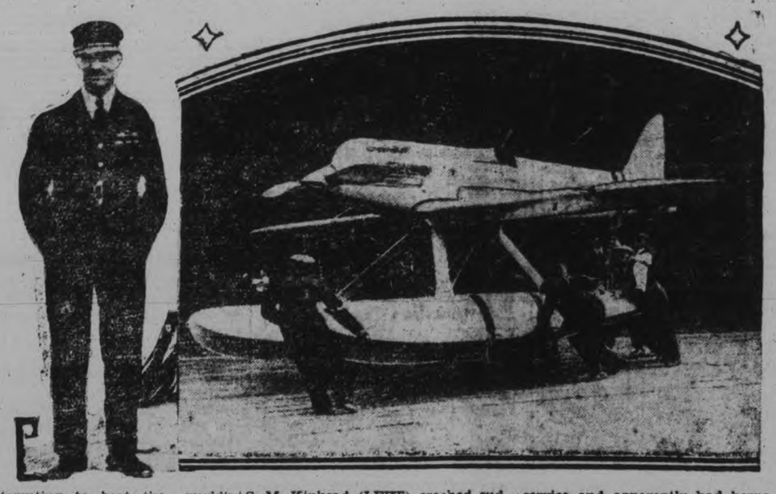
BRITISH FLIER DIES SEEKING RECORD



Attempting to beat the world's seaplane speed record of 297.7 miles an hour established recently by the Italian flier, Major Bernardi, Lieut. S. M. Kinkead (LEFT) crashed suddenly and swiftly to death at Calshot, England. Kinkead was one of the most daring fliers in the British service and apparently had borne a charmed life until he met disaster. At the RIGHT is Kinkead's plane, a super-marine Napier 5.

POLICE PATROL WITHIN SHADOW OF NORTH POLE

Official Reports Unfold Thrilling Tale of Adventure.

JOURNEY FOR MONTHS.

Three Members of Mounted Live Within 700 Miles of Pole.

OTTAWA, Ont., March 16 (By the Canadian Press).—How the Royal Canadian Mounted Police—formerly styled the Royal North-West Mounted Police—continue to uphold the authority of Canada up in the Arctic wastes, thousands of miles from civilization, is told in simple, straightforward language in the annual report of that body which has just been made public. Patrols undertaken within the shadow of the North Pole itself, demanding an absence of months from their base, involving treks over glaciers, through blinding blizzards and under conditions that call for the utmost endurance and hardihood, are recounted as a matter of routine duty.

All the land lying north of the mainland of Canada has long since been claimed as the possession of Canada, and in order to assert her authority Canada sends those stalwart constables to apply the laws of the Dominion, to succor the Eskimos, whom Canada has adopted as her wards, when they are in need of help, to establish post offices and customs posts, and in general to administer in the name of the King that vast sub-continent that lies beyond the northern shores of this country.

At Bache Peninsula, in Ellesmere Land, is the most northerly outpost of civilization in the world. It is 700 miles south of the Pole, and stationed there are three men of the Royal Mounted, with three native Eskimo families, and a further animal equipment of 19 huskie dogs. They are housed in two small but comfortable shacks for the natives, with living quarters, storehouse, blubber shed and other small constructions for the officers. The winter of 1926-1927 was a mild one and such being the nature of communications the most recent news from Bache Peninsula is that of last winter. Only one night did the thermometer go below 41, and climatic conditions generally were good.

Perhaps it was this mild weather which inspired Sergeant Joy to undertake his trip directly across Ellesmere Land with two Eskimos, Ahkeeoo and Nookapeeungwak, covering a distance of 1,320 miles and doing it in 54 days. The story of the trip is told in plain, unvarnished language, with no heroics and no superlatives. The party left Bache Peninsula at noon on March 26, 1927. Constable Garnett and Eskimo Oode accompanied them part of the way. Four dog teams made up the four-footed part of the expedition. After 10 days the constable and his Eskimo returned to the base, and Sergeant Joy and his two natives continued their brought out the great endurance of the white man and his natives, and the casual manner in which circumstances are told form one of the most interesting features of the journal.

"On the 6th (April) Nookapeeungwak and Ahkeeoo walked inland in search of cariboo, while I made a further attempt to dry out clothing. During their 10-hour absence they killed four hares, and saw many cariboo tracks a few days old, but no cariboo."

Many musk oxen were seen; hares were plentiful, as were ptarmigan, while polar bears and wolves also put in occasional appearance. The party replenished their larder from the results of a cariboo hunt, but the after-effects looked bad for a while.

"While returning to camp with the cariboo on the Komatik, two hares jumped up from under the dogs' feet; the dogs followed the hares like animals gone mad and took the komatik over a high-cut bank into a bed of rocks, with bad results on the komatik. It took over a day to put it in running order again."

On April 16, the party ran into a blizzard while making towards a high cape. "We had barely covered half the distance when the storm came on again. We reached the cape, but the storm made it almost as dark as mid-winter, and we were unable to see more than a few feet on land or ice. The storm continued until the morning of the 18th when the snow ceased drifting and the wind moderated to a strong breeze.

Fogs and storms became an almost daily portion of their trip, but even in these exposed wastes there was vegetation.

"Here and there a few tufts of grass, an occasional frozen Arctic poppy and a little heather were all the vegetation that could be seen within several hundred yards of the shore line. At this time we had only two feeds of dog pemican for each team; our dogs were thin and languid, and I decided to start on our return journey immediately."

However, the Eskimos re-stocked the cupboard with a large, bearded seal while a polar bear was also shot and fed to the dogs. On the way back the food supply became more plentiful, but the storms and the fog continued. The sergeant found evidences that led him to believe that in that part of Ellesmere Land cariboo were increasing, but "they appear to be a very stupid animal, even more so than the barren ground cariboo. They are not afraid of men, nor are they much concerned over the noise made by a team or a number of teams of dogs—howling Eskimo dogs. For the latter reason it would be interesting to observe how they would act when being approached or stalked by wolves. The wolves must play havoc with such easy prey. And no doubt many die annually from starvation and sickness, for they are wretchedly poor in the spring and not all can be lucky enough to survive the winter, a living skeleton."

The Eskimos worked very hard throughout the trip, and Sergeant Joy expresses appreciation of their good work. The patrol reached Bache Peninsula Post on May 18, 1927, after having travelled 1,320 miles.

QUEBEC FOLKSONGS THOSE OF FRANCE

Canadien Children Sing and Dance To Same Old Rhymes.

TORONTO, Ont., March 16 (By the Canadian Press).—"The traveller from several provinces of Old France who happens to find his way to the old parishes of the province of Quebec may hear with surprise the rhymes of his native village," said Victor Morin, LL.D., of Montreal, in a recent address in this city. "The children of this country dance to the rhythm of the same songs as their little cousins of France, and mothers rock their babies to sleep with the same lullabies as their great-great-grandmothers used to sing 200 years ago."

Mr. Morin's subject was "Folk Songs," which he said did not ordinarily require instrumental accompaniment. The cadence of the paddle plunging endlessly to push the canoe onward was their most becoming accompaniment. Their rhythm lent itself as well to the gymnastic step of the soldier as to the monotonous toil of bodily work, and their choruses repeated endlessly by the toilers helped them to forget their physical fatigue. "This is why the craft songs, the paddle songs and the marching songs start at the departure, and only stop at the arrival," Dr. Morin said. "This explains the endless number of verses as well as the oddities of the adaptations and the great variety of their scope."

Long-distance telephone connection between Mexico City and all principal cities of the United States, Canada and Cuba has been established.

Comedy— "SHOULD A MASON TELL?"

THEATRES

AT THE CAPITOL.

REGINALD DENNY IN "ON YOUR TOES"

This is one of the lively, entertaining pictures in which Reginald Denny stars to such advantage. In it, he takes the part of Elliott Beresford, with Barbara Worth as his sweetheart, Mary Sullivan. Hayden Stevenson, so well known in "The Collegian" series, is her father, Jack Sullivan, while Mary Carr, another noted actress of the screen, is the interesting Grandma Beresford and Punch Mellou is Frank Hageuy, the coming prize fight champion who plays as a foil to Denny's part in the prize ring.

Beresford is pictured first as a little boy, brought up by his grandmother to believe in everything artistic and aesthetic, and chiefly never to know that his father had been the greatest fighter of his day, "Young Evans." He is trained to be a dancer, but fails when he goes to New York and tries to capture the town with his footwork. Jack Sullivan, father of the pretty Mary, is a former trainer of Beresford's prize-fighting dad and is longing for the day when he can resume his role as trainer of the son.

Beresford is taunted by Mary with being no good, leaves the dancing arena and becomes a taxi driver. Then he gets into a fight with a passenger and knocks him out. Unknown to him, he has defeated the coming champion. Then Sullivan steps in and offers to train him.

One of the liveliest scenes in the picture is the episode showing a surprise visit by Grandma to the training camp and the dexterity with which Beresford transforms his quarters into a dancing floor and makes his bewildered assistants go through a series of steps for the old lady's gratification.

Beresford is so good natured that he is unable to knock out his opponents so it is decided to make him so mad in the forthcoming big fight that he will go in and win. This is done and the resultant mix-up is a real scrap.

It is an entertaining picture with an excellent cast and a lively theme.

AT THE REGENT.

"The Brute" now at the Regent Theatre ranks among the few really authentic pictures of the Old West. Primarily it is the story of the love of a cowboy for a girl of the dance halls. But with the intriguing lives of these two young people, other lives—good, bad, weak, strong but always picturesque—are entangled.

Monte Blue has never equalled the "Easy-Going Randall" of "The Brute." The millions remember him in many other rough and ready heman parts—"Across the Pacific," "Hogan's Alleys," "Wolf's Clothing," "Bitter Apples," "Red Hot Tires," are examples. But his 'Easy Going" is a master piece. The slow-to-anger dead-shot, fighting lasso-swinging lover seems to have enamored him.

His feminine lead is the lovely Leila Hyams, practically a new comer to the screen, though not to the stage, for one can go far in two and twenty years. As Janice, the dance hall girl, she is especially captivating.

And Clyde Cook! For all laughing out-loud comedy see him as Oklahoma Red! Then there is the veteran Paul Nicholson as the Bad Man of the Razzle Dazzle Saloon. And Indians, and prospectors and the riff raff of the oil rush thousands, and through it all the bright thread of a great love—the idyl of the Brute and the dance hall girl.

"The Brute" rings true. It is a picture that will live, for it has caught the spirit of its day and the common humanity of its people.

WHERE DAM GAVE WAY

The map above shows the area swept by the millions of gallons of water released when the great St. Francis dam burst bringing death to hundreds in the Santa Clara valley, California. Newhall, the town just below the St. Francis dam, s shown, as well as Sangus and other towns in the stricken zone.

FLOWERS SURROUND SPEAKER

Baskets of flowers surrounded Dr. A. E. G. Hall, psychologist, when following his arrest, threat of deportation and release on bail, he resumed his lectures in Massey Hall, Toronto. Throughout his discourse, he stood framed in tall standing candelabra and baskets of flowers while subdued mystic music came from an organ off-stage. According to Dr. Hall the flowers were principally sent to him by his classes in cities where he has recently lectured, only three of the baskets coming from Toronto. He is believed to have been in Vancouver and Chicago at various times.

EXPLOSIVES are the advance agents of civilization, expansion and prosperity. Think of the overwhelming power explosives give to man, the terrific force that can be directed to turn the course of rivers, and remove mountains. There is a vital significance in the association of C.X.L. Explosives with great construction and industrial enterprises of the nation.

Without explosives Canada would have no railroads. Her fields would be barren prairies. Her buried treasures, the mines of today, would remain earth's secret. Explosives have served to place Canada's unlimited resources within reach of world markets.

The trained minds of chemical engineers on both sides of the Atlantic for many years have been focussed on the development of explosives and products that have a common chemical origin.

Canadian Industries Limited, therefore, has been formed to centralize this great fund of knowledge, this vast experience and this expert buying power so that each one of its associated companies may benefit therefrom.

Canadian Explosives Limited, by its affiliation with Canadian Industries Limited, is in a position to give to the trade and to the ultimate consumer the result of the benefits that come from the purchase of selected raw materials in vast quantities, the latest and most scientific method of combining these materials, and economic and effective methods of distribution and selling.

This is Number Four of a Series of advertisements published that the public may have a clearer understanding of Canadian Industries Limited and its Subsidiary Companies.

THE "CANARY" MURDER CASE

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

© Charles Scribner's Sons

(Continued from yesterday.)

CHAPTER LIII.

"Society unfortunately isn't ready for your nihilistic philosophy just yet," said Markham. "And during the intervening transition human life must be protected."

He rose resolutely, and going to the telephone, called up Heath.

"Sergeant," he ordered, "get a John-Doe warrant and meet me immediately at the Stuyvesant Club. Bring a man with you—there's an arrest to be made."

"At last the law has evidence after its own heart," chirped Vance, as he lazily donned his top-coat and picked up his hat and stick. "What a grotesque affair your legal procedure is, Markham! Scientific knowledge—the facts of psychology—mean nothing to you learned Solons. But a phonograph record—ah! There, now, is something convincing, irrefragable, final, what?"

On our way out Markham beckoned to the officer on guard.

"Under no conditions," he said, "is any one to enter this apartment until I return—not even with a signed permit."

When we had entered the taxi-cab, he directed the chauffeur to the club.

"So the newspapers want action, do they? Well, they're going to get it . . . You've helped me out of a nasty hole, old man."

As he spoke, his eyes turned to Vance. And that look conveyed a profounder gratitude than any words could have expressed.

(Tuesday, September 1; 3:30 p.m.)

It was exactly half past three when we entered the rotunda of the Stuyvesant Club. Markham at once sent for the manager, and held a few words of private conversation with him. The manager then hastened away, and was gone about five minutes.

"Mr. Spotswoode is in his rooms," he informed Markham, on returning. "I sent the electrician up to test the light bulbs. He reports that the gentleman is alone, writing at his desk."

"What room number?"

"Forty-one." The manager looked perturbed. "There won't be any fuss, will there, Mr. Markham?"

"I don't look for any." Markham's tone was chilly. "However, the present matter is considerably more important than your club."

"What an exaggerated point of view!" sighed Vance when the manager had left us. "The arrest of Spotswoode, I'd say, was the acme of futility. The man isn't a criminal, don't y' know. He's what one might term a philosophic behaviourist."

Markham grunted but did not answer. He began pacing up and down agitatedly, keeping his eyes expectantly on the main entrance. Vance sought a comfortable chair and settled himself in it with placid unconcern.

Ten minutes later Heath and Snitkin arrived. Markham at once led them into an alcove and briefly explained his reason for summoning them.

"Spotswoode's up stairs now," he said. "I want the arrest made as quietly as possible."

"Spotswoode!" Heath repeated the name in astonishment. "I don't see—"

"You don't have to see—yet," Markham cut in sharply. "I'm taking all responsibility for the arrest. And you're getting the credit—if you want it. That suit you?"

Heath shrugged his shoulders.

"It's all right with me. . . anything you say, sir." He shook his head uncomprehendingly. "But what about Jessup?"

"We'll keep him locked up. Material witness."

We ascended in the elevator and emerged at the third floor. Spotswoode's rooms were at the end of the hall, facing the Square. Markham, his face set grimly, led the way.

In answer to his knock Spotswoode opened the door and, greeting us pleasantly, stepped aside for us to enter.

"Any news yet?" he asked, moving a chair forward.

At this moment he got a clear view of Markham's face in the light, and at once he sensed the minatory nature of our visit. Though his expression did not alter, I saw his body suddenly go taut. His cold, indecipherable eyes moved slowly from Markham's face to Heath and Snitkin. Then his gaze fell on Vance and me, who were standing a little behind the others, and he nodded stiffly.

No one spoke; yet I felt that an entire tragedy was somehow being enacted, and that each actor heard and understood every word.

Markham remained standing, as if reluctant to proceed. Of all the duties of his office, I knew that the arrest of malefactors was the most distasteful to him. He was a worldly man, with the worldly man's tolerance for the misfortunes of evil. Heath and Snitkin had stepped forward and now waited with passive alertness for the district attorney's order to serve the warrant.

Spotswoode's eyes were again on Markham.

"What can I do for you, sir?" His voice was calm and without the faintest quaver.

"You can accompany these officers, Mr. Spotswoode," Markham told him quietly, with a slight inclination of his head toward the two imperturbable figures at his side. "I arrest you for the murder of Margaret Odell."

"Ah!" Spotswoode's eyebrows lifted mildly. "Then you have—discovered something?"

"The Beethoven Andante."

Not a muscle of Spotswoode's face moved; but after a short pause he made a barely perceptible gesture of resignation.

"I can't say that it was wholly unexpected," he said evenly, with the tragic suggestion of a smile; "especially as you thwarted every effort of mine to secure the record. But then . . the fortunes of the game are always uncertain."

His smile faded, and his manner became grave. "You have acted generously toward me, Mr. Markham, in shielding me from the canaille; and because I appreciate that courtesy I should like you to know that the game I played was one in which I had no alternative."

"Your motive, however powerful," said Markham, "cannot extenuate your crime."

"Do you think I seek extenuation?" Spotswoode dismissed the imputation with a contemptuous gesture. "I'm not a schoolboy. I calculated the consequences of my course of action, and after weighing the various factors involved, decided to risk it.

"It was a gamble, to be sure; but it's not my habit to complain about the misfortunes of a deliberately planned risk. Furthermore, the choice was practically forced upon me. Had I not gambled in this instance, I stood to lose heavily nevertheless."

His face grew bitter.

"This woman, Mr. Markham, had demanded the impossible of me. Not content with bleeding me financially, she demanded legal protection, position, social prestige—such things as only my name could give her.

"She informed me I must divorce my wife and marry her. I wonder if you apprehend the enormity of that demand? . . You see, Mr. Markham, I love my wife, and I have children whom I love. I will not insult your intelligence by explaining how, despite my conduct, such a thing is entirely possible. . And yet, this woman commanded me to wreck my life and crush utterly those I held dear, solely to gratify her petty, ridiculous ambition!

"When I refused, she threatened to expose our relations to my swife, to send her copies of the letters I had written, to sue me publicly—in fine, to create such a scandal that, in any event, my life would be ruined, my family disgraced, my home destroyed."

He paused and drew a deep inspiration.

"I have never been partial to halfway measures," he continued impassively. "I have no talent for compromise. Perhaps I am a victim of my heritage. But my instinct is to play out a hand to the last chip—to force whatever danger threatens.

"And for just five minutes, a week ago, I understood how the fanatics of old could, with a calm mind and a sense of righteousness, torture their enemies who threatened them with spiritual destruction. . . I chose the only course which might save those I love from disgrace and suffering. It meant taking a desperate risk. But the blood within me was such that I did not hesitate, and I was fired by the agony of a tremendous hate. I staked my life against a living death, on the remote chance of attaining peace. And I lost."

Again he smiled faintly.

"Yes—the fortunes of the game. . But don't think for a minute that I am complaining or seeking sympathy. I have lied to others perhaps, but not to myself. I detest a whiner—a self-excuser. I want you to understand that."

He reached to the table at his side and took up a small limp-leather volume.

"Only last night I was reading Wilde's 'De Profundis.' Had I been gifted with words, I might have made a similar confession. Let me show you what I mean so that, at least, you won't attribute to me the final infamy of cravenness."

(To be continued.)

YARDLEY'S
Old English
LAVENDER SOAP

THEN the swinging coach rattling over cobblestones. Now the purring motor gliding over smooth highways. Through generations of changing modes Yardley's Old English Lavender Soap has remained the standard of purity.

Now, as it did then, Yardley's yields a bountiful lather of soothing quality which refines complexions—touches them with its sweetly lingering lavender breath.

FAMOUS LOVE ROMANCES — George Washington (V) — By Nicholas Afonsky

A few months later Washington, finished with his military mission, went to Martha Custis's home—which was called the White House—near Williamsburg, Virginia. There, on a lovely day in May, Martha promised to marry him. Washington was contented. He wrote to Sally Fairfax, telling her of his engagement.

The wedding, the next January, 1759, was a gay affair. Washington was dressed in a red velvet coat—the bride in rich white silk and satin, with pearls. There was a merry marriage feast, and the pair were toasted in wine and champagne. The bride and groom danced a minuet. All was happiness and jollity.

Washington settled down to the life of a country gentleman. Superintending his estate at Mount Vernon and his wife's White House kept him busy. He hunted, visited, went boating and shooting, rode horseback beside his wife's four-horsed chariot, and played with her two young children, to whom he was devoted.

But war with England was brewing, and Washington was drawn back into public life. The Fairfaxes were royalists, and in 1773 Sally and her husband went to England. In the autumn of 1775 Washington was made commander-in-chief of the American armies, and for the next seven years saw Mount Vernon but once.

NAVAL OFFICERS SUSPENDED FROM DUTY IN MALTA SCANDAL

Involved in Serious Controversy Over Incident Aboard H.M.S. Royal Oak.

COURT MARTIAL EXPECTED.

Disputed Over Question Whether Battleship's Jazz Band Should Play at Dance.

LONDON, Mar. 17. — (Canadian Press.)— Involved in a serious controversy, which at first gave rise to hints of "mutiny," three British naval officers have been suspended for an incident aboard H.M.S. Royal Oak at Malta. A court martial is expected to be the next step to place responsibility.

Rear Admiral Bernard St. G. Collard, in command of the first battle squadron at Malta, Captain Kenneth G. B. Dewar, in command of the Royal Oak, flagship of the first battle squadron, and Commander H. M. Daniel, of the same vessel, have been "suspended from duty by the commander-in-chief, whose report has not been received by the Admiralty," says an official communication.

According to a report in naval circles, Captain Dewar and Commander Daniel disagreed with the admiral on the question of whether the Royal Oak's jazz band should perform at a dance which the squadron commander proposed to give aboard his flagship.

The affair was first brought up in the House of Commons late Thursday night when Commander Carlyon Bellaire questioned the government on a report that several officers of the Mediterranean fleet, including the admiral, had been in a serious disagreement and that a court martial had been held. Not much information was forthcoming at the time, but later an official communication was issued, which said:

Report Not Yet Received.

"A court of inquiry has been held at Malta by order of the commander-in-chief of the Mediterranean station to investigate certain disciplinary matters in which Rear Admiral Bernard St. G. Collard, Captain Kenneth S. G .Dewar and Commander H. M. Daniel were involved.

As a result of this inquiry, the three officers concerned were suspended from duty by the commander-in-chief, whose report has not been received by the Adbiralty.

"Since the first lord (W. C. Bridgeman) made his statement in the House of Commons to-day, he has ascertained that Rear Admiral Collard's flag has not been transferred to another ship, as he had inferred from an earlier telegram, but has been 'struck 'and that he is still at Malta.

"It is hoped that the press will not prejudge the matter and will await the Admiralty's statement of the case."

Disputed Over Band.

As the story goes in navy circles, when the Royal Oak, which is Rear Admiral Collard's flagship of the first battle squadron ,arrived at Malta, the admiral arranged to give a party aboard, to which all the elite of Malta were invited. The battleship's jazz band would furnish the music, said the admiral.

It would not, said Captain Dewar, Commander Daniel backed up his captain. In diplomatic words, Captain Dewar informed the admiral that he had no objections to a dance aboard the battleship, but if the admiral wanted jazz, and lots of it, he had better get a band from ashore to blow saxophones far into the night.

The captain contended that his boys had too much work to do in the day, and he did not propose to permit them to stay up most of the night for the amusement of the ship's guests —even at a dance given by the admiral.

Captain Dewar and Commander Daniel arrived in London Thursday night after having been suspended from duty by the Malta court of inquiry. Charges and counter-charges have been made on both sides. Admiral Collard is leaving Malta for London on Sunday.

O'CONNELL LAYS BLAME ON DRINK

Expects To Be Hanged For Killing Wife, He Says in Cells.

REMANDED FOR WEEK.

TORONTO, March 17 (Canadian Press).—"I guess they will hang me. I had been drinking." This was the frequent comment made to police officers by Harry O'Connell, 33, formerly from the Ottawa Valley, before his appearance in Police Court to-day for preliminary hearing on a charge of murder in connection with the slaying of his wife, Edith, at their apartment here last night. O'Connell was also charged with the attempted murder of Edward McCarthy. He did not plead on either count, and within a few minutes was back in the cells, remanded for a week at the request of the Crown.

The four children of the O'Connells are all under six years of age.

Mind May Outlive Body, Says Scientist

NEW HAVEN, March 17.—Science has failed to prove that the mind cannot survive physical death. Dr. William Brown, head of the psychology department of the University of London, said so in the first of the Terry lectures at Yale University last night. This series was established for a discussion of "Religion in the Light of Science and Philosophy."

Dr. Brown is also Wilde reader in mental philosophy at Oxford university and a fellow of the Royal Society of Medicine, as well as author of several books on psychology. He said the mind is able to react upon the body with an increased degree of freedom, and eventually may survive physical death.

O'NEILL FACES MURDER TRIAL

Arraigned To-day As Result of Jury's Verdict—Remanded Until March 21.

STILL VERY WEAK.

BARRIE, Ont., March 17 (Canadian Press). — Charged with murder as a result of the coroner's jury recommending this course, George O'Neill, a farm hand, appeared in Court here to-day for preliminary hearing. He was remanded until March 21, largely because of his weakened condition. He is still suffering from the effects of loss of blood caused by self-inflicted knife wounds some weeks ago, shortly after he had been taken into custody as a material witness in connection with the deaths of Asa Robertson, an aged farmer, and Mrs. Ruth Martin in a barn fire.

The jury verdict was returned last night with a recommendation that o'Neill should stand trial on a murder charge, and he was immediately arraigned on this charge.

GIVES EVIDENCE BEFORE COMMITTEE

Club Waiter Tells Sinclair and O'Neill Discussed Bonds at Dinner.

CHICAGO, Ills., March 17 (Canadian Press).—Although it failed to find further trace of the Sinclair Liberty bonds used to help extinguish the Republican party deficit in 1923, the Senate Teapot Dome sub-committee yesterday heard two rather interesting stories from three of the thirty-six witnesses it questioned at morning and afternoon sessions.

One was that Harry F. Sinclair, James E. O'Neil and two unidentified men discussed the Teapot Dome lease, Liberty bonds, Albert E. Fall, and the Continental Trading Company at dinner at a club in New York City early in 1923. The other was that the late Fred W. Upham, then Republican national treasurer, and Wilbur W. Marsh, the Democratic national treasurer, entered into an agreement in 1923 not to make a report to Congress on receipts and contributions for that year.

The story about Sinclair, lessee of Teapot Dome; O'Neill, a missing witness in the Sinclair-Fall oil conspiracy trial, and two unidentified men, was given to the committee by Edward Buckley now of Chicago, but who said he was a waiter in the Bankers' Club in New York in 1922, when Sinclair obtained the lease.

Telling the committee that he waited on the four men on the day in question, which was either in the spring or early summer of 1922, Buckley said he heard Sinclair tell the others that the secretary of the navy was objecting to the lease of the Teapot Dome and another conference would have to be arranged with Fall. The witness also said there was talk of $85,000 or $125,00 in Liberty bonds, but it was not clear from the parts of the conversation he overheard as to what was to be done with these bonds. He also testified that there was some talk of the Continental Trading Company, the Liberty bond profits of which the Senate investigators are seeking to run down.

O'Neil was quoted as having said that $100,000,000 would be made, but it was not clear as to what it was to be made out of. Sinclair, Buckley said, told the others that from that time on, each man would have to look out for himself, but that if he got in trouble the Consolidated Oil would "take care of it," while O'Neil said "The Standard Oil Company would take care of it."

Testimony as to the agreement between Upham and Marsh to conceal 1923 political contributions was given by Irl G. Hipeley, and A. V. Leonard, associates of Upham, while he was the Republican national treasurer. He said Marsh frequently visited Upham and that the latter had told them that Marsh had made the proposal about omitting to make a report because the Democrats expected to have some heavy contributions to wipe out their deficit which they did not want to make public.

Given Double Term On Assault Charge

SYDNEY, N.S., March 17 (Canadian Press). — William Richards of Glave Bay, who pleaded guilty to attempting to break jail and to assaulting Rod Mackay, assistant county jailer, was given two years on each charge by Magistrate M. A. G. Hill in City Court yesterday afternoon. Richards was serving six months in jail when he joined Frank Greene and Philip Morgan in their dash for liberty last Saturday. Greene pleaded not guilty and will be tried later. Morgan has not yet been charged. Richards' sentences will run concurrently.

ARMY PLANE CARRIES FOOD TO VILLAGERS

Rescuers Break Snow Blockade Which Isolated Michigan Village.

CUT OFF 16 DAYS.

Dog Team Battles Storm For Several Hours Before Reaching Goal.

SAULT STE. MARIE, Mich., Mar. 17 (Associated Press).—An army aeroplane and a dog team yesterday broke the snow blockade which had isolated the village of Detour, Mich., for 16 days, and the dog team got there first. Their threat of famine averted, the villagers abandoned their canned food diet last night, to eat their first square meal in more than a week and scanned the first mail they had received in nearly three weeks.

It was a joyous holiday, with the schoolhouse closed and work abandoned as virtually the entire population of 600 inhabitants gathered around an improvised landing field on the ice of St. Mary's River to greet the arrival of the army transport plane several hours after a dog team, carrying a lighter load of provisions, had been welcomed.

It had taken the team of seven dogs since Wednesday afternoon, when it left here, to make the sixty-mile trip in the teeth of a blizzard, while the big aeroplane carrying 300 pounds of mail and 300 pounds of food, principally bread, landed gracefully on the ice field just 37 minutes after it took off from here at 11.40 a.m.

Immediately upon discharging its cargo, the plane returned here carrying Russell Goots, critically ill from blood-poisoning. He was removed to a local hospital.

Dr. T. R. Laughbaum, village physician, who accompanied the patient, said the trip probably would save Goetz's life.

The aeroplane, which came here from Chanute Field, Ills., by way of Selfridge Field, Mich., was piloted by Lieut. J. C. Soper, who was accompanied on the first trip by Walter Dourocher, a Detour resident, who acted as guide.

Battle Snowstorms.

The dog sled was in charge of Dr. John F. Deadman, one-legged physician, and musher, who was accompanied by Fred W. Leuning, a newspaperman. They and the dogs were near exhaustion when they reached the isolated town after having fought a raging blizzard most of the way. Several times, according to their story, they were forced to put on snowshoes and dig the dogs out of the deep drifts, and at times helped pull the sled. At times, they said, the blizzard was so severe that they could see only a few feet ahead.

They carried only a few provisions and some cigarettes.

BOY RECOVERS.

Leaves For Home After Lying in Hospital 16 Months.

TORONTO, March 17.—(Canadian Press).—After lying in St. Michael's Hospital, suffering from a fractured spine for over 16 months, Eugene Nolet will leave for his home in Quebec to rejoin his aged parents. Nolet will be accompanied on his long journey by Miss Edna Turner, a nurse. Nolet attributes his remarkable recovery to his nurse, Miss Helen Shannon. Little hope was held out for his recovery at the time he entered the hospital. He was strapped and placed in a plaster cast. There he lay for months, assiduously attended by Miss Shannon.

Spring Is Coming; Caterpillars Out

Spring must be coming, for the caterpillars have appeared. Yesterday afternoon on the sidewalk in front of the Queen Mary School, Frances Tully, daughter of Mr. and Mrs. Victor Tully, found a caterpillar curled up in the sun.

TRIAL RATE ON ALBERTA COAL TO ONTARIO FIXED AT $6.75 A TON

Effective Three Months of the Year For the Next Three Years.

WILL KEEP CHECK.

To See How It Compares With Other Prices Previously Obtained.

OTTAWA, Ont., March 17 (Canadian Press).—Alberta coal is to be moved to Ontario in a further test movement at a trial rate of $6.75 per ton. This temporary rate, authorized by an Order-in-Council passed yesterday, is to be effective for not less than three months in each of the next three years.

An investigation is to be made by the Board of Railway Commissioners of the working of the rate to ascertain the actual cost of moving Alberta coal to the railway. A vote will be placed in the estimates of the Department of Mines to cover disbursements which might accrue to the railways in the interim.

Making this official announcement last night, Hon. Charles Stewart, Minister of Mines, stated that the Order-in-Council contained the following additional conditions:

Supervised By Board.

1.—That the cost of the movement under consideration be supervised by the Board of Railway Commissfoners of Canada.

2.—That the cost of the movement be carefully checked by representatives selected by both the coal interests and the railways.

3.—That a detailed report of the representatives checking the cost of this movement shall be furnished the Board of Railway Commissioners for their consideration, and that the full Board of Railway Commissioners after hearing the parties interested, will determine from the evidence submitted to them what is a reasonable rate per ton, having in mind all the factors which, in the national interests, may properly be taken into consideration.

4.—That at the end of each seasonal movement, the Board of Railway Commissioners be authorized to name what amount, if any, over and above the rate of $6.75 per ton the Board estimates to be due the railways in the light of the information secured during the season, and to certify to the Minister of Mines the total sums of money due to each railway company in connection therewith.

The purpose of extending the test for a period of three years, the Order-in-Council relates, is "in order that the Board of Railway Commissioners may have conclusive evidence of costs before them to enable them to give judgment."

The three-month period during which the coal movement is to take place is not specified in the Order-in-Council. The railways and the coal operators will determine during what months the movement will take place. It is stated that the intention is to move coal under the reduced rate when cars are available.

POLICE SEEK W. R. CLARK

Man Who Agreed To Buy Farm For Summer Resort Being Sought.

CHEQUES REFUSED.

W. R. Clark, of New York, who arrived in this city eight days ago and in less than three days negotiated the purchase of a farm near Jackson Park and announced to the police through the columns of The Examiner that he intended to build a large summer boarding home and make an investment of $12,000, is wanted by the police. Provincial Constable Maker has circularized for him throughout the country. Some time during the week end a shot gun, violin and other small articles valued at about $100 were taken from the Franks farm, which Clark had purchased. The cheques issued by him were not honored by the banks and he took French leave from the Y.M.C.A. where he had been staying.

Atlantic City Pageant Is Thing of the Past

ATLANTIC CITY, March 17 (Canadian Press).—All the Miss Americas might as well turn in their crowns—and bathing suits —for they won't need them any more.

The national beauty pageant is a thing of the past, because the Atlantic City Hotel Men's Association has decided too many young ladies are seeking "personal advertising and profit" from it.

The Atlantic City chamber of commerce doesn't agree, but admits nothing can be done now that the hotel men have withdrawn their support from the pageant that drew hundreds of misses from all over the country.

"We do not feel that the pageant truly represents American girlhood, and that it is largely an aggregation of girls seeking personal advertising and profit. We have, therefore, decided to withdraw our support," said the hotel men.

The pageant is reported to be $45,000 in debt.

HOPE FADES FOR BRITISH FLIER

Rescue Parties Fail To Locate Unidentified Plane Heard Near Greenville, Maine.

LUMBERJACKS LEND AID.

GREENVILLE, Maine, March 17 (A.P.).—Hope that an unidentified plane heard and seen near here Thursday morning was the Hinchliffe monoplane Endeavor slowly faded last night as reports of failure to find the craft trickled back here through a 50-mile network of camp telephone lines around the Moosehead Lake region.

Near the limit of its fuel supply, if it were the missing plane, it was feared the craft may have come down in the forest wilderness that stretches for nearly 100 miles northwest toward the city of Quebec. Persons could be lost for weeks in the territory, especially in Winter.

William H. Cole, postmaster at Kokadjo, 20 miles northeast of Greenville, reported seeing the plane at 6 o'clock Thursday morning. It was flying low, he said, and apparently going well.

John Dyer and his wife, in the same vicinity, heard the plane's motor distinctly.

On either side of the big lake to Sebcomook at Northwest Carry, 40 miles away, and to scores of lumber camps of the Great Northern Paper Company, word was telephoned by Deputy Sheriff Adelbert G. Rodgers that sent woodsfolk in search of a possibly crashed plane and its occupants. The frozen lake would have provided a natural landing place for the Endeavor.

Two men were sent into the region in an auotombile. They had not returned early last night, and on their report it was believed would rest the decision of further search into the territory by woodsmen.

NOSE IN 20 MINUTES.

"Choose Type You Want," Says Plastic Surgeon.

TORONTO, Ont., March 17.—(Canadian Press).—"You can select the type of nose you want and have it ready in 20 minutes", declared Dr. Henry J. Schireson of Chicago in his talk at the Hairdressers' Exhibition.

Dr. Schireson told of the progress plastic and facial surgery has made in the past six years. He commented on the fact that such operations were performed in less than 25 minutes and without pain or discomfort.

Three-Cornered Conflict Over Security Pacts Features Geneva Council Session

GENEVA, March 17 (A.P.).—A three-cornered conflict over security pacts occupied the session of the preparatory commission on disarmament yesterday.

Maxim Litvinoff, head of the Russian delegation, took the offensive against pacts of security, declaring that immediate disarmament was the only way of furthering peace.

Count von Bernstorff, head of the German delegation, said that security pacts were all right in their way, but disarmament must go hand in hand with them.

M. Claudel, representing France in the absence of M. Boncour, backed the old French theory of security first, disarmament afterwards.

Counter-attacks by the Locarno countries seemed to have mastered the Soviet offensive, but when the report recommending "non-aggerssion and mutual assistance pact" was put to the vote, objection was raised, and the vote went over until next week.

The commission decided to wait until the Turkish delegates arrived, on Monday ,and go on with the next item on the agenda, which is the Soviet proposals to destroy immediately all armaments.

St. Patrick's Day Dry In Free State

BELFAST, March 17 (Canadian Press). — St. Patrick's Day was dry in the Irish Free State. In a country with an annual drink bill running into seventeen or eighteen million pounds, the national festival cannot be celebrated with the time-honored "drowning of the shamrock." It is decreed that the public-houses shall remain closed.

CURRIE ACTION LIKELY TO BE VERY LENGTHY

About Fifty Witnesses For Defence To Be Called in Libel Suit.

SOME FOR GENERAL.

Examination For Discovery is Resumed at Port Hope This Morning.

COBOURG, Ont., March 17 (Canadian Press).—About fifty witnesses will be called by the defence in the libel action taken by General Sir Arthur Currie, former Commander of the Canadian Corps, against W. T. R. Preston and F. W. Wilson, publisher of the Port Hope Guide. This was stated to-day by counsel for the defendants. The number of witnesses General Currie will call has not yet been stated, but it is probable that the trial, which is scheduled to commence April 16, may extend over a lengthy period. A motion of security for costs will be presented by Judge O'Connor this afternoon by counsel for Messrs. Preston and Wilson. Examination of General Currie "for discovery" was resumed to-day and counsel for both parties expressed the belief that this phase of the action would be concluded to-day. It was given out that the examination was proceeding progressive from day to day with respect to the operations of the Canadian Corps during the week prior to the armistice on November 11, 1918.

General Currie is seeking fifty thousand dollars damages against the defendants on account of an article published in the Port Hope Guide which, according to the statement of claim, alleged that there had been deliberate and useless waste of life and that the losses in the Canadian corps incurred in the capture of Mons were "appalling." Sir Arthur has publicly denied this, and has said the Canadian troops captured Mons prior to the corps headquarters receiving armistice orders. He said he did not receive the armistice order until 6.45 on the morning of November 11, by which hour the Belgian city had already been taken.

Good Program Arranged.

Fifth of Humane Society's Series of Concerts is To-morrow Night.

The fifth of a series of sacred concerts will be given in the Regent Theatre, Sunday evening at 8.30, under the auspices of the Peterboro Humane Society. The program includes:

Solo, Miss Ethel Maybee, "Come unto Me."

Cornet solo, J. Minicola.

Reading, Mrs. F. McNeely, "The First Settler's Story."

Solo, Miss Geraldine Collins, Gounod's "Ave Marie" with violin obligato by Arnold Spencer.

Solo Mrs. Ross Williamson, "The Lord is My Light." by Allitson.

Violin solo, Roy Rome, "Ave Marie" by Schubert.

Solo, Miss Alma Blanchard, "Alleluiah," 16th century melody, by O'Connor Morrif.

Male Voice Quartet. Pianist Miss Gwen Donley.

WANT MORE MEMBERS.

Officer of Fish and Game Association Starting Membership Drive.

An effort to enlist a large number of those interested in fish and game preservation is being made by the Peterborough Fish and Game Protective Association, which, in order to increase the scope of its efforts, is also becoming affiliated with the Ontario Federation of Fish and Game Clubs. Membership cards for the local association can be obtained from Fred Roy, Chris Graham, the Chamber of Commerce, and officers of the association.

WATER-POWER AND PAPER INDUSTRY

Canada's supremacy in the pulp and paper field rests on adequate and abundant water-powers well distributed among extensive forest resources.

SIDNEY WHATLEY GIVES UP SECRETAR YSHIP OF LEGION

Service of Nine Years in Important Post Ends April 30.

WORK COMMENDED.

Splendid Success in Obtaining Pension Adjustments is Specially Praised.

At a fully-attended meeting of the executive of the Canadian Legion last night, the resignation of the secretary, Sidney Whatley, was regretfully received. In accepting it, the members expressed appreciation of the splendid service given the Great War Veterans' Association and the Canadian Legion by Mr. Whatley during the past nine years. His resignation will take effect on April 30.

Commander James Abraham spoke of the wonderful assitance given by Mr. Whatley in settlement of pension cases, and of his tenacity in following up adjustment claims until the veteran concerned had been awarded the highest amount to which his disability entitled him. There is no one in the city who knows so much about the pension regulations, and it was seldom that legal assistance had to be asked. Mr. Whatley has studied the pension act and every amendment thoroughly, and knows every method of approaching the department with a view to obtaining justice for every veteran suffering from war disability. In this one line of endeavor, Mr. Whatley has more than justified the confidence replaced in him by executive after executive of the veterans' organization.

In his special report on the bookkeeping method of the Branch, in which he recommended the adoption of the synpotic system, W. Swanger took occasion to comment upon the splendid manner in which the books have been kept by the secretary. While his report had nothing to do with the retirement of the secretary, Mr. Swanger expressed his great appreciation of the co-operations he had received in his monthly audit, remarked that the accounts always balanced, and expressed the opinion that few men could be found who would so carefully and painstakingly attend to routine bookkeeping with so much other work continually pressing. Mr. Whatley's good work was done, too, in spite of an archaically complicated system, which it is the object of the executive to simplify.

The first vice-president, and all other members of the executive, took the opportunity to express their appreciation of the work done by the secretary, and to wish him success in his future activities.

No definite plans were made for filling Mr. Whatley's position, action being held over pending the receipt of a report from a special committee appointed to investigate suggested changes in the management of the Legion Hall and business.

There will be a general meeting of members of the Legion on Monday night.

Afghan Monarch To Visit Moscow

LONDON, March 17 (Canadian Press).—Surprise was expressed at the Afghan legation yesterday morning at the published report that Amunullah Khan, king of Afghanistan, might abandon his proposed visit to Russia. It was officially stated that the king intends to complete his tour as originally planned and that there was no foundation for the statement that he had cancelled the Russian visit.

The report was published by the Daily Express, which said that some kind of a plot had been discovered in Afghanistan which might lead the king to change his plans. The king was also stated to be influenced by the fatigue of Queen Souriya from the continuous journey over Europe.

SMALL MARKET THIS MORNING

Produce Plentiful But Buyers Few—Eggs 35 to 40.

POTATOES SELL AT $150.

There was a small market this morning. Produce was fairly plentiful, but there were not many buyers. Eggs ranged in price from 35 to 40 cents a dozen, butter was 40 cents a pound, and chickens 35c a pound.

On the open market, potatoes were selling from $1.50 to $1.75 a bag. Little pigs were $8.00 a pair. Pork was quoted from 14 to 18 cents a pound, beef at 18 cents, and veal at 20 and 25 cents.

A big white Wyandotte rooster was priced at $3.00, and his companions, of the Barred Rock breed, at $2.00 apiece. Tiny collie pups, only five weeks old, shivered in the cold wind. These were little orphans, their mother having died when they were three weeks old. They were a dollar each. Another small pup with black and white markings was $4.00.

Cabbages were very prominent this morning, selling at 5, 10, and 15 cents apiece, and in the upstair section potted raspberries in quart jars were priced at 55 cents.

THE LEFT OVERS.

The three-act comedy, "The Left Overs," presented in Reid Street Hall on Thursday and Friday evenings, under the auspices of Trinity Church Club, was exceedingly well received by the large appreciative audiences which filled the hall on both occasions. The amateur actors took their parts in a very able manner and each seemed admirably suited to his or her part.

The play, which was presented under the direction of W. S. Derry, depicts in the opening act a love scene between the young daughters of Henry Stone and their admirers. One of the boys Morley Belts (Osborne Smith) devoted to Carlotta (Helen Ross) is urged to get a name for himself in the front page of the paper. About this time Mr. Stone (Tom Foulkes, who took his part admirably) returns from his trip and tells the pretty, talkative housemaid, Caroline (Edna Forester) to keep his homecoming a secret until the next morning, as he wishes to rest. He also tells her about his wonderful scarab, which he purchased in Egypt. She repeats the conversation to the girls' admirers and they form a plot to get possession of the scarab and thus make a name for themselves.

The scene which follows is very amusing. Mr. Stone is gagged and robbed by two masked bandits, but the colored butler Ben (Bill Fanjoy) comes to the rescue and the robbers make a hasty getaway. Miss Alma Blanchard, as a sister of Moses Repley (Ken Reid) appears on the scene and her acting is superb. The police are telephoned for and a female detective (Rose LaRoque) appears to investigate the robbery. Her efforts prove so successful that the boys make a clean breast of thte affair, and are forgiven. Mr. Stone pardons them for the sake of Lucy Lu, with whom he has fallen in love. All ends happily and the father gives his consent to the engagements of Jane (Jean Puttick) and Sears and Charlotta and Betts, and even his sister Miss Lillian (Lyda Wilson) is satisfied.

The orchestra of the club furnished excellent music between the acts. On Thursday evening Miss Irene Cox gave a reading, "The Cattle Thief," by Pauline Johnson. On Friday evening Mr. and Mrs. Edwin Rowe delighted the audience with a vocal duet, "A Lass Like a Rose," responding to an encore with "The End of a Perfect Day." Cliff Shea gave a delightful violin solo. Miss McFadden acted as accompanist.

GIRLS GIVE CONCERT.

Sunbeam Circle Members Put On Enjoyable St. Patrick's Program.

The Sunbeam Circle of the Ancient Order of Foresters held a very enjoyable St. Patrick's concert in the Knights of Pythias Hall on Thursday evening, in charge of the secretary, Mrs. W. R. Terrace, and Mrs. E. Barnes. The different numbers were thoroughly appreciated and heartily encored by the audience and the program was followed by the service of refreshments to about a hundred people. The program was as follows::

Remarks by the chairman, G. Matthems, of Court White Lily; opening song by the Sunbeams, who are members of the A.O.F. junior girls' lodge; "The Lost Knife," by Margaret Reid, Reta Paterson, Joan Paterson and Lavida Crouter; 'My Doll" sung by Annie Fletcher; recitation by Vera Barnes; piano solo by Catherine Prout; playlet entitled "The Celebrated Characters," enacted by Jean Laverty, Mary Terrace, Catherine Prout and Elsie Price; recitation by Moira Read; dance by Margaret McMasters, with accompaniment by A. Fisher; song by Alice Shurety, accompanied by Miss Freda Shurety; recitation, "Guess What's in My Pocket," by Olive Shurety; piano solo by Lucy Fisher; dialogue by Vera Barnes, Frances Livingstone and Moira Read; duet by Annie Fletcher and Margaret Fletcher; playlet entitled, "How the Story Grew," by Mary Terrace, Alice Shurety, Thelma Livingstone, Connie Mason, Nellie Babbs and Marion Dundas; dance by Margaret McMasters, with accompaniment by A. Fisher; recitation by Mary Terrace and dialogue entitled "Almost a Runaway." by Hilda Freeman and Olive Shurety.

SILICA SAND IN MANITOBA

Deposits of silica sand, possibly suitable for glass manufacture, are found on the shores of Black island, lake Winnipeg, as well as at Beausejour, Manitoba.

COME OFTEN TECO STORE OPERATED BY T. EATON Co. COME EARLY

ELECTORAL LAW IS ADOPTED BY ROME CHAMBER

Italy Virtually Made One-Constituency Country By New Fascist Law.

OPPOSED BY GIOLITTI.

Former Premier Makes Last Stand as Leader Opposing Mussolini.

ROME, March 17 (Canadian Press). — The new Fascist electoral law, which virtually makes Italy a one-constituency country, was adopted by the Chamber of Deputies almost unanimously last evening. There were two votes against it—those of Giovanni Giolitti, former Premier, and Marcello Soleri, former Minister of War and Finance. The two other members of the Giolitti group, constituting the only survival of opposition to Premier Mussolini, were absent.

Ex-Premier Giolitti is 86 years of age. He is the veteran of the Chamber and has not missed a sitting during the 46 years since he was first elected. He has occupied the same seat, which was always reserved for him, and he made his last stand last evening as the sole leader opposing the Fascist regime like Horatius at the bridge.

Speaks Against Measure.

The doughty warrior of the old Liberal school was the only speaker to counter the Government measure, and he succeeded in having his voice heard despite the noisy interruptions by the majority members.

Like Premier Mussolini, Giolitti is a Knight of the Supreme Order of Annunziata, which entitles him to the rank of cousin to the King. With his usual calm, impassive tone, the veteran, standing upright, six foot four inches, began amidst a breathless silence.

"With this Bill," he said, "the Government recognizes that a great civilized country like Italy must have among the constitutional organs of state a national representation.

"But the method suggested for the formation of the new Chamber seems to me cannot constitute a true and proper national representation.

"In order that the Assembly may represent the entire nation, I believe it necessary that its members be elected in full liberty."

"The deputies must be elected directly by the voters, according to the electoral law as prescribed by Article 39 of the constitution.

"Any possibility of the choice of deputies is suppressed, since only one electoral ticket can be presented. This Bill, entrusting the choice of deputies to the Fascist Grand Council, excludes from the Chamber any opposition of a political character. It marks the decisive break of the Fascist regime with the regime contemplated by the constitution.

"For these reasons, I, in the name also of my few colleagues—(shouts of "few, very few indeed")—must state that it is impossible for us to give a favorable vote to the Bill."

Mount Pleasant

MOUNT PLEASANT March 17. — Mr. and Mrs. Edgar Best were visitors to Peterboro on Monday.

Mr. Percy Stewart of Ebeneezer, made a business trip to the village on Tuesday.

Mr. and Mrs. W. H. Lowes and Mrs. H. Jamieson, spent Monday in Peterborough.

Mr. Albert Finley of East Emily, visited his sister, Mrs. John Handley, on Tuesday.

The Misses Helen McLean and Hazel McPherson, were guests of Mr. and Mrs. Cecil Gallagher, in Peterboro, on Monday.

Mr. John Earle of Fairmount made a business trip to the village on Tuesday.

Mr. and Mrs. Wesley Downer and family, spent Monday evening at the home of Mrs. Margaret Lough, in Emily.

Mr. A. E. Best, spent Monday in Peterboro.

Mr. Clarke of Springville, and Mrs. Reynolds of Manitoba, called on their sister, Mrs. D. Acheson, Tuesday afternoon.

Mr. Humphrey Finley of Sonya, is spending a few days with his sister Mrs. John Handley.

MOUNT PLEASANT, March 17.—Mrs. Richard Graham has returned to her home after spending a few days with friends in Peterborough.

Mr. Thomas Gardiner has been staying with his sister, Mrs. Hannah Rutherford for the past two or three weeks.

Mr. Gardiner and Mrs. Rutherford spent Monday with friends in Omemee.

Mrs. Garnet Shield and daughter Juan, are visiting friends in Peterborough.

Mr. and Mrs. Thomas Boyd and Mr. and Mrs. George Wilson were visitors to Peterborough on Tuesday.

Mr. Lloyd Hootan of Fairmount called in the village on Tuesday.

Mr. Gerald Visee and son Bert were visitors in Omemee on Saturday.

Mr. and Mrs. Wesley Casey and two children, Roxie and Gordon, of Orange Corners, spent Sunday with Mrs. Casey's parents, Mr. and Mrs. W. Handley.

Skin Sufferers Try This Test

A Pure Antiseptic Treatment

Are you tormented with the agony of a burning itching skin which seems to defy relief? Have you the sores, crusts, eruptions, blemishes, of skin disease? Try the pure cooling liquid D.D.D. It penetrates the skin, soothing and healing the irritated tissues. A 35c bottle proves its merit or your druggist gives your money back. *D.D.D. means skin health.* (Use only D.D.D. Soap.)

OYSTER SUPPER GREAT SUCCESS

Springville United Church Social Attended By About 200 Persons.

DEBATE A FEATURE.

SPRINGVILLE, March 17. — The Springville United Church held an oyster supper on March 13, in aid of the basement fund. About two hundred persons were present in spite of the unfavorable weather. Those who did not care for oysters were served ham and Boston baked beans, besides the salads, follies, cakes, etc., with which the tables were heavily laden.

The room was artistically decorated in green and white in honor of St. Patrick. The table decorations followed the same color scheme with their white linens and bouquets of evergreens. Even the pigs knew that a St. Patrick's night was their night, and "it was good for them to be there," so several clean, shapely potatoes took on ears legs, eyes, etc., from the tooth-pick box, and stationed themselves conspicuously upon paper shamrock leaves on the tables. Some unique potato-men also ventured forth in order to have a part in the table decoration. Two white owls found a suitable resting place amongst the evergreen boughs, and kept watch over the tables but were wise and silent.

The program consisted of an interesting debate by the young people from Ebenezer, and an equal number from the Springville Literary Society, being, "Resolved, that drink is more destructive than war." The debaters were: Affirmative, Springville, Miss C. McConnachie, Miss J. Schaffer, and F. McIndoo; negative, Ebeneezer, Miss Sharp, and Messrs Hinslow and McCamus. The judges who decided unanimously in favor of the affirmative, were: Miss McCullough, Rev. Mr. McDonald of Peterboro, and A. E. Sanderson.

Instrumental numbers were given by Miss Hetherington, of Peterboro, accompanist for the evening; vocal solos by Miss Daisy Murray, entitled The Old Road, His Little Teddy Bear, and the Song of the Robin; also a solo by Thomas Stazicker entitled "Absent," and two monologues "The Whitest Man I Know," and "Dan McGrew."

Rev. Mr. McDonald spoke a few suitable words of encouragement to the members of the Springville Church in their basement enterprise. S. S. Staples on behalf of the Springville Literary Society thanked those taking part in the program, after which Rev. A. H. McConnachie made the announcement that the membership roll had now reached the total of 60 members.

CLASS ENTERTAINS.

Boys of Gilmour Church Hosts to Girl's Class.

The boys of the Perseverance Class of the Gilmour Memorial Church, entertained the Junior girls' class, and their teacher, Miss Margaret Mann at a jolly St. Patrick's party.

The evening was enjoyed with games, contests and music, after which a dainty supper was served in the form of a banquet. The toast to the King was given by Joseph Mann, teacher of the Perseverance Class, while the toast to the girls was proposed by Kenneth Sanderson and responded to by Phyllis Moore.

On behalf of the girls' class a vote of thanks was given to the boys' class by Lillian McGregor, which brought the evening to a close.

POLES MAKE GOOD.

Twenty Families Settled Near Winnipeg Are Progressing Well.

WINNIPEG, Man., March 17.—(Canadian Press).—Twenty Polish families settled under the auspices of the Canada Colonization association in the Wapella district last year have made excellent headway, and show every indication of wanting to become Canadianized, according to E. S. Zing, colonization agent in that district. The work of settlement will go on this season, Mr. Zing says, and plans are under way for the handling of at least another 20 families.

Stirling

STIRLING, March 17.—Mr. Jackson Moore has rented his garage and automobile business on North street, to Mr. Frank Woodbeck and son, of Campbellford.

Mr. Oliver Constable, B.S.A., of Fairfield, Iowa, is visiting friends here. He was called east on account of the death of his father in Toronto.

Mr. Bidwell Sine, in his 89th year, is seriously ill at his home on Wright street.

Mr. Acil Reid is very ill at his home on John street with pleuro pneumonia.

Messrs. William Fox and William Chambers are in Belleville this week, attending the assizes as jurymen.

Mr. and Mrs. Charles Craighead of Campbellford spent Wednesday visiting relatives here.

Mrs. W. T. Sine of Sine is seriously ill with bronchial pneumonia and pleurisy.

Mr. and Mrs. Macklin will, on their return from their honeymoon, take up residence in Mr. Ralph's house on Front street.

Mrs. H. F. Doig will sing at the Sacred Concert in the Regent Theatre Sunday evening at 8.30, under the auspices of the Peterborough Humane Society.

Mrs. F. McNeely, Elocutionist, will give a reading at the Sacred Concert in the Regent Theatre Sunday evening at 8.30, under the auspices of the Peterborough Humane Society.

RECITAL GIVEN BY JUNIOR PUPILS

Good Program Given at Omemee—Choir Holds Social.

OMEMEE, March 17.—The Junior pupils of Miss Isabel McKee gave a musicale at the home of Mrs. P. Parsons, on Tuesday evening.

A music match and the serving of homemade candy were pleasing additions to the following program:

The Juggler, Pendleton; Intermezzo Caprice, Dewal; Etude, Dial bell, by Frances MacPherson; Red Rose, Graham, Lorraine Irwin; reading, Charlie Weir; The Homeward March, Kinaling, Jean McGinness; John Gilpin, Slater, Velia Endicott; Peter Pump, Slater, Verda Endicott; Haymaking, Slater, Mildred Jones; reading, Miss I. McKee; Tulip, Lloyd Howland, and Lake Waltz, Jean Parsons.

Following the usual choir practice of Trinity Church choir, on Wednesday evening, Mr. and Mrs. Cecil Cornell invited all to remain for a social hour in the Sunday school room. Partners were chosen for an Irish contest which caused a good deal of amusement.

Each guest was presented with an "Irish Orchid" which consisted of a potato firmly fastened to a stem of green, shooting out of a spray of green asparagus fern and strips of tinsel.

Following the dainty lunch provided, Messrs. Arthur Stinson and T. McCammon thanked the host and hostess for the evening's entertainment after which Rev. E. W. Rowland spoke a few words of appreciation to Mr. and Mrs. Cornell, and also the choir for their generous assistance.

Miss Christina Connel had charge of the Young People's meeting while Cyril Elliott gave the topic which was "War and Peace". The scriptural reading was given by Miss Rita Reading, and a pleasing piano duet by Misses Eva Race and Winnifred Bradburn.

Rev. S. and Mrs. Kennedy, Mr. and Mrs. W. Thorn and Messrs. R. Belsh, Armstrong Windrim, L. Windrim and J. Deyell were among those who attended a meeting of Presbytery in Peterborough on Tuesday.

Hastings

HASTINGS, March 17. — Mr. J. M. Thomson of Guelph, spent Wednesday at the home of his parents, Rev. D. A. and Mrs. Thomson.

Mr. Bryant Scriver is spending a few days in Toronto.

Mr. John R. Walsh of Peterboro, was in town on Monday, attending the funeral of his mother.

Miss Hazel Whitred is visiting friends in Peterboro.

Mr. Arthur Dodd, son of Mr. and Mrs. Fred Dodd, who has been working in the St. Mary's branch of the Bank of Toronto, has been transferred to the Paris branch.

Mrs. E. W. Lee of Belleville, Mrs. Harry G. Lewis of New York, and Miss Mary Walsh, of Atlantic City, attended the funeral of their mother Mrs. John Walsh, on Monday.

Dr. J. H. Hess, local Chevrolet agent was in Belleville on Thursday attending the Chevrolet convention.

Mr. Timothy Gorman while driving down Front street with a high-spirited horse, went to turn into the driveway of Malcolm Baker's store when his cutter, due to the icy roads, swerved and upset, throwing Mr. Gorman out and dragging him several feet.

PAGE KING SOLOMON

OKLAHOMA CITY, March 17.—Is beer, overlooked in raid No. 1, subject to fine if found in Raid No. 2? Judge Estes in police court here says it is. But Mrs. Fisher who had the beer, told the judge it should be charged against the first raid. "Charge it against any thing you like," said the judge, "but the second raid will cost you $20."

BIBLE CLASS HOLDS HAPPY SLEIGH RIDE

Weiner Roast Held After Outing By Young People of Havelock Church.

HAVELOCK, March 17. — The Young People's Bible Class of the United Church, accompanied by their teacher, Robert Archer, held a very enjoyable sleigh ride party on Wednesday evening. On their return, the young people assembled in the school room of the church, where a weiner roast was held.

Twenty-six were present at the regular meeting of the Ladies' Aid of the United Church, which was held on Wednesday afternoon, at which the time was spent in quilting and a dainty lunch served at the close.

Mrs. William Woodbeck was honored recently by a large number of her friends on the occasion of her birthday anniversary. The evening was spent in cards and musical selections given by Miss M. Weymark and F. Platt. The prizes were won by Mrs. J. Weymark and Trevor Watson, with consolation awards to Miss M. Weymark and Fred Masters.

A dainty lunch was served and ere the guests departed, all good wishes were extended to Mrs. Woodbeck for "many happy returns of the day."

The regular meeting of the Companions of Court Princess of Wales was held on Wednesday evening at the home of Mrs. Jesse Weymark. After the routine business had been disposed of, the members enjoyed the remainder of the evening at cards. Honor prizes were won by Mrs. W. Hamilton and Mrs. W. Bullied, and the consolation prize by Mrs. R. Sanderson and Mrs. J. Weymark. The evening concluded with a dainty lunch and a number of piano selections by Miss M. Weymark.

MOST ORIENTALS WEST OF ROCKIES

British Columbians Have To Bear Brunt of Competition, Says Minister.

VICTORIA, B.C., March 16 (CP).—In the local Legislature Attorney General Manson is quoted as saying there was no question that the standard of living among the Chinese was far below that of the white man. In the case of the Japanese the situation was different. The Japanese adopted the ways of the whites, raising his standard of living until soon those resident in British Columbia would be nearly on a par with the white residents.

The birth rate among Japanese was shown, said the Attorney-General, to be 100 per cent above that of the whites. The Japanese children in the schools had increased in three years by 74 per cent, while the white children increased by only three per cent.

Out of the Oriental immigration it was shown that 80 per cent of the Chinese entering Canada remained in British Columbia and 98 per cent of the Japanese entering so remained in the province.

British Columbia was thus forced to bear the brunt of the competition from these Orientals.

Ennismore

ENNISMORE, March 17. — Messrs. Gerald and Emmitt O'Neill of King's Wharf, visited friends here on Sunday.

Miss Maria Pluard has returned home after visiting friends in Buckhorn.

Mr. Fred FitzPatrick of Downeyville, called on friends here on Tuesday.

Messrs. H. Flood and J. Winters were sawing wood at King's Wharf on Monday and Tuesday.

Mr. M. Twomey and sister Mary spent Sunday as the guests of Mr and Mrs. A. Twomey at King's Wharf.

MUSINGS AT A MANSE WINDOW

I HAVE A FRIEND, to whom I have been indebted for many favors, who has sent me some notes on a wonderful message from the pen of Dr. Mark A. Matthews, minister of the First Presbyterian Church, Seattle, Washington. His church is said to be the largest in the world. It has a membership of 7,561. I count myself fortunate in knowing Dr. Matthews. He is one of the strongest men in the American Presbyterian Church. Some years ago he was honored by his brethren in being made Moderator of the General Assembly. Trained for the law, his steps were directed to the pulpit. The bar's loss was the church's gain. He is a giant in every way you like to think of him. The great congregations that gather to his ministry are a splendid tribute to his outstanding pulpit gifts. Any words of his, whether written or spoken, are well worth heeding. Therefore, I am going to use my friend's notes as the best contribution I can make this week.

AMERICA'S NEED.

This is the title of the article to which I refer. It might just as properly have been called "Canada's Need", or any other place's need, for the greatest need of all places at present is evangelistic fire! Statistics show the lowest drop on the scale of evangelistic work and results that they have shown at any time in the last hundred years. As an inevitable consequence, every department of life is suffering. The morals of almost every country is lower. Crime has increased. Disregard for law is almost universal. Divorce is on the increase. Immorality abounds. The fences of propriety and modesty are down. These are a few of the results of the waning spirit of evangelism. Those who fail to realize this must be very simple or simply stupid.

THE CHURCH CURSED.

The church is suffering most. She is cursed with unbelief and spiritual inertia. Multitudes of her members have a name to live, but are spiritually dead. That they have a form of Godliness no one will deny, but in very deed they are denying, the real power thereof. If Christ stood in the midst of many a congregation today, He would be compelled to say, as in the days of His flesh, "Woe unto you, scribes, Pharisees, hypocrites! for ye are like unto whited sepulchres, which indeed appear beautiful outward, but are within full of dead men's bones, and of all uncleanness."

DEARTH OF RED-BLOODED MEN.

There is a great dearth of red-blooded laymen who believe and are willing and ready to fight and die, if need be, for their belief. Expediency is the daily rule of action in the state and in the church. Men buy and sell positions. They do not fight and die for principles. The fighting spirit given place to the spirit of compromise. There is more of the fear of man in most hearts than there is of the fear of God. Churches are empty and would-be saints are on the fields of pleasure and idleness breaking God's holy day, wrecking the home and blasting the religious future of their children.

GOLF AND PRAYER.

Too many ministers know more about the rules of golf than they do about the experiences of the prayer closet. The minister's place is the pulpit—the layman's is the pew. And the pew will never, as a rule, be able, even if it is willing, to rise any higher than the pulpit. Great is the minister's responsibility. If the Christian ministry would, for one day, be what God wants it to be we should have one of the greatest revivals of religion the church has experienced since Pentecost.

SERIOUS LOSSES.

Many of the denominations lost last year, and, thousands and thousands of churches did not receive even one person on profession of faith. Thousands of ministers turned from the gospel to preach the froth of books, the filth of the screen, the fumes of politics, the fatalism of philosophy, and the fallacy of social service as a remedy for the sin and sorrow of the world. Dr. Matthews says, "In fact, the preachers of America are to blame for the horrible condition in the church and in the country." He adds that the rationalistic preachers of the nation are the country's greatest menace. It was the infamous rationalism of Nietzscheism that plunged the world into the awful war of 1914. It is the same rationalism that is today responsible for the low state of our morality and the high state of our crime efficiency.

INFAMOUS HERESY.

The infamous heresy that is today preached by rationalistic preachers is directly responsible for our social condition. When preachers abandon the blood of Jesus Christ as the only gospel for the salvation of men, they become Judas Iscariots, and deserve his fate.

There is but one way to be saved and that is by regeneration through the blood of Jesus Christ. God cannot save one who denies the deity of Christ and rejects His vicarious atonement. Therefore, there is but one gospel that can produce a revival and that is the blood-bathed gospel of Christ's death and resurrection.

When ministers become traitors and abandon that gospel the evangelistic fires go out, family altars crumble, church chancels are covered with the world's icicles, pulpits become the stalls of asses, and Ichabod appears over the doors of the churches.

RATIONALISTIC SEWERS.

Church pews cannot be filled and be kept filled by the trash from rationalistic sewers. The water of life does not flow from such sources, and, no one ever saw the bread of life on such a table. If the preachers would return to the gospel of Jesus Christ, which includes His incarnation, His virgin birth, His crucifixion, His resurrection, His ascension, His mediatorial work and His coming again, the evangelistic fires would burn once more, and men would be saved and added to the church daily.

A PROPHET SPEAKS.

I can easily imagine myself present in the great congregation when these words come hot and hurried from the lips of this great preacher. If ministers would again preach the revival-producing doctrine of justification by faith only, you would see another reformation producing even greater results than the last one. Fill the pulpits of the church with men who can preach, and who can preach the only gospel. If we had such men we would then find the pews filled with red-blooded laymen who believe something instead of flabby, time-serving, expediency-governed, masculine jelly-fish who are today seeking places of pleasure rather than the avenues of Christian duty and service in the church.

Let the church be called to prayer, and let her pray daily for gospel preachers. She should drive from her pulpits the rationalistic traitors and install instead preachers who know how to preach the gospel of Jesus Christ. Then the revival will begin!

WILL YOU DO IT?

I hope that those who feel about these things as I do will be stirred up to pray more passionately for a house-cleaning within all our churches—and still more passionately for a genuine revival of religion throughout the world. Unless something of this kind happens we are likely to be involved in another terrible war.

—Allan Fairbairn.

P. W. Wilson says that when a girl cuts her hair and clutches her knees, she also is pursuing happiness. It is her way of overtaking bliss.

The Minister Remarks--

—While it sounds learned to quote Scripture, I have noticed that people do not always quote it learnedly.

—It's a queer world! The people who travel in circles that get them invitations to costly banquets usually have poor stomachs and can't eat much.

—Some man's tendency to give advice is in inverse ratio to their ability to mind their own business.

—Some people I know would not remain long in the self-satisfied class if they could only get acquainted with themselves.

—If a girl who will not dance at a dance is a wall flower, would you call a man who decorates the sidelines a wall-nut?

—A. F.

THE CONTROVERSY

IT is a battle-royal. Modernists have issued the challenge. Evangelicals accept it. There is no discharge in this war. It is the bounden duty of believers in the Christ of the gospels to lay bare the causes of present-day apostasy. Camouflaged error is illusive and alluring. The masked batteries of modernism must be revealed and their destructive nature unfolded. Clad in the livery of heaven, mistaken leaders conduct the unwary into the labyrinth of doubt, from which extrication is difficult. Opposition is to be met out in the open with straight-forward, unequivocal affirmation and argument. For evangelicals who know it is a matter of life and death; either to ignore the present anti-supernaturalist movement, or to treat it with levity, is a betrayal of a sacred trust. Educated men of conviction appreciate its gravity. If any subject in God's universe is vital it is the secret and source of life everlasting.—"Jesus Christ at the Crossroads." —A. Z. Conrad.

Do You Believe In Luck?

IS it true that human history is full of instances of where men have made fortunes through no efforts of their own? Perhaps it is, and perhaps it isn't! It may all depend upon the viewpoint of the historian. In writing history he may unwittingly have overlooked some of the facts.

At the beginning of the Great War there was a case in which luck certainly seemed to figure. The Indra, a wooden ship, was half way across the ocean with a cargo of nitrates which she was taking from Chile to France when she learned that Germany and France were at war. As she belonged to a citizen of Germany, she turned about and made for New York where she arrived in safety.

The captain tried to sell the cargo at once, to New York parties who were willing to purchase it, but a suit was brought against him to prevent his doing so. The case dragged along in court for about two years, when it was decided in the captain's favor and he was allowed to sell the nitrates. It brought a million dollars cash—that is the point. It was worth a hundred thousand dollars when he started across the ocean with it. He tried to sell it for seventy-five thousand dollars when he reached New York, but was stopped by the courts. So he found himself more than nine hundred thousand dollars ahead of the game, through no efforts of his own, or despite his efforts. He had nothing to do with starting the war. It seemed the merest chance that a swifter ship met him and gave him the information that made him head his ship for New York. He did everything he could to get rid of his cargo before the war put up prices. If all the facts are there it would seem that chance or luck plays a part in human lives.

Perhaps luck is only a short way of spelling pluck! If so, then much may depend upon ourselves as to whether we are to be helped by it or not. If it isn't, then in all probability many people will continue to keep their wishbone where their backbone ought to be.

—A. F.

A Pen Picture

RUMOURS come from far away country places of political troubles, and the minds of men are deeply agitated. When the affairs of a land are unsettled, although the storms may be brewed in the towns, the waves of feeling soon reach lonely farmsteads. It is so here, and the farmers meet in consultation and have animated debates. These men are not mere graziers, they are well drilled, accustomed to defend their hearths and homes, and some of them have done wonderful deeds in driving off marauding tribes. At last, some more ardently patriotic than the rest, can no longer stand the policy of delay—they will not be kept back, because others are less earnest. They are leaders, not rank and file, but men who have led on large numbers of men to the battle. Now, however, they have no following, so they must accept the situation. Duty calls, so they must go. If they cannot bring others, they will show that their hearts are true and they will go alone. They set off together, a little handful—scarce a dozen warriors—but every man a hero. Powerful men they look, strong limbed and wiry, and the fire that flashes from their eyes as they speak of their country's need would make the strongest foeman tremble.

The plains and pasture lands are left behind, and a mountain range has to be crossed. It is early spring, and the sun's rays are growing warm, but their ardour knows no check. Here, however, is a difficulty. Yonder flows a river running fast and deep; it is in flood, and the muddy waters have extended far beyond the channel on either side. What matters that? Many waters cannot quench love, and the brave men plunge into the torrent, armour, weapons and all, and bravely swim to the farther side. Now let us hope their difficulties are over. They have had many—thirty or forty miles of march, climbing heights, swimming across a swollen, dangerous river. Now, however, they emerge and proceed still further on their way. But see! a greater danger is at hand. Bands of invaders, rendered more bold by the troubles in the land, attack them on both sides. Ah, they little knew with whom they have to deal. This little band of heroes flew at them and drove them in flight to right and left as the thistledown before the wind. On, on they march, towns and villages are left behind. They are coming into lonely places now far from the haunts of man. At last the long journey is over—all perils passed, all obstacles overcome, and one look at the face that welcomes their arrival makes up for all the trouble of the way.

The key to the previous Pen Picture of Bible History is to be found in Gen. 14:3-16.

Jewish Snobs Turncoats & Cowards

A Jewish Rabbi Speaks Plainly to People of His Own Race.

IN a sermon on the above subject, Rabbi Stephen S. Wise commended Supreme Court Justice Arthur S. Tompkins for withdrawing from the Metropolitan Mason's Country Club at Briarcliff because it excluded Jews from its membership. He said it was something for which he had been waiting fifty-four years, and predicted that he would wait another fifty-four years for a Jew to resign from a Jewish club because there are as many mean, contemptible snobs in them as there are in the Christian organizations.

Quoting from the application blank of a fashionable Jewish club on the north shore of Long Island, which required the birthplace of the applicant's father, mother, wife, father-in-law, mother-in-law and grandparents, he said, "They don't want any one who comes from stock born in Eastern Europe."

He then denounced the Jews who were responsible for the production of the motion picture, "King of Kings," which he called an insult to the Jewish race. "It was produced by a half-Jew. It is being distributed by Jews and shown in Jewish theatres. The very men whom it insults are making money from it. They are selling their souls for a mess of pottage." —A. F.

SEARCH THE SCRIPTURES

1. At what stage in the history of the race did woman become subordinate to man?
2. Who should have been Elisha's successor?
3. Which is the pivotal verse in the Book of Jonah?
4. In which of the Psalms do we find an Abode of Peace?
5. Where in the Bible do we find a list of dietary don'ts?
6. Where in nature do we find a perpetual memorial of Jehovah's judgement?

(Answers to these questions will appear next week.)

ANSWERS TO LAST WEEK'S QUESTIONS.

1. At the wedding in Canna, "The unconscious water saw its God, and blushed."
2. Joseph passes from the Bible narrative when Jesus declared he had to be about his "Father's business" (Luke 2:48).
3. Nathanael was probably reading the story of "Jacob's ladder" while sitting under the tree (John 1:50-51).
4. Andrew had previously worked with the fiery John the Baptist (John 1:40).
5. A full length portrait of the Lord Jesus similar to the one in Revelation 1, is found in Daniel 10. The one in Daniel is before His incarnation, and the one in Revelation is after His resurrection, and show that neither birth nor death had power to change the Son of God (Heb. 13:8).
6. When two thousand devil possessed swine were choked in the sea, the men, probably the owners, "prayed Jesus to depart out of their coast" (Mark 5:1-17).

—Florence Young.

Children's Corner

TELL US A STORY

WHAT is a Bigot? It is questionable whether many people who dislike the word know exactly what it means. In the grand old days, when men would rather lay down their lives than sacrifice the truth, they were lashed to the stake. The man with the lighted torch stood close by the faggots; and, just before the torch was set to them, the martyrs were asked for the last time, "Will you recant?" And they used to have this form of answer, "By God, no!" That phrase has been contracted into "bigot." A bigot, therefore, really means a man who would rather be burned than sacrifice the truth.

A Big Navy And the Jingoes

THE demand by a certain group in the U.S.A. for a big navy, if granted, will turn out to be a great temptation to the jingoes of every kind and to the imperialists of one kind. Rabbi Wise says that imperialists is nothing more than a "hifalutin" name for those gentlemen who are eager to invest their funds in far-off lands, with the implicit understanding that at a pinch the State Department may be trusted to take care of those investments, with the big navy in the background, as the bill collector's club.

Continuing, the Rabbi said: "Remember the words of Tolstoi: 'Bethink yourselves!' As we today think about Germany and the damage done to its great people by its mad war lord, do we not wonder oft time—why did not this great people protest and even revolt before it was too late, ere half the world was struck down in anguish and desolation?" —A. What Is the Cause of So Much Discontent?

Our Joy Needed in Daily Toil—Our Sense of Values Has Become Badly Twisted.

A prominent Episcopal rector blames envy of our neighbor's lot for much widespread discontent and the consuming greed of the present time. Most of us under-estimate our sources of happiness and under-value our opportunities for usefulness. A sense of the unimportance, maybe the uselessness, of our work and influence creeps upon us, and I can conceive of nothing drearier, more depressing and more hurtful to the finest energies of man. Christianity offers a corrective in teaching the essential dignity and beauty of the average work and the average sphere. We should idealize our labor, no matter what it is, so long as it is honest and praiseworthy, until instead of simply being a means to an end such as a wage, a salary or a fortune, something to finish as quickly as possible, it becomes a source of joy and satisfaction. We should make it a means of industrial or social helpfulness. Few things will avert pessimism and discouragement so effectively as this.

SATURDAY, MARCH 17, 1928.

SATISFIED WITH PICKEREL.

Appearing before the Fish and Game Committee the other day a guide from Northern Ontario hit the nail squarely on the head when he declared that he no longer sent his tourists after bass—"for the bass are gone"—but after pickerel, "and the tourists are glad to get them."

The argument that pickerel is not a game fish and that therefore no special pains should be taken to protect it, will not impress anyone who knows the facts.

With the game fish rapidly disappearing, the majority of visitors are quite satisfied to catch pickerel, just as this Northern Ontario guide has found, and the question now to be considered involves conserving the pickerel before they become as scarce as other fish in these waters.

In any policy of conservation it should be obvious that the through-the-ice fishing and the building up of a big business in the sale of pickerel caught in this way must be brought to an end.

If this is not done, and done speedily, we will not even be able to offer our tourists an opportunity to catch pickerel.

The fish, if protected, may save the situation in this district; at least, we cannot afford to take the chance of allowing the supply to be exhausted merely to give a few individuals an opportunity of making some easy money during the winter months.

CURBING THE SENSATION-MONGERS.

With the decision of the Quebec authorities to bar newspaper representatives from attending executions in that province most people will be in accord.

There is no reason except the gratification of morbid tastes, why the details of the carrying out of the death sentence upon convicted murderers should be published.

Yellow journals have gone to such a length indeed in this respect as to justify the exclusion of the press upon such occasions, the treatment of a recent execution in Sing-Sing by tabloid newspapers, one of which even published pictures of the unfortunate woman as she appeared in the death chair, being a particularly striking example of what can be expected from sensational sheets that pander to morbidity.

The British system of issuing a brief official notice that the sentence of the Court has been carried out, would seem to be a much more desirable method, and now that Quebec has decided to adopt this system henceforth, the example might well be followed by the authorities in other provinces.

The change will be resented by some of the yellows and tabloids, and perhaps by a few Canadian newspapers which seem to have been infected by the same germ as these sensation-mongers, but the majority of the papers published in this country will not be slow in approving the decision of the Quebec authorities.

THE SHOVELS SHOULD FUNCTION.

When the snow-cleaning by-law was withdrawn by the City Council at the beginning of the winter as the result of strong opposition to the measure by many citizens, The Examiner expressed the view that the compulsory element having been eliminated most householders would voluntarily assume the task of keeping their walks clean.

Unfortunately this hope has been only partially fulfilled, and the result is that conditions under foot on many of the city's streets are far from pleasant, in some places the accumulation of ice being at least six inches thick.

It is easy to imagine that had the by-law been left in force a very different state of affairs would prevail today, for there are stretches of bone-dry pavement here and there where citizens as a voluntary contribution to the general comfort have coped with successive snowfalls and kept the walks clear, and these dry spots are in agreeable contrast to the general conditions.

The point is that the public forced the scrapping of the by-law, resenting the compulsion involved, and that there is an obligation on the part of those who opposed the measure to bring about the same results by their own efforts.

Unfortunately this obligation had not been generally admitted, and the present unpleasant walking conditions are the result.

It is not too late, however, to at least partially make up for the lapse.

The shovel brigade still has a chance to function, and should get busy as soon as the weather conditions permit.

Otherwise the obnoxious by-law may come back, necessitated by the intolerable state of most of the city's sidewalks.

GENERAL MOTORS.

The public knows something of the fabulous profits that have been made by some of the automobile companies. The ordinary working man, who finds it hard enough to scrape together and save one thousand dollars, has heard rather vaguely from time to time of which an original investment of $1,000 in the Ford Company would have earned, but he hasn't heard so much about the similarly amazing dividends of General Motors, manufacturers of the Chevrolet, Pontiac, Oakland.

Merely for simplicity and convenience, consider an original purchase of 100 shares of General Motors at $100 a share, an investment of $10,000. That fortunate investor to-day would own 10,038 shares and their market value would be around $1,600,000. Had he taken advantage of various rights that were offered to him during that time, it is calculated that his holdings at present would total 14,538 shares, valued at about $2,300,000 .And the most of this appreciation developed within the period of ten years. In 1916 there was a stock slit-up on a five-for-one basis, in 1920 it was on a ten-for-one basis, and so on, rapidly pyramiding the original 100 shares. The prediction has been ventured that the net earnings of General Motors this year will be close to $300,000,000. Most of the important executives of the company are millionaires many times over. They obtained an interest in the business by purchases of the common stock through what is known as the Managers' Securities Company, and they have been elevated thereby to the swelling ranks of American plutocrats.

DO WE NEED COUNTY COUNCILS?

The Arthur Enterprise in a very well written article in its last issue discusses the above question. The matter was brought to its attention because of the intention of Fergus, which is in the county of Wellington, to withdraw from the county. Fergus has now the necessary population for incorporation as a town and the separation from the county. It will require a special act of the Ontario Legislature, but is quite within possibilities.

The Enterprise is of the opinion that County Councils have come to be a very unnecessary link between the municipal and Provincial governing bodies. It states that the chief business of the County Council at present is building and maintaining roads, and the administration of education. It believes that this work could be successfully carried on by the Legislature and the Township Councils. The Enterprise further points out that at present county grants are made to schools and Government grants, based on county grants, are made by the Department of Education. The county then gets these grants by making allowance in the county rate for them. In the opinion of the Arthur newspaper there is no need of the county's part in the matter at all. It believes that the Education Department and the municipality could carry on more economically and more efficiently without County Council interference than with it.

This is rather a new idea. Most people, no doubt, believe that the County Council is a very vital part of municipal machinery. The views of The Arthur Enterprise, however, are well worthy of consideration. If County Councils could be done away with without interfering seriously with the administration of the towns, villages and townships throughout the Province, then there is no doubt that a good deal of money would be saved. As The Enterprise suggests, there is little chance of any suggestion of reform coming from County Councils themselves, but it is a matter to which thoughtful men of every Province will no doubt be prepared to give serious consideration.—Kingston Whig-Standard.

RADIO AND CONTROVERSY.

There is an interesting controversy in Great Britain over the question of broadcasting controversial matter. The possible subjects of controversy are grouped by The London Times under three heads—religion, politics and industry. Religion, it is admitted, presents difficulties, and in its doctrinal aspects it might well be left alone. "But no sanctity attaches to politics or industry." We are not sure that there would be no difficulty in regard to industry. The cleavage between socialism and the present system is as likely to provoke passion as that between modernism and fundamentalism in religion. Many people would be shocked by the notion of Red propaganda being broadcast; but if the subject is to be discussed at all, where would the line be drawn? A mild Utopian form of socialism might be denounced as revolutionary or at least disturbing, as a magazine was forced by old-fashioned public opinion to discontinue the publication of Ruskin's "Unto This Last." Winston Churchill favors the removal of the ban. He says:

> "The newspapers no longer report public speeches. They only go about dogging your steps from place to place to see if you say something that, clipped from its context, can be made into a headline. They only go prowling about looking for the wrong tit-bits."

This is rather startling to those who have been accustomed to venerate Old Country newspapers as models of sobriety and solidity; but manners change there as elsewhere. Churchill goes on to say that if newspapers will not report political speeches, they should not act the part of dog-in-the-manger and stand in the path of a great and wonderful new invention. He suggests that one radio hour a night should be given to political and party controversy, and that the time should be divided up in accordance with the strength of parties in any given House of Commons.

There are difficulties and dangers in the way, but it will be hard to contend that controversy and propaganda, now carried on in books and newspapers and in public meetings, shall be excluded from the field of radio activity. All living issues are controversial by their very nature, says The Manchester Guardian, and it does not wish the broadcasting agency to deal with the dead alone. Propaganda means the dissemination of views with which you disagree. There would be less difficulty if topics were only two-sided, but "unfortunately most questions are complex polygons, and the only safeguard is to insure as much free discussion of various views as possible."

The practical difficulty would be in giving fair play to all parties and advocates of all kinds of opinion. You can buy the newspaper or book which meets your views and shut the door on the others; but in the case of the radio the proposition is not quite so simple. The nearest analogy is the space allotted to correspondents in a newspaper. Every editor has had the experience of being accused of unfairness because B thinks he has not been given the same opportunity to express himself as A; and no matter how fair he may try to be he is liable to be accused of dark and sinister motives. Then the radio fans are troubled by interference. The annoyance which one feels when his favorite musical program is interrupted by discordant sounds would be slight when compared with the feeling aroused by an unsought blast of communistic doctrine in an old-fashioned household, or a wave of reactionary Toryism pouring into a Liberal ear. Still it may be argued that such shocks are stimulating.—London Advertiser.

EDITORIAL NOTES AND COMMENTN.

Regulation No. 17 is not likely to worry Mr. Ferguson, at least as a political menace, for the next five years.

A study of the spring styles seems to indicate that the really smart young man in Chicago will wear a bullet-proof vest this year.

High School girls in Hungary must wear dark blue sailor trousers instead of short skirts. That's one way of dealing with the scanty skirt problem.

Now that both the Federal House and the Legislature have got through talking on the Budget, is it too much to hope that business will get a chance?

The profits announced by the Wrigley Company for last year indicated that however much unemployment there may be over the border, millions of jaws were busy.

"Are you strong?" "Strong! Say, I can read the Saturday Evening Post with one hand."—Judge.

CATTLE, GRAIN AND PRODUCE

TORONTO LIVESTOCK.

TORONTO, March 17. — A light run of less than 2,000 cattle for best Monday's market, due to blocked condition of the country roads, the market opened for the week with a good actice demand. Prices for the day averages 15c to 20c higher than the previous close. The advance was lost in the later markets, and before the closing market on Thursday, medium and common butcher cattle had suffered a further decline of about 25c. Choice heavy steers and fancy quality butcher steers and heifers handy weights held steady to firm at the week's opening prices.

Choice fat cows were 25c to 40c lower than the week's opening prices. Good medium cows selling at $7.00 to $7.25.

Springers in steady demand if of good quality. No demand for milkers.

Calves—Choice around 14c; good, 13c to 13½c; medium calves, 9c to 12c; a few dairy type grassers selling at 6c to the abattoirs for boning purposes.

Receipts.

Union Stock Yards — Total receipts this week: Cattle, 3,864; calves, 1,015; hogs, 4,420; lambs, 381.

Heavy steers, choice	$10.50 to $11.00
Butchers, choice	9.00 10.25
do. common to medium	7.00 7.75
do. heifers	9.00 9.75
Baby beeves	9.50 12.00
Cows, fat, choice	7.50 8.25
do. canners, cutters	2.50 3.50
Bulls butcher, choice	6.50 7.50
Bolognas	4.50 6.25
Feeders and shortkeep.	8.00 9.00
Stockers, good	6.00 6.75
Calves, choice	14.00 15.00
Springers, choice	90.00 120.00
Milkers, choice	70.00 90.00
Lambs, choice	16.00 16.50
Buck lambs	10.00 11.00
Sheep	7.00 8.00
Hogs, f.o.b., thick, smooth	8.25
Hogs, selects, f.o.b.	9.00
Hogs, off cars, selects	9.90

MONTREAL GRAIN AND PRODUCE.

MONTREAL, March 17 (Canadian Press). — The foreign demand for wheat here yesterday was quiet, but some sales of oats and barley were made by exporters.

In sympathy with the steady advance in prices for oats in Winnipeg of late a stronger feeling developed in the local cash market, and prices for all grades were marked up two cents per bushel. The demand was moderate.

The flour situation was without any new feature to note, prices for spring and winter wheat grains being firmly maintained under a limited demand.

Owing to the increasing scarcity of most lines of millfeed and the urgent demand from local and outside buyers a stronger feeling prevailed and prices scored an advance of $1.00 per ton. A moderate trade was done in standard grades of rolled oats and prices were firm.

A feature of the baled hay trade was the demand that developed from foreign buyers, and some sales of fair average quality hay were made for May-June shipment from the Port of Montreal to Cardiff at 35s per ton, c.i.f. Owing to the more liberal supplies available on spot and the somewhat limited demand a weaker feeling prevailed and prices were reduced $1.00 per ton.

The demand for all grades of eggs was good and an active business was done at unchanged prices. The receipts were 2,307 cases.

A fairly active business was done in potatoes and the undertone was firm.

The trade in imported beans was steady and values were unchanged. Sales of car lots of choice white hand-picked to arrive were made at $3.50 per bushel, ex-track, and broken lots at $3.60 per bushel, ex-store.

An easier feeling developed in the butter market and prices were declined ½c per pound. The volume of business was again of a limited character. The receipts were 137 packages.

The undertone to the cheese market continued firm on account of the limited supplies available on spot. The receipts were 67 boxes.

Montreal Quotations.

Oats, Canadian Western No. 2, 85c.
Oats, Canadian Western No. 3, 79½c.
Oats, extra No. 1 feed, 77½c.
Oats, No. 2 local white, 76½c.
Flour, Manitoba spring wheat patents firsts, $7.90.
Flour, Manitoba spring wheat patents seconds, $7.30.
Flour, Manitoba spring wheat patents strong bakers, $7.10.
Flour, Winter patents, choice, $5.90-$6.00.
Rolled oats, bag 90 pounds, $3.85.
Bran, $40.25.
Shorts, $42.25.
Middlings, $48.25.
Hay, No. 2, per ton, car lots, $12.00 to $12.50.
Cheese, Westerns, 21¾c-22½c.
Cheese, Easterns, 21¾c.
Butter, No. 1 pasteurized, 41¼c-41½c.
Eggs, fresh extras, 44c.
Eggs, fresh firsts, 42c.
Quebec potatoes, per bag, car lots, $1.70 to $1.75.

CHICAGO CATTLE.

CHICAGO, March 17 (Canadian Press). — Cattle, 15,000; no choice steers or yearlings here; best, $13.75; several loads, $13.00 to $13.35; bulk, $11.75 to $12.50; good market on light heifer and mixed yearlings at $13.00 downward to $11.50; very few bulls offered; light heifers, $12.00 to $13.00; better kinds, $13.50 to $14.50; best, $15.00.

Hogs, 36,000; top, $8.85 sparingly paid for sorted 200 to 210 pound weights; bulk better grade 170 to 230 pound averages, $8.35 to $8.60; desirable 240 to 280 pound butchers largely $8.05 to $8.35; big weight butchers selling down to $7.75; better grade lights active; bulk 140 to 160 pound weights, $7.75 to $8.40; strictly choice kind, $8.60; pigs mostly $6.50 to $7.25; choice kinds upward to $7.75; bulk packing sows, $6.90 to

Sheep, 6,000; top, 79 pound Nebraska lambs to traders, $16.75; bulk better grades 90 pounds down, $16.00 to $16.25; medium kinds down to $15.00; good to choice 94 pound fed Montanas, $16.15; 82 to 87 pound clipped lambs, $14.15 to $14.25; few fat ewes, $9.50.

CHICAGO GRAIN.

CHICAGO, March 17 (Canadian Press). — Brisk export demand for corn led to big general buying in the corn market yesterday and to fresh high price records for the season. Barley also outdid the season's topmost previous figures. Closing quotations on corn were strong, 1 cent to 2 cents net higher, with wheat varying from ¼c decline to 1¼ advance, oats ¼c to ⅝c to ⅞c up, and provisions showing 10 to 12 cents to 32 cents gain.

Despite heavy selling at times to realize profits, corn went soaring first beyond $1.00 a bushel for May delivery and later on ran up above above 7.01, touching finally 1.01¾, and closing within about ½ cent of the day's highest level. Meanwhile, No. 2 corn available for quick shipment to Denmark from Saint John, N.B., was in demand here yesterday at 12½ cents over Chicago May. Announcement was also made of sales of corn to Rotterdam, and export business was likewise in evidence at Omaha and St. Louis as well as at New York and the Gulf of Mexico.

With country offerings of domestic corn virtually zero, smallness of world shipments of corn gave emphasis to trade reports indicating European scarcity of feed, with demand now turning to oats as well as to corn. Argentine corn was talked of as practically exhausted, and the new Argentine crop unavailable for some time yet. Under such circumstances, bulls in the corn market here swept everything before them yesterday, and forced into execution many standing orders which previous sellers had given to buy at various set limits to put a stop to losses.

Wheat and rye, together with oats and barley, accompanied the upward swing of corn. Wheat was influenced too by falling off in wheat shipments from Australia, 976,000 for the week, against 2,296,000 bushels the week before.

Foreign buying of lard gave independent strength to the provision market.

STERLING EXCHANGE.

MONTREAL, March 17 (Canadian Press). — Sterling exchange rates were quoted here yesterday as:

Demand—$4.87¼.
Cables—$4.87¾.

GOD'S MINUTE

"Hear, O Lord, when I cry with my voice."—Ps. 27:7.

O Lord, our Lord, how excellent is Thy Name in all the earth. Thou art our God, and the God and Father of our Lord and Saviour Jesus Christ, through Whom we, Thy children of faith, have the forgiveness of our sins. Thou art our fathers' God; and Whom they in the flesh confidently worshipped, we their children, would also reverently worship and adore.

Humbly, yet devoutly, would we give thanks to Thee, O God, for Thy great love revealed to us in Christ; and for Thy rich and unfailing providences to us, and to all men. For Jesus' sake, receive our thanks. Continue Thy loving famors to us, and grant us pardon for sin, and life eternal.

Give us, we beseech Thee, the Holy Spirit as our Guide this day, into truth. May He ever comfort us and all Thine in times of sorrow or of trial. May He strengthen us when we are weak. May He raise us up again, if we fall. May He interpret Thy Word to us, and enable us to do Thy holy will with gladness of heart.

With us, bless also this, our nation, and the whole world with Heavenly peace, for Jesus sake. Amen.

John Grant Newman, D.D.,
Philadelphia, Penna.

A Thought

SELF-MASTERY

Would you be strong, conquer yourself. He is twice a conqueror, who can restrain himself in the hour of victory. He that is master of himself will soon be master of others. He that returns a good for evil obtains the victory. Put not your faith in another's sleeve. Conquer thyself. He's a wise man that leads passion by the bridle. The noblest task is to command one's self.

DEFEATS.

It is generally more profitable to reckon up our defeats than to boast of our attainments.—Carlyle.

Voice of the People

Letters to be printed in the Voice of the People column must be received at The Examiner office on the day before it is desired to have them published.

Dear Sir. — An article in your issue of March 10, headed "Christian Science Revolt," seems to have given an erroneous impression to some of your readers. The withdrawal from the Christian Science church of the man referred to cannot with any degree of propriety be considered as a revolt. The right of a person to disassociate himself from this or any other organization cannot be questioned, and where discontent is in evidence such disassociation is perhaps the best for all concerned, at least until the malcontent is healed. The statement made that "any intelligent and thinking member will eventually become dissatisfied with it", is simply an absurd and futile suggestion, or else perchance, a thought fathered by a wish which will never be gratified. All genuine Christian Scientists in the light of their intelligent understanding of the true import of the teachings of Christian Science, are perfectly satisfied with, and have abiding confidence in, the constituted authority of their organization and the suggestion of "politics and management" is positively not correct.

The discoverer and founder of Christian Science, Mary Baker Eddy, established the present form of government and made adequate provision for its continuity. Consequently this institution is functioning and will continue to function harmoniously regardless of, and undisturbed by, any attempted interference.

Notwithstanding the withdrawal of a few disaffected individuals, the last report of the clerk of The Mother Church, the First Church of Christ, Scientist in Boston, Massachusetts, shows the largest increase in membership of any year in the history of Christian Science, with prosperity and harmonious activity prevailing throughout the entire organization, including 26 branch churches in Ontario.

ARTHUR E. BLAINEY,
Christian Science Committee on Publication for Ontario.

East Emily

EAST EMILY, March 17.—Mr. and Mrs. Gordon Mann of Bridgenorth spent the week-end with relatives in East Emily.

Mr. Victor Fee was a visitor to Peterborough on Saturday.

Mr. George Franks was a visitor to Bobcaygeon on Tuesday.

Mr. and Mrs. A. McCarrell received word last week that their son-in-law at Dunsford was seriously ill.

Mr. and Mrs. W. Franks of Peterborough were visitors in East Emily last week.

Mrs. Paul has returned home after an extended visit with friends in Bobcaygeon.

Miss Margaret Middleton of Peterborough called on Mrs. Allen Fee last week.

Mr. Everett Harrison made a business trip to Peterborough on Saturday.

Mr. and Mrs. George Bannon and children have moved to their new home near Peterborough.

Mr. and Mrs. Stanley Mahood of Smith spent Monday with the latter's parents, Mr. and Mrs. George Lowes.

The roads throughout this district have been almost completely blocked. The mail men just got around their routes about three days last week.

Mr. and Mrs. Melville McInnis of Cavan have moved to their farm which they purchased from Mr. John Fee near Omemee.

Mr. and Mrs. Lloyd Boate and children have moved to their new home at Fowler's Corners, and Mr. and Mrs. Wilbert Harrison of Fowler's Corners, have moved to Mr. Boate's farm.

Mr. and Mrs. Harry McQuade were visitors to Lindsay last week.

Mr. Paul McGuire is assessor this season, and has been in this district during the past week.

Mr. Garnet Shield of Mount Pleasant, and Mrs. L. Scott and little daughter, of Homefield, Manitoba, spent last Friday with Mr. and Mrs. Joseph Shield.

Mr. and Mrs. Lloyd Boate entertained a number of their friends at their home last Thursday. The evening was spent in cards and dancing, after which a dainty lunch was served.

Peterborough - - - Ontario

ONTARIO

To Truck Owners and Drivers:

During Early Spring
Avoid Overloads - - Don't Speed

Penalty is a fine or imprisonment, or both. License may be suspended.

Because even the hardest roads may be damaged by heavy loads or excessive speed during early spring, the law especially protects them at this season.

The Ontario Highway Traffic Act declares that during March and April, on roads outside cities and towns:

Solid tired trucks and trailers shall not carry more than half a load;

Pneumatic tired trucks and trailers, with a carrying capacity exceeding three tons, shall be limited to half a load;

Horse drawn vehicles with a carrying capacity exceeding one ton shall be limited to half a load.

The speed limit for solid tired vehicles is set at 15 miles an hour all the year round.

The speed limit for pneumatic tired vehicles of more than six tons gross is set at 20 miles an hour all the year round.

The penalty for overloading at this season is a fine, imprisonment, or both. Licenses may be suspended also. Highway traffic officers have been directed to be especially vigilant in apprehending all who disobey.

Due to the open winter, compliance with these provisions is all the more needful this year.

The Department of Highways desires to impress upon truck and team owners and drivers the provisions of the law and the penalties provided. It seeks their co-operation in a decent observation of provisions so greatly in the public interest. Ontario has an investment of over $170,000,000 in roads and an annual maintenance bill of $4,000,000. This investment must be protected.

Ontario Department of Highways
The HON. GEORGE S. HENRY, *Minister.*

WOMEN'S PAGE

PERSONALS

Mr. and Mrs. J. Robertson, 174 Lock street, were hosts at a very enjoyable surprise party tendered them by a number of their friends on the occasion of Mrs. Robertson's birthday. About thirty in number, the visiting ladies and gentlemen brought with them sumptuous refreshments and spent the evening in the enjoyment of games, dancing and music. Mrs. Robertson was presented with a handsome carving set in a plush-lined case and a reading lamp, the presentations being made on behalf of the assemblage, by Miss M. Miller and Mr. and Mrs. R. Goodfellow. The hostess' sons, Alex and Sam, also presented her with a pretty bouquet of roses and tulips. A suitable acknowledgment was made of these and other gifts. Among those present were: Mr. and Mrs. Goodfellow, Mr. and Mrs. Green and daughter, Miss Myrtle Green, Mr. and Mrs. Adams, Mr. and Mrs. Kelsey and son Leith, Mrs. Buchanan, the Misses Margaret Miller, Mary Clingan, B. Whitfield, I. Parkes, Messrs. Bert Kelsey and Cyril Astol, also Mrs. Anderson and daughter Ruby, of England, who are visiting the former's parents, Mr. and Mrs. Robertson.

• • •

The sergeants of the Peterborough Rangers were at home to their friends at a whist drive and dance held in the Recreation Room of the Armories last evening. Twelve tables of cards were played, with prizes as follows: Ladies' first, Mrs. E. Nicholls, second Miss A. Freeburn, consolation Mrs. C. J. Beauclerc; gentlemen's first, C.S.M. Hales, second Sgt. J. French, consolation Capt. E. Nicholls. The special prize was won by Mrs. Warman. Music for dancing was provided by Mrs. Warman, Miss M. Willis and J. Hodson. C.S.M. J. Gaskill was Master of Ceremonies and T. Griffin was in charge of square dances. Refreshments were served in the Band Room.

• • •

Mrs. G. Garvin of 324 Charlotte street, left to-day for an extended visit with friends in Detroit.

• • •

Mrs. James Brandon of Toronto, is visiting relatives in the city.

• • •

Mrs. Aubrey Woof, of Codrington, is spending the week end with Mrs. W. Barringer.

• • •

A very successful masquerade dance was held at the I.O.O.F. Hall, George street, last evening, under the auspices of the Triple Link Club. Fallis' orchestra supplied excellent music for dancing. Judges of costumes were Alderman and Mrs. R. S. Cotton and Miss Cathleen McCarthy. The prize for the ladies' best costume was won by Miss Polly Parks as a Jester and the gentlemen's prize went to Mr. George Benton, junior, in a feminine impersonation. A committee of the Triple Link Club, composed of Messrs. G. Benton, G. Worboy, C. H. Hotston, R. S. Cotton, F. Tuggey, H. Lemmings and J. Stanley, served delicious refreshments. Among those present were Mr. and Mrs. George Worboy, Alderman and Mrs. R. S. Cotton, Mr. and Mrs. H. Beatty, Mr. and Mrs. H. Lemmings, Mr. and Mrs. Harry Black, Mrs. Easson (as an Irish Colleen), the Misses Marjorie Byers (western girl), Polly Parks (Jester), Evelyn Freeman (Shamrock), Eva Scott (Harem lady), Ruby Theobald (Pierotte), K. Kitchen, Viva Wyatt, Olive Wyatt, Helen Ferguson, Olive McCracken, Hazel Brown, Bertha Sanders, Doris Sanders, Edna Dingman, Kathleen Cooney, Helen Jopling, Eva Beatty, Ethel Brownlee, Frances Andrews, Helen Turner, Connie Downs, Jean McIlwain, Kathleen Leary, Margaret Cotton, Viola Smith, Marjorie Dodson, Peggy Taylor, Eva Patterson, Victoria Goodson, Thelma Fallis, Hughey, Ella Trotter, Evelyn Smallword, Neva Smallwood, Joyce Alcock, Marion Armstrong, Messrs. John Krogh (western cowboy), George Benton (female impersonator), Frederick Clark (Indian), Brotherson, Fred Batten, Sherman Rowe, Bruce McLean, Alex. Sage, Kenneth Young, Archie Menzies, Earl McIlwain, Charlie Evans, Jack Huggins, Harry Siders, Wilson Dunlop, Harry Grose, P. Telford, Kenneth Miller, Jack Hall, John Dawson, W. Willshire, Jack Hillman, Frank Gray, Stephen Steves, Vincent Jacques, Neil Clark, Austin, Armstrong, Norman Nesbitt, Alex. Moore, Ted Bradshaw, Melville Star, Ted Kingdon and Vernon Veeley.

Mr. Frank Oldfield of Toronto, who will be a special soloist at both services at Knox church to-morrow, will be a guest at the Empress Hotel during his stay in the city.

• • •

Members of the staff of the Metropolitan Insurance Company held a very enjoyable dance and card party at the Downyflake last evening.

• • •

A very enjoyable evening was spent at the home of Mr. and Mrs. Burton C. Moore, 552 Chamberlain street, on Wednesday, when about forty friends and neighbors gathered to present Mr. and Mrs. Douglas C. Moore (nee Olive Gosselin) with a miscellaneous shower. The many useful and pretty gifts were brought in in a prettily decorated wagon, drawn by a miniature bride and bridegroom, in the persons of Miss Helen Beatty and Edgar Robertson and were presented by Mrs. George Sexsmith. Mr. and Mrs. Moore were taken by surprise, but responded in a few words, thanking their friends for their kindness, after which the evening was spent in a social manner. Mr. Wm. McLaren entertained the gathering with a beautiful Irish solo and Mrs. George H. Rowe gave a reading which was much enjoyed. Dainty refreshments were served and the evening was brought to a close with a vote of thanks to Mr. and Mrs. Burton C. Moore for the use of their home, to which Mr. Burton C. Moore responded.

• • •

A very delightful Irish tea was held in the auditorium of George Street United Sunday School Hall yesterday under the auspices of Group D of the Women's Missionary Society of the church. The guests were received by Mrs. W. McMillian, convenor of the group, assisted by Miss E. C. McCamus. The room was very attractive with its decorations of green streamers and potted shamrocks. The central table was lovely with green shamrocks and green candles in silver candle holders, and silver service. Mrs. J. E. Todd and Mrs. R. Helson poured tea, which was served at numerous small tables, decorated with green fluted runners and small green potted shamrocks. Those assisting in serving were Miss Leota Fisher, Miss Reta Head, Mrs. J. E. Stephens, Mrs. Wasson, Mrs. Harrison and Mrs. Hatherley. The home-made cooking table, in charge of Mrs. R. Batten and Mrs. McKnott, looked very tempting with its decorations of green and its array of goodies. The table where the Oriental goods was sold was lovely with a Korean lace cloth, beautiful embroidered linens, and several pieces of brass. Mrs. E. W. Coon and Mrs. A. I. Brown were in charge. Mrs. J. Stubbs made the tea. A very enjoyable program arranged by Miss E. C. McCamus consisted of instrumental solos by Miss Pearl Carruthers and Mrs. K. Purdy, and an instrumental duet by the Misses Alda Bartlett and Loreen Lorriman. Two lovely vocal solos were given by Mrs. Frederick Frogatt and a vocal duett by Misses Olive Rowe and Elva Trethewey, accompanied by Miss Miriam Purdy, was much enjoyed.

• • •

Miss Winifred Hicks-Lyne has returned to Toronto after some time spent here with Mr. and Mrs. R. T. E. Hicks-Lyne.

• • •

Mr. and Mrs. John Revoy and children of Montreal, Mrs. James Hartley, and Mrs. George Stanley of Toronto, and Mrs. Draper and children of North Cobalt are guests of Mr. and Mrs. B. Revoy, 292 Woodbine Avenue, who celebrated their golden wedding anniversary on Friday.

• • •

Mr. and Mrs. Percy Revoy and Mrs. Farewell of Toronto are guests of Mrs. J. W. Devall, Water Street, having come down for the wedding anniversary of Mr. and Mrs. B. Revoy.

• • •

Mrs. R. Kingan, Aylmer Street, entertained a number of friends on Thursday evening.

• • •

The Kindergarten Room of Central School was very attractive with its decorations of green streamers, green shaded light, and spring flowers, yesterday afternoon, when a St. Patrick's Tea was held there under the auspices of Central Home and School Association. The guests were received by Mrs. W. H. Lacey, President of the association, and Mrs. D. Vincent, assisted at the door. The central table looked lovely with a silver basket of pussy willows and daffodils, banker with smilax, sprays of shamrock and four green candles in silver candle holders, and small green baskets of mints. The small tables were decorated with green shamrocks and yellow daffodils in silver bud vases. Tea was poured by Mrs. A. Mowat and Mrs. K. S. Wightman, and tea room assistants were Mesdames Lush, W. Skitch, J. Spencer, J. W. Boorman, Latimer, Weir, W. Flannery. Convenors were Mesdames E. H. Bartlett and C. B. Westbrook. The program consisted of vocal solos by Miss Addie Batten, accompanied by Miss Alda Bartlett; a vocal duet by the Misses Olive Rowe and Elva Trethewey, accompanied by Miss Miriam Purdy, and instrumental music was rendered by the Misses Nellie Boorman at the piano, Dorothy Fine, violin; and Aileen Clark, mandolin; a piano duet by the Misses Alda Bartlett and Loreen Lorriman, and instrumental solos by the Misses Margaret Skitch, Kathleen Lacey, Dorothy Boorman, Jean Howson, and Margaret Patoine.

• • •

Miss Madeline Whaley, McDonnel Street, was hostess at a dance at her home on Thursday evening.

Mr. and Mrs. F. A. McFadden and infant son, of Madoc, were in the city yesterday and left on the afternoon train en route to Vancouver, B.C. Mr. McFadden intends to take up fruit farming in the western province.

Women, Your Manifold Duties Require Strength

St. Catharines, Ont.—"During my early married life Dr. Pierce's Favorite Prescription was very helpful to me as a tonic and nervine. I had become all run-down, my nerves were all upset, I could not sleep, and was weak and miserable. I was advised by my mother to try Dr. Pierce's Favorite Prescription and it relieved me of the nervousness and made me a well, strong woman. Since then I have always recommended it to weak women."—Mrs. M. F. Slack, 5 Francis St.

All druggists. Fluid or tablets.

Write the Faculty of Dr. Pierce's Invalids Hotel in Buffalo, N. Y., if you feel the need of free advice.

Ever tried Dr. Pierce's Pleasant (laxative) Pellets? 60 Pellets for 30c.

FEMALE VOICE CHOIR CONCERT

The Female Voice Choir, which has been heard to good advantage during the past six annual concerts, rendered their seventh in the Canadian Legion Hall last night before an audience that almost filled the main auditorium. A great work is being carried on by this choir under the able leadership of Mrs. Robert Bugg, for the proceeds of the annual concert are given to the Canadian Legion for work among needy veterans and the ir families.

Last night's concert was received with great applause from the large audience present. Time after time the artists were called back to give an encore, and probably the concert would not have been as long drawn out if the audience had allowed Mrs. Bugg to carry out her splendid program instead of demanding so many encores.

His Worship Mayor Denne acted as chairman, and in his address stressed with pride the great work for the city and for humanity that the choir was doing. James Abraham, president of the Legion, thanked the members for past gifts, as it has enabled the Legion to do a greater work among the needy returned soldiers and their families.

The program opened with "O Canada" and a very picturesque opening scene in Hawaii with two young ladies sitting on a canoe in front of the main choir. The pianist was accompanied by a Hawaiian guitar quartette, consisting of the Misses Hamilton, Jack Clayton, and Mervin Hamilton. Miss A Barton took the solo part in "Tell Me That You Love Me," and the choir assisted in the chorus. Miss E. Harrison, in masculine costume sang "Honolulu Moon," and Mrs. G. F. Jackson, accompanied by the quartette which received great applause from the audience, sang "Sailing When the Lights Are Low."

Osborne Wells, just a boy, played a selection on the Hawaiian guitar very admirably. Miss Cain was encored for the solo she rendered so creditably. The piano selections by Ardeth Richardson, a little tot who was lifted up by the Mayor so that the little girl could be seen, secured much well earned applause. Mrs. L. Groombridge, assisted by the choir, sang "Blue Eyes," 'and "Lily Land" by the Juvenile Choir was one of the best numbers on the program. Little Annie Fletcher took the solo part and little Phyllis Pink gave a nice dance. Then marched on fourteen girls all dressed in white, who assisted Annie Fletcher in the chorus. The choir sang "Hello, Babby," and Mrs. L. Groombridge gave a dance during the three choruses. A piano selection by Mrs. G. Dafoe followed, after which Mrs. G. F. Jackson sang "When Irish Eyes Are Smiling," 'which was very appropriate for the occasion, and was sung in a clear and true voice. The Hawaiian guitars quartette played two selections, these four young artists playing well together, and well deserved the hearty encore they received. The comic of the evening was the solo by Miss E. Harrison in the same attire as she previously appeared in when she sang "If Mama Knows Where Papa Goes." Alfie Pink, a gold medallist sang in a clear voice without faltering, "Absent," and Miss Elston, another gold medallist, sang "Killarney," 'which delighted the audience. Mrs. Heard and Miss C. Milby played a piano duet and the "Parade Review" by request.

"School Days," a short act put on by the Juvenile Choir and Mrs. R. Bugg as school teacher, was full of comical questions and answers, which added a touch to the program that was greatly enjoyed by everyone.

The solo, "Mother Machree," by Miss P. Smith, and "The Bells of St. Mary's' 'by Miss Cain and the choir brought the program to a close.

Members of the choir are Mesdames G. Jackson, S. Buckton, S. Rathbone, A. Murray, Stott, Bethune, Cairns, Groombridge, A. McKinley, S. McKinley, and Misses M. Wilson, M. Berwick, T. Smith, Groombridge, M. Elstone, A. Barton, Berwick, Murray, D. Cain, Curtis, Bugg, Burnham, Herron, Thorne, Montgomery, and Reynolds.

The Juvenile Choir: Misses A. Fletcher, M. Fletcher, W. Francis, R. Rumary, Rena Rumary, P. Pink, M. Reid, F. Barrie, E. Morrison, I. Surety, D. Hall, M. Hall, E. Doughty, G. Doughty, P. Doughty, D. Sharman, P. Sharman, P. Whatley.

Miss M. Flowers accompanied the choir and Mrs. Buckhan the Juvenile Choir.

PEG O' MY HEART.

(By Jeanette.)

"Peg o' My Heart," the play chosen this year by the dramatic Club of St. Alphonsus Lyceum for their annual dramatic presentation, was given at the Grand Opera House last evening before a good sized audience that appeared to enjoy to the utmost the excellent reproduction of the famous stage success.

Under the able direction of J. J. Southern, each member of the cast gave a splendid portrayal of the allotted role. The setting which remains the same throughout the three acts, was handsome and luxurious and provided an appropriate background for the play, which is set in an aristocratic atmosphere. The gowns worn by the ladies for the cast were beautiful in every instance and added much to the general artistic effect. In the matter of setting and costuming the production was quite outstanding.

Although every member of a well-chosen cast performed in a very able and creditable manner, the honors of the piece naturally go to "Peg," a role taken by Miss Dora Quinlan in a manner that brought her renewed and sincere applause throughout the entire production. Most amateur actors require considerable prompting but it was noticeable Miss Quinlan appeared to know her part thoroughly. A quality of real naturalness and lack of stiffness made the portrayal of the tomboy "Peg" almost professional in characterization at times and the incessant chatter which marks the role "went across" in clear voice that carried to the majority of the audience. Miss Quinlan was extremely well suited in her part, and carried it through in splendid style.

John Madden as Alaric Chichester son of the house, was another actor who appeared to enter quite thoroughly into his role. He also had a touch of snappy professionalism in the way he acted the part of the empty-headed and excessively English youth. Even his laugh was an exact reproduction of the "Algie" type of hilarity, and his make up suited the portrayal to perfection Alaric provided a lot of the laughs.

The remaining roles were carried out in the best possible manner. The story centres about the coming of "Peg" O'Connell from New York city to visit a rich uncle who dies while she is on the way. He has become estranged from his sister Angela during his lifetime, because of her mesalliance with a poor man, but he provides in his will for his niece, if she will remain in England for a year and become educated according to English ideas.

Mrs. Chichester, of Regal Villa Scarborough, is Peg's proud and aristocratic aunt, who, on the morning of her niece's arrival has received word of the failure of her bank. Although she despises the type which the young girl represents, she consents to receive her, and the thousand pounds a year which goes with her. Peg then enters on a month of irritation, during which she shocks the household by her natural manners and uncultured speech, and incidently does the members quite a lot of good. The play ends with her capture of a neighboring baronet and reconciliation to the idea of an English existence.

The supporting members of the cast were well chosen and portrayed in excellent style. The role of the proud and snobbish aunt, Mrs. Chichester, was taken by Miss Geraldine Collins, Ethel, her daughter, was portrayed by Miss Ernestine McManus and Alaric, her son, was John Madden. Jerry the suitor for Peg's hand was well played by John Roach, and John Holland had the part of Christian Brent, a married neighbor with who Ethel has an affair whose nearly tragic conclusion is forestalled by Peg's quick wit and kind heart. The role of the lawyer, Montgomery Hawkes, was played by James Geraghty. John Gainey was the footman and Miss Minnie Allen, the maid. The fine directing ability of J. J. Southern was manifested in the production, while Miss Lillian Hurley acted as pianist for the evening, playing Irish music between acts. Property managers were M. Whaley and H. Archambault.

The play abounds in comedy and several little episodes were the cause of much laughter. Peg's soliloquies over her proud relations and the warm-hearted enthusiasm which she projected into her constance defence of her father, were especially good. There was a ludicrous proposa scene where Alaric, prompted by his mother, proposes to Peg's bank account, and, incidentally, herself, and then thanks her joyously when she refuses him while the very realistic fainting spell by Miss McManus was another excellent bit.

Michael a white French poodle with a green ribbon, the property of Peg, and despised by the Chichesters was another unconscious but very good actor, proving himself to be a well behaved canine member of the cast. When Peg was compelled to choose between Alaric and Michael she preferred the latter.

At the conclusion of the play pretty bouquets of flowers were presented to the ladies of the cast, also to the pianist, Miss Hurley.

OUR ASBESTOS OF FINEST QUALITY

Canadian asbestos, which is the chrysotile, or serpentine variety, is of the finest quality, and, on account of its softness, silkness, and tenaile strength, is in great demand for all kinds of asbestos products, but particularly for asbestos textiles.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care of Every Young Mother.

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

HOROSCOPE

The Stars Incline, But Do Not Compel

(Copyright, 1928, McClure Syndicate.)

SUNDAY, MARCH 18, 1928.

Good and evil influences appear to have about equal power in this day's planetary government, according to astrology.

It is a time for rest and relaxation that should free the mind from all thought of business or financial matters.

The clergy are subject to stimulating and helpful aspects that should rebound to their benefit.

The seers point out that religious alliances will be much discussed in the coming months and they counsel plenty of brotherly love as an antidote for prejudices.

While this configuration prevails persons who occupy official positions will be inclined to ignore public curiosity regarding their special church labels.

Mars is in a place making for bitter controversies on all subjects, even those affecting trivial domestic questions.

Uranus frowns on spiritual asboration while this rule prevails and preachers may find congregations unresponsive.

There is an aspect supposed to be good for those who enjoy the delights of the table. Dinners today should be successful.

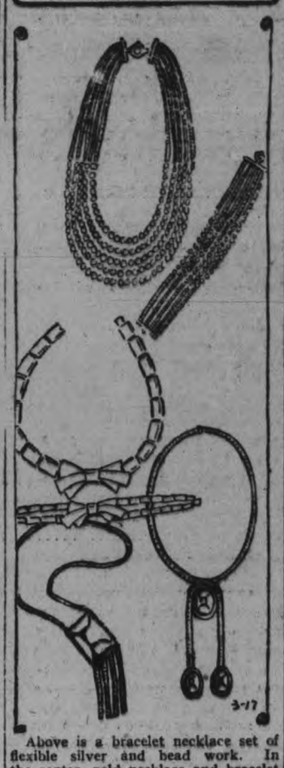
This is not an auspicious aspect for seeking one's friends or patrons. Visits should be delayed.

Suitors may find Sunday evening calls most disappointing since girls may be exacting and critical in choosing husbands under this direction of the stars.

Warning is given that diseases of the head and throats may be quite prevalent at this time.

Children born on this day probably will be alert of brain and deft of hand. They usually meet with success in life. Many surgeons are born under this star.

DRESS
By MARY MARSHALL



Above is a bracelet necklace set of flexible silver and bead work. In the center, gold necklace and bracelet with bows. At the right a flexible gold and silver necklace adorned with cut topazes, and last, at the left another flexible necklace with a single large cut topaz.

In Paris they are using jeweled dress ornaments that are attached to the frock or hat by means of a very small screw which secures perfect fastening without leaving any sort of mark on the fabric. I have not seen these in this country yet, but a correspondent in Paris says they are meeting with approval there.

The watch is sometimes carried on the cigarette box. Or at least some of the smart shops in Paris are selling jeweled cigarette boxes with tiny watches set in at one side. Then there are match boxes with watches inset. Cigarette lighters are still smart and there has been a revived interest in match boxes.

There does seem to be a terrific effort on the part of the jewelers at present to keep abreast with the times and instead of being the most conservative of mortals jewelry designers nowadays manage to keep their fashions moving more rapidly than the milliners.

Flat plain silver or gold jewelry is not, of course, a new thing under the sun, for necklaces and bracelets amazingly like the sort considered most up-to-date were worn by the women of ancient Egypt.

Jewelry designers are indeed fortunate in having materials of such permanency to work with. Instead of having simply representations of ancient work of their craft to follow—as is usualy the case with dressmakers and milliners—they have an almost limitless supply of ancient rings, pendants, necklaces, bracelets and other ornaments in almost perfect condition from which to seek inspiration.

Vieing for favor with the plain gold and silver ornaments are the square cut crystal ornaments. In fact, not to wear square cut stones or crystals of some sort is, in the estimation of some women, not to be in the fashion at all.

CANADIAN NATIONAL

MONDAY, MARCH 19, 1928

Early today sinister stars frown upon the Earth, according to astrology, but later the planetary aspects are benefic.

Under this sway there may be a sense of nervousness and irritability and quarrels are easily started.

It is not an auspicious day for beginning journeys, for delays and even accidents are indicated, especially for those who travel by water.

Oil again will come into general attention, for there will be many contrary opinions regarding its commercial aspects.

This is a fairly fortunate day for seeking positions and efforts made under this rule may lead to first rate employment.

Newspapers and magazines again are subject to the best possible direction of the stars.

Many changes are indicated for journals and all periodicals and they will be for the better, it is forecast.

Women now come under a fortunate sway that will enable them to make the best use of their talents.

Educational reforms will engage attention and child study will develop into practical benefits.

Africa is to benefit through aviation and this year will mark great development.

Terrible accidents have been foretold by the seers as one of the probabilities in the early spring. Fires also will cause great losses.

Persons whose birthdate it is may discover that an apparent sorrow leads to great happiness in the coming year, which should be generally lucky.

Children born on this day probably will be extraordinarily intelligent and able to succeed in the learned professions.

CANADA AND CZECHO-SLOVAKIA SIGN COMMERCIAL CONVENTION

Each Country Grants Imports From Other Favored Treatment.

CANADA SELLS MORE.

Trade With European Republic in Last Fiscal Year is $6,500,000.

OTTAWA, Mar. 16. — (Canadian Press.)— A convention of commerce between Canada and Czech-Slovakia was signed yesterday by Hon. James A. Robb, Minister of Trade and Commerce, on behalf of Canada, and by Monsieur Frantisek Kvetl, consul of the Czecho-Slovak republic, in Montreal, on behalf of Czecho-Slovakia. The convention provides for the mutual exchange of most-favored nation treatment.

The principal exports from Canada to Czecho-Slovakia are food products, the chief item being flour. It is estimated that in the last fiscal year the value was about $4,875,000. Canada also sells agriculture machinery, rubber goods, canned fish, etc., to Czecho-Slovakia.

Imports from Czecho-Slovakia in the fiscal year 1927 had a total value of $1,726,922, the chief items of importance being tableware, of glass and china, glass and glassware.

The convention will be submitted to Parliament at the present session. In the meantime, the present temporary trade agreement is continued. This temporary agreement was put into effect on the first of January, 1927, and was to remain in force for 15 months, but by an exchange of notes in February of this year it was arranged that it should continue in force until a new convention could be put into force.

WASHINGTON ADOPTS NAVAL AMENDMENT

Request President To Urge Necessity For Another Armament Conference.

WASHINGTON, March 17 (Canadian Press). — Without debate, the House yesterday adopted an amendment to the $274,000,000 new warship construction program to request the President to urge the "necessity" for another international conference for the limitation of naval armaments.

The proposal, sponsored by Representative Sproul, Republican, Kansas, was accepted without a vote. Shortly after its adoption, an effort to reach a final vote before night adjournment was blocked by Representative Blanton, Democrat, Texas, and the measure was carried over for disposition to-day.

The House also accepted by a vote of 115 to 102 an amendment by Representative Dallinger, Republican, Massachusetts, to provide that eight of the proposed sixteen ships be constructed in Government navy yards.

Dallinger contended that it was fair that at least half of the proposed 15 cruisers and one aircraft carrier should be built in the navy yards, and several members supporting his stand said that the statement had been made that the program had been offered to Congress for the relief of the private shipbuilding industry.

Final Vote Postponed.

Blanton opposed the Dallinger amendment, and after an unsuccessful effort to obtain a record vote on the proposal, threw a Parliamentary monkey-wrench into the plans of House leaders for an immediate final vote. He demanded the reading of the engrossed measure, which would have necessitated sending the Bill to the Government Printing Office for printing as amended. House leaders thereupon postponed the final vote until to-day.

Throughout the consideration of the Bill, a half-dozen unsuccessful attempts were made by Representative McClintick, Democrat, Oklahoma, to materially alter it. One of his proposals sought the construction of fifteen submarines rather than cruisers and also the provision of funds to equip the 18 United States capital ships with additional airplane launching facilities. This was rejected 109 to 22.

OBITUARY

SAMUEL G. WAY.

TORONTO, March 16.—(Canadian Press.)—Samuel G. Way, editor of the Tweed Advocate, and owner of the Dominion Foundries in that town, died in the General Hospital here today. He had been operated on for appendicitis.

OSHAWA WINS IN EXHIBITION

Beats Campbellford 8-6 in Friendly Hockey Match.

FIGHT MARS END.

CAMPBELLFORD, Mar. 17.— For the second time this season Campbellford suffered defeat at the hands of the Oshawa General Motors team only this time the margin was not quite as wide as on the previous occasion. The score last night was 8-6 in favor of the motor city representatives, and the score before was 7-3. Practically the same players took the ice for both teams as had met before. Charles Holmes, Campbellford, was referee and managed to get through the sixty minutes with only ten players having been sent to the bench. Most of the offences were of a minor nature, but when a local player elected to use his fists, the referee summoned the police. But his frantic summons found no response since the management of the arena would not allow such action to be taken unless as a last resort. The player was suspended for the remainder of the game which was nearly finished anyway.

Of the eight goals scored for Oshawa, four go to Whitton, the left winger, and one each to Houck, Joyce, Stephen and Elliot. The six goals for the home team were divided, with Cowell getting three, Horkins two and McArthur one. Oshawa players were given four of the ten penalties and six stayed with the Campbellford team. Of these six, four occurred in the last period. The shots on goal were evenly divided, or as nearly so as an od dnumber may be divided. Oshawa shot thirty-six times on the local net and the visiting goalie had only one less, thirty-five, to deal with. In the first period, Oshawa went into the lead with the score at 3-1. In the second session there were two goals chalked up for each side, 5-3. The last frame gave the goal-tenders more to do, and three apiece went by them, 8-6. Between periods and before the game started there was music by the band. Oshawa was rather late arriving, but lost no time in getting to the arena and into their regalia. The almost impassable condition of the Campbellford-Brighton highway is given as the reason for their tardiness.

First Period.

Two minutes after the game commenced, Oshawa slipped one into the local net, but an offside pass ruled out the counter. After another three minutes of play, Cowell fooled the Oshawa goalie with one from the side and close to the visitors' blue line. Whitton evened the score in short order and it began to look like a job for an accountant. Johnson relieved Cowell and Horkins drew the first penalty for using his arm illegally. Oshawa gave their lone sub a chance on an offside in front of the Campbellford goal. Elliot, Oshawa, was penalized for using his body and Garrison stopped a snappy shot from about six feet out. Fox had a narrow escape a minute later when he managed to get the puck in his hands while on his knees in front of his net and pass it out backwards between his feet. Johnson made a spectacular slow motion rush, but failed to get by the gaolie. Blue shot twice and there was a pile-up in the Oshawa net, but no goal. Again Blue figured when he came within an inch of scoring on a pass from Horkins. Whitton scored the tie breaker for Oshawa on a close-in shot following a combination into Campbellford territory. Just before the bell rang, Houck tallied another for Oshawa and the game ended 3-1 for the visitors with only one penalty for each during the epriod. Ten shots on Oshawa goal, fifteen on Campbellford.

Second Period.

With about three minutes of the second period gone, Whitton scored the fourth goal for Oshawa, and Horkins did the same for the home town boys in less than a minute afterward. There was a scramble in front of the Oshawa net, but no score. When Ibey was getting away to a flying start, Little got in a little slugging and was sent to the penalty box.

In an attempt to prevent another goal, Fox rushed out to meet the shot but Joyce shot past him and put Oshawa three goals up. The big lead was short lived since Cowell scored on Horkins rebound. It was an easy matter just at the moment since the goalie was on his knees and the net was unguarded. Joyce drew a penalty for a trip and Ingram got a rest for hoisting an Oshawa player into the boards. Garrison made two miraculous saves just as the gong rang for time. The period ended with Oshawa leading, 5 to 3, two penalties and one for Campbellford, eleven shots on the local goal and ten on Oshawa net. Just as the players were leaving the ice, Blue took a cramp in his leg and had to be carried off after he was straightened out. He was out again for the last spasm.

Third Period

At the outset, the Oshawa team seemed to fall far from their excellent form of the first of the game. The wings did not get the passes when the centre man skated them up the desired range for a corner shot. There was a mad minute around the local net, but no score. Fox rushed out of his goal and saved a shot when Ingram missed his check. Little and Horkins were penalized for a slight disagreement, and Blue followed almost at once for tripping. With only three men out, Campbellford were hard pressed for a minute till Horkins and Blue got out of pawn and back into the game. While they were off, Campbellford got a shot at the Oshawa goal and lodged the puck in the goalie's pads. Oshawa took advantage of the interval to substitute. Horkins got too close to the Oshawa net and the goalie upset him. Then followed a rain of shots on the visitors' goal, which was only stopped when Stephen got away on a lone rush and scored from a corner shot.

Ten seconds later Horkins retaliated and the score stood 6 -4. About three minutes more and McArthur stepped into the limelight when he followed in on a low shot and scored on the rebound. The local fans went wild with delight and hope rose to a new high level. One goal more and the score would be tied; two, and Campbellford would be in the lead. But their hopes were of short duration, Houck scored on a pass from Elliott. Holmes ruled that the goal did not count since there had been offside. Oshawa maintained that the offence had been committed after the goal was scored. Holmes stuck to his decision and the goal was not counted. The play began and as it passed the penalty box, Ibey, whose time was up at that critical moment, stepped out into the play. Somehow an Oshawa player went sprawling on the ice, and Ibey was blamed for tripping him. Holmes sent him back for five minutes and Ibey let loose his fists in defence of his innocence. Holmes called loudly for the police but there was no response. Several players from both teams mixed in and stopped the battle and Ibey was sent to the dressing room. The period and, incidentally, the game were all but finished, but Elliott managed to make another count for Oshawa. Cowell returned the compliment just before the bell rang. Thus the final count stood at 8 to 6 for the visitors, with three goals scored by each team during the period. There were five penalties, four for Campbellford and one for Oshawa. There were ten shots on the local goal and fifteen on the Oshawa net.

The teams:

Oshawa.—Goal, Garrison; defence, Houck and Elliott; centre, Joyce; wings, Stephen and Whitton; sub, Little. Manager, Stuart.

Campbellford.—Goal, Fox; defence, McArthur and Ingram; centre, Horkins; wings, Ibey and Cowell; subs., Johnston, Blue, Blute.

Referee—Chas. Holmes, Campbellford.

RUMORS OF WAR BELIEVED FALSE

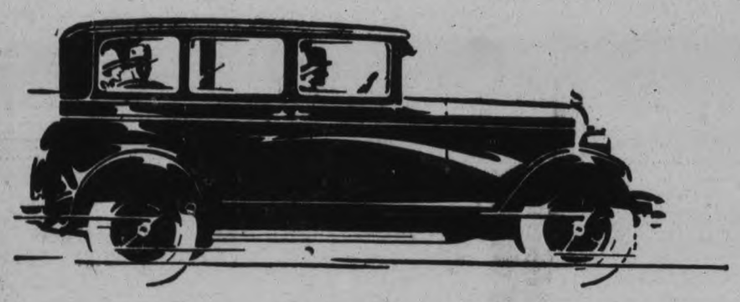
Report From Bagdad Says That Ibn Saud is Restraining Tribesmen.

PREVENTING RAIDS.

BAGDAD, March 17 (Canadian Press). — News received here stated that the intervention of Ibn Saud, king of Nejd and Hedjaz, prevented a raid by Akhwan tribesmen into the neighboring state of Irak, which is under British mandate.

LONDON, March 17 (Canadian Press). — Bagdad despatches saying Ibn Saud had prevented a raid by a tribal leader on the Irak frontier are interpreted here as disposing of the recent reports that Ibn was supporting the raiders and had declared war on the British mandatories.

The Great New
CHRYSLER "62"



• • with truly exceptional features and at amazingly low prices

No one can see—or drive—or even read the specifications of the Great New Chrysler "62" without marveling at its value.

Here is everything that Chrysler quality has come to mean among motor cars—and at prices that upset all past ideas of what $1525 will buy in an automobile.

Here is typical Chrysler performance—all its snap and dash and zip with 62 and more miles an hour whenever and as long as you wish.

Here is typical Chrysler comfort—with such exceptional features in a car of this price as saddle spring seat cushions and the rubber shock insulators which have previously been exclusive with the famous Chrysler "72" and Imperial "80."

Here, in brief, is typical Chrysler excellence in design and manufacture—reflected particularly in the six-cylinder Chrysler 54 h. p. engine, with 7-bearing crankshaft, invar-strut pistons, ventilated crankcase, rubber engine mounting and 4-wheel hydraulic brakes.

Try to match these Chrysler "62" faatures in any other six priced from $1525 to $1785. Then drive the "62." Put it to any test you choose. We are confident you will agree that the price of the "62" cutclasses and outbuys all competition.

GREAT NEW CHRYSLER "62" PRICES—Business Coupe, $1525; Roadster (with rumble seat), $1525; Touring, $1550; Two-door Sedan, $1625; Coupe (with rumble seat), $1675; Four-door Sedan, $1700; Landau Sedan, $1785. All prices for delivery in Peterborough and include two Bumpers, Spare Tire and Cover, and License.

IN PETERBOROUGH CHURCHES

BETHANY TABERNACLE.

Miss Nellie Jones, of South China, gave an intensely interesting missionary address on the "Perils of Bolshevism" last night in Bethany Tabernacle.

Miss Jones went through those harrowing uncertain days before and after the orders came for all missionaries to leave their stations. Miss Jones vividly pictured the sudden change of the Chinese people towards the missionaries brought about by the teaching of the children to curse the missionaries and the anti-Christian literature broadcasted by the communists and students.

The speaker told how wonderfully well God protected them from molestation when the cry, "Foreign devil, kill her, kill her," would be raised as she passed through the streets of Kweielin. Miss Jones will tell tonight of their escape down river and of God's unfailing care for them.

The address of Rev. A. M. Blackett on "The Marriage Supper of the Lamb" was inspiring and very helpful to those who were present.

Mr. Blackett is an intensely earnest speaker and holds his hearers in perfect attention. In speaking of this great event, which is yet future, he emphasized the fact of it, the principals, and the guests, and he spoke earnestly of the one who had purchased and prepared a wonderful future for those he loved (the church). The speaker said that the Lord had this place of closer fellowship for those who, suffering with Jesus, shared His shame, endured His reproach, bore faithful witness to His name, and overcame wickedness, and he invited his hearers to live so as to win this exalted place by the side of Jesus, the heavenly bridegroom.

Mr Blackett will speak to-night on the subject, "The Great Tribulation and the Anti-Christ." Meeting Saturday afternoon at 3 p.m. The convention closes Sunday night.

Greater Speed.. Greater Power.. Greater Beauty

All at no increase in price

THE new Willys-Knights offer a degree of fine performance such as you never have known before. Only the Willys-Knight offers you the advantages of higher compression—greater speed, flashier activity—with none of the disadvantages so conspicuous in poppet valve motors, such as undue wear and tear, and the need for special gas to prevent knocking even after limited mileage.

And the patented, exclusive Knight engine is the only type of engine that constantly grows smoother and quieter with use.

All of the new Willys-Knight color combinations are lastingly attractive, rich and harmoniously blended. They are fitting complements to the low, graceful Willys-Knight bodies, adding beauty of color to beauty of design.

Willys-Knight Great Six prices from $2365 to $3695; Standard Six $1480 to $1610; Special Six $1625 to $1895. Prices f.o.b. factory, Toronto. Taxes extra.

The Willys-Knight Great Six Five-Passenger Coupe illustrated below is smart and distinctive in design, with a roomy, comfortable interior intelligently planned for greatestpossible riding and driving comfort. Price $3140 F.o.b. Factory, Toronto Taxes extra.

NOW! A full range of Willys-Knight and Whippet commercial cars and trucks at attractive prices.

SAME SYMPTOMS IN MANY CASES

An Anaemic Condition Easily Recognized—Calls For a Blood Builder.

In most cases of anaemia the symptoms are almost the same. The sufferer grows pale and is easily tired after the least exertion. The appetite is fickle and the patient loses in weight. Sometimes there are headaches, and often inability to sleep well. As the blood becomes thinner the symptoms become more pronounced and often there are fainting spells. All this shows that the blood is thin and watery, and at the very first symptoms of this condition the patient sould take Dr. Williams' Pink Pills, the most reliable blood-builder and nerve tonic known. The sole mission of this medicine is to enrich the blood, and when that is done all the distressing symptoms disappear. Among those who have reason to praise this medicine is Mrs. M. E. Patterson, Shanklin, N.B., who says:—"About four years ago I became very much run down, I could not eat, sleep nor rest, and I grew so nervous that the smallest things would annoy me. Eventually I grew so weak that I did not have strength to move about without help. I was just a miserable wreck, and became very much discouraged as I had tried many medicines which failed to help me. In this wretched state a friend urged me to try Dr. Williams' Pink Pills. I did so and before long found they were helping me. Gladly I continued taking the pills until I fully regained my health and strength and I have since continued in the best of health. Later my daughter became ansemic and six boxes of the pills restored her to health, strength and color. Naturally I consider Dr. Williams' Pink Pills a blessing to weak, run-down people."

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

week has caused the high banks of snow to grow less. Trappers are still unable to get started, so the season will be short.

MISSION TRAINING HELPS ESKIMOS

Bishop Dewdney Tells of Improvement Made in Morals.

WINNIPEG, Man., March 17, (Canadian Press).—Bishop Dewdney, of Keewatin Diocese, writing to the Tribune says:—

"It would be neglecting the responsibility I feel toward all the Eskimo tribes I have visited if I did not call attention to the fact that in all the eastern parts where teachers and missionaries have been at work there has arisen among the people a strong feeling against murder and infanticide. I cannot refrain from pointing out that it costs only a couple of thousand dollars to maintain a missionary in these regions, a man whose work will render that of the police largely superfluous.

$1000 Cash IN PRIZES

Solve this Puzzle

What is the Message?

THAT KEPT COLUMBUS STRUGGLING ON WHEN OTHERS HAD ABANDONED HOPE

$1000 Cash in prizes

1st Prize	$500	Cash
2nd Prize	$150	"
3rd Prize	$75	"
4th Prize	$25	"
5 Prizes $10 each	$50	"
10 Prizes $5 each	$50	"
75 Prizes $2 each	$150	"

A Few Pointers on Solving Puzzle

If you succeed in getting the correct letter in each square, you will be able to solve the message. There are four words in the message.

Start at the left hand square in the top row and try to trace the line until you come to a letter; put that letter in the square. Do the same with each square until you have a letter in each square.

Rules of Contest

1. Use sharp lead pencil; make your letters as near to the shape of the letters in the circles as you can.

2. Write your name and address plainly in lead pencil at the bottom of this advertisement. Say if Mr., Mrs. or Miss.

3. Cut advertisement out on dotted line and send it to us.

4. Be neat; remember points are also awarded for neatness.

5. Employees of Atlantic Mills and their relatives are barred from this Contest.

6. Only one entry will be accepted from a household.

Extra copies of this advertisement can be had by sending us a stamped addressed envelope.

NOTE

Any person who solves 2 or more words correctly will receive an IMMEDIATE award in addition to any other prize they may win.

Nothing to Sell

YOU WILL POSITIVELY NOT BE ASKED TO SELL ANYTHING FOR US in order to win any of the Big Cash Prizes offered above.

When we receive your entry, we will advise you of the number of points you have gained and ask you to make a small purchase from our catalogue to qualify.

YOU DO NOT OBLIGATE YOURSELF TO DO ANYTHING FOR US BY SENDING IN AN ANSWER TO THIS PUZZLE.

GIVEN

Every contestant who qualifies WILL BE GIVEN samples of our merchandise valued from 50c to $2.00.

My Name is .....

Street or Box No. .....

Town ..... Province .....

Write name and address plainly in lead pencil; state whether Mr., Mrs. or Miss.

Kitchener Defeats Porcupine 3-2 in Senior Final

O. H. A. CHAMPIONS WIN LEAD IN HARD FOUGHT OPENING GAME

Kitchener's Greater Weight Fails To Stop Northern Body Checks.

LOSERS TIRED OUT.

Play Tense From Bell To Bell —Big Crowd Sees Battle.

TORONTO, March 8. — One lone goal parted Kitchener and South Porcupine in the first game of their Allan Cup elimination series last night, the Green Shirts gaining the small but precious margin in one of the most spectacular and thrilling conflicts staged at the historic Arena Gardens. Kitchener, kings of the Senior O.H.A., won by a 3 to 2 score but were forced to overcome a two goal advantage gathered by the men of the North in the first half of the game. Seldom has a local hockey crowd been treated to so much excitement in one hockey game and there should be few empty benches when the feud is renewed at the Gardens this afternoon. Veterans of many campaigns all agreed that few games in the glorious past compared with the ice struggle last night.

Where the North Country failed in its annual challenge for the Junior crown, the Seniors are more than making up; for South Porcupine's play will go down as one of hockey's epics. Burned out after a gruelling three-game series with Port Colborne, the Porkies came back last night and made the best senior team in Southern Ontario step the limit to get the victory. Although outweighed the plucky Northerners put up a barricade of body-checks that wrecked and rocked the Green Shirt attackers. "The quality of mercy was not strained" as the Porkies stepped into the biggest and smallest of the Kitchener staff, almost every thrust at the Northern goal being halted by bruising, battering checks.

From bell to bell the crowd was kept on edge, for tense moments, thrilling, spilling plays, close calls on first one goal, then the other, were all crammed into the hour's hockey. Seldom has so much action been provided in one evening at the Arena, and through it all the northerners although down on the score, earned the most of the praise. The crowd was almost solidly behind the striped staff from the North Country and there is no doubt but that most of them will be back when the battle is resumed this afternoon. The teams:

Kitchener—Goal, Berner; defence, Schneider and Karges, centre, Seagram; wings, Roth and Molson; subs, E. Heller and O. Heller.

South Porcupine—Goal, Thornton; defence, Murray and Cain; centre, Jemmett; wings, Spence and McHutchion; subs, Gagnon and Saunders.

Referee—Stan Burgoyne.

The Summary

First Period

No score.

Second Period

1—S. Porcupine, McHutchion (Jemmett) 3.37
2—S. Porcupine, Gagnon (Saunders) 5.40
3—Kitchener, Karges..... .40
4—Kitchener, Seagram ..... .13

Third Period

5—Kitchener, Molson 14.14

Final Score

Kitchener, 3; South Porcupine, 2.

GIRL'S DOG WINS IN ANNUAL RACE

Beats Those Entered By Boys in Winnipeg Event.

WINNIPEG, Man., March 17.—(Canadian Press).—Mere boys have no chance at all when Violet Wood, East Kildonan, is racing her dog, Beaver. For the second time in two years Violet and her dog defeated a field of boy competitors in the children's annual dog races on York avenue. No other girl was entered.

Newspaper men of Cairo, Egypt, are forming a press association and will build a club house on government ground.

Hockey Scores

Bank Series, T.H.L.

zRoyal wins round 6 to 1.
z Royalw ins round 6 to 1.

Canadian-American.

Quebec 1, New Haven 0.

MARLBOROS OUT OF JUNIOR RACE

O. H. A. Champions Eliminated By Ottawa Gunners, 3-2 at Kingston.

SUDDEN DEATH GAME.

KINGSTON, Ont., March 17. — Ottawa Gunners, champions of the Ottawa district in a sensational game here last night, defeated Toronto Marlboros, O.H.A. title holders by the score of 3 to 2 and thereby won the right to play Regina for the Dominion junior title.

It was one of the most surprising victories ever seen here. The Dukes ruled three to one favorites before the game, and even in the first period it seems as though they were holding back. But the Gunners upset the dope when they back-checked like fiends, and their goalkeeper Maynard Peterkin gave a brilliant exhibition in the nets.

Marlboros' showing for two periods was very disappointing to their supporters. They failed to make the effective rushes expected of them and only in the last ten minutes of play did they show the spurts which carried them to the O.H.A. championship. Even then when they had the chance of victory they were unable to beat Peterkin more than twice.

McPherson Outplayed.

"Shrimp" McPherson, who was expected to star against the Gunners, in reality fell down on the job. He was outplayed at centre and was finally switched to the wing, with Mercer at centre, and while the change was an improvement, the Dukes failed to seize their opportunities until it was too late.

It was perhaps the backchecking of Tabor and Murphy, along with the goal-tending of Maynard Peterkin that beat the Dukes. Time and again the two Ottawa forwards broke up Marlboro attacks, while Peterkin's work in the nets had seldom been equalled on Kingston ice.

Red Horner marred his work on the defence by too strenuous body checking ,and the result was that when Gunners scored their first goal the Dukes had two men in the penalty bench. All through the first two periods, the efforts of the Dukes to break through failed, and only in the last period did they flash their old time stuff.

Gunners— Goal, M. Peterkin; defence, McInenly and Armstrong; centre, Murphy; wings, S. Peterkin and Tabor; subs, Howe and Quinn.

Marlboros— Goal, Harris; defence, Horner and Irvine; centre, McPherson; wings, A. Connacher and C. Conacher ;subs, Jackson and Mercer.

Referees—A. Brouse and C. A. Devlin, Kingston.

The Summary:

First Period.

1. Gunners, Murphy, 18.54.

Second Period.

2. Gunners, Murphy, 1.47.

Third Period.

3. Gunners, Tabor, 5.26.
4. Marlboros, Mercer, 10.09.
5. Marlboros, A. Connacher, 2.51.

IN TRAINING CAMP

TID-BITS FROM MAJOR CAMPS IN SOUTH

ATLANTA, Ga., March 17 (Canadian Press).—The holdouts so far as baseball veterans were concerned, had been narrowed down to Pete Donohue, Cincinnati pitcher, last night, with Waite Hoyt, Yankee hurler, the latest to sign his contract.

Hoyt signed yesterday after considerable dickering with officials of the New York Americans, while Rube Bressler, earstwhile Red Leg performer, has joined the Brooklyn Robins after having bought his release from Cincinnati. Hoyt's new contract is understood to call for $20,000 annually for two years.

Ty Cobb, veteran outfielder, who has been doing his conditioning at his home city, August, Ga., joined his team-mates, the Philadelphia Athletics, yesterday when they went to Augusta to play the Giants an exhibition game.

At Avon Park, Bill McKechnie, St. Louis Nationals manager, announced that Danny Clark, 31-year-old infielder, had been released to Houston of the Texas League.

E. S. Barnard, president of the American League, assisted Bradenton, Fla., citizens during the day in honoring Bill Doak, Brooklyn pitcher, who is a citizen of that town.

With all of the slow contract signers now in the fold except Donohue, the remainder of the training season, with only a few days to run before the clubs begin to head northward, will be marked by departure of many rookies to the minors.

Training games yesterday resulted as follows:

At Bradenton, Fla.:

Brooklyn	7	13	0
Boston	2	7	2

Vance, Doak, Petty, Elliot and Hargreaves; Morris, Bennett and Berry.

At Augusta, Ga.:

Philadelphia Americans	5	12	0
New York Nationals	2	7	2

Grove, Rommell and Fox; Barnes, Fitzsimmons, Faulkner and Hogan.

At Winterhaven, Fla.:

Baltimore Internationals	5	8	1
Philadelphia Nationals	1	15	0

Henderson, Boswell, Bolen and Dixon Koenig; Baber, Green, Baecht, Wheat and Schulte, Wilson.

At Avonpark, Fla.:

New York Americans	3	11	2
St. Louis Nationals	8	11	1

Moore, Campbell, McEvoy and Collins; Haines, Alexander, Berley, Sherdel and O'Farrell, Manusco, Davis.

At West Palm Beach, Fla.:

Newark Internationals	1	1	4
St. Louis Americans	5	6	1

Moore, Brennan and Skiff, Utzman; Nevers, Crowder and Schang.

At Monterey, Calif.:

Pittsburgh Nationals	7	11	3
San Francisco	11	15	1

Brame, Perry and Gooch; Jacobs, Moudy, May and Sprinz.

Inside Sportin' Dope—By a Wise Cracker

Yes, we ain't got no hockey championship, although the Collegiate kids come within 1 gool of bringing home the bacon. They mighta turned the trick only they was flood victims at Belleville the other night when the 2-marker lead they had hung up here was drowned in inches of water and slush. They do say that a gool empire what could see scores when they wasn't any and was blind when they was 1 was the best man that the Belleville students had. But for me, I'd say the bird what figgered out that it would be good strategy to sweep all the slush down to the end of the rink the Petes would hafta attack in the last period was the admiral what really win the naval engagement. Right there, with a water hazard to get over before they could hope to find the net, the Petes was sunk with all hands on board. A guy what could dope out a scheme like that in the pinches sure oughta make his mark in politics later on. Keep an eye on that bird; you're gonna hear off him again. Anyway, Mac, the kids from the Confederation Square education foundry has had a great season, and they deserve all kinds of credit for what they done. Belleville papers admit that they was a fishy smell to that game the other night, and any time you find them sheets going so far you can bet the last of the family plate that the Petes was robbed both ways from the jack. Whatever glory they is in that kind of a win Belleville is welcome to, but somehow you expect a higher level of sportsmanship in school contests.

By the way, Mac, Peterborough was in a way represented in the Allan Cup serious. This Mister Spence what starred for the South Porkypiners was a member of this year's Peterborough team, at least he was until the end of last June when he developed a yearning for the great open spaces up north and pulled steaks. He woulda been a nice help to the lads here.

I see that Oshawa's got enough new ball players in to make up a team by themselves. Mister Jeff Hardill sez he ain't eat since he read the list, but he should remember that a lotta birds what is darned good ball players around Christmas seem to get the sleeping sickness or the hookworm or something long about the 24th May, and the chances are they ain't so many stars in that list Oshawa imports as you might imagine. You can't tell nothing about them till they step out there to strut their stuff. Meanwhile they's going to be a opening on the Peterborough ball club for some young players with ambition and the ability to step up to the plate and hit the old Spalding on the piccolo, what I mean. Mister Jimmy Hall, the ball hawk, is going to be chasing line drives up in the Inter-county League next summer, so his shoes will have to be filled, and they's going to be some more berths to be plugged up. It'll be a chance for flaming youth to come through.

How do you like the way they's giving this South Porcupine outfit a ride in the Allan Cup serious? Here they are just out of a tough 3-game setto and they toss 'em in against Kitchener for 2 games within 48 hours. If they come through they'll certainly be entitled to use the soft drink slogan, "They hadda be good to get where they are."

The Grads are coming home next week, and I suppose they'll get as big reception as if they had done something more than just going through the motions over there. The Olympic serious was really decided a year ago, and all the Grads hadda do since was duck soup. Anyway, they bring the world's championship back, and that's worth a cheer, whether in hockey or badminton, or what have you?

Well, Mac, the Budget debate's over, and they ain't no use me wasting language neither, so I'll go off the air.

Sportfully yours,

A. WISE CRACKER.

DEMANDS MADE FOR CUP FINAL SEATS

Big Football Match Will Be Played April 21st at Wembley Stadium.

LONDON, Eng., March 17.—(By Canadian Press).—Though the final of the English Football Association's cup competitions is a long way off—it takes place on April 21, to be precise—applications have already been received by the authorities at the Wembley Stadium where the battle is staged, for 10 times its seating accommodation.

The magnet of the "Final" is one of the most amazing things in British sport. Since the last game of the tourney has been played at the Wembley Stadium the event has become something in the nature of a national festival. No matter what are the competing teams, the demand for seats from both London and the provinces is on a prodigious scale, and every year the number of visitors from abroad grows. It was announced lately that all tickets for 2s., 5s., 7s. 6d., 10s. 6d., and 15s. enclosures were heavily oversubscribed by the first post, and no further applications for tickets at those prices could be entertained. As there are seats for 35,000 people at the stadium it may be taken that 350,000 people have already tried to obtain accommodation. By far the larger part of the crowd which attends the last cup tie have to stand up after waiting hours to gain entrance to the stadium.

The record attendance at Wembley is 180,000 at the 1923 final between West Ham and Bolton Wanderers. On this occasion thousands got in free when the gates were broken down through pressure of the huge throng.

Because of the success of the autostrada between Bergamo and Milan, Italy, another connecting Turin and Milan will be constructed.

Senators and Maroons In N.H.L. Tilt To-Night

MONTREAL, Que., March 17 (Canadian Press).—Ottawa Senators and Montreal Maroons, the two teams which are pointing for the preliminary elimination in the Canadian section play-off of the National Hockey League, meet here tonight in their final scheduled game of the season.

They will start out on even terms, each club having won two and one battle ending a draw in the five contests between them to date. On which team wins in the "rubber" game will probably depend the second place question in the division. At present Maroons held the post by two points. A win would just about clinch the berth for the local club. An Ottawa triumph would leave the two teams tied and the issue would rest in the two remaining games each team has next week.

A. MILLER MAKES AVEAGE OF 228

Member of Royals Team Leads the City League Bowlers.

Alex Miller of the Royals had the high average 228 for 51 games. High three consecutive games, Ulric Brioux of the Crescents, 883. High single, Dick Evans of the West Ends, 353.

Lawn Bowlers winners of the 1st section have to play the Royals winners of second section for first and second positions. Crescents and West Ends play off for third and fourth positions.

The following is the final standing of City League at Duffus' Bowling Alleys for first and second sections:

CITY LEAGUE

First Section

Lawn Bowlers	21	6	29
Royals	18	9	25
West Ends	18	9	24

Stop that agonizing RHEUMATISM

Read how James Dalley, 1404 Gerrard St. East, Toronto, stopped his:

"I was attacked by Rheumatism in the hips (he wrote). It got steadily worse, spread over my body. People recommended all kinds of liniments and medicines. My druggist gave my son a free sample of T-R-C's. I wouldn't use the sample. Was so discouraged. Then I started taking T-R-C's. Felt much better after the second dose. By the time I had used 6 or 8 $1 boxes the pain and stiffness had all gone."

What better proof could you want? Why continue suffering with Rheumatism, Sciatica, Neuralgia, Neuritis, Lumbago? T-R-C's will help your body get rid of the poisons that cause the trouble—will give you safe, speedy relief. No harmful drugs. 50c and $1 at your druggist's. T77

VISITORS WIN IN TWO GAMES

Peterborough Basketball Teams Score Victories in Lindsay.

BY GOOD MARGINS.

Two basketball teams, one from the Y.W.C.A. and one from the Y.M.C.A., were victorious in their invasion of the Lindsay Monarch Athletic Club last evening, winning from the Monarch girls' team by 8—11, and from the Monarch boys' by 26—17, in exhibition tilts run off in the Collegiate gym. there? Both games were keenly contested and by no means one-sided, despite the score and the fairly large number of fans were shown plenty of fast playing.

The Monarch club is to Lindsay what the "Y" is to Peterborough and though only recently formed, has managed to produce formidable teams in running, hockey and basketball. Consequently, the teams that faced the Petes last night were not to be scorned and when they play here two weeks from last night, stand an even chance of coming out on top.

Girls' Game

The first game, starting at 7.45, was between the two girls' teams and with the home towners playing their first game according to boys' rules, the Petes had the edge during the opening minutes. Then play evened up, and for the rest of the session there was less scoring and closer checking. The Lindsay girls showed up best during the second ten minutes when they garnered most of their points, while in the final period it was anybody's battle. The teams and individual scores were:

Peterborough.—S. Ecobichon 11, K. Taylor 6, H. Davis 4, C. Touchburn 1, D. Mortimer, M. Maclaren.

Lindsay.—R. Robinson 7, L. Parkin 4, D. Gillies, D. Babcock, G. Saunders, M. Gamble, G. Clarke, O. Redland, D. Kennedy.

Boys' Game

The boys' game proved a rough and tumble affair. It was played in two twenty-minute periods with the ultimate winner far from determined until the dying minutes, when the Petes managed to land a couple of sinkers to put the weight on the right side of the sheet.

The Monarchs, slow to start, found themselves trailing by several points with the period half over and rallying, pulled up to take the lead for a few minutes, only to lose it again so that their opposition sat out in front, 16—13 at the close of the session. Both teams lost chances to register through inaccurate shooting, while foul throws were quite frequent.

The second and final period saw no slackening of the pace, though both teams tired perceptibly. The Petes were without subs, but managed to outscore their opponents 10 to 4. Neither outfit had any monopoly on the free heaves awarded, but Monarchs had difficulty in locating the hoops. They had quite as many shots as the winners and look like a tough proposition for the return game here.

Dr. Hugh Logan of Lindsay handled both games satisfactorily, keeping the play within reason despite a contrary tendency at times. The teams and scores:

Monarchs.—Brandon 2, Brien 1, O'Leary 6, Woods 8, Peel, Spratt, Gamble, Forbert.

Peterborough—Ecobichon 7, Ellis 8, Crawford 8, Hardill 2, McLeod 1

TRIBUTE PAID TO EX-MAYOR

Winnipeg Paper Gives Opinion of H. H. Smith Held By Fellow Citizens.

TRUE GENTLEMAN.

The following from a Winnipeg paper gives the tributes paid by prominent Winnipeg men to Harry Hall Smith, Mayor of Peterborough in 1861-2-3, who died last Sunday in that city:

Henry Hall Smith, a prominent citizen of Winnipeg and a descendant of a family that has written its name strongly into the political life of Canada, died suddenly Sunday morning at the home of his son, Dr. W. Harvey Smith, 223 Roslyn road. He was seized with a stroke just after he arose and succumbed shortly afterwards. He was 82 years of age.

In Mr. Smith's death Winnipeg loses another of its oldest and finest citizens. For 44 years a resident of the city, Mr. Smith filled several important positions. He was at one time Dominion land commissioner and for many years was a director of the Toronto General Trusts corporation. He was one of the oldest members of St. Luke's church.

Mr. Smith was close to the political life of Canada for many years and in his young manhood he was organizer for Sir John A. Macdonald in Ontario. His father, Hon. Sidney Smith, was a member for West Northumberland and postmaster-general in the Macdonald-Cartier government of 1858.

Henry Hall Smith himself was born at Cobourg, Ont., in 1846 and spent his early life at Peterboro, Ont. There he entered the law profession and practiced in partnership with Edward Armour Peck, now member for Peterboro West in the Dominion house.

Friend of Sir John A.

The young barrister enjoyed the friendship of Canada's first premier and it was in support of Sir John A. Macdonald and through his influence that he became organizer of the Conservative party in his province.

Mr. Smith took as his bride, in 1867, Georgina McAlpin, a niece of Mrs. Robert Dennistoun, of Peterboro. They had one child, Dr. W. Harvey Smith, at whose home Mr. Smith passed his last days.

In 1884 Mr. Smith was appointed Dominion land commissioner for the West and moved to Winnipeg, where he had resided ever since.

The funeral took place Tuesday afternoon to St. John's cemetery. A private service was held at the home at 2.30 o'clock. Archbishop Matheson conducted the burial service.

Fine Public Servant.

Sir James Aikins, legal adviser in the eighties for the Department of the Interior, saw a great deal of Mr. Smith in a professional way. At that time Mr. Smith and A. M. Burgess, deputy minister of the Interior Department, were under the late Hon. Thos. White, a minster during the Macdonald regime.

"These three men," said Sir James, "were exceedingly able, and all excellent administrators. I never knew a trio that ran better together; they were three fine public servants."

Sir James came West while Mr. Smith was active in the political field in the East. It was always understood, however, that Mr. Smith was in very close personal touch with Sir John A. Macdonald; a man of integrity and diplomacy, no one could wish for a finer counsellor.

"True Gentleman."

"Mr. Smith," added Sir James "was the true man, the true gentleman."

"In the earlier days and to the end, Mr. Smith was the man worth while going to for sound advice." So remarked N. K. Boyd, ex-M.P., who had knowledge of Mr. Smith's great work for the Conservative party in the East, and his able conduct of departmental affairs, while Commissioner of Dominion Lands.

"We that knew Mr. Smith since his retirement from the government service, frequently sought his advice and judgment on any intricate matter, either of policy or organization. He never failed to give sound and mature counsel. A talk with him revealed the fact that his political knowledge was very wide and comprehensive, whether in the provincial or Dominion fields."

Sir John A.'s Letter.

In the Dominion campaign of 1882, Mr. Smith was chosen by Sir John A. Macdonald as his confidential agent and adviser. In February of that year, Sir John A. wrote a letter to Mr. Smith, Ontario organizer, outlining the best line of action to pursue in the selection of candidates and organization of the constituencies.

In that letter Sir John A. stressed the importance of young men playing a true part in politics; he urged the need for their organization. And, at the end of the letter to Mr. Smith, Sir John A. added: "You may show this note to any of our friends. This note will assure them that you possess my entire confidence."

Mrs. Margaret Scott, famed for her good works, was Mr. Smith's private secretary until the office of Commissioner of Lands was closed here in 1897.

Man of Sincerity.

"In the course of 40 or more years' acquaintance with Mr. Smith, I suppose I had not less than double that number of 'interviews with him,'" said a newspaper friend this morning. "A man of greater brevity, I never met. He had a question to ask, and it was most direct. An answer to give, he was courtesy itself, and always plain and direct. He displayed extra keenness of interest in a given man or subject by his manner, but in conversation he never seemed ruffled, nor unduly overjoyed. Poise—not studied—was characteristic of his bearing.

"In the turmoil of any agitation, civic or in the larger arenas, his mind always seemed to be in that state to reason why. He was a splendid individualist, thinking for himself, and leaving others to do the same, but never indifferent to the worth-while things in the life of his community."

The following is from its editorial columns:

Mr. H. H. Smith.

Mr. H. H. Smith, who died on Sunday, was an active participant in the public affairs of the Dominion through the greater part of his 82 years. He was the son of a distinguished father, who held an important portfolio in the government of Sir John Macdonald.

In his former position as Commissioner of Dominion Lands and a member of the Dominion Lands Board, Mr. Smith learned to know the West as few men have known it. Not only did his office call for the administration of Dominion lands in Manitoba but he had to deal with involved interprovincial land disputes. In the discharge of these duties he displayed tact, directness and rare judgment that made him a most valuable public servant.

Publicity he shunned. He was always a believer in silence when nothing need be said, which after all is "the eloquence of discretion."

When Mr. Smith came to Winnipeg as Commissioner of Lands his appointment had the warm endorsation of Sir John A. Macdonald. He was one of the young men of the period in whom Sir John placed implicit confidence. Sir John had a high appreciation of dependable friendships and the qualities of uprightness and sincerity. All these he found in the young son of one of his cabinet ministers.

To the social and religious life of the community Mr. Smith contributed in a quiet and unobtrusive way. One of Winnipeg's most striking and familiar figures for nearly half a century, he will be greatly missed.

MORE SHARES BOUGHT IN 1928

Increase of 239 in Employees Taking Out C.G.E. Stock.

HOLD SIX SHARES EACH.

Wednesday, March 15th, was the closing day for subscriptions for the purchase of preferred shares of the Canadian General Electric Company by employees. This was the second year of this scheme under which the company sells the employee preferred shares at par and pay on them the regular dividends of 7 per cent per annum plus 1 per cent bonus. The results of the scheme are as follows:

Organized, April 1st, 1927.

1927—Results of completion of year:	
Shareholders fully paid up	602
Number of shares	2,669
Par value	$133,450.00
1928—Results:	
Shareholders subscribed	841
Number of shares subscribed	2,761
Par value	$139,050.00
Number of employed	1,700
Number eligible to purchase shades, i.e. on payroll Sept. 30, 1927	1,552
Par value of shares held by employees	$272,500.00
Number of shareholders, 1927-1928 plans	916
Percentage employees that are shareholders	60
Average number of shares each	6
Dividends 7 per cent per annum plus 1 per cent bonus paid by company to employees as dividends and bonus per annum	$21,800.00

Harry Buss's Back bothered him for over 17 years

Then Gin Pills relieved his pain

Harry H. Buss of Egmont, B.C., suffered from a lame back for over 17 years. Every spring he was laid up from work. He tried many remedies, but could not obtain relief. He was advised to try Gin Pills and immediately obtained relief. Read his letter:

"There is nothing to compare with Gin Pills. I suffered unspeakably with a lame back for over 17 years. I tried almost everything, even to hot poultices. I could not sleep. After taking two and a half boxes of Gin Pills I am at work again and feel fine as a fiddle. I will not be without Gin Pills from now on. I am telling everyone in this settlement who has kidney or back trouble to give Gin Pills a trial. Publish my letter as I would like others to know what great relief Gin Pills gave me."

Pains in the back, constant headaches, swollen joints, painful urination, murky urine, brick dust deposits, scanty or too frequent voiding of urine are all symptoms of kidney trouble. Relieve your suffering and ensure a future free from kidney ailments. Get a box of Gin Pills today. 50c at all druggists. National Drug & Chemical Co. of Canada, Limited, Toronto, Canada. 167

ADVERTISE IN THE EXAMINER

The Prayer of St. Patrick

The following interesting extract in Irish with the English translation was found among the papers of a distinguished minister.

The oldest piece of writing in the Irish is called St. Patrick's Armour or Breast Plate. It is a prayer or hymn written when St. Patrick was going to Tara to preach before the kings and nobles of Ireland. At that time all the great people in Ireland were pagans and Patrick greatly feared that he should be killed at Tara.

"At Tara to-day the strength of God plot me, the power of God preserve me, may the wisdom of God instruct me, the eye of God watch over me, the ear of God hear me, the word of God give me sweet talk, the hand of God defend me, the way of God guide me. Christ be with me, Christ before me, Christ after me, Christ in me, Christ over me, Christ on my right hand, Christ on my left hand, Christ on this side, Christ on that side, Christ at my back, Christ in the hearts of every person to whom I may speak. Christ in the mouth of every person who speaks to me, Christ in the eye of every person who looks at me and Christ in the ear of every person who hears me at Tara to-day."

THEATRES

AT THE REGENT.

"CRADLE SNATCHERS" MAGNIFICENTLY FUNNY SCREENED BY FOX FILMS

"Cradle Snatchers," the Medcraft-Mitchell comedy-drama which played over a year on Broadway and which a halfdozen road-shows played in every city of importance in the United States, has been given a screen version by Fox Films with Louise Fazenda in the principle role and a case of screen favorites in all parts of importance.

This is the play which the critic of The New York Times said provoked, "gales of hysterial laughter" and The New York Journal proclaimed as "magnificently funny," while Stephen Rathbun of The Sun said of it, "A hit! A funny American Play, with the spice of a French Farce."

"Cradle Snatchers" is the story of three wives, whose husbands take a fishing trip. That is to say, they go fishing, but as a matter of fact they take three blondes on a little excursion.

The wives dicover the deception and hire three college boys to play the parts of shieks to arouse their husbands' jealousies. The boys are rather reluctant swains, who make love to the wives for purely monetary considerations, each having a sweetheart of his own. The husbands return to their wives and discover what has occurred during their absence, believing it to be real unfaithfulness on their wives' parts. And while they are at the height of their denunciations and the wives and their hired lovers frightened out of their wits, the husbands' blondes turn up. The resulting situations are hilariously funny, and as Percy Hammond in The Herald Tribune says, "it is a sermon." But a screamingly ludicrous sermon.

Howard Hawks, the director for Fox Films, is said to have caught the spirit of the play with rare fidelity and produced a picture that has caused hardboiled critics to shout with laughter when they saw the review.

"Cradle Snatchers" comes Monday to the Regent Theatre.

McGill University MONTREAL

Faculty of MUSIC

Annual Local Examinations in Music

Theoretical Examinations will be held on or about May 2nd, and Practical Examinations during May and June at various centres throughout Canada. Through these examinations—open to the pupils of all teachers—the standing of a student may be ascertained and progress tested. They are also preparatory to the diploma and degree courses in music, which, taken from McGill, the national university of Canada, are recognized everywhere as of the highest standing. Further information regarding the different grades, music to be prepared, fees, etc., and application forms may be obtained by applying direct to the Secretary of the Faculty of Music of McGill University or to the local

Secretary, F. C. Mann, 190 London Street.

Entries for the examinations should be sent in before April 1.

GRAND RAPIDS—"Outsold every other make of car for January, 1928, excelling past Hudson-Essex record more than 100%."

CLEVELAND, O.—"In first 15 days Cuyahoga County sold approximately 300 cars, double the former record."

IDAHO—"While the automobile industry as a whole showed a loss of 25% in Idaho during 1927, the Hudson-Essex line won its highest popularity, increasing sales over the previous year by 43%."

LITTLE ROCK, ARK.—"Have sold more cars in Little Rock than 3 agencies last year sold during the entire month of January."

JACKSONVILLE, FLA.—"In 15 days deliveries were 70% greater than for the entire month of January, 1927."

GASTONIA, N. C.—"A gain in actual deliveries over last January of 150%."

NEW YORK—"Greatest January and February business in our history."

PHILADELPHIA—"These are the greatest values Hudson-Essex ever offered and they deserve their great success."

CHICAGO—"The most successful automobile show we ever held."

A Buying wave

that sweeps away all records

. . . . Value the reason of course

Sales that surpass all records for this time of the year; outselling all other cars at many points, and gaining momentum at a speed that astounds the trade, the new Essex Super-Six is enjoying the greatest public ovation in 6-cylinder history.

The localities reported in the column to the left are not unusual, but typical, and they merely reflect the country-wide triumph. Everywhere dealers are reporting more than 100% greater sales than for the same period last year which was the previous record.

It is easily the greatest Essex Super-Six in history. It offers $200 to $300 more visible value than its great predecessor which outsold any other "Six" at or near the price by overwhelming margins.

Buyers can pay for cars out of income at lowest available charge for interest, handling and insurance.

THE "CANARY" MURDER CASE

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

© Charles Scribner's Sons

(Continued from yesterday.)

CHAPTER LIV

Spotswoode opened the book, and began reading in a voice whose very fervor held us all silent.

"'I brought about my own downfall. No one, be he high or low, need be ruined by any other hand than his own. Readily as I confess this, there are many who will, at this time at least, receive the confession sceptically. And although I thus mercilessly accuse myself, bear in mind that I do so without offering any excuse.

"'Terrible as is the punishment inflicted upon me by the world, more terrible is the ruin I have brought upon myself. . . In the dawn of manhood I recognized my position. . . I enjoyed an honored name, an eminent social position.

"'Then came the turning point. I had become tired of dwelling on the heights—and descended by my own will into the depths. . . I satisfied my desires wherever it suited me, and passed on. I forgot that every act, even the most insignificant act, of daily life, in some degree, makes or unmakes the character; and every occurrence which transpires in the seclusion of the chamber will some day be proclaimed from the housetops.

"'I lost control of myself. I was no longer at the helm, and knew it not. I had become a slave to pleasure . . . One thing only is left to me—complete humility'."

He tossed the book aside.

"You understand now, Mr. Markham?"

Markham did not speak for several moments.

"Do you care to tell me about Skeel?" he at length asked.

"That swine!" Spotswoode sneered his disgust. "I could murder such creatures every day and regard myself as a benefactor of society. . . Yes, I strangled him; and I would have done it before, only the opportunity did not offer. . . It was Skeel who was hiding in the closet when I returned to the apartment after the theater, and he must have seen me kill the woman.

"Had I known he was behind that locked closet door, I would have broken it down and wiped him out then. But how was I to know? It seemed natural that the closet might have been kept locked—I didn't give it a second thought. . . And the next night he telephoned me to the club here.

"He had first called my home on Long Island, and learned that I was staying here. I had never seen him before—didn't know of his existence. But, it seems, he had equipped himself with a knowledge of my identity—probably some of the money I gave to the woman went to him. What a muck-heap I had fallen into!

"When he phoned, he mentioned the phonograph, and I knew he had found out something. I met him in the Waldorf lobby, and he told me the truth there was no doubting his word. When he saw I was convinced, he demanded so enormous a sum that I was staggered."

Spotswoode lit a cigaret with steady fingers.

"Mr. Markham, I am no longer a rich man. The truth is, I am on the verge of bankruptcy. The business my father left me has been in a receiver's hands for nearly a year. The Long Island estate on which I live belongs to my wife.

"Few people know these things, but unfortunately they are true. It would have been utterly impossible for me to raise the amount Skeel demanded, even had I been inclined to play the coward. I did, however, give him a small sum to keep him quiet for a few days, promising him all he asked as soon as I could convert some of my holdings.

"I hoped in the interim to get possession of the record and thus spike his guns. But in that I failed; and so, when he threatened to tell you everything, I agreed to bring the money to his home late last Saturday night.

"I kept the appointment, with the full intention of killing him. I was careful about entering, but he had helped me by explaining when and how I could get in without being seen. Once there, I wasted no time. The first moment he was off his guard I seized him—and gloried in the act. Then, locking the door and taking the key, I walked out of the house quite openly, and returned here to the club.—That's all, I think."

Vance was watching him musingly.

"So when you raised my bet last night," he said, "the amount represented a highly important item in your exchequer."

Spotswoode smiled faintly.

"It represented practically every cent I had in the world."

"Astonishin'? . . And would you mind if I asked you why you selected the label of Beethoven's Andante for your record?"

"Another miscalculation," the man said wearily. "It occurred to me that if any one should, by any chance, open the phonograph before I could return and destroy the record, he wouldn't be as likely to want to hear the classics as he would a more popular selection."

"And one who detests popular music had to find it! I fear, Mr. Spotswoode, that an unkind fate sat in at your game."

"Yes. . . If I were religiously inclined, I might talk poppycock about retribution and divine punishment."

"I'd like to ask you about the jewelry," said Markham. "It's not sportsmanlike to do it, and I wouldn't suggest it, except that you've already confessed voluntarily to the main points at issue."

"I shall take no offense at any question you desire to ask, sir," Spotswoode answered. "After I had recovered my letters from the document-box, I turned the rooms upside down to give the impression of a burglary—being careful to use gloves, of course. And I took the woman's jewelry for the same reason.

"Parenthetically, I had paid for most of it. I offered it as a sop to Skeel, but he was afraid to accept it; and finally I decided to rid myself of it. I wrapped it in one of the club newspapers and threw it in a waste-bin near the Flatiron Building."

"You wrapped it in the morning Herald," put in Heath. "Did you know that Pop Cleaver read nothing but the Herald?"

"Sergeant!" Vance's voice was a cutting reprimand. "Certainly Mr. Spotswoode was not aware of that fact—else he would not have selected the Herald."

Spotswoode smiled at Heath with pitying contempt. Then, with an appreciative glance at Vance, he turned back to Markham.

"An hour or so after I had disposed of the jewels I was assailed by the fear that the package might be found and the paper traced. So I bought another Herald and put it on the rack." He paused. "Is that all?"

Markham nodded.

"Thank you—that's all; except that I must now ask you to go with these officers."

"In that case," said Spotswoode quietly, "there's a small favor I have to ask of you, Mr. Markham. Now that the blow has fallen, I wish to write a certain note—to my wife.

"But I want to be alone when I write it. Surely you understand that desire. It will take but a few moments. Your men may stand at the door—I can't very well escape. . . The victor can afford to be generous to that extent."

Before Markham had time to reply, Vance stepped forward and touched his arm.

"I trust," he interposed, "that you won't deem it necessary to refuse Mr. Spotswoode's request."

Markham looked at him hesitantly. "I guess you've pretty well earned the right to dictate, Vance," he acquiesced.

Then he ordered Heath and Snitkin to wait outside in the hall, and he and Vance and I went into the adjoining room. Markham stood, as if on guard, near the door; but Vance, with an ironical smile, sauntered to the window and gazed out into Madison Square.

"My word, Markham!" he declared. "There's something rather colossal about that chap. Y' know, one can't help admiring him. He's so eminently sane and logical."

Markham made no response. The drone of the city's mid-afternoon noises, muffled by the closed windows, seemed to intensify the ominous silence of the little bedchamber where we waited.

Then came a sharp report from the other room.

Markham flung open the door. Heath and Snitkin were already rushing toward Spotswoode's prostrate body, and were bending over it when Markham entered. Immediately he wheeled about and glared at Vance, who now appeared in the doorway.

"He's shot himself!"

"Fancy that," said Vance.

"You—you knew he was going to do that?" Markham spluttered.

"It was rather obvious, don't y' know."

Markham's eyes flashed angrily. "And you deliberately interceded for him—to give him the opportunity?"

"Tut, tut, my dear fellow!" Vance reproached him. "Pray don't give way to conventional moral indignation. However unethical—theoretically—it—may be to take another's life, a man's own life is certainly his to do with as he chooses. Suicide is his inalienable right. And under the paternal tyranny of our modern democracy, I'm rather inclined to think it's about the only right he has left, what?"

He glanced at his watch and frowned.

"D'ye know, I've missed my concert, bothering with your beastly affairs," he complained amiably, giving Markham an engaging smile; "and now you're actually scolding me. 'Pon my word, old fellow, you're deuced ungrateful!"

THE END

After taking ZUTOO TABLETS Says they are Harmless

Mrs. (Dr.) Shurtleff, of Coaticook, says "I must have taken 1000 Zutoo Tablets. After trying every remedy within reach I discarded them all four years ago for ZUTOO, which I have taken ever since. I find the tablets a harmless and efficient remedy for all kinds of headache."

FAMOUS LOVE ROMANCES — George Washington (VI) — By Nicholas Afonsky

With Washington and her husband were happy and contented, though he seems never to have got over his love for Sally Fairfax. As Martha shared his honors, so she tried to share his hardships. She stayed with him a winter at Valley Forge, when bacon and greens served on tin dishes were their usual dinner.

Then came the surrender of Cornwallis and the end of the war. For five happy years the Washingtons lived at Mount Vernon. Then he was made president, in 1789, and for eight years lived a life of devotion to public duty. Washington was a popular idol, and his well-bred, gracious wife shared his popularity.

In 1795, in December, after his return to Mount Vernon, Washington rode for the last time over the lands he loved so well. He came indoors wet with sleet—and in a few hours was dead. His wife died three years later. In 1811 Sally Fairfax, childless, for twenty-five years a lonely widow, died at Bath, England.

A year before his death, when they were both almost seventy, Washington had written to Sally, "None of which events, however, have been able to eradicate from my mind the recollection of those happy moments, the happiest in my life, which I have enjoyed in your company." He had never forgotten his lost love.

WAS VERY WEAK
NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very badly with my heart and nerves, the cause of it, I think, was my going through the change of life.

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well.

"I was advised to try

so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

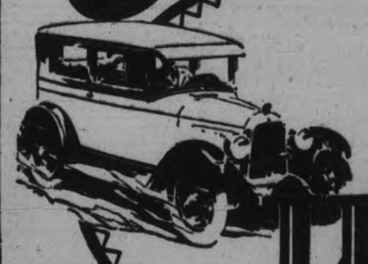
Economy!



The Whippet has demonstrated its unequalled economy under the most widely varying conditions. It has shown the vital importance of BIG 4-wheel brakes—the advantages of higher speed and faster pickup. It has proved its ease of handling, its smoother riding qualities, its roominess and comfort, and its extraordinary durability.

FALLS IN OWN TRAP

BROCKVILLE, Ind., March 17.—Authorities here believe that John Koetter, 70, was a victim of his own folly. His charred body was found in the ruins of a barn on the farm of Albert Scoulte, Franklin County. Bitter contestants in a lawsuit, it is believed that Koetter sought revenge by setting fire to Schulte's property but apparently was caught in the flames before he could escape.

Obituary

PERCY WELCH.

Terminating a lengthy illness, the death took place in Kingston Hospital on Friday, March 16, 1928, of Percy Welch, son of the late Leo Welch and Mrs. Welch of Peterboro. He was in his 35th year, and was well known in this city.

Left to mourn are his mother, two brothers William and Norman of Peterborough, and three sisters, namely, Mrs. David Leether, Mrs. Robert Dorrell and Mrs. Ernest Hamlin, all of this city. His wife predeceased him some six years ago.

The funeral will take place from the residence of Mrs. Leether, 294 Lake street, Peterborough, on Monday afternoon, March 19th, at 2.00 o'clock, to the Little Lake Cemetery for interment.

The Rev. Mr. Dudgeon of St. James church will conduct the services.

A NEW DEPARTURE.

Live Clothing Firm Introduces New Line of Shirts Under Own Label.

Messrs. Riley and Hickey Limited have shown considerable enterprise in making such an extensive purchase of men's shirts that they are put up under their own label. They made a most careful check up on quality and finding this shirt to be a super value and one which they are proud to sponsor with their own name contracted to have a continuous supply. At the popular price which they announced in their large advertisement in last night's paper this should be an attractive line, following out the regular policy of this young firm to have their store known as "the store of popular prices." (A)

BIRTH.

McISAAC. — At St. Joseph's Hospital, on March 14, 1928, to Mr. and Mrs. J. D. McIsaac, 111 Gladstone Avenue—a son.

IN MEMORIAM.

JONES. — In loving memory of Olive, who passed away March 18, 1926.

Gone from us, but leaving memories
Death can never take away,
Memories that will always linger
While upon this earth we stay;
In my heart her memory lingers,
Sweet and tender, fond and true,
There is not a day, dear Olive,
That I do not think of you.

—Inserted by Sister (Sibyl) Mrs. Harold McMahon.

One celebrated teacher of singing used to fill the mouths of his pupils with prunes and chestnuts before a performance, declaring that if the cheeks were allowed to touch the teeth the tone of the voice was spoiled.

Nickel Remains Strong Massey-Harris Very Active

TORONTO, Mar. 17. — (Canadian Press.)— International Nickel was a feature on the Toronto Stock Exchange this morning when prices on a whole sowed firmer tendency. Nickel continued its upward movement, advancing ⅞ to 93½. Building Products was another strong spot, selling up ¾ at 45. Massey Harris was fairly active and closed 40½ for a full point gain. Page Hersey, Can. Industrial Alcohol and Brazil Rights were all fractionally stronger, while Can. Canners First Preferred made a gain of 1¼ at 90. British Amn. Oil and Hiram Walker both suffered fractionally and International Petrol at 37 was fractionally stronger. Brazilian Common suffered a decline of 1⅛ at 208, while Brazilian new gained 1 at 53.

Government Reports Tend To Higher Prices

CHICAGO, March 17 (Canadian Press).—Wheat prices advanced today on buying due more or less to the United States Government report on stocks of wheat in country mills and elevators. The report was constructed here as bullish. Opening unchanged to ¾c higher, wheat later scored behind a general advance. Corn, oats and provisions were also firmer, but corn met with much selling to realize profits. After starting 1-8c to 7-8c up, corn re-acted to near yesterday's finish.

Chicago wheat, March 139 3-8, May 138¼; corn, March 98 7-8, May 101 1-8; oats, March 58 3-8, May 58½.

AMERICAN GIRL BECOMES WIFE INDIAN PRINCE

Couple United in Ceremony Conducted According to Strict Mahratta Rites.

COLORFUL SCENE.

Many Europeans and Notables Attend Banquet Held in Place.

BARWAHA, India, March 19 (Associated Press).—The prolonged and imposing ritual of a Hindu wedding is at last ended and Nancy Ann Miller, an American girl, has become "Her Highness Maharanee Devi Sharmista Holkar."

It is customary among the Marathas for a bride to change her name on entering the husband's family, but in the present case an exception was made and Miss Miller retains the name Sharmista given to her when she became a Hindu.

The final ceremonies last evening were favored by glorious weather. A slight shower earlier in the day laid the dust and made for greater comfort on the concourse packed by thousands attracted to view the richly-picturesque ceremonials.

Miss Miller looked charming throughout and seemed fully to appreciate the brilliant Oriental setting of the magnificent function she went through. Not once did she betray any sign of nervousness, and everything passed off without a single hitch. On every hand was heard loud praise of the bride's perfect self-possession and her ease of manner.

The newly-wedded couple have been flooded with felicitations and many wedding presents.

A conspicuous figure throughout the two-day ceremonies was the senior Maharanee, who was recently reconciled to the former ruler's marriage. She rendered assistance whenever and wherever required.

The initial wedding ceremonies, which began Saturday and lasted until a late hour, were a trying ordeal for the Western girl not used to the elaborate Eastern customs, but she came through with perfect composure and smiled and chatted with the bridegroom occasionally during the ceremony.

25,000 Spectators.

The 25,000 spectators broke into thunderous cheering as the processions, headed by the bride and groom, advanced from opposite directions to the beautiful pavilion specially erected outside Darya Mahal Palace. As soon as the principals alighted, they seated themselves, according to custom, on wooden planks facing each other—Miss Miller toward the East and the bridegroom toward the West. The former Maharajah, resplendent in diamonds and wearing a ruby necklace, appeared calm and absorbed, but occasionally nodded recognition to distinguished personages in the assemblage. Miss Miller, in a sari of silk and gold brocade, wearing a diamond ring and bangles set with brilliants, looked a perfect Indian bride as serenly and gracefully she went through the ceremonies.

Miss Miller's grandmother, who sat in a chair next to the bridegroom, followed the lengthy proceedings with intense interest.

The ceremony was conducted according to strict Mahratta rites, the bride being barefooted with gold ornaments on her toes. The rites included the partaking of rice, sprinkling of holy water, solemn vows before sacred fire and worships of deities.

Colonel Lambhate gave Miss Miller away, and after the couple mounted the dais, they were joined by a golden thread and declared man and wife. After the knot was tied, the couple ceremoniously worshipped scrificial fire of bark and steam of the sacred peepal tree. At the conclusion of this part of the ceremony, which lasted more than two hours, the bride and bridegroom went in procession to the latter's residence, where they worshipped the goddess Lakshami—the Goddess of Wealth, Beauty and Fortune.

Many Attend Banquet.

The palace was beautifully illuminated for the huge banquet, which was attended by 10,000 guests, including many of the most prominent people in Indore, and many Europeans who were keenly interested in the ceremonies. It was stated, however, that neither the junior Maharanee nor any high officials of the state were present.

THE WEATHER

Sunday was again an unpleasant day of which we have had a number in recent weeks. Have you ever noticed that the weather seems to favor a cycle of seven, and that if any particular day is stormy or fine, the chances are that the same day in following weeks will repeat the same conditions. Not long ago we had thirteen consecutive Saturdays on which rain fell. Yesterday's snowfall was about 2½ inches here, and covered a wide area. A Pittsburg radio announcer said last night the snowfall was the heaviest there of the winter. I would like to think this was the last kick of winter, but it is hardly probable. Lowest temperature yesterday 24 highest 34.—W. P.

Raised S-4 Brought Safely To Harbor

BOSTON, March 19. Canadian Press. — The raised submarine S-3 was towed into a safe berth at the Boston navy yard yesterday just ahead of a vicious Northeaster, which caused great damage to shipping in Massachusetts Bay. Had the storm struck the submarine and her tugs, the S-4 would have surely sunk, the navvy officers said.

Yesterday evening the submarine brought up from the bottom of the sea off Provincetown after three months of struggle with the wintry elements, was cradled in her six pontoons off drydock 2 at the navy yard. She will not be docked until high tide this morning.

WHOLE BRIGADE IS CALLED OUT

Overheated Stovepipes Found On Arrival at Donegal Street.

TWO CHIMNEY FIRES.

Three units of the fire brigade as well as the Chief's car attended a chimney fire this morning. At 10.19 a call came in from 596 Donegal Street, but the message was not completed. Fearful that the cause of the alarm might be a serious fire, the brigade turned out, but on arrival, found that overheated pipes were all that required attention.

At 10.44 a.m. a call was received from a residence at the corner of McDonnel and Park Streets, where a chimney fire made necessary the use of chemicals. One minute after this call had come in, an alarm was sounded from 49 Park Street, due to a chimney fire, which was not of a very serious nature.

During the run to the south-end there was lost off one of the fire trucks a hose key which the department is anxious to recover. The route of the truck was south on Aylmer Street to Lake Street, thence to Park Street and South on Park Street, returning back Park to Rubidge to Charlotte to the Fire Hall on Aylmer Street.

COURT MARTIAL TO AIR DISPUTE

Trouble On Battleship Royal Oak Will Be Investigated at Gibraltar.

OFFICERS HAVE COUNSEL.

LONDON, March 19 (Canadian Press).—A court martial will be convened at Gibraltar to investigate certain issues of importance from the point of view of discipline in the Royal Oak affair, W. C. Bridgeman, First Lord of the Admiralty, told the House of Commons today. The three officers concerned, Rear Admiral St. G. Collard, Captain Dewar, and Commander Daniel, will be allowed representation by counsel.

PROVISION MADE FOR OLD ORDER

Communion Must Be Celebrated in Present Form Once a Month, If Asked.

BISHOP CHANGES STAND.

LONDON, March 19 (Canadian Press Cable).—An important provision made by the House of Bishops in new proposals for the revision of the Church of England Prayer Book, issued yesterday, is that the old order of Holy Communion shall be celebrated one Sunday in each month if the parochial council so desires or if the Bishop so directs, being satisfiel that there is a desire for this.

The addition of the Rt. Rev. F. Rene, Bishop of Truro, former head of the Community of the Resurrection, Hirfield, Yorkshire, to the opponents of the revised Prayer Book, has come with considerable surprise. The Bishop of Truro, who is one of the most profound liturgical scholars of the Anglican church, declares that the alterations in the Prayer Book have cut away the grounds of his earlier support.

Marmora Resident Traps Brown Owl

MARMORA, March 19. — A large brown moon-eyed owl was caught in a trap in Neil Quinlan's barn on Friday morning. This bird had for several days been pestering chickens and killing pigeons around the Quinlan home. Mr. Quinlan accordingly set the trap and Hooty was caught.

Another large owl, grey in color, has been seen around the same farm.

CHAIRMAN NOT GIVEN HEARING; ROW FOLLOWS

Charges and Counter-Charges Are Flung at Rotary Luncheon.

IT IS ALL IN FUN.

And Ensign Green, Real Speaker of Day, Makes Fine Address.

The harmony that usually reigns at meetings of the Peterborough Rotary Club was rudely shattered at to-day's luncheon when Rotarian George A. Gillespie, chairman of the program committee for the month, was refused permission to act as the speaker for the day and, apparently nettled by the unexpected treatment accorded him, disturbed the serenity of the occasion by hurling charges at Rotarian Ross Dobbin, Andrew Brown, Chris. Graham, James Juby, and Dr. Moir.

The members thus singled out for attack retorted in kind and charges and counter charges were flung across the tables.

It was all in fun, of course, and this burlesque controversy which provided the members with a great deal of amusement was terminated as quickly as it started, and Rotarian Gillespie called upon Ensign Green, new head of the Peterborough Corps of the Salvation Army, the real speaker of the day.

Ensign Green, who is becoming a member of the Rotary Club, expressed a hope that he would be a Rotarian in spirit as well as in name and promised his best services to the club.

His address dealt with the growth of the Salvation Army, which starting with the efforts of one man in the London slums, had in sixty years spread all over the world. Ensign Gren pointed out the great development that had taken place in those sixty years, explaining how in the early days of the movement Salvationsits had tramped from place to place, carrying their food with them and sleeping wherever they found a place. He contrasted these conditions with the splendid buildings in all parts of the world where Army work was carried, declaring that the Peterborough citadel was one of the finest buildings he had enocuntered in the Dominion. The development of the Salvation Army Band from the primitive musical organizations of the early days to the present splendid bands that were to be found everywhere was stressed by the speaker, who also touched upon the establishment of Junior bands which were proving of great service as feeders to the senior organizations.

Ensign Greene traced the growth of the Army's press work, notably The War Cry which, he said, had played a great part in the rapid development of the Salvation Army. Briefly, too, he touched upon the social service work of the Army, referring to the services alone this line in Peterborough of Adjutant Army Wood.

A vote of thanks to the speaker was proposed by Rotarian Andrew Brown.

At to-day's meeting a letter was read from the secretary of the Rotary Club at Bromley, Kent, England, stating that at a recent meeing of that club the Peterborough club had been toasted.

The secretary was instructed to send the greetings of the Peterborough Club to the Bromley Club.

President A. L. Killaly was in the chair to-day, and the attendance was large.

SIX MEN SAVED FROM TRAWLER

Eight of Crew Drowned When the Vessel Runs Ashore.

IN ORKNEYS.

STROMNESS, Orkney Islands, March 19 (Canadian Press). — Six members of the crew of the trawler Lord Devonport, which went ashore last night, were rescued by coastguards to-day. Eight others of the crew were drowned.

NO DISCUSSION YET IN MACDONALD CASE

Cabinet Expected To Review Matter To-day or To-morrow.

OTTAWA, March 19 (Canadian Press).—The department of Justice has nothing to make public yet regarding the case of Doris MacDonald, who is condemned to hang in Valleyfield, Que., on Friday night of this week. It is intimated that if any steps are taken to commute the sentence they will not be made until Tuesday or Wednesday. The case will probably come before the Cabinet for review today or tomorrow.

Believe British Plane Lost During Storm Which Swept Over Atlantic On Wednesday

BOSTON, March 19 (Canadian Press).—Belief that the monoplane Endeavor in which Captain Walter Hinchliffe, British pilot, and the Hon. Elsie MacKay attempted a trans-Atlantic flight last week was lost in a great storm which swept a large area of the Atlantic on Wednesday is expressed by Captain R. B. Miller, of the liner Republic, which arrived from Bremen, Southampton, Cherbourg and Queenstown.

On that day, 1,200 miles off the Irish coast, Captain Miller said, the Republic encountered a whole westerly gale, one of the worst in the officer's experience. The wind velocity was at least 70 miles an hour, he said, and the storm was accompanied by snow squalls and bitter cold. In 24 hours' steaming, the Republic was able to cover only 81 miles, although her normal run would have been from 350 to 375 miles.

"It would have been impossible for an aeroplane to survive conditions that prevailed, the captain said. "No pilot could have navigated in the snow squalls and the cold would have caused ice to form on the wings. We posted double lookouts on that day and the next, but neither heard nor saw anything of the plane."

MAY SUMMON CIVIL SERVANT TO TESTIFY ABOUT BALLOTS

George Landkerin Revealed as Man Who Found Nineteen.

PROBE CONTINUES.

Newsboys Found Papers in Room Near Election Office, Witnesses Say.

TORONTO, March 19. — Canadian Press. — The name of the civil servant who found the 19 ballots on Aylmer avenue, Ottawa, and handed these ballots to Alexander Smith barrister, who in turn passed them on to Russel Sparks, the defeated Liberal candidate, was revealed after some hesitation by Mr. Smith before the Royal Commission investigating the case to-day. The finder was George Landkerin, an Ottawa civil servant. These ballots eventually reached W. E. N. Sinclair, the Ontario Liberal leader, and resulted in the inquiry. Justice Hodgins suggested that Landkerin be called before the inquiry.

W. Lowrie, one of the deputy returning officers in the last Ottawa South provincial election, stated that he received them from a newsboy named Nelson Wilkins, on February 25. The newsboy said he had found them in a back room of the Hills' building, on the upper part of which building F. M. Scott, the returning officer had the election office. This room is now used by the newsboys as a distributing centre.

Tom O'Neil, Ottawa, testified that he had picked up a ballot on Aylmer street, he believed, in November, and there were others lying around quite clean, despite a recent rainfall. Some might be under the snow yet, he thought.

Charles Mullin thought he saw one there in the fall but did not pick it up, while Fred Taggart said he told Mr. Sparks what his mother had been told by a newsboy. The boy as said to have produced and shown her a pad of ballots. He was asked to find out the name of this newsboy.

FORMER RESIDENT'S RELATIVES SOUGHT

Chief Newhall Asked To Locate Friends of William W. Ross.

Chief Constable Samuel Newhall received a telephone call from Jeffersonville, Indiana at noon to-day asking him to locate the relatives of William W. Ross, who are supposed to be living in this city. Mr. Ross died in the Indiana city and Charles T. Hertsfch, district manager of the Car and Foundry Company of Jeffersonville, is anxious to get into communication with his relatives Mr. Ross is a former resident of this city, coming here in the eighties, and living for 40 years here. If anyone knowing relatives of the deceased will communicate with Chief Newhall he will see that Mr. Hertsfch is notified From information supplied Chief Newhall, Mr. Ross is about 65 years old and a bachelor.

ACTRESS DIES.

Nora Bayes Succumbs To Operation—Star For 20 Years.

NEW YORK, March 19 (Canadian Press).—Nora Bayes, musical comedy actress, died today in Brooklyn Hospital. She was taken to the hospital last Monday for an abdominal operation and was thought to be on the way to recovery when she suffered a relapse from which she did not rally. She was a star on the stage for more than twenty years, making her first appearance in vaudeville in New York.

A single kitchen in the basement to serve meals to each of the 38 apartments by means of dumb waiters is a feature of a new Detroit apartment house which prohibits cooking in the individual suites.

CELEBRATES BIRTHDAY.

JAMES HENDLEY
taken last week on the occasion of his 106th birthday.

TAG DAY TOTAL IS $200 LOWER

Not Enough Assistants, Says Bishop O'Brien in Making Announcement.

$1,003.16 RECEIVED.

The results of tag-day on Saturday for St. Vincent's Orphanage were yesterday announced by His Lordship, Bishop O'Brien, as totalling $1,003.16. Last year's total was $1,209.83.

Commenting on the difference in the sums received last year and on Saturday, His Lordship attributed it to indifference on the part of those who were supposed to assist in the enterprise. There were not enough boxs out, he said, and many of the helpers did not appear, or only assisted during a portion of the day.

The Bishop thanked all who had helped in any way, the general public who answered so generously to the appeal, the Peterborough bus lines and also The Examiner, for publicity through its columns.

FLIER THOUGHT MAKING SEARCH

Nothing Heard From Pilot Since He Was Forced to Land.

SEEKING HINCHLIFFE.

OTTAWA, March 19 (Canadian Press).—In the absence of definite word, Royal Canadian Air Force headquarters here assume that Flying Officer Bath took off to-day from Grenville, Que., for Greenville, Maine, to take up the search for Capt. Hinchliffe's lost monoplane "Endeavor." The Canadian officer started from Ottawa yesterday, but could not go further than Grenville on account of a snowstorm. Canadian and United States authorities are co-operating to make the search as effective as possible.

BIRTH.

SEXSMITH. — To Mr. and Mrs John Sexsmith, Otonabee on Wednesday March 14th, a daughter.

NINE MINERS BURN TO DEATH IN BUNK HOUSE

Others Injured During Blaze Which Swept Granby Consolidated Mine Property.

QUARTERS DESTROYED.

Incendiary Suspected of Starting Blaze in Model Mine Residence.

VANCOUVER, B.C., Mar. 19.—(Canadian Press.)— Nine men are dead, five seriously injured in hospital, and several others received burns or injuries as the result of a fire which swept the bunk house of the Granby Consolidated Mine, at Copper Mountain, early yesterday.

The dead are:

R. P. Bassett, Dan McPherson, H. Towell, Martin Swanson, Pat Dermody, N. Sollid, J. McKay, A. Mathewson and K. Upjohn.

The injured include:

W. C. Nelson, T. Mealey, J. Sweet, E. Liabo, V. Astergord. The names of the other men injured have not yet been ascertained.

The injured were taken to Princeton, B.C., hospital by special train.

When the fire started, the bunk house was filled with men off shift, and it spread with such rapidity that escape by the regular exits was impossible.

The bunk house, which was a model one equipped with the latest conveniences, including steam heat, was destroyed.

R. P. Bassett was a member of the Copper Mountain hockey and baseball team and was very popular in camp. Pat Dermody years ago was superintendent of the Granby at Phoenix and later of the Providence mine at Greenwood. Jim McKay was formerly at the Mother Lone mine and the Granby at Anvox. He is survived by his widow and daughter, now living in Vancouver.

Incendiary Blamed.

PRINCETON, B.C., Mar. 19.—(Canadian Press.)—Incendiary believed to have started the fire which burned nine men to death and injured five in the Granby Mining Company bunk house yesterday.

FIFTEEN GIRLS RECEIVE HABIT

Reception Held at Mount St. Joseph Chapel This Morning.

NOVICES RECEIVED.

Following a retreat of eight days conducted by the Rev. Father P. Quinn, C.S.S.R., of St. John, N.B., the solemn and inspiring ceremonies of reception and profession were held at Mount St. Joseph this morning. Fifteen young ladies were clothed in the holy habit, four novices made their first vows and four sister pronounced perpetual vows.

Those who received the habit were: Miss Viola Herlihey, Downeyville (Sister M. Cornelia); Miss Ethel Giltenan, New York (Sister M. Monica); Miss Emily Back, Fort William (Sister M. Ernestine); Miss Muriel Connolly, North Bay (Sister M. Anna); Miss Monica Gattie, Walford (Sister M. George); Miss Dorothy Dumond, Brentwood (Sister Benigna Consolata); Miss Gertrude Dumond, Brentwood (Sister M. Anacleta); Miss Teresa Meade, Peterboro (Sister M. St. Jerome); Miss Alice Mitchell, Lindsay (Sister Margaret Teresa); Miss Marguerite Joyce, St. Andrew's West (Sister St. Romuald); Miss Amelia Pobaras, Hanmer (Sister M. Benedicta); Miss Kathleen Jewell, Sault Ste. Marie (Sister M. St. Brendan); Miss Ella M. Boyer, Parry Sound (Sister M. Cyrilla); Miss Alice Beachey, Trout Creek (Sister M. Marcelline); Miss Dora Dodge, Pakenham (Sister M. Winnifred).

His Lordship Bishop O'Brien officiated at the ceremony, assisted by Rev. Father Corkery and Rev. Father Finn. Present in the sanctuary were: Very Rev. Dean Crowley, Sault Ste. Marie; Rev. Father E. Bunyan, Callander; Rev. Father O'Toole, Pakenham; Rev. Father Mooney, Almonte; Rev. Father McCormack, Rev. Father J. J. O'Brien, Rev. Father P. Costello, Rev. Father J. Guiry, Rev. Father Corkery, Rev. Father Moloney, Rev. Father Carroll.

Start For New York In Unsinkable Boat

LONDON, March 19 (Canadian Press)—The lifeboat Schuttevaer, declared to be unsinkable, started for New York to-day. She sailed from Westminster Pier, within the shadows of the House of Parliament, as "Big Ben" chimed three o'clock. The boat is twenty feet long and the four men aboard believed they can reach New York in forty days.

Command Protection Foreigners In China

SHANGHAI, Mar. 19.— (Canadian Press.) — News despatches from Nanking last night said that the Nationalist government had issued two important mandates calculated to clear up the aftermath of the 1926 outrages in which several foreigners were killed.

The first of these decrees orders the arrest of the principal culprits. The second commands protection for foreigners in China.

The first decree places responsibility for the outrages on "part of the Nationalist army, together with local riffraff, at the instigation of Communists." It claims that 19 soldiers and 32 local gunmen have already been executed for their part in the outbreak.

LOCAL COUPLE WED 50 YEARS

Family Helps Mr. and Mrs. B. Revoy Celebrate Anniversary.

MARRIED AT MARMORA.

An event of more than usual interest took place at the home of Mr. and Mrs. B. Revoy, 292 Woodbine avenue, on Friday evening, March 16, when their six children, a number of grandchildren and a large number of their friends met with them to celebrate their golden wedding anniversary. The bride and groom of fifty years ago are hale and hearty and do not look to have seen that many years of the ups and downs of wedded life. Mrs. Revoy, who was Matilda Cooper, daughter of Mr. and Mrs. James Cooper of Hastings County, was married to Benjamin Revoy, son of Francis Revoy, at Marmora, by the Rev. Mr. Peake of the Methodist appointment there. The young couple walked part of the way to his home and got a boat and paddled across Crow Lake to be married.

Ten years later they came to Peterborough, settling in the house they now occupy, on what was then a farm in Ashburnham.

They were blessed with eight children, four sons and four daughters, all living. The daughters, who were all present for the happy occasion are Mrs. J. W. Draper, North Cobalt; Mrs. W. Scott, Gouverneur, N.Y.; Mrs. M. E. Dormer, and Mrs. J. W. Devall of this city. Two sons, James of Toronto and John N. of Montreal were present. Will of Brandon, Manitoba was unable to be present, also Fred (a veteran of the Great War, who is ill in Christie Street Hospital, Toronto. Beside these, there were present a number of grandchildren and one great grandson, Kenneth Dormer, son of Mr. and Mrs. George Dormer.

Rev. J. E. Todd was present and baptised the young grandson and gave a brief address of congratulation, saying he was very pleased to be present on such a rare occasion. Mr. Revoy replied on behalf of himself and bride.

The rooms were beautifully decorated with spring flowers. Dinner was served at 6.30 p.m. to about forty guests. The tables were decorated with gold runners and gold stars, with a basket of yellow daffodils, tulips, and narcissus draped in gold tulle. Yellow candles in brass candle holders and the beautiful wedding cake completed the decorations. The happy bride and groom were presented with a purse of gold and an embossed address, signed by their children and a number of their grandchildren, by Margaret Revoy, while Florence Revoy presented Mrs. Revoy with a beautiful bouquet of flowers. Florence and Margaret are small daughters of Mr. J. N. Revoy of Montreal. Telegrams of congratulation were received from Ted and Johnnie Dormer, grandsons, Toronto, Mr. and Mrs. N. B. Levar, Governeur, N.Y., Mr. and Mrs. Deline, New York, Mr. and Mrs. Billedo, Haileybury, Barbara, Roy and Ruth Draper, grandchildren, North Cobalt.

During the evening a large number of friends came in and the evening was spent in music and games, in which the bride and groom of 1878 entered heartily. Two members of Stanley's Orchestra, Toronto, were present, George Stanley and a grandson, Stanley Revoy, who furnished fine music. Many beautiful gifts from friends were received, including a lovely bouquet of tulips, narcissus, and hyacinths from little Dorothy Deline.

Five Lose Lives Nursery School Fire

SALFORD, Surrey England, March 19. — Five small children were burned to death in a midnight fire at the nursery school for children here. The nearest fire brigade was 2½ miles distant, and when the firemen arrived the whole upper part of the building was ablaze. The teachers worked heroically to rescue the children, but five who were on the top floor perished. There were 50 children in the school.

COUNSEL SAYS WAR RECORDS ARE NOT TRUE

Statement Made By Lawyers For Defendants in Currie Libel Action.

MADE UP TO MISLEAD.

Delivered in Course of Argument on Motion For Security For Costs.

COBOURG, Ont., March 19 (Canadian Press).—If it were not for the unfortunate fact that the records were made up to mislead and did not represent the true state of affairs, the matter would be simple. Following immediately upon his declaration that "We say the records have been deliberately falsified, and we propose to bring men here to say so, men from every unit engaged at the battle of Mons," the statement of Frank Regan, counsel for W. T. R. Preston and F. W. Wilson, publisher of The Port Hope Guide, defendants in the libel suit instituted against them by General Sir Arthur Currie, former commander of the Canadian Corps, was delivered in the course of argument on a motion for security for costs Saturday. It indicated somewhat the course which will be pursued by the defence when the case come to trial on April 16.

Heard in Public

Unlike the "examination for discovery," the motion was heard in public, and press representatives were admitted. It was this fact which brought to his feet D. N. Chisholm, of counsel for General Currie, to protest vigorously against such statements being made during this particular stage of the proceedings. Mr. Regan said Mr. Chisholm, was merely talking for the sake of the reporters. Such declarations were not revelant to the point at issue. Another statement of Mr. Regan's was that "He proposed to put men in the box who say their comrades were killed at a quarter to eleven on the forenoon of November 11, 1918, and their bodies lying in the gutters."

Two of the preliminary stages of the case were more or less completed Saturday. One was the "examination for discovery," in which the documents that the plaintiff will put in at the trial were examined by counsel for the defendants, and Sir Arthur himself was subjected to interrogation by Mr. Regan. When the examination ended at 7.30 Saturday night, neither Mr. Regan nor R. H. Parmenter, K.C., counsel for General Currie, would say if there was to be a resumption. Mr. Regan declared that he intended entering a number of motions either at Osgoode Hall or in Cobourg, the purpose of which would be to require Sir Arthur to answer certain questions. This would be done on Tuesday.

Should Give Security

The second preliminary stage was the motion for security for costs. This was heard before County Court Judge L. V. O'Connor. It was based upon an affidavit sworn by Mr. Wilson, one of the defendants, wherein it was claimed that since Sir Arthur Currie possessed no property in Ontario, he should be required to give security for the costs of the trial. Defendants' counsel asked for $6,500, which would be divided as to $5,000 for witnesses' expenses, and $1,500 for counsel's fees. The motion was contested by Mr. Chisholm, who argued that a number of provisions of the libel act had been unfulfilled in the affidavit and that it was now too late to enter a substantive motion for such security. General Currie was willing to furnish a reasonable amount of security, voluntarily, however, counsel would give that undertaking, but only with the proviso that the present motion was dismissed with costs to be paid by the defendants. Both Mr. Regan and Mr. Chisholm withdrew to discuss the matter and returned with the announcement that they had arrived at an understanding. They agreed upon $2,000 security, and the costs of the motion were set at $15 to be borne by the defendants.

The intimations of the defending counsel Saturday made it clear that when the case comes to trial the whole of the operations leading up to the capture of Mons on the morning of November 11, 1918, by Canadian troops will be gone into. Military maps, orders and such like documents will be examined. Mr. Regan said at the public hearing that the defendants proposed to call between 75 and 100 witnesses from Quebec, Ottawa, Winnipeg, and possibly Vancouver. He would endeavor to get men from all the units of the Canadian corps that had fought at Mons, and the case might last for two weeks."

This matter with respect to duration, however, was scouted by Mr. Chisholm. "You don't agree with Mr. Regan with regard to the two weeks," commented His Honor. "No, no, there's nothing on record to substantiate what Mr. Regan says," replied Mr. Chisholm. "It's all imagination."

"How many units were engaged?" asked Mr. Regan.

Mr. Chisholm smiled. "Since we are using military terms," he said, "I might say that Mr. Regan is at present engaged in throwing out a smoke screen."

MERCHANTS REFUSE TO KEEP FRONT LIGHTS ON AT NIGHT

Decision of Campbellford Commission To Charge For Power Causes Change.

STREETS DARK.

Lamps Maintained By Town Located at Centre of Street.

CAMPBELLFORD, March 19.—The town is to be several shades darker unless the light war that has sprung into being is called off or some reconciliation made.

The town street light serve as a light to the road intersection, but only a portion of the light falls on the sidewalk. The main streets have obtained most of their illumination in the past from the lights in the merchants' windows and in front of the stores. The reason for the somewhat darker streets is that the lights in front of the stores are now required to be placed on the meter system. Several of the merchants do not agree with this plan, and have had their service for these lights discontinued. In spite of the fact that the new rule is not to come into force till the first day of April, many of these services have already been discontinued. The result is a much darker street, now that the street lamps themselves are being almost entirely depended upon.

Some years ago the merchants were allowed to put these lights in front of their places of business and receive current free of charge provided the lights ware properly installed and kept in proper operating condition. The result was that the streets in the business section were more brilliantly lighted than before Judging from the feelings indicated by some of the merchants, the meter system is not going to meet with the approval of the majority and the streets are to be just that much darker. These merchants claim that they derive no benefit from having these lamps lighted during the entire night, and are quite content to have the streets as dark as the country roads after business hours.

CALCUTTA YOUTH A PROBLEM

Calcutta has a problem in handling its delinquent youth, and may have to adopt Western methods. Its juvenile court, reform school and three probation officers are said to be unable to cope with the growing number of youthful offenders, and observers say that the system of probation will have to be revised.

Brakesman Killed

INGERSOLL, Ont., Mar. 19.—(Canadian Press.)— Harry John Andrewes, C.N.R. brakeman, 28 Rodgers Ave., London, was instantly killed about 3.30 o'clock Saturday afternoon near the Stone Company fertilizer plant. The victim of the fatality was riding the pilot of the locomotive, which suddenly dropped and carried him under it. The body was terribly mutilated. There was no eye-witnesses of the fatality, so far as has been ascertained. The first intimation that the engineer and fireman received of the accident was when the fallen pilot began to bump over a switch. The pilot had evidently dropped shortly before that time and Andrewes had been carried for a considerable distance.

Coroner Dr. Cornish ordered an inquest. Andrewes was 47 years of age and leaves a widow and two children. The remains were shipped to London yesterday morning.

STIRLING GIRL HURT IN CRASH

Florence Barker Injured When Father's Car Skids on Port Hope Street.

J. LANEY DRIVING.

PORT HOPE, March 19.—A new sedan, owned by Walter Barker, of Stirling, Ont., and driven by Jack Laney, of Stirling, was completely demolished when it skidded on the slippery street at the corner of Toronto Road and Ridout Streets, Port Hope, at 5 o'clock yesterday afternoon, and crashed into a hydro-electric pole. Miss Florence Barker, daughter of the owner of the car, was riding in the front seat of the car, and when taken from the wreck was unconscious. She was rushed to the Port Hope Hospital, as was also Mr. Laney, where it was found that Miss Barker was suffering from severe injuries to her back. Mr. Laney's injuries were slight, and after treatment he was able to leave the hospital. The occupants of the rear seats, Mr. Barker and A. D. McIntosh, of Stirling, both suffered from cuts and bruises.

HOME ECONOMICS SUBJECT OF PAPER

Mrs. A. G. Austin Addresses the Members of Wooler Women's Institute.

WOOLER, March 19.—Mrs. Anderson entertained the members of the Women's Institute at the regular meeting held recently, at which Mrs. A. G. Austin gave a paper on "Home Economics." Mrs. M. Sharpe gave a practical talk on home dressmaking, advising ladies to wear costumes in color and quality suitable to the figure, not to look conspicuous because it was in vogue.

The business included reports from the library committee, the program committee, and the appointing of a committee to install three new street lights for the town. Mrs. L. H. Rowe gave an instrumental piano solo. A "hemming" contest was a special feature, the judges being Mesdames W. A. Smith and Roy Putman, who after skillful judging awarded Mable Bogg with a china salad bowl.

The March birthday party were Mrs. Murdoff, Mrs. Ashby, Mrs. Irvine Scott and Mrs. S. L. Terrill, the hostesses for the social hour. The roll call was an exchange of patterns, the response being apron, centerpieces, dresses, bloomers and quilt patterns.

Vienna Doctor Finds Cure For Pneumonia

VIENNA, March 19. Canadian Press. — Dr. Hans Siegenfeld, of the great Wilhelminen Hospital of Vienna, astonished the Austrian medical association on Saturday night by telling them that he had succeeded in entirely frustrating death from pneumonia of the type which often follows long operations under anaesthetics. Hitherto such cases have had a fatality record of about 33 per cent.

Dr. Siegenfeld said he used an intramuscular injection of twenty cubic centimetres of the patient's own blood. He said this injection could be given only after pneumonia has supervened, that it was not possible before operating, and was efficacious only when the patient's lungs were previously sound. He said the highest fever and congestion invariably disappeared within a few days under such treatment.

NEW PROPOSALS MADE PUBLIC

Will Be Presented To Joint Board Before Going To Church Assembly.

REVISION OF PRAYER BOOK.

LONDON, March 19 (Canadian Press Cable). — New proposals for revision of the Church of England Prayer Book which the House of Bishops will present first to a joint convocation of the ecclesiastical provinces of Canterbury and York and then to the Church Assembly, were issued yesterday.

The proposals are epitomized by the House of Bishops as follows:

"In the rubrics of alternative order for Communion of the sick provision was made for reserving the elements for communicating to the sick. In the first of these rubrics the priest was authorized when Holy Communion cannot reverently or without grave difficulty be celebrated in private, and also when there are several known sick persons desirous of receiving Communion on the same day, to set apart at open Communion in the church with the consent of the sick persons, so much of the consecrated elements as may be necessary for their Communion. In such cases consecrated elements must be consumed during the day and not taken back to the church. This rubric remains.

The second rubric dealt with cases where further provision was needed, and refers to what commonly is called 'continuous reservation.' In order to remove misunderstanding and to make it clear that the consecrated elements are to be reserved only for the sick and to be used for no other purpose whatever, the House of Bishops has recast the form of this rubric. In its present form the rubric lays emphasis on the duty of the bishop before he gives his license to be satisfied as to the evidence of real need for Communion of sick and dying for which provisions of the first rubric would not be sufficient.

"Further, in view of the proposals made by the House of Clergy and the House of Laity, it is now provided that where a bishop's license under this rubric is granted or refused the minister of the parish or the people as represented in the church council may refer the question to the archbishop and bishops of the province.

"The fourth rubric of the alternative order for Communion of the sick lays down definitely the place and manner in which consecrated elements when reserved shall be kept as to secure that this shall be done with all due reverence and at the same time that the only purpose of reservation which can be sanctioned by authority of the Church of England, namely Communion of the sick and dying, shall be made clear.

"A short declaration of fasting and Communion has been placed among the general rubrics of the administration. This is done in accordance with requests from the House of Clergy and Laity. The purpose of this statement is to give the practice of fasting before Communion its due place as an ancient and laudable custom of the church, but to guard against it being made oppressive to Christian conscience by being required as a necessary condition of celebrating or receiving Communion."

CANADIAN TARIFF HELPS DRY FORCES

Collection of Duty On Re-exported Liquor Aids U.S. Officers.

WASHINGTON, Mar. 17.—(Canadian Press.)—New York Herald-Tribune Despatch.)—The greatest aid to prohibition enforcement in this country, of late, according to Seymour Lowman, assistant secretary of the treasury, is the order issued by the Canadian authorities prohibiting the bringing of foreign liquor into Canadian bonded warehouses and re-exporting it to other countries without payment of the duty. Henceforth this liquor will pay the regular tariff of ten dollars a gallon, whether it is consumed in Canada or elsewhere, Mr. Lowman pointed out.

PAPER ON GARDENS IS GIVEN INSTITUTE

Mrs. J. A. Sexsmith Entertains Belmont Ladies—Rebekahs Have Card Party.

HAVELOCK, March 19. — Mrs. John A. Sexsmith entertained the members of the Belmont Women's Institute at the regular meeting held recently, when the president Mrs. Scott gave a very interesting paper on "Four Walls and a Garden Plot." The society decided to donate $25 towards the purchasing of prizes for the Belmont rural school fair. During the afternoon, readings by Mrs. J. Seabrooks, "A Woman's If," and Mrs. W. Smith on "St. Patrick's Day" were given; community singing and a musical program was enjoyed. At the conclusion of the meeting a dainty lunch was served.

At the close of the regular meeting on Thursday evening the members of Dorcas Rebekah Lodge No. 98, entertained a number of their friends at progressive five hundred. Twelve tables were played, the honor prizes being won by Mrs. D. Youmans and J. Little, with consolation awards to Miss Helen Thompson and James Craighead. A dainty lunch was served at the conclusion.

Manx, the native language of the Isle of Man, is passing, only about 1,000 of the island's 50,000 inhabitants being familiar with the tongue.

Two New Cruisers On Way To Canada

LONDON, Mar. 19.—(Canadian Press Cable.)—The two new Canadian cruisers, Champlain and Vancouver, recently obtained from the British navy, left Portsmouth Saturday for Canada after being inspected by the Canadian High Commissioner, Hon. P. C. Larkin. The boats, formerly the Toreador and the Torbay, have just been overhauled and refitted at Portsmouth. Their displacement is 1,075 tons and they have a speed of 36 knots. These cruisers are taking the place of the old destroyers Patriot and Patrician and will form the main strength of the Canadan navy force until the two modern torpedo-boat destroyers which the Canadian government has decided to order, are ready for service about 3 years hence. Commander C T. Beard, R.C.N. will command the Champlain and Lieut.-Commander R. I. Agnew, R.C.N., will command the Vancouver.

MISSIONS STUDIED BY MADOC Y.P.S.

Chapter Read From Book on India—W. M. S. Meets.

MADOC, March 19.—Miss McRory, missionary vice-president, had charge of the topic at the last meeting of the Y.P.S. of Trinity Church being a chapter from "The Christ of the Indian Road." This pointed a timely warning to people of the western world, for while the Asiatics love Christ they cannot respect Christian civilization.

Readings were given by Miss Bernice Bailey and Mrs. Duncan Brown, scriptural reading by Miss Florence Hale, and two groups of songs by the orchestra composed of Misses Schofield, Ferguson and Ludbrook, was much enjoyed. The Hudson car team led in the part of the "Race" run on Tuesday evening.

Mrs. Walter Whytock entertained the members of the Presbyterian W.M.S. at the March meeting held recently. The devotional exercises were conducted by Mrs. Pollard and Mrs. McCaffrey, after which the third chapter of "The Royal Road" was explained by Mrs. Jenkins, and Mrs. G. Wright told of our first western missionary, Lucy Baker. A duet by Mrs. Ashley and Mrs. James Whytock closed the meeting.

The members of the local chapter of the Eastern Star entertained about one hundred of their friends at a social evening on Monday, in the Orange Hall. Cards, refreshments and dancing were enjoyed by all. Mrs. Ambrose Smith and George White were the successful prize winners.

Personals.

Miss Margaret Kerr of Tweed is visiting friends in town, and sang a duet with Mrs. L. Ashley, "The Old Rugged Cross" at the evening service last Sunday, of Trinity United Church.

Mr. Raymond Rivers of Albert College, Belleville, sang on Sunday morning, "Open the Gates of the Temple."

Mr. and Mrs. C. Wallbridge are spending a few days in Toronto.

Rev. C. J. Young left recently for Vancouver, B.C., where he will spend some time with his son. Rev. Mr. Young has spent over forty years in the ministry and Bishop Seager has granted him six months' leave of absence.

Mr. Oliver Plane had the misfortune to have his hand severly cut while sawing wood with a circular saw.

Mr. Elliott Trotter is suffering from an injury received recently, while felling a tree, which hit him breaking his hip bone.

Miss Helen Francis of Stirling is visiting friends in Madoc.

Mr. and Mrs. T. Calleny and children of Penetanguishene are visiting at the home of the former's mother, Mrs. J. Callery.

Miss W. Morton of Stirling is the guest of her sister, Mrs. James Watson.

Mr. and Mrs. F. S. McFadden left town on Monday for the West, where they will reside in the future.

SHOCKS FELT IN NEW YORK STATE

No Serious Property Damage or Injuries Caused in 'Quake.

ALBANY, N.Y., March 19 (Associated Press).—Earth shocks which jarred windows, broke dishes and caused general apprehension shook north-eastern New York yesterday morning between 10 and 10.30 o'clock.

The tremors were felt in Saranac Lake. The shock was so severe that many residents fled their homes during the tremors. No injuries and no serious property damage was reported.

Geologists have explained following previous earth tremors that shifting of rock in Logan's Fault, in this section of the Adirondack Mountains is responsible for the quakes.

The last quake of several in the past 20 years was felt February 28, 1925.

The shocks were accompanied by a grinding and roaring. They also were felt on the Canadian side of the border, according to word reaching American points in the shaken area.

The tremors were felt in Saranac Lake at 10.20 o'clock, in Lake Placid at 10.22, and in Plattsburgh at 10.27.

In Helen Hill section of Saranac, dishes were shaken from shelves and reports from nearby sections said several buildings had been wrenched. The shock here and at Plattsburgh lasted ten seconds, while Lake Placid residents reported the shocks lasted fully a moment.

HOUSEHOLD GOODS SOLD AT AUCTION

Effects of Late Richard Parker Bring Good Prices.

BAILIEBORO, March 19.—The household effects of the late Richard Parker were sold by public auction on Wednesday afternoon, with James Roddy as auctioneer and Morley Smithson, of Otonabee, as clerk. The various articles were disposed of quickly and at a good price. The late Mr. Parker's estate has been purchased by Wesley Thompson and his son Norman Thompson is moving here shortly.

The farm stock and implements and some of the household effects of Walter Henry were sold by public auction on Thursday afternoon, with James Roddy as auctioneer and A. Birchard and N. Henry as clerks. A large number were present, and the stock brought good prices, horses sold from sixty to one hundred and sixty dollars, cows from fifty to eighty, and hens from eight cents to one dollar and a quarter. Shop hogs brought from eight to nine dollars.

Personals.

Messrs. S. Colter and A. Brown attended the sale at Bailieboro on Wednesday.

Mr. Oscar McGill of Cavanville purchased cattle in this vicinity on Wednesday.

The recent thaw made the roads almost impassable around Bailieboro and the mail carriers had great difficulties in going their rounds.

Further signs of spring are here, numerous woodchucks are sun basking on the sunny slopes.

Mr. and Mrs. Edmund Morrison entertained about eighteen of their friends on Wednesday evening at supper. The evening was spent in games, music and dancing. Those present were: Mr. and Mrs. F. Morrison, Mr. and Mrs. R. Morrison, Mr. and Mrs. K. Moncrief, Mr. and Mrs. R. Moncrief, Mr. and Mrs. G. Bebee, Mr. and Mrs. R. Perrin, and Mr. and Mrs. H. Moncrief.

Obituary

GEORGE BARRIE.

The death occurred in Newark, N.J., on Sunday, March 18th, of George Barrie, brother of W. C Barrie, 522 Chamberlain Street, in his 73rd year. The funeral and interment will be in Newark.

FIRST NUMBER OF EMPIRE SERIES

Quebec Ready Reference is a Model of Scientific Publicity.

The Quebec Ready Reference just issued by the Heaton Publishing Co., Toronto, is the first number of the British Empire Series. It contains in acceptable form more information to the square inch than any similar Canadian book—concise information which is adequate for seventy five per cent of the readers. Briefly it includes highway, resort and commercial maps; a classified chronology, winter sports, summer sports, open seasons and best districts for hunting and fishing, a detailed guide to Seaside and Inland Resorts, a complete summary of the resources of the Provinces, with mining featured, a study of the habitant, detailed descriptions of industrial centres, detailed descriptions of harbors and waterways, a complete summary of the industrial and market factors which have to be considered in the location of new industries, land settlement and living conditions, etc. A unique and most valuable feature is the section "Where to find it." Here references for complete detailed information are given to the best authorities and the available publications. The sections covers a wide field from summer cottages to rents, maps, folk songs and canoe trips to history, forest products, water powers and gold.

It is interesting to know that numbers of the British Empire Series will be issued covering other Provinces in Canada and other overseas Dominions. If they are equal in quality to "The Quebec Ready Reference", they should find a ready sale in bookstalls to intelligent tourists who want "real information" about the Countries they pass through.

AN APOLOGY.

Chamber of Commerce List Was Not Published o nSaturday —Appears To-day.

The Examiner regrets that it was unable to publish the list of members of the Chamber of Commerce on Saturday.

Notice was sent out by the Secretary that this list would appear in The Examiner on Saturday, and he handed in his copy in time. Due to pressure of news, however, space could not be found for this item, which is printed today.

The time limit for entering nomintations has been extended to Wednesday.

FRIGIDAIRE

THE CHOICE OF THE MAJORITY

See them today

New designs....New beauty

NEVER before has there been an electric refrigerator like the new Tu-Tone Frigidaires—in classic beauty of the cabinets, in sureness and efficiency of operation.

Frigidaire has long been the world's leading electric refrigerator—more in use than all others combined. General Motors genius, General Motors resources made the quality which brought such success. Now General Motors has turned to *style*, to *beauty*. Eminent authorities produced the new Tu-Tone cabinets which await your inspection at the Frigidaire showrooms.

It costs less to own a Frigidaire than it does to try to get along without one. Frigidaire prices are lower than those of any other make nationally distributed. Payments are very easy. Visit the display room today.

FRIGIDAIRE

PRODUCT OF GENERAL MOTORS

Those Charming Forties

are but the natural reward of youth safeguarded, as thousands will tell you, in this simple way

YOUTH at forty means caution at twenty, *extreme* care through the thirties . . . and rigid avoidance of untried ways every day of one's life.

Thus modern beauty culture turns now to natural means, and frowns on the artificial and often dangerous ways of yesterday.

The scientific skin care of today starts with the proved doctrine of pores kept open, of the skin cleansed daily with the balmy lather of Palmolive.

It is a simple method, but *certain* in results, and what it is bringing to millions, it will bring to you.

Retail Price 10c

MADE IN CANADA

3867

Palmolive Soap is untouched by human hands until you break the wrapper—it is never sold unwrapped

This is the method. Follow it, please, for one week . . . note the difference then

Wash your face gently with soothing Palmolive. Then massage it softly into the skin. Rinse thoroughly, first with warm water, then with cold. If your skin is inclined to be dry, apply a touch of good cold cream—that is all. Do this regularly, and particularly in the evening.

Use powder and rouge if you wish. But never leave them on over night. They clog the pores, often enlarge them. Blackheads and disfigurements often follow. They must be washed away.

Avoid this mistake

Do not use ordinary soaps in the treatment given above. Do not think any green soap, or one represented as of olive and palm oils, is the same as Palmolive.

And it costs but 10c the cake!—so little that millions let it do for their bodies what it does for their faces. Obtain a cake today. Then note what an amazing difference one week makes.

KEEP THAT SCHOOLGIRL COMPLEXION

THE BATTLE LINE THAT NEVER BUDGED

Sir Arthur Currie Tells How the Canadians Held the Vimy Sector During the Great German Offensive Ten Years Ago This Month, When the Allied Front Elsewhere Was Driven Backward Many Miles

(By GILBERT DRAPER, BRITISH UNITED PRESS.)

TEN years ago, on the 21st of March, 1918, the Germans launched the greatest drive of the Great War. It aimed to divide the French and British armies and to thrust the Teuton spear-head down the Somme to the Channel ports or Paris—probably both.

Had it succeeded—and it failed by the breadth of a hair—France would probably have been crushed and a final victory for the Allies rendered almost impossible.

The battle began on a fifty-mile front in a day of dense fog which hid the field-grey charge until it had swept, under an intense barrage, clean through the front line of the Fifth British Army. In four days the enemy had captured an area of hundreds of square miles. The Allies retreated with enormous losses of casualties, prisoners, guns and supplies, but their armies were unbroken.

On March 28th, Foch was appointed Generalissimo of all the Allied forces in France.

Until April 7th this phase of the battle raged, but on this date it came to an end with a bloody repulse of the final German attempt to drive home the separating wedge. The main German objectives were still ungained.

On April 8th the second phase of the offensive began with another great attack on the British armies in Flanders, near La Bassee and Armentieres. Again it smashed through for miles capturing scores of strongholds. Four days later, on April 12th, Haig issued his famous order to the British troops:

"Every position must be held to the last man. There must be no retirement. With our backs to the wall and believing in the justice of our cause each one of us must fight to the end."

And the line held during the terrible fighting of the next two weeks, until, with the bitter defeat of the attacking forces on April 29th near Ypres, this phase of the struggle came to an end.

The battle line as it stood then remained practically unchanged until a few months later when, after a last desperate effort on the part of the enemy towards Soissons, Foch began the drive that ended the war.

From just below Vimy Ridge down almost to Soissons, a distance of approximately seventy miles, a huge salient had been driven to a depth of almost forty miles—a great bulge running up to six miles from Amiens.

North of Vimy, from La Bassee almost to Ypres — about twenty-five miles—another bulge of approximately fourteen miles depth, had brought the Germans within forty miles of the Channel.

The sector in between where the battle-line never shifted an inch backward was held mainly by the Canadian troops.

* * *

The Canadians at Vimy.

THE Canadians had been ordered to hold their section of the line —the Vimy bastion especially— in order to prevent France's one remaining coal area from falling into the hands of the Germans, who at this period had occupied practically every coal mine of any importance in the country. The holding of the last one, therefore, was of prime importance, for if it fell, France's production of munitions would suffer what might prove a very serious blow. Indeed, Clemenceau, when he visited General Horne at the headquarters of the 1st British Army, declared that if this area was lost, France would be obliged to make peace.

Volumes of historic facts, of course, have been written about this and every other phase of the Great War, so it was with a view to getting a somewhat "different" story concerning the operations of the Canadian troops that the British United Press approached the man best qualified through personal experience to rub the dust of time from that ineradicable canvass, the man under whose guidance Canada's sons acquitted themselves so nobly—General Sir Arthur Currie, G.C.M.G., K.C.B., L.L.D., Commander of the Canadian Corps in France.

In his office at McGill University, Sir Arthur, once he had been persuaded to forget the many pressing demands on his time, was soon engrossed in reminiscences of the days that must be stamped indelibly on his memory, days when he was first and foremost the soldier, confronted with the heavy responsibilities of his high command, but happy to be at the head of "the best soldiers in the world," as he himself describes the men who fought under him.

* * *

Sir Arthur explained that with the disappearance of the Russian front, the Germans were enabled to turn the bulk of their forces against the Allies on the Western front and that their resources of men and material would be such that our power of resistance would be severely tried.

In order to prepare for the coming test, and with the lessons of previous fighting fresh in his mind, he resolved that every possible effort should be made to bring the Corps to the highest possible fighting efficiency.

"It will be recalled," said Sir Arthur, "that the ground held by the Canadian Corps throughout this period had been captured by the Canadians in the Battle of Vimy and subsequent actions, and held by them practically since its capture, except for a short interval during the Battle of Passchendaele. The area had been considerably improved during this time, and a very complete system of trench railways, roads, and water supply were in operation. Very comprehensive defences had been planned and partially executed.

* * *

"We Had to Hold Fast."

"BEHIND Vimy Ridge lay the northern collieries of France and certain tactical features which covered our lateral communication. Here, little or no ground could be given up.

"A comparatively shallow advance beyond the Vimy Ridge would have stopped the operation of the collieries, paralysing the production of war material in France, as well as inflicting very severe hardship on the already sorely tried population. In conjunction with the shortage of shipping which practically forbade an increase in the importation of coal from England, the loss of the northern collieries might have definitely crippled France. On the other hand, a deep penetration at that point, by bringing the Amiens-Bethune railway and main road under Army in a critical position, by threatening to cut it in two and by depriving it of vital lateral communication.

"The tactical and strategical results to be gained by a moderate success at that point were so far reaching in effect that, notwithstanding the natural difficulties confronting an attack on that sector, it was fully expected that the German offensive would be directed against this, the central part of the British front."

The French, according to Sir Arthur, always manifested the deepest interest in this sector, and it was often visited by their generals and other officers of high rank.

* * *

250 Miles of Trenches.

IN going over the extensive defence preparations carried out under his orders, Sir Arthur said that 250 miles of trenches were dug, 300 miles of barbed wire entanglements were set up and 200 tunnelled machine gun emplacements constructed, in addition to which existing trench systems, dug-outs and gun positions were strengthened and repaired.

"I often more than half wished," mused Sir Arthur, "that the enemy would attack. However, he never did."

The importance attached by the French to the Vimy Ridge sector was further emphasized by the visit of General Roques, formerly Minister of War, and at that moment attached to the Cabinet of the Minister of War. Having thoroughly inspected the defences of the Canadian Corps, he expressed himself as satisfied that every effort had been made to secure the Vimy Ridge against any surprise attack.

Another prominent visitor to the Canadian area was Earl Haig, who had shown the greatest interest in Sir Arthur's preparations, with which he had been most impressed.

Later, in chronicling his official report concerning the manner in which his troops had acquitted themselves, Sir Arthur wrote: "All ranks of the Canadian Corps were unanimous in their ardent resolve to hold to the last every inch of the ground entrusted to their keeping. . . . . It was for them a matter of great pride that their front was substantially the only part of the British line which had not budged, and one and all felt that it could not budge so long as they were alive."

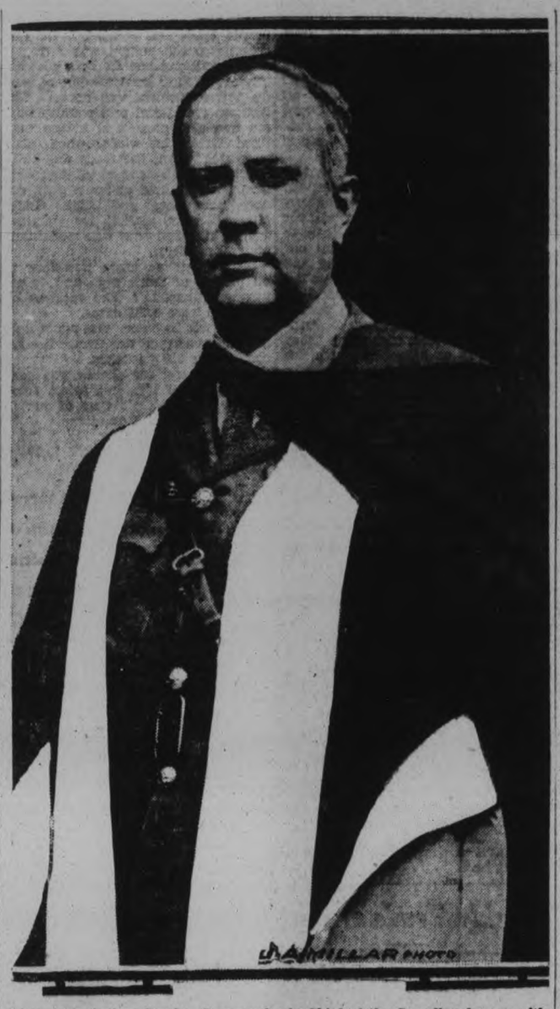
* * *

The German Strategy.

IN prefacing his most vivid impressions of this period of the war, the Canadian commander emphasized the fact that a German attack had been expected, as it was only reasonable to suppose that the enemy would sooner or later concentrate in a determined effort to separate the British and French, and that the result of this offensive was bound to have a vital bearing on the final issue. But that the German drive would be of such magnitude and of such unparalleled ferocity was not generally forseen, nor were the British aware that the enemy was prepared to sacrifice an appalling number of his own troops if only he could smash through to Paris or the channel ports.

At this time Sir Arthur was summoned to London by the authorities for a conference which was expected to last a few days. The Germans had just started the heavy bombardment that forecast the beginning of their offensive, so before leaving, he consulted with his Army Commander, General Horne, (now General Lord Horne), as to the advisibility of departure under the circumstances.

"He had heard about the attack," said Sir Arthur, "but he didn't seem to think it was serious enough to prevent my going over to England for a few days. In fact, he even suggested that I had better take my leave at the same time. It later transpired that the measure of success achieved by the Germans had been everywhere unexpected. Anyway, I left France and started for London."



General Sir Arthur Currie, Commander in Chief of the Canadian forces, with his academic gown over the khaki uniform.

An Unlooked For Situation.

WHEN passing through St. Pol on his way to the coast, Sir Arthur received some first-hand information as to the power of the German guns, for in this little town a building had been shattered by a German shell which must have been fired over thirty miles away; St. Pol was at least twenty-five miles behind the front lines.

"This was the first time I learned of a gun actually hurling a shell thirty miles," said Sir Arthur.

Paris had not then been bombarded.

On his arrival in England, Sir Arthur received a wire containing instructions from General Horne to return immediately, showing that an unlooked-for situation had developed almost overnight due to the unanticipated force of the German drive. Proceeding to Dover, he found the city congested with British troops who had been ordered back to the front but who could not be transported across the Channel because of a fog of unusual intensity that defied general and private alike. For a little while Sir Arthur was nonplussed, but hearing that Admiral Sims, U.S.N., was in the vicinity aboard a destroyer, he prevailed upon that veteran to convey him to Calais.

On the 23rd all leave was cancelled and all instruction courses abandoned, the danger of the enemy's sinister offensive being by now fully appreciated.

Scientific Miracles of The War.

ONE of the chief reasons for the successes achieved by the Germans during the fortnight or so beginning March 21st, explained Sir Arthur, was their ability to determine the weak spots in the British line, against which they concentrated in great strength and into which they drove wedges. And it was because they likewise knew the strength of the Canadian area that this territory was not then attacked.

This knowledge was obtained in a number of ways, though usually by observation from the air, it being possible for both sides to take aerial photographs of their opponents' line.

The Canadian observers were specially trained in this sort of work, and the science of deducting the position of invisible batteries, etc., played an important part in the fighting.

For instance, said Sir Arthur, the Canadians had microphones, placed near their front line, which "caught" the discharge of a certain German gun and straightway registered their "impressions" of it on an ingenious sound-ranging instrument further back, enabling the artillery surveyors to figure out in an amazingly accurate and speedy manner the position of the gun which fired the shot. Then, equipped with this information, it was the work of only a few minutes to direct the gunners to shell the spot indicated. Sometimes, said Sir Arthur, a message from a German scouting plane would be intercepted instructing a battery far behind the German lines to open fire, and it often happened that the Canadian observers were not only able to warn those occupying the threatened territory but were able to figure out the exact position of the German battery in question, with the result that the latter would be duly shelled.

The German plane, too, was frequently sent crashing to earth by Canadian airmen who were ordered up to [illegible] as soon as its presence was truly marvellous sound-ranging devices would be hard to estimate, for they made it possible for the Canadian artillery officers to ascertain the locality of a gun they couldn't see and to destroy it shortly after the sound of its discharge had been utilized in the aforementioned manner. Half a dozen microphones, or "drums", several thousand yards apart, was the usual number employed, and it was by comparing the oddly contrasted "sound lines" of each as they appeared on the parent instrument that the correct direction was obtained.

Operating in conjunction with the sound ranging officers were the "flash spotters," who also did invaluable work by "spotting" the flash of German guns far behind the line and, by comparing notes, figuring out their position for the Canadian gunners.

Incidentally, added Sir Arthur, the work of the Canadian artillery was even "praised" by the Germans themselves, who, when endeavoring to explain the why and wherefore of certain defeats, were wont to plead that they had been shelled by "those celebrated Canadians."

* * *

The Canadian Machine Guns.

CONCERNING the help rendered to the British by Canadian machine gunners, Sir Arthur said that on the night of the 22nd of March, following a telephonic conversation with General Headquarters, the 1st Canadian Motor Machine Gun Brigade, then in the line on the Vimy Sector, was withdrawn and ordered to be prepared to move south to the Fifth Army area. On confirmation of the order by telephone through regular channels, this unit left Verdrel at 5.30 a.m. on the 23rd to report to the Fifth Army. By midnight all batteries were in action on a 35-mile front east of Amiens, having travelled over 100 miles during the day.

"The 1st C.M.M.G. Brigade," said Sir Arthur, "commanded by Lt.-Col. W. K. Walker, and under orders of the Fifth and later of the Fourth Army, was ordered to fight a rear-guard action to delay the advance of the enemy and to fill dangerous gaps on the army fronts. For 19 days that unit was continuously in action north and south of the Somme, fighting against overwhelming odds. Using to the utmost its great mobility, it fought over 200 square miles of territory. It is difficult to appraise to its correct extent the influence, material and moral, that the 40 machine guns of that unit had in the events which were then taking place. The losses suffered amounted to about 75 per cent of the trench strength of the unit, and to keep it in being throughout the fighting, I authorized its reinforcement by personnel of the infantry branch of the Canadian Machine Gun Corps."

* * *

The 2nd Canadian Division.

IN describing the activities of the 2nd Canadian Division at this particular time, Sir Arthur said that at the end of March it relieved the 3rd British Division in the line in the Neuville Vitasse Sector, and on the night of the 31st extended its front southwards by relieving the left battalion of the Guards' Division.

The front held by the 2nd Canadian Division extended from south of the Cojeul River, east of Boisleux St. Marc, to the southern slopes of Telegraph Hill (where it joined with the of about 6,000 yards. The 2nd Canadian Division held this front for an uninterrupted period of 92 days, during which time it repulsed a series of local attacks and carried out no less than 27 raids, capturing three officers, 101 other ranks, 22 machine guns, two trench mortars, and inflicting severe casualties on the enemy.

"The aggressive attitude adopted by this Division at such a critical time," declared Sir Arthur, "had a most excellent effect on our troops, and it certainly reduced to the lowest point the fighting value of two German divisions."

* * *

The Canadian Defense Work.

ONE OF the most interesting parts of Sir Arthur's reminiscences dealt with events and conditions following the abandonment of the old front line system in favor of a line known as the Blue Line, a mile or so to the rear of the original position.

"This Blue Line," said the Canadian leader, "was originally sited and constructed as an intermediate position, and consisted in most parts of a single trench none too plentifully supplied with dug-outs. This meant that until a support line was dug and made continuous the troops had to be kept in strength in the front line, subject to heavy casualties from hostile shelling and to probable annihilation in case of an organized attack.

"I therefore directed that every effort should be made to give more depth to our new front line system by pushing forward a line of outposts and by digging a continuous support line, as well as by constructing reserve lines at certain points of greater tactical importance. We also built switch lines facing south, the importance of which became apparent when the Germans attacked the troops on the right and were at one time actually able to fire on the rear of our Vimy stronghold.

"Every available man was mustered for this vital work, and the need of properly organized Engineer Services was very keenly felt.

"Personnel from the Canadian Light Horse and the Canadian Corps Cyclist Battalion were organized in Lewis and Hotchkiss Gun Detachments and sent forward to man the defences in Vimy and Willerval localities, under orders of the 3rd and 4th Canadian Divisions.

"The Machine Gun Companies of the 5th Canadian Division had arrived in France on March 25, and in view of the extreme urgency of the situation, the personnel and armament had been moved by lorries, sent specially by Canadian corps, from Le Havre to Verdrel, where they were in Corps Reserve."

Some idea of the gigantic task confronting Sir Arthur and his men may be gleaned from the fact that on April 10, 1918, the front held by the Canadian Corps was approximately 29,000 yards in length. As the 2nd Canadian Division, which, it will be remembered, was under the VI Corps (Third Army) was holding 6,000 yards, the grand total of front held by the four Canadian Divisions amounted to 35,000 yards. The total length of the line held by the British Army between the Oise and the sea was approximately 100 miles; therefore the Canadians were holding approximately one-fifth of the total front.

Owing to the great length of the Canadian line, it was of necessity held very thinly and without much depth, and in this respect Sir Arthur said: "To deceive the enemy regarding our dispositions and intentions, we adopted a very aggressive attitude. The artillery constantly harassed the enemy's forward and rear areas and our infantry penetrated his line at many points with strong fighting patrols and bold raiding parties. Gas was also projected on numerous occasions. This activity greatly perturbed the Germans, who gave many indications of nervous uncertainty."

* * *

Armored Cars and Machine Guns.

THE part played in the struggle by armored cars was recalled with satisfaction by Sir Arthur, who stated that the Canadians were the only troops in the field who had them. "They brought great cheer to the British," he said, "and the latter greatly appreciated the many exploits in which they figured, particularly the manner in which they would charge and scatter any stray party of Germans. The cars were organized by General Brutinel, a Canadian officer who was a Frenchman. He was not, as is sometimes stated, a French-Canadian."

Nor would it be fair, added Sir Arthur, to forget those responsible for the Canadians' magnificent signal system, which was perhaps the best in France. It did the morale of the troops no end of good, for an efficient system of communication unifies a whole force.

Sir Arthur spoke in the highest terms of the Canadian machine gunners, whose sterling work in the Fifth Army area has already been mentioned in this article. Their efficiency, he said, so impressed the British that the latter, since the war, have adopted similar methods of organization.

"Indeed," said Sir Arthur, "I think one of the outstanding features of our Canadian Corps was the organization of the machine gun units, but it was not until the last days of the war that the newly organized detachments were able to demonstrate their worth. In the spring of 1918 we manned each gun with a sergeant, a corporal and six men, while each section was under its own officer and had its own transport, which made them all self-contained units. A section consisted of four guns; two sections made a battery, and four batteries one company."

The machine gunners were very much to the fore in the Battle of Lys, when the Germans attacked the British between La Bassee and Armentieres and, making rapid progress, crossed the Lys River, advancing west of Merville-Bailleul. The Canadian Corps were not, explained Sir Arthur, actively engaged in this fighting, but they now found themselves in a deep salient, following with no little anxiety the Battle of the Lys.

* * *

More Machine Guns Required.

THE situation was critical, and extensive steps were taken at once to increase the ability of the Canadian Corps to withstand hostile attacks.

"The success of the German offensives," stated Sir Arthur, "emphasized the need of greater depth for defensive dispositions, which depend very largely on the stopping power of the machine gun. Unfortunately the number of machine guns with a division was inadequate to give the required depth of defence on a front exceeding 4,000 yards in length. Each of my divisions was now holding a front approximately 10,000 yards in length, and the extemporised machine gun detachments formed previously, added to the machine gun companies of the 5th Canadian Division, in my opinion were far from sufficient for the task.

"I decided, therefore, to add a third company of four batteries to each battalion of the C.M.G. Corps, thus bringing up to 96 the number of machine guns in each Canadian Division. This entailed an increase in personnel of approximately 50 per cent of the strength of each machine battalion."

This action was taken on the Corps Commander's own authority, and the men were brought from the reinforcement depot in the field. All the other available troops in the area were organized into two brigades of about 2,000 men each and allotted definite duties.

How critical the situation was at this time may be judged from what General Byng said to Sir Arthur when the latter visited him in connection with the 2nd Canadian Division which had been sent to reinforce the British 3rd Army—"If they break through now nothing can stop them."

* * *

How Gas Attacks Were Managed

ONE of Sir Arthur's most interesting revelations was that during the year 1918, three-quarters of all the gas directed over the Prussian lines came from the Canadians.

"We had our own system of using gas. One way was to keep it in cylinders in the various trenches and let it off with each favorable wind. This, however, sometimes meant that we had to wait three or four weeks for the right wind. Besides, there was always the danger of a shell striking the cylinders and releasing the poisonous fumes in our own trenches. But we found a method to overcome this danger, and we were the only ones to successfully combat it. A short distance behind the front trenches we put down a light railway, being careful to camouflage it so that its presence would not be detected by the enemy. If atmospheric conditions during the afternoon indicated that a wind favorable to the setting off of the gas was likely within a few hours, we made up a little train miles behind the line and loaded it with cylinders. After dark this train was moved slowly and cautiously to a position just behind the front trenches, from which the men were withdrawn. We then released the gas. If conditions remained satisfactory, we repeated the performance."

Sir Arthur had risen from his chair and was apparently gazing through the window at the peaceful collegiate scene without, though it would indeed be an unobservant person who failed to surmise that he was seeing again the exploits he had been relating and that before his eyes was passing a grim panorama of battle-scarred France as he had known it a decade ago.

Suddenly he turned. "There is nothing," he declared with emphasis, "more demoralizing than the poisonous gas used in the war. The troops hated it. It was a constant menace, for there were many who could not wear gas masks without the greatest discomfort. Even the most hardy could seldom keep them on for more than six hours at a stretch."

* * *

Y.M.C.A. Did Good Work

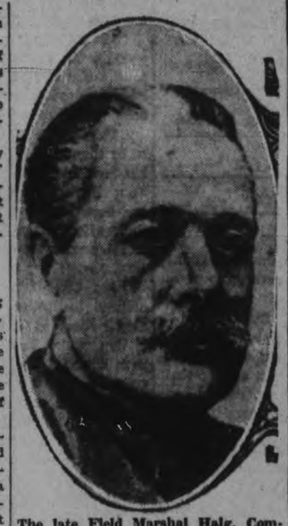
OTHER activities of the Canadians during this period centred in the evacuation of civilians from a number of towns which were regarded by the French authorities as being unhealthily near the front line. The job of getting the townspeople to quit their homes and retire to a safer area was given to Sir Arthur's men, to whose credit be it said that though some of these towns contained many unguarded and tempting taverns, there was not one case of looting a wine shop or drunkenness among the Canadian troops in connection with this work.

"You have no idea," remarked Sir Arthur, of the picture presented by these unfortunate refugees as they marched or were driven along the muddy roads away from their homes, nor of the difficulties we had in finding enough for them to eat. Here the Y.M.C.A. did splendid work, and if it hadn't been for it many of the rural civilians would probably have died during this trying ordeal. The children, however, seemed quite happy as they trudged along, sucking the chocolate bars which had been distributed among them by 'Y' workers. In the mining town the miners were left, but we had to remove their wives and children. The towns we evacuated the populace from were Bully, Les-brebis, Aixnouiette, Mines de Bethune, Mines de Annezin, Choques, Busnes and Hersin."

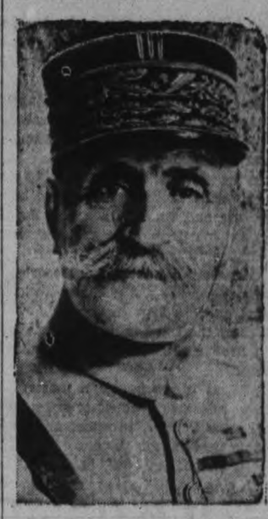
But in the midst of all this misery occurred several God-sent happenings of a distinctly humorous nature, one having to do with some Australian soldiers who went in search of a German tank which had been reported as having broken through the line. In the distance they sighted this hostile monster and lay in wait for it, only to discover that it was nothing more menacing that a wheezy farm tractor driven by an old French farmer.

Another ludicrous incident which might have ended seriously was caused by the report that a German spy had stolen a G.H.Q. car and a British general's uniform and was driving unmolested about the country. Some enterprising troops spotted the "spy" and wanted to shoot him, and there was no end of a row until it was ascertained that he was really a bona-fide British general, even though caught driving a "borrowed" car.

The reader will now have formed a fairly comprehensive opinion of the magnificent courage and devotion to duty of the Canadian troops who so gallantly held their section of the line while the hard-pressed British were driven back on either side, and he will undoubtedly agree that, though they did not have to repulse any German attacks of major proportions, they nevertheless, as their distinguished leader puts it, "played a part worthy

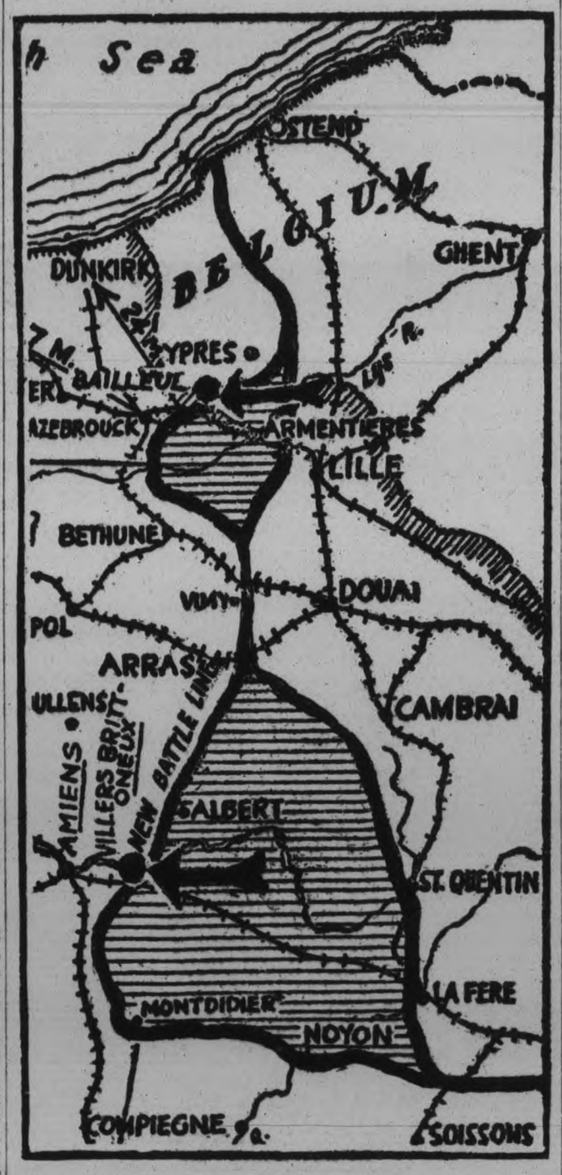


The late Field Marshal Haig, Commander in Chief of the British forces.



Marshal Foch, Generalissmo of the Allied forces.

THE CANADIAN LINE STOOD FAST



This map illustrates the position of the armies before and after the Great German offensive which began ten years ago, March 21. The arrows indicate the general direction of the German drives which smashed through the Allied lines for forty miles south and twenty-five miles north of the Vimy sector held by the Canadians which had been so fortified that it was never attacked and

This monument on Vimy Ridge was unveiled by Gen. Sir Arthur Currie who is seen standing in front. It commemorates the sacrifice of Canadian artillery-[illegible] fell there.

MR. WHATLEY'S SERVICES.

Peterborough's returned soldiers owe much to Sidney Whatley, who has resigned from the secretaryship of the local branch of the Canadian Legion after nine years' service on behalf of the ex-soldiers and his dependents.

Mr. Whatley fought the battle of the veterans on every possible occasion, but his outstanding contribution to the welfare of the men who fought and of their families was the work he did during the years when pension re-adjustments had to be dealt with, literally by the hundred.

His intimate knowledge of the pension regulations and of the intricacies of the red tape with which all Government activities seem to be entangled, but none so much as those dealing with the ex-soldier, has been gained by many months of faithful and persistent work in helping to straighten out difficulties and fight the claims of those who should never have to had to fight for justice.

Many a Peterborough veteran owes it to the former Secretary of the Legion that his case was carried through to a successful conclusion, and that the justice of what he asked was finally admitted by the authorities.

Those who know how earnestly Mr. Whatley threw himself into the task of smoothing the path for ex-service men in the re-adjustment period that followed demobilization are in a position to realize the extent of his services to a most worthy cause.

SCIENTIFIC NATIONAL PUBLICITY.

The mere spending by Dominion and Provincial Governments of millions of money in publicity as is urged in many quarters would be in the main ineffectual unless the thing is done well and systematically.

System is more important than money.

There would be little profit in spending time and money without adequate information and system.

National publicity designed to sell a country to the world naturally divides itself into three stages—first, the arousing of interest by pictures, lectures, newspaper articles, etc.; secondly, the satisfying of the interest thus aroused; and third, the preparation of special reports which tourists, investors, intending settlers, etc., want before they take action.

The claim is made in the Old Country that Canada in publicity methods has lagged behind Australia, New Zealand and South Africa, and the flow of British emigration, particularly to the first named country, would seem to justify the charge.

The annual invasion of tourists affords an opportunity for some real publicity work, inasmuch as investment should follow the tourist.

But the right information must be ready.

Provincial booklets so far have failed to meet the need.

What is required is a uniform series of Provincial ready reference booklets covering adequately the attractions for tourists, investors and intending settlers—the whole field in one volume.

Such booklets will, of course, have to be prepared with great skill, having regard to conciseness, arrangement, completeness and up-to-date accuracy, and it is therefore gratifying to know that a very promising beginning has been made in the British Empire series, the first number of which, the Quebec ready reference, has just been issued.

It is a model for publicity of this kind.

CANADA'S BANKS.

An interesting table has been sent The Examiner by the California Bank, Los Angeles, showing the relative position according to deposit liabilities of the largest banks of the United States and the British Commonwealth. The compilation does not include the deposits of saving institutions, it should be understood.

The figures are given for 150 of the largest banks in the Republic and the British Empire, and Canadians will be gratified to know that two Canadian banks occupy a very high position in the list, the Royal Bank of Canada being ninth and the Bank of Montreal eleventh.

Only five British banks out of the 60 listed and three American out of the 90 on the list have larger deposits than the Royal Bank, while the Bank of Montreal is close behind the Guaranty Bank of New York, which occupies tenth position.

The list is headed by the Midland Bank, Ltd., with head office at London, which has deposits amounting to $1,821,896,648, and in order follow Lloyds' Bank, Ltd., Barclays' Bank, Ltd., Westminster Bank, Ltd., and the National Provincial Bank, Ltd., all with headquarters in London, then the National City Bank, the Federal Reserve Bank and the Chase National Bank, all in New York, before we come to the Royal Bank of Canada, with deposits of $722,636,090, and then after the Guaranty Trust Company of New York is the Bank of Montreal with total deposits of $709,179,697.

The Canadian Bank of Commerce is 19th in the list, the Bank of Nova Scotia 49th, the Banque Canadienne Nationale 92nd, the Imperial Bank of Canada 102nd, the Dominion Bank 105th, the Bank of Toronto 109th, and the Standard Bank 142nd.

Altogether nine Canadian banks appear in the list of 150, with total deposits given as $2,625,341,639 out of a grand total of $37,911,522,131 deposits in the whole list quoted.

WHAT MAY IT LEAD TO?

If divorce laws are to be relaxed and broadened out in Ontario, what limits, if any, in that direction are likely to be set up?

Is there any reason to expect that easy divorce in Ontario will not descend to the present shifting level of easier divorce in the United States, where liberating laws have spawned a lengthening train of latitudinarian ideas of marital responsibilities and relationships.

Even the traditionally paramount purpose of marriage is freely questioned and denied in the United States, and the leaders of the revolt against the old customs and principles, men like Judge Ben. E. Lindsey and Havelock Ellis, are active, forceful and prominent propagandists.

Judge Lindsey, of Denver fame, is an industrious advocate of companionate marriage, but in his recent book on that subject it is noticed that he leans rather heavily toward free love, which is the very negation of marriage. By companionate marriage he means a union that is legal, but is intended to be childless, either temporarily or permanently. It may be dissolved at the will of the two persons, but if a child is born the marriage is regularized. Finally, it entails no financial obligation on the part of the husband for the support of his wife, or for alimony in the event of divorce.

The implications of this type of marriage are obvious enough. Its provisions for divorce are somewhat similar to the simple and convenient arrangements Bolshevist Russia adopted. And in that respect the Soviets have been rather accomodating and unconventional.

The British family has been immemorially bulwarked by the ideal of the Englishman's home. And his home has been his castle, a solid, impregnable unit of the nation. He has been the head of his house, and his wife has been his chatelaine, combining their interests and their affection in a happy nucleus of a society whose moral standards have thus far dominated the world of English-speaking men.

Are Canadians generally satisfied to retain that historic institution of the Englishman's home, or are they inclined to yield to the steady pressure of Americanization, which inevitably introduces and recommends such doubtful blessings as Judge Lindsey's marital nostrum of companionate agreements and other variations of what men have so long called the marriage state.

In the hundred years' history of this Peterborough section of Ontario marriages have apparently been highly successful. It is not very clear that the present-day protagonists of divorce would have effected by improvements which this community is conscious of having lacked.

THE LIQUOR ISSUE.

Two more candidates for the American Presidency have declared themselves on the prohibition issue—and it is an issue, even though the major parties, officially, seek to dodge it.

Senator Frank B. Willis, of Ohio, is known as a "dry" and in his interview with the United Press he came out vigorously for support of the 18th Amendment. "The Republican Party," he said, "has never wavered in the matter of law enforcement and respect for the constitution. The past history of the party leaves no room for doubt upon this matter. It will, and ought to, speak, in no uncertain terms, in favor of the maintenance of law and order and the upholding of the constitution which it came into being to defend."

The other man who spoke at the same time was Governor Albert C. Ritchie, of Maryland, who has been boomed for some time as a possible Democratic standard-bearer in this year's fight. Just as Senator Willis is known as a "dry," so is Governor Ritchie called a "wet," although in his statement he goes to some pains to point out that his argument is for State control of the liquor problem as against the existing Federal authority in the matter. Mr. Ritchie believes that the 18th Amendment was a serious mistake, and that better results could have been secured had the question been attacked in slower fashion. For 50 years before the Volstead Act came into force, he says, temperance sentiment was growing throughout the United States. In Maryland, for instance, practically the whole State, except the city of Baltimore, was "dry." He is inclined to think that the improvement process should have been allowed to proceed in this gradual manner. "Frankly," he told an interviewer, "I think it would be infinitely better to go back to those days, though I would not return to the saloon." Just how Mr. Ritchie would go back to "those days" without returning to the saloon that was so prominent in "those days," the Maryland Governor does not seem to have explained.

Mr. Ritchie thinks that prohibition is the big issue of the forthcoming campaign. "There is no use of the people fooling themselves," he remarked. "Prohibition is the only issue stirring the country." Perhaps Mr. Ritchie is right, but the attitude taken by Mr. Herbert Hoover the other day and Senator Willis later—both strong contenders for the Republican nomination—does not indicate that either has any fear of "wet" sentiment being sufficiently strong to beat the Republican party. Of course, Governor Smith, of New York, who looks like the chief bet for the Democratic nomination, is known as an outstanding "wet," but in the South, where the Democrats draw their greatest strength, it is generally recognized that "dry" sentiment predominates and that a Democratic presidential candidate of "wet" leanings might have hard going even there. Indeed, it is Mr. Smith's "wet" attitude, quite as much as the fact that he happens to belong to the Roman Catholic Church, that makes his selection as Democratic nominee open to so much doubt. There is no reason under heaven why he should not be the nominee, so far as his religious affiliations are concerned, but there are still a number of persons who view with alarm any prospect of having a Roman Catholic in the White House. On the other hand, the United States has many broad-minded persons who, quite aside from party leanings, would like to see Mr. Smith nominated and elected, if for no other reason than to prove that the majority of the nation is tolerant.

As pointed out, party managers on both sides have been anxious to dodge prohibition as a campaign issue. To them it is filled with dynamite and they would like to pass it by. Mr. Hoover has declared himself, Mr. Willis has declared himself, Mr. Ritchie has declared himself, and the last named does not agree with the first two. However, there is still considerable time between now and nomination day, and it seems hardly likely that the Democratic party, all things considered, will attempt to win out on an anti-prohibition platform. An indication of this is seen in the announcement today that Senator Thomas J. Walsh, of Montana, the Democrat who has become famous by his big work in uncovering the oil scandals which are now rocking the Republican party, has also thrown his hat into the presidential ring. Mr. Walsh, like Governor Smith, is a Roman Catholic. Unlike Mr. Smith, however, he is a "dry." With Herbert Hoover in the field as a Republican "dry," a "wet" Democracy wouldn't have a chance. It hasn't much chance anyhow, perhaps, but it would have even less on the "wet" side of a liquor fight.—Border Cities Star.

EDITORIAL NOTES AND COMMENT.

The Fish and Game Protective Association's drive for new members should be a success. The organization is leading the fight for the conservation of our resources of fish and game.

Between the fishing through holes in the ice and the poaching through holes in the administration of the Fish and Game laws it is not to be wondered at that how our resources of fish and game are diminishing.

The naval incident at Malta suggests the thought that this is not the first time harmony has been ruined by a jazz band.

GOD'S MINUTE

Therefore shall the people praise Thee.—Ps. 45:17.

Almighty God, Heavenly Father, Who art the life of men, we give Thee humble and hearty thanks for all the blessings of Thy merciful Providence; and we commend ourselves this day, and all who are near and dear to us—our family, our friends, our neighbors—to Thy divine care and protection. Give us grace so to live that we shall not be afraid to die. Save us from all dangers of soul and body. Grant us strength for our daily work, sufficiency for our daily needs, and a right judgment in all things.

We pray for our country, that it may be exalted in righteousness; for those who exercise authority, that they may be wise and just; for all our citizens; that they may be faithful to duty and obedient to law; that our land may be a land of liberty and peace, or true religion, of mutual service, acceptable to Thee, our God, and honored throughout the world.

Finally, we beseech Thee, O Father, to protect and encourage those, who, by life and doctrine, at home and abroad, are proclaiming the Gospel of Thy redeeming love. Send out Thy light and Thy truth, that all men everywhere may acknowledge themselves to be the sons of God, and that Thy Kingdom may be established in all the earth. Through Jesus Christ, our Lord. Amen.

Bishop Thomas F. Gailor, D.D., Memphis, Tennessee.

A Thought

A TRUE PURPOSE.

Whatever be our purpose in life, if it is a good and true one, we may rest assured we shall promote it best, not by seeking for large and impossible views of it, not by waiting for the clouds that obscure it to pass wholly away and leave it in untempered light, but by cherishing every gift that is afforded, by discovering all that is thus revealed, and by so conducting our actions and our life as to embody in practice that which we have realized in conception. "In small proportions we just beauties see. And in short measure life may perfect be."

Weekly Trade Report

WINNIPEG, Man., March 17 (Canadian Press).—The weekly trade report of the Canadian Credit Men's Trust Association, Limited, for the week ending March 17, 1928, is as follows:

Halifax—Wholesale trade reported good. Retail trade normal. Collections fair.

Saint John—An improvement is reported by the wholesale trade. Retail trade just fair. Collections inclined to be slow.

Montreal—Wholesale groceries are reported to be recovering from the slight depression shown last week. Sales have been fair. Dry goods satisfactory; boots and shoes in good demand. Sales of clothing and ladies' wear have been very fair. A good volume is reported by wholesale dealers in hardware and electrical goods. City retail merchants continue to be fairy busy. Country merchants report a slight increase in trading. Collections generally are improving. The near completion of some of the large buildings has provided considerable work for plasterers, and building trade generally continues busy. The pulp and paper industry is also busy. And the removal of snow and ice has provided plenty of work for unskilled labor.

Quebec—Sales in wholesale groceries are fair; dry goods improving; boots and shoes satisfactory. Sales have been fairly satisfactory in hardware, although total volume for February has been slightly below that of the same month last year. Business in lumber has been very satisfactory owing to the activity in building trades. Retail trading generally shows an improvement. Collections very fair. Conditions generally may be considered as good.

Toronto—An improvement in whole sale trade would appear to be continuing and the general condition would appear somewhat better than at the same time last year. No great improvement has taken place in retail trading. There is a fairly steady volume being transacted which is about normal for this time of the year. Collections can be considered fair.

Winnipeg—The wholesale trade is continuing very satisfactory, particularly in groceries, dry goods, boots and shoes and rubbers. Men's furnishings and ladies' wear fair, hardware normal. The retail trade was rather quiet during the past week, but still may be considered normal for this period of the year. Collections fair.

Regina—Wholesale groceries fairly good; dry goods normal; boots and shoes fair; hardware good. Retail trade in the city and country fair. Collections fair to slow.

Saskatoon—A normal volume of business is being transacted by the wholesale trade generally. Retail merchandise turning over in fairly satisfactory manner. Collections normal.

Calgary—Wholesale and retail volume holding steady. Local manufacturing reporting very satisfactory business. Automobile sales appear to be exceeding expectations. A large building program is awaiting opening up of spring weather, with the exception of collections in districts where large amount of crop is still awaiting threshing, everything throughout Southern Alberta appears to be on an exceedingly satisfactory basis.

Edmonton—A decided improvement in business is reported from all branches of the wholesale trade. Retail business very good. Collections showing considerable improvement. Very optimistic feeling in all lines of business.

Vancouver—Manufacturing fair. All lines of wholesale business report conditions as being generally fair. Retail trade is somewhat quiet. Collections fair.

CATTLE, GRAIN AND PRODUCE

MONTREAL GRAIN AND PRODUCE.

MONTREAL, March 19 (Canadian Press). — There was a good inquiry for Canadian Western mixed oats from foreign buyers here on Saturday, and exporters worked some business for nearby shipment. The domestic trade was quiet, but the undertone to the market was firm.

The export trade in spring wheat grades of flour continued good and an active business was done. The demand from local and country buyers was also good, and values were firm. Prices for winter wheat flour were steady, but the trade was dull.

Prices for all lines of millfeed were firmly maintained under a good demand from local and United States buyers. The market for standard grades of rolled oats was moderately active and firm.

A fairly active trade was done in all grades of fresh eggs and values were unchanged. The receipts on Saturday were 1,883 cases.

The trade in butter was again dull, but the undertone was firm. The receipts were 519 packages.

The demand for cheese was confined to small lots, but prices ruled steady. The receipts were 47 boxes.

CHICAGO GRAIN.

CHICAGO, March 19 (Canadian Press). — Unexpected scantiness of wheat supplies in country mills and elevators brought crowds of brokers back to the wheat pit on Saturday, and swung the market upward. Meanwhile, corn rose to fresh top price records for the season, but fell off under heavy profit-taking. Rye finished at the highest level yet for the present crop.

Closing quotations on wheat were unsettled, ¼c to 1c net higher, with corn ⅝c to ⅞c down, oats unchanged to ½c lower, and provisions at 5c to 20c advance.

In addition to stimulus given to wheat buying as a result of the United States Government report showing comparatively meagre stocks of wheat on hand at country mills and elevators, new advices were current from Chicago crop observers pointing to likelihood of big abandonment of winter wheat acreage both in the central west and the south-west as well. Trade leaders meanwhile gave special emphasis to the fact that official figures telling of 12,000,000 bushels reduction of country mill and elevator stocks as compared with last year, were about 16,000,000 bushels under the estimates of private experts.

A sensational aspect of the Government report, one unofficial authority said, is that there is 40,000,000 bushels of wheat unaccounted for after allowing for increased seed requirements for winter wheat. He added that it is evident that either the original supply was over estimated or else that there has been a domestic disappearance upon a much greater scale than last year.

The outstanding feature of Saturday's trade in feed grains was that export business was done both in corn and oats, with prices also on about a working basis for barley, an unusual situation.

Provisions owed their strength to buying of July lard for Europe.

STERLING EXCHANGE.

MONTREAL, March 19 (Canadian Press). — Sterling exchange rates were quoted here yesterday as:

Demand—$4.87 5-16.
Cables—$4.87 13-16.

GREAT CLIMBING FIELD

The most extensive, interesting and readily accesible field for alpine climbers today is found in the Canadian Rockies, particularly the portions included in the national parks of Canada.

Best Remedy for Kidneys and Bladder

British Columbia Man Used Dodd's Kidney Pills

"I have been using Dodd's Kidney Pills for Rheumatism and Bladder trouble," writes Mr. W. E. Howey, R.R. 1, Langley Prairie, B.C. "I had tried a good many medicines but with little results. I started to use Dodd's Kidney Pills, taking three boxes altogether. Before taking Dodd's Kidney Pills I was hardly able to walk, but now I am quite well. Dodd's Kidney Pills are the best remedy for all Kidney trouble." Dodd's Kidney Pills are purely and simply a Kidney remedy. They tone up and strengthen weak kidneys so that they can do their work of straining the impurities from the blood.

INVESTIGATORS SEEK CAUSE OF DISASTER

Reported That Foundation On Which Dam Was Built Was Faulty.

SANTA PAULA, Calif., March 17 Canadian Press. — With the known death toll standing at 208, several sets of investigators dug deper into the available evidence to-day in an effort to unearth the cause of the St. Francis dam disaster.

Although two coroners' juries found yesterday that the victims came to their death by drowning as a result of the breakin of the dam they did not attempt to fix the blame From two official investigation sources however came reports that the foundation upon which the great structure was built was faulty.

The Greatest Man in the World

TO those dear to you, you are the greatest man in the world . . . the wisest and the most far-sighted. They trust you to protect them from hardship and privation. And to the best of your ability you would do so.

Yet there may come a day when you will no longer be here to shield them . . . to provide for their needs. Will their faith in you then be justified?

You realize that their confidence challenges you to greater vigilance in their behalf. Have you made the provision for them that you know to be necessary? Is your Life Insurance sufficient to meet their needs? Do you realize that $5,000 invested at 6% yields an income of less than $6 per week?

For the sake of those who love and respect and trust you . . . those to whom you are the "greatest man in the world" . . . take pencil and paper, and figure how much you have done toward the building up of an estate. Then call in the representative of any Life Insurance Company and learn how little is the cost of adequate protection.

FINE DECORATIONS FEATURE SOCIAL

Regent Street C. G. I. T. Group Celebrates St. Patrick's Day.

LAKEFIELD, Mar. 19. —The annual St. Patrick's party given by the C.G.I.T. group to the Tuxis Square of Regent Street United church was held recently. On entering the room, one would exclaim, "Oh, how pretty," and pretty it was, with its green and white decorations, festoons of crepe paper, attractively carried from corner to corner. Each person was given a comical shaped cap of green and white paper, with a request to wear it and the effect was in most cases charming, especially on the fresh faced young girls, in their uniforms of white middies and blue pleated skirts.

The eight pieced orchestra of the Regent Street Sunday school, was in attendance and gave a splendid program of music for the promenades. It was rather amusing to see two shy boys promenading in company, casting wistful eyes at the fair damsels and eyeing enviously their older brothers who had ventured to ask a girl for a prom. By special request two extra numbers were added, Leap Year promenades, the girls doing their duty nobly.

The girls and boys and adults gathered around the tables which were set in the centre of the room and which were particularly attractive, in white and green caudlesticks, dainty cut reminiscent of the "low back car,' 'and "Kathleen Mavourneen," and the dear old ballads. Several plump green pigs were seated comfortably on the table and an eight inch replica of the famous stage Irishman was in a place of honor on the table. The menu was carried out in green and white. A short program was given with Mrs. Kemp as chairlady, while songs consisting of a duet by Miss Margaret Richardson and Harry Wannamaker, 'The Keys of Heaven"; Miss Ora Dunford, "An Affectionate Letter" and "The Tribulations of Biddy Malone," which were both in the Irish dialect. Messrs. Burrows, Wannamaker and Kenneth Kemp sang unaccompanied, "The Bullfrog on the Bank." Mrs. McMillen sang the modern Irish song, "Oh Molly O'Malley," in her pleasing manner. Mrs. H. E. Moore was the accompanist for all the musical numbers.

Mr. Kemp was called for an address on Saint Patrick but he felt the hour was too late to deal with the subject properly and instead voiced his appreciation of the successful evening, and the value of the orchesra to the church and Sunday school. ening, and the value of the orchestra and all who had taken part was moved by Misses Merle Crawford and Grace Darling. Walter Madill replied on behalf of the orchestra, of which he is a veteran member, after which Norman Lemay proposed three cheers for those who had made it a success, and A. B. Burrows called for cheers for the one who was prime mover, Mrs. S. A. Kemp, who has labored faithfully in the congregation and who has given so much time to the work among the young people.

How Thin Men and Women Gain in Weight.

McCoy's Cod Liver Extract Tablets, sugar-coated and rich in weight building agents, are easy to take and will not upset or even disturb the most delicate stomach.

These wonderful health building strength creating, weight producing tablets are now sold in every drug store in North American and millions of them are used every month.

McCoy takes all the risk—Read this ironclad guarantee. If after taking 4 sixty cent boxes of McCoy's Cod Liver Extract Tablets or two one dollar boxes any thin underweight man or woman doesn't gain at least 5 pounds and feel completely satisfied with the marked improvement in health—your druggist is authorized to return the purchase price.

Ask McDermid & Jury, Bond's Drug Store, McDermid Drug Co., Giles Drug Store, James Lynch or any good druggist.

NO HOLDS BARRED

KANSAS CITY, Mar. 19—There are no limitations to the amount or kind of "teasing" a wife may do in order to get friend husband out of bed and to work on time in the morning. Judge Smith in municipal court here fined Walter Trimble for "disturbing the peace" when he made strenuous objection to his wife for bending his toes back to bring him out of slumberland.

What Does "BUDDHA" mean ?

CANADA CEMENT GETS GOOD LEAD

Defeats Grove 6-1 in First of Play-off Series.

LAKEFIELD, March 19.—The Canada Cement hockey team won from "The Grove" on Thursday 6-1, in a well contested match, the first game in the three-cornered tie which ended the regular district schedule. Hunt and Bagg, who have been outstanding in all their games, did excellent work, while Smith in goal played a steady game. For the winners, Louis Sabatino and Braden Blewett were at their best and played a fast clean game. Hamblin in goal, like his opponent, Smith, was steady and strong. The Cement defencemen, Darcy Hill and John Sabatino, were hard to pass, and were veritable bulwarks of strength to their team. The junior member of the sextette, Wingett, played a fair game. The bell was handled by G. H. Losemore, who gave general satisfaction to every one. Play was keen from the face-off to the last bell, and for the first fifteen minutes the puck slid back and forth, first with one side and then the other, with a decided partiality for the Grove goal. The period ended with the score 2-0 in favor of the "concrete boys."

The second period set even a faster pace. Wingett drew two short penalties in this period. With a score of 4-0 against them, the Grove went bravely into the third period undaunted and played hard, mindful of the fact that the third period had proved a surprise packet in most of the district games when the result of the first period was often reversed. The Cement team was also mindful of this, and worked hard to the finish. Nielson scored the final goal of the game, and although Peck, Earl II., Bagg, Hunt and Nielson worked hard to add another counter, Hamblin tightened up and the final bell saw the score 6-1.

The Cement team and the Grove Grads meet early this week, and the winner plays Warsaw if the ice holds long enough. Last year, for the first time in the past five years, the District League was not played to a finish owing to an early break up of the ice.

The line-up for the Grove was: Goal, Smith; defence, Hunt and Earl II.; centre, Peck; wings, Nielson and Bagg; subs., Earl I. and Leggatt.

Cement Company—Goal, Hamblin; defence, Sabatino and Hill; centre, Sabatino; wings, B. Blewett and Wingett.

MANCHESTER PORT MUCH IMPROVED

Eighty Million Dollars Spent On Canal —Now Fourth Port.

TORONTO, Ont., March 19.—As the result of an expenditure of more than $80,000,000 on the canal project in connection with the port of Manchester the port is now the fourth in importance in Great Britain, R. D. Harding, Canadian representative of the Manchester Ship Canal, told an audience in an address in this city. Ocean ships have sailed up the canal since 1894, Mr. Harding said. Manchester is a seaport 60 feet above the level of the Mersey River, where salt water shipping from the four corners of the world is to be found.

PEDDLERS BOTHER BROCKVILLE LADIES

Complaints Registered About Persistency of Some Agents.

BROCKVILLE, Ont., March 19 (CP).—An editorial in the Recorder and Times refers to the persistent way in which housewives are annoyed by a certain class of door to door peddlers. The main cause of the complaint was the fact that a Brockville citizen had returned home recently to find installed in his kitchen an electric washer which neither he nor his wife ordered, and which, as a matter of fact, they did not want. Most women are busy. The household duties take up a great deal of time, and they have no time to waste listening to door-bell ringers expatiate on the merits of some article in which they are not the slightest bit interested.

In Brockville some of the bell-ringers won't take "No" for an answer, and are disposed to argue the question. One case is reported of a man putting his foot in the door and preventing the woman from shutting it. If the husband is home, which unfortunately he seldom is, that type of nuisance should be kicked off the place. One way of stopping this is to take careful note of the person's appearance and what he is selling and report him to the police.

GRENFELL TELLS OF MANY TASKS

Has Been Dentist and Eye Specialist as Well as Physician.

MONTREAL, Que., March 16 (CP.)—Speaking in this city Sir Wilfred Grenfell said

"I have done more dentistry in Labrador than I ever anticipated when I was studying surgery in London." He cited many cases of suffering he had relieved at times when the proper facilities for aiding patients were miles from outposts where he happened to be. He told of the hundreds of spectacles he had been able to secure and, at scarcely any cost, supply to poor, short-sighted residents living far from villages. There were even persons who through the work of the mission had their sight restored after years of blindness. He mentioned especially two young people of Labrador whom he had had trained at an institution in Halifax. Through the skill of a specialist whom Sir Wilfred secured these afflicted persons regained their sight.

War In Desert Breaks Out Anew

BASRA, Irak March 19. — A desert war broke out in a new quarter on Saturday, when Persian tribes of the Pushtuku area crossed the frontier near Amara, north of here, and attacked the Beni Iam tribe of Sheik Gumfuoh. After sharp fighting in which the Persian leader was wounded and numerous casualties were suffered by both sides, the Persians escaped, taking with them more than 15,000 sheep. The British mandate officials have sent a commission of inquiry to Amara.

DISTRICT MARKETS

Oats, 55c bushel; wheat $1.25 bushel; barley, 75c bushel. Hay, $12 to $13 a ton.

KINGSTON, Ont., March 17 (Canadian Press).— A warning has been issued by the Levana Society executive reminding the co-eds at Queen's University that the regulation making the wearing of a gown in the Arts Building compulsory must be strictly observed. A number of cases have come up recently where girls have given up wearing the gown, but offenders will now be haled before a Levana tribunal.

Taking the "long" out of Long Distance

"IT'S all right, Chief. Joe will catch the 4.40 and be at the Conference this evening"—said the Sales Manager as he came to the President's door.

"Why it isn't five minutes since I asked you to call him!"

"I know, but *Long* Distance is *short* distance, nowadays. I've got a list of the out-of-town numbers we call, and by giving Long Distance the number we want she is nearly always able to make immediate connection."

If you haven't the distant number, Long Distance will look it up for you—and tell you what it is. But it saves everybody's time to have a list of out-of-town numbers. We will prepare one for you, if you will give us a ring.

W. C. BEAMER
Manager.

Black and all lovely new colours, in sizes for women and misses.

RICHARD HALL Limited

CITY ACCEPTS RESPONSIBILITY

Los Angeles Prepared To Make Restitution To Stricken People.

243 KNOWN DEAD.

LOS ANGELES, March 17 (Canadian Press). — Having acknowledged through Mayor Cryer its "moral responsibility for the loss of hundreds of lives and millions of dollars worth of property in the St. Francis Dam disaster, the city of Los Angeles today assumed the task of making restitution to the stricken valley. The Mayor, who spoke on behalf of the municipality at a conference of the City Council men and other officials, did not say to what length the city would go in restoring the valley, but the Los Angeles Chamber of Commerce announced it would propose to the Council a rehabilitation program based on an estimate of a million dollars property damage." This is at least four million dollars below the lowest estimate of the damage.

The last check-up of the number of bodies recovered from the flood-swept valley showed a total of 243 known dead. Of these 209 had been identified and 34 remained unidentified.

Guard Against "Flu" With Musterole

Influenza, Grippe and Pneumonia usually start with a cold. The moment you get those warning aches rub on good old Musterole.

Musterole relieves the congestion and stimulates circulation. It has all the good qualities of the old-fashioned mustard plaster without the blister.

First you feel a warm tingle as the healing ointment penetrates the pores, then a soothing, cooling sensation and quick relief. Have Musterole handy for emergency use. It may prevent serious illness.

The Musterole Co. of Canada, Ltd. Montreal

Better than a mustard plaster

CHAMBER OF COMMERCE EXECUTIVE TO BE CHOSEN

Members Asked To Nominate 32 Candidates From List.

16 TO BE ELECTED.

In order to create greater interest, on the part of the membership, in the affairs of the Chamber, and the selection of officers who direct its policies, the Executive Council have ruled that all members shall, this year, be asked to perform part of the duties of the Nominating Committee.

A full list, alphabetically arranged, of the members of the Peterborough Chamber of Commerce appears below, from which, according to the Constitution, you are asked to select 32 names, or individuals, suggested candidates for election to the Directorate of the Chamber of Commerce. Write these names carefully on the reverse side of letter, which has been mailed you, return it to the Chamber, using self-addressed envelope provided, which must be mailed so as to be in the hands of the Nominating Committee not later than 5 00 p.m., Wednesday, March 21, 1928.

The thirty-two individuals receiving the highest mention shall constitute the "Official Ticket," or ballot, from which, later, you will be asked to select sixteen to comprise the actual Executive Council for the year 1928-29. The Executive Council-elect will, prior to the Annual General Meeting, elect from its own number a President, Vice-President, Treasurer, and engage a Secretary.

It is expected that the date of the Annual Meeting will be announced shortly—in the meantime please facilitate matters by attending to nominations as above. Such nominations should be representative of every line of business, professional or other activity represented in the membership.

The list as below is as nearly perfect as it is possible to make it from the office records, augmented by the city and telephone directories. It will be considered a favor if you will kindly telephone in any corrections to any member of the Chamber of Commerce staff—telephone 1360.

The membership list, of course, does not include the names of about fifty subscribers to the Activities Fund, amounts ranging from $5.00 upwards. A subscription of less than $15.00 to the Activities Fund does not qualify or entitle the subscriber to a paid-up membership in the Chamber at $15.00. A number have subscribed amounts in excess of the membership fee, stipulating that such contributions be credited in the Activities Fund—no membership or voting privileges being required.

Signed J. R. CORKERY,

"YEARS OF PROGRESS IN WASHING"

By HILDA DORAN ROSS
Home Economics Counselor

"GRANDMOTHER says that when she was young everybody made their own soap. Yes, it was harsh soap—ruinous to fine silks and laces—but then it didn't matter. People wore sturdy homespun clothes made to withstand hard treatment. Now we wear soft, silky garments which just simply cannot be washed with ordinary soap.

"For years manufacturers have been experimenting and improving soap. And as Home Economics Counselor, I have tested soap in every form, so that I could advise housewives with authority. My tests have shown me that the best soap for the weekly wash and for all household washing tasks is Princess Soap Flakes. They contain no harsh chemical filler, or harmful free caustic, and will not hurt your hands or your daintiest garments. And they are just as effective for heavier things.

"Princess Soap Flakes are economical, too. A small amount dissolves into mountains of foaming suds which clean clothes like magic."

DON'T HAVE RED HANDS

Princess Soap Flakes will not harm your hands because they contain no harsh chemical filler or free caustic.

OUR GUARANTEE

We guarantee to replace any washable garment which, by reason of its having been washed with Princess Soap Flakes, has been damaged in texture or its color made to run, provided such garment has been washed in accordance with our instructions.

PERSONALS

Mr. and Mrs. Robert Pue announce the engagement of their daughter Jean, to Walter T. Ford, son of Mrs. Ford, of Bailieboro, the marriage to take place the latter part of March.

• • •

The engagement is announced of Margaret Victoria, only daughter of Mrs. M. Goodson and the late John Goodson, to Frank C. Gray, only son of Mr. and Mrs. H. Gray, Aylmer street, the marriage to take place early in April.

• • •

Mrs. C. H. Cheverill, Stewart street, spent the week end in Toronto Her daughters, Misses Marion and "Ted" of Oshawa, accompanied her

• • •

Mrs J. W. Hales, 635 Stewart street, was in Tweed on Sunday, attending the funeral of an old friend Mr. Samuel G. Way, who is well known here. He was the editor of the Tweed Advocate and owner of the Dominion Foundries of Tweed.

A very successful "Conundrum Tea" was held at the Mark street United Church on Friday evening March 16, under the auspices of the Gleaner's Bible Class of the Sunday School The room was beautifully decorated in green and white with a profusion of green shamrocks. The guests were received by Mrs. T. I. Hill, president of the class. Tea was served at six small tables, which were very attractive with their decorations of green shamrocks. The menu was very unique and many of the guests were quite puzzled as to which of the fifteen oddly named articles to order.

• • •

Those assisting in serving were the Misses Blanche Scott Mildred Perry Amy Drury, Aileen Nicholls, Myrtle Perry, Grace Crysler, Mabel Reynolds R. E. Delong, Mrs. V. Boorman and Mrs. H. Hunter made the tea, and Miss Schriver assisted as cashier. Others assisting were Mrs. L. Agnew Mrs. G. Stevenson, Mrs. W. McNair, Mrs. H. W. Cooper, Mrs. Morrison, Mrs. Tucker, Mrs. Robert Stokes, Miss Mary Wilson.

• • •

An excellent program was rendered by the following artists: Vocal solos, by Mrs. E. Wand, Mrs. H. Hunter and Miss Olive Howland, accompanied by Mrs. W. H. Smith. An instrumental piano solo was given by Miss Hurl, and readings by Mrs George H Rowe and Mr. Max Peters

• • •

A very enjoyable dance was held at the Paragon Hall on Friday evening, under the auspices of the Cricket Club. Excellent music for dancing was provided by A. Clarke at the piano and H. Childerhouse on the traps. The following committee were in charge, and served a very dainty lunch: C. Thorpe, G. Monkman, and W. Massey-Cook. Among those present were the Misses H. Evans, M. Huston, G. Brownlee, P. Buller, M. Bowler, J. Gillespie, B. Palmer, B. Massey-Cook, B. Dunkerley, L. Tennyson, Messrs. T. Jenkins, D. Deyell, E. Huston, J. Dishart, B. Hammond, T. Quip, D. Clark, Vern Fuller, R. N. Stewart, Jefferson.

• • •

The auditorium of the Queen Mary School was the scene of a very attractive Irish tea held on Saturday, March 17th, under the auspices of the Home and School Association. There was a large attendance and the receipts were most gratifying. The decoration of the room was carried out with green and white streamers across the hall in narrow green fluted paper. The piano was decorated with a plug hat with green band and clay pipe, green candles in silver holders and bud vases containing spring flowers. The crown of the plug hat was filled with real Irish shamrocks. The guests were received by the president, Mrs. C. R. Banks, assisted by Mrs. W. Lytle. The tea table was very pretty, with a white linen cloth adorned with shamrock cutouts and "Pat and Bridget" were also very prominent, having a place of honor on the table. The centre had a silver basket banked in green tulle and filled with spring flowers. Silver candle sticks with tall green candles and pretty little green containers of candy, made a very effective table. This was presided over by Mrs. E. G. Wagar and Miss C. Cairns. Those assisting were Mesdames Worsencroft, Skinner, Trussler, Dobson, Shiner, Connolly, Driscoll and Lytle. The home-made cooking table, in charge of Mrs. W. Cathcart and Mrs. S. H. Huffman, was also very prettily decorated in green and white, and the many good things found a ready sale. The program, in charge of Mrs. G. S. Parlour, was very much enjoyed by those present. It included piano selections by Miss M. Hetherington, and vocal solos by Miss Diana Liddle, accompanied on the piano by her father, G. F. Liddle; choir boys' quartette (E. Davis, W. Howell, D. McPherson, R. Pitchford); vocal solo by Master Roy Pitchford, accompanied by Miss M. Flowers, and vocal solo by Miss Ruby Quartermaine. The program throughout was very interesting and thoroughly enjoyed by everyone. Mrs. W. T. Wilson acted as treasurer during the afternoon. Mesdames Worsencroft and Skinner were general convenors of the tea table.

• • •

Miss Hazel Crowe, Brock street entertained at bridge on Friday evening.

• • •

The Misses Frances and Genevieve Murray spent the week end in Toronto.

• • •

Martin Chenhall, Junior, of Toronto, was a visitor to the city yesterday.

• • •

Miss Hazel McPherson and Miss Helen McLean of Mount Pleasant were in the cit recently.

• • •

Mrs. Nelson Degan and children of Kitchener are guests of Mr. and Mrs J. F. Degan, 173 Westcott street.

• • •

Senior members of the Y.W.C.A. gymnasium classes held a very pretty St. Patrick's tea at the Association on Saturday afternoon. The central tea table, presided over by Mrs. H. eBal, a member of the Physical Committee, was prettily decorated with yellow daffodils and candles and green souvenirs of Ireland. The little tea tables, in green and white, were in charge of the following members of the elementary and advanced gymnasium classes, Jessie Pattison, Marjorie Long, Carrie Tourhbourn, Mabel McLaren, Ina Terrace, Adele Milbourn, Sybil Ecobichon, Freda Shurety, Mrs. McWilliams, and Mrs. Ross. The candy and home-made cooking table was presided over by members of the intermediate gymnasium class. A very interesting Irish program was given by members of the Y.W.C.A.. Edna Starr, a member of the junior gymnasium class, danced the Irish national dance in a pretty Irish costume, Edith Guiry and Margaret Wyllie contributed Irish recitations, and Miss Musa Cox instrumental numbers. Miss eJssie Pattison sang "Come Back to Erin," accompanied by Miss Freda Shurety. An interesting event in connection with the tea was the presentation by Miss Littlefield of the bronze and silver awards to members of the life-saving classes. These medals were won last fall, but had just arrived from the Royal Life Saving Society in England, and were formally presented to the following: Georgina Lackey, Bertha Edmondson, Mary Westbye, Barbara Foster, Ann Simpson, Doorthy Foster, and silver medals to Margaret Rogers, Viola Harvey, Mrs. Johnson, and Ruth Sutton. The proceeds, amounting to nearly $20.00, were donated to the Y.W.C.A. foreign work in China, India, and Japan.

• • •

A very pretty St. Patrick's tea was held in the parish house of St. John's church on Saturday afternoon, under the auspices of the Church Women's Association. The decorations were carried out in the attractive green and white of the season, the table, with its draperies of Madeira and filet lace, being centred with green candles in silver candelabara and arranged with spring flowers in green glass vases. The Ladies' Parlor was bright with lighted floor lamps and ferns. The waitresses wore green and white caps and white aprons. Tea was poured by Miss H. Hugel and Mrs. G. S. Cameron poured coffee. Assistants were Mrs. B. D. Hall, Mrs. G. M. Lyons, Mrs. J. Patterson, Miss Mary Comstock and Miss Clara Morris. The guests were received by the president, Mrs. T. W. H. Young, and Mrs. R. C. Blagrave. Mrs. J. J. Howden and Mrs. E. B. Clegg assisted at the entrance. The sale of home-made cooking was supervised by Mrs. A. Gibson and Mrs. J. Comstock.

• • •

An item sent in to these columns by a correspondent stated on Saturday that Miss Madeline Whaley, McDonnel street, entertained at a dance on Thursday evening. The item was incorrect.

• • •

Mr. Charles Coleman celebrated a birthday anniversary yesterday.

• • •

Miss Isobel McKee of the teaching staff of the Conservatory of Music, accompanied by two of her pupils from Omemee, the Misses Marion Dickson and Lenora Jamieson, is in Toronto to-day to attend the recital by Paderewski at Massey Hall to-night. Miss McKee is staying over for the Kreisler recital to-morow evening.

• • •

Mrs. H. G. Walker and Miss F. D. Walker, of 774 George street, entertained a number of the teachers on the city's staff and several other friends, at tea at their home on Friday and Saturday afternoons. The table was attractively arranged in St. Patrick's Day fashion, with daffodils and tulips, shamrocks and green cutout. On Saturday afternoon, vocal solos were given by Miss Mae Jory and Miss Ellen Eagleson, with accompaniments played by Miss M. Rannie.

• • •

Mrs. William Lawrence, of Winnipeg, arrived in the city on Thursday to make an extended visit with her sister, Mrs. H. McWha, who is convalescing from a recent illness.

HAIR AND HEALTH

The amount of hair which a man can grow on his head does not seem to be any indication of his mental abilities or capacities. The bald headed man may say that "Grass does not grow on a busy street," and the bushy-headed man may reply, "Oh, I see. It's because it cannot get up through the concrete." But the fact remains that there is about an equal number of successful men between the bald headed ones and those who have more luxuriant hair. There is a health side to this question, however, which it is well to point out.

The successful young man who is bald has usually lost his hair because of a tight scalp, or because of some devastating fever which he had during his growing years. John D. Rockefeller, who is nearly ninety, has certainly been successful in a business way, but lost most of his hair very early in life. One of our most famous American actors, who is now around seventy, and has just married his seventh wife, hasn't had a hair on his body since he was twelve years old. He lost his hair after a bad fever. One of my friends is a famous inventor around sixty-five years of age. He has been bald since youth.

These points are brought out to show that it is possible to have a high degree of mental and physical health and still have little hair, provided the loss of hair was caused by some sickness early in life. When a man of thirty-five to forty begins to lose his hair, it is usually a sign of approaching senility and general debility from constitutional causes. Loss of hair is, in such cases a danger sign which indicates that unless bad habits are corrected the one with the approaching baldness of middle age has a slim chance of living to the average length of life which is now around fifty-eight years.

What is true in this regard of a man is also true with women. The man or woman who at forty finds the brush and comb filled with hair must heed the warning which tells them of premature senility and a too-rapid degeneration of their bodily tissues, and especially, of deterioration of the ductless glands

A plentiful growth of hair is dependent upon the circulation of good blood to the hair roots. Each hair root grows something like an onion, although the main shaft of the hair after it leaves the scalp is no more alive than the end of the fingernail. The growth of the root itself, and its ability to push up the shaft of hair depends upon the proper irrigation of the hair roots with healthy blood. If one lives day after day with devitalizing habits, the normal alkalinity of the blood will be reduced, and not enough silicon and other organic minerals will be furnished to grow enough hair to cover the head.

Baldness usually starts at a certain well known spot, just back of the top of the head, where the circulation of blood is the most sluggish. Very few people lose the hair around the ears and at the back of the neck. This is simply because the circulation at these parts is naturally better than at the top of the scalp.

When toxic wastes in the system cause an untimely degeneration of the ductless glands, there is an effect produced in the blood which makes the hair turn gray and fall out, and the teeth to loosen. Lowered functioning of the thyroid, the pituitary, adrenal, and generative glands plays a part in the slowing up of the growth of hair, and also is producing wrinkles and other signs of old age. There is no reason why the functioning of these glands cannot be brought back to normal if the proper hygienic measures are used.

Questions and Answers.

Question Worried asks "Can prolapsus of the bladder be cured with an operation?"

Answer The operations for raising a prolapsed bladder have not proved highly successful, but have brought about cures in some cases. The best plan is to do everything possible to strengthen the abdominal muscles so as to raise the other prolapsed organs which will be found to be lying on the bladder. When the cure of the general prolapsus has been effected, it will be found that the bladder will not collapse as it did formerly when the stomach and intestines were pressing upon it.

Question Ella asks "Are carrots good for the kidneys if eaten raw?"

Answer There is no single article of food which has any pronounced effect upon any organ of the body. A raw carrot is an excellent food, and this vegetable is especially healthful when used uncooked. An entire raw food diet for a week or two is often helpful in the treatment of diseases of the kidneys.

Question D. R. F. asks "What could cause an ache and burning pain in the right hip, groin and whole leg? This comes when being relaxed, but disappears when walking or being active. Have had it for over three years. Heat, diathermy, and quartz light have been tried with no result."

Answer It would be unwise for me to guess what is causing the pain in your right hip and leg. I advise you to have a thorough diagnosis made with a fluoroscopic examination of the abdomen just after a bismuth meal. There is no reason you should be in doubt about the cause of your trouble, as a good diagnostician should be able to put his finger on the spot from which the pain originates.

HERE AND THERE

Fire Injures Fifteen.

DENVER, Colo., March 19 (Canadian Press).—Fifteen persons were injured, four seriously, when an early morning fire partly destroyed the Colorado House, one of Denver's oldest hotels.

Nobile's Base Ship Passes.

SPEZIA, Italy, March 19 (Canadian Press).—The ice breaker, City of Milan, which will serve as the base for General Umberto Nobile's aerial polar expedition, passed all trials successfully in the bay here and is being loaded with supplies.

Woman Finishes Long Flight.

PORT DARWIN, March 19 (Canadian Press).—The longest flight ever undertaken by a woman was completed when Mrs. Keith Miller and Captain Lancaster, flying a light plane, arrived from Croydon, thirteen thousand miles away. The couple left England October 14.

Loss Fixed at 449.

LOS ANGELES, March 19 (Canadian Press).—The total loss of life in the St. Francis Dam disaster was computed to-day at 449 persons, 272 known dead and 177 missing and believed to have perished.

Another Bout Expected.

NEW YORK, March 19 (Canadian Press).—In the peculiar fashion of the boxing business, signs already are multiplying that Jack Dempsey will take one more fling at Gene Tunney and add at least another half million to his bank roll, fight experts say.

JOLLY JINGLES By Graham Hunter

Evening Examiner Fashions

A Smartly Simple Frock for the Junior Miss

This smart little one-piece frock for the Junior Miss is a style the home modiste will find quite simple to fashion. There is an inverted plait in the center-front of the skirt and the pointed vestee with shaped collar is chic. The sleeves are long and gathered into narrow wristbands and the belt fastens with a buckle at front. No. 1303 is in sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2⅛ yards 32-inch, or 2¼ yards 39-inch material. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centers, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

A SECOND CHANCE

Some say, that all those, who have flouted God's Grace
And come short of the goal, in the Heavenly race
May yet, enter the lists, run again, as of yore,
And win the high prize, on a more favoring shore.
So the Arch Tempter whispers his bold ancient lie,
Eat, drink, and be merry, for ye shall not die.

The world, and it's pleasures, were all made for you it-
A new chance in the next world, awaing you too,
So worship at will, before Pleasure's gay shrine
Your hope of Salvation to Mammon resign.
At the gaming board, risk e'en your immortal soul
And drown Conscience's voice, in the full, flowing bowl.

But, list to the warning sent down from the sky
As to earth the tree falleth, so there shall it lie
Now, now, is our chance, this the accepted day
Then seek now Salvation, be wise while ye may.
For this life here below, is the one chance, that's given
To prepare, and make meet, for the glories of Heaven.

No matter how far a frail mortal may stray
Or weakly or willful, from virtue's straight way
Tho' to sin's lowest depths, he may sink, even then
He may rise, and return, to his Father again.
For still by the unfailing mercy of Heaven,
A new chance for repentance, and pardon is given.

Tho' God's Day be profane, and dishonor His Name
Recrucify Christ, grieve Him, put Him to shame
He may wear on his brow the dark, blood brand of Cain
There's still a Fount open, to cleanse every stain.
And 'tis never too late to find shelter, who will,
For the door of God's mercy, stands open still.

And, well may this suffice, for as day follows day
Ours are chances unnumbered, till life's latest ray
But, when death's icy hand has once swung to the gate,
For weal or woe then, fast sealed is our fate.
Vain, vain, is the hope, of a chance, after death.
For our probation ends, with our last fleeting breath.

(Mrs.) A. F. Calder,
260 Armour Road,
Peterboro, Ont.

Who Wrote This?

(Copyright, 1928, McClure Syndicate.)

1. "It has become quite a common proverb that in wine there is truth."
2. "Fashion—a word which knaves and fools may use,
Their knavery and folly to excuse."
3. "Walls must get the weather stain
Before they grow the ivy."
4. "Thrice he assayed, and thrice in spite of scorn,
Tears, such as angels weep, burst forth."
5. "I see that time divided is never long,
and that regularity abridges all things."
6. "Like our dawn, merely a sob of light."
7. "But sometimes virtue starves while vice is fed.
What then? Is the reward of virtue,
bread?"
8. "When asked what wines he liked to drink, he replied, "That which belongs to another."

CANDY COATED GUM

Lyrics of Life - By Douglas Malloch

"COMPANIONATE"

Remember this, my girl, with all
The silly talk you hear
Of vows that either may recall,
Of marriage "for a year;"
That men may scoff at sacred things,
And men may lightly choose,
But, when the end disaster brings,
That you're the one to lose.

Remember this, my girl that men
Before have played the knave,
Have tricked a girl, and will again,
Have soiled the love she gave;
And when a man has gone his way,
And when your dream is through,
Remember someone has to pay—
And that the one is you.

Remember this when folly speaks
Of such a bond as this,
A trial bond for months or weeks,
Sealed by a faithless kiss,
That you, the wife "companionate,"
Some day will count the cost,
Will know at last, but know too late,
That you're the one who lost.

Never need your hands say "Dishpan"

"Why try to keep our hands white and soft," women said, "and then for an hour and a half each day expose them to irritating soaps in the dishpan?"

The answer was Lux for dishwashing!

A little Lux in the dishpan goes so far it is *real economy* to use it.

And your hands stay smooth and white—forever rid of that dishpan look.

The free alkali in so many soaps—regardless of whether they are flakes, chips or cakes—dries up the beautifying oils Nature placed under the outer skin to keep your hands from getting rough and red. There is no free alkali in tissue-thin, transparent Lux diamonds.

Less than a cent a day keeps dishpan hands away

Lever Brothers Limited, Toronto

Maroons Clinch Second Place in Canadian N.H.L.

MONTREAL CLUB TAKES 3-1 TILT FROM SENATORS

Overcome Early Lead of Ottawa By Fast Combination Attack.

PLAY GOOD HOCKEY.

Come Within Three Points of First Place in Sectional Race.

MONTREAL, Quebec, March 19.—Canadian Press. — Montreal Maroons threw practically a second loop around second place in the Canadian section of the National Hockey league when they came from behind with a fast, wide passing combination attack to defeat the champion Ottawa Senators 3 to 1 before a crowd of ten thousand spectators at the Forum on Saturday night.

The victory placed the Maroons two full games ahead of Ottawa with each team having but two more scheduled fixtures. It also sent the Maroons once again to within three points of Canadiens and first place in the sectional race. The tussle was the sixth and final scheduled affair of the season between Maroons and Ottawa, the Montrealers taking the edge in the series through three victories one draw and two losses.

Hooley Smith of late has been the scoring ace of the Maroons, but he was out of the picture when the Montrealers swung into a vicious attack in the latter half of the first period, and throughout the second session to clinch the game. Just to demonstrate the strength of the team, regardless of what combination is in action for the moment, Maroons cut their dash with Hooley Smith reclining in the penalty bench with minor penalties, and the team playing short handed.

Frank Clancy, plugging Ottawa defenceman back in the game after a prolonged absence through a leg injury and an automatic suspension last week, opened the scoring, giving the Senators the lead in a little more than nine minutes of play. Clancy drilled a raking shot from some distance out on the left plain after a four man Ottawa rush the disc driving over Benedict's arm into the net.

Play Championship Hockey.

That tally by the opposition provided the incentive to send the Maroons away to a display of championship hockey. Five minutes before the end of the period Hooley Smith was penalized and while he was off Siebert flew in on the Ottawa goal, leaving the Senator defence flabbergasted and rushing close to Alex. Connell to whip the puck to the near corner on a fast, high shot. It was the sparkling play of the game

Play in the second half started at a gingery clip, with a fair amount of bumping in evidence. Hooley was benched for lifting his knee to spill Clancy. Maroons went back to the defence. They were hemmed in only for a moment while short a player, Dutton broke down the centre, and straight for the Ottawa goal.

Phillips was on his right. Dutton tore in on the most direct line, backed up the Ottawa defence and then slipped the puck over to Phillips, who engineered a smart delayed shot to put Maroons in the lead.

Six seconds from the end of the period Phillips, Oatman and Joe Lamb went down in a rush. Lamb was the top figure in the thrust. He drove a fast shot which Connell saved but could not clear. Phillips jabbed at the disc and Connell lost track of it as it moved over to the other side in front of the Senator net Connell sprawled when he saw Lamb pounce on the disc, but the Maroon rookie lifted the puck high and the tussle was as good as won for the local team.

Benedict in Rare Form.

There were two goals called back one for each side, and there were several close calls around each net Benedict was in rare form despite a nasty jab early in the game when he stopped a high shot from Alex Smith with his throat, and had to time out. The Maroons' goalie was poison to Frank Finnigan, who twice got to close quarters, only to have Benedict sit down and smother the puck. In the last period Benedict beat Alex. Smith at the Maroon goal fine, holding the puck on the line while Smith piled into the net.

Connell, recipient of a horse shoe of shamrocks before the game from local Irish admirers of the Ottawa goalie, got his skates and pads in the way of promising shots from Nelson Stewart, Ward and Oatman.

Ottawa were outplayed and as the game wore on, appeared more and more a beaten team. The Senators however, can be counted on for more stubborn resistance in the eliminations than they showed on Saturday night. King Clancy was back in the game after a long lay off, but not at the form he will undoubtedly show next week working Kilrea at left with Broadbent on right, and Cy Denneny on left, instead of the usual Kilrea-Finnigan first string combination.

The line up:

Ottawa		Montreal.
Connell	goal	Benedict
Boucher	defence	Dutton
Nighbor	centre	H. Smith
Kilrea	wing	Ward
Finnigan		Stewart
Clancy	sub	Munro
Shields		Lamb
Broadbent		Phillips
Grosvenor		Oatman
Denneny		Brown

Referees: M. J. Rodden and Geo. Hallinson.

Summary:

First period:

1: Ottawa, Clancy, 9.16.

2: Maroons, Siebert, 5.31.

Penalties: Boucher, H. Smith and Siebert.

Second period:

3: Maroons, Phillips, 7.07.

4: Maroons, Lamb, 12.47.

Penalties: H. Smith, Broadbent and A. Smith.

Third period:

No score.

Penalties: Grosvenor 2, Ward, A. Smith.

CANADIAN RACERS.

FLAGSTAFF, Ariz., March 19 (Canadian Press).—John Cronick of Saskatoon, finished fifth Saturday in the 36.2 mile lap of the bunion marathon from Williams to Flagstaff, making the distance in 6:07:30. His elapsed time of 92:25:10, gave him fourth place in the standing for 518.8 miles covered from Los Angeles.

Other Canadians with their standings:

Phil Granville, Hamilton, Ont., 17th, 7:24:15; 9th, 101:03:50.

A. Constantinoff, Toronto, 19th, 7:35:00; 20th, 112:02:10.

George Liebergall, Bellevue, Alta., 10:53:30; 29th, 119:36:50.

David Davies, Sandwich, Ont., 9:54:05; 31st, 123:36:15.

Eugene Germain, Montreal, 9:02:-00; 37th, 124:35:50.

Harold McNutt, Alberta, 8:43:55; 79th, 140:38:40.

COUGARS WIN FROM HAWKS

Defeat Chicago Club 7-0 in Saturday National League Fixture.

CHICAGO, March 19 (Canadian Press).—Penetrating their opponents defence with ease, the fast Detroit Cougars Saturday night defeated the Chicago Black Hawks 7 to 0 in a National League hockey game. Part of the game, Detroit played but four men.

Only once or twice the crippled Hawks threatened, while the Detroit team shoved the puck over twice in the first period, three times in the second, and twice in the last period. Eleven penalties, nine of them on the Cougars, were called.

Boston Defeated 3—1

PITTSBURG, March 19 (Canadian Press).—Pittsburgh defeated Boston in a National Hockey League game here Saturday night 3 to 1, winning a possible chance at a tie for third place in the American division of the league. The Pirates battled with the knowledge that a victory for Pittsburgh coupled with a defeat of the third place Detroit club would tie up the third place position.

Boston got away to an early lead when Frederickson scored in the first period. The count was tied when Darragh scored on a pass from Cotton in the second period and the Pirates went into the lead a few minutes later when Darragh again counted. McCurry made the final goal in the last period.

Outclass Indians

SPRINGFIELD, March 19 (A.P.).—Springfield's league-leading Indians failed to clinch first place in the Canadian-American League hockey race here Saturday night, when they tumbled to a 3 to 1 defeat before the Providence Reds. The Rhode Islanders outclassed the home club from start to finish and went away with a well-deserved victory. A crowd of 5,800 saw the game, the last game of the season for the Indians.

Campbellford

CAMPBELLFORD, Mar. 19.— Mr. and Mrs. A. L. Riendeau, Rear street, are visiting friends in Belleville and Picton during the week end.

Miss Helen MacDonald, Brighton, is spending the week end with her parents, Mr. and Mrs. Robert MacDonald, Front street.

Miss Grace MacDonald, Toronto, is spending the week end at her home, Balaclava street.

Yesterday, Mrs. R. N. Whitton disposed of her household effects by public auction. It is understood that the residence will be listed for sale, since Mrs. Whitton is now residing in the village of Brighton.

Donald Keir has purchased the grocery business of Mr. Bonsteel and will take possesion Monday, March 19th. Mr. and Mrs. Bonsteel will return to their former summer hotel business.

Mr. George Peterson takes possession on Monday of the property on Ranney street formerly owned by John L. Hay and once used as the office building for the Rathbun estate.

Mr. Percy Sherwin has purchased the property on the Hastings road formerly owned by Mrs. Baxter. He will take possession April 1st.

This evening, St. Andrew's Young People are to be the guests of their sister society at Burnbrae. All members are asked to meet at the church at seven o'clock, when conveyances will be at hand. The following week the Campbellford church will be at home to the Warkworth society.

PERTUSSIN soothes irritated throats

P.C.I. HOCKEY PLAYERS DINED BY PRINCIPAL

Inter-Scholastic Runners-up Are Entertained By H. R. H. Kenner.

MAYOR A GUEST.

His Worship Reminds Boys That it Will Soon Be Their Turn to Rule.

The members of the Peterborough Collegiate Institute hockey team, Interscholastic runners--up, and the executive officers of the Athletic Association of the Collegiate were entertained at a most enjoyable dinner in the Empress Hotel on Saturday evening by Principal H. R. H. Kenner.

The occasion was designed to testify to Mr. Kenner's appreciation of the good playing and fine sportsmanship shown by the P.C.I. during the present season, and was featured by the presence of Mayor Denne, who was toasted during the sport program that followed a most excellent repast.

The feeling that the Peterborough team had been robbed of a championship by reason of several features of the last game at Belleville was in evidence but not stressed except that the occasion was as happy as if the table had been graced by the championship trophy.

Principal Kenner presided and after the tost to the King had been loyally honored, called uuon His Worship Mayor Denne. In doing so he referred to the fact that the Mayor had been for many years a member of the Board of Education and had always been ready to assist in the promotion of sport in the schools.

Mayor Denne referred to changed conditions in school life to-day as compared with those that prevailed in his school days. He congratulated the Collegiate team upon the fine showing it had made during the season and urged the boys to love sport for sport's sake, regretting the professionalism that had crept into the athletic world and threatened to destroy it. His Worship reminded his boy hearers of the opportunities they had in contrast with the boys of yesterday, and pointed out that it would soon be their turn to become the city rulers and advised them to be ready for the time when their services would be needed. In conclusion he declared that he and the city council were anxious to assist sport in every way possible.

Mr. Kenner in proposing the health of the Collegiate team, gave an interesting resume of old days in sport in the Collegiate Institute, referring to the King brothers, the Armstrongs and other players of years ago who had graduated from the P.C.I. Collegiate teams had, he said, maintained a high level of sportsmanship throughout the years he had been connected with the local school and he congratulated the presnt team upon their fine record for the season. Referring to the Belleville fiasco he remarked that probably the Belleville team was not responsible for what had happened, but it had received the benefit of it and if something similar had happened here he was certain that there would be no championship cup for Peterborough.

Mr. Kenner stressed the value of sport in school life because of the lessons in taught the participants, enabling them to appreciate the importance of co-operation and team play, the subordination of self, obedience to constituted authority and other valuable lessons. He paid a high tribute to C. S. Browne, the coach of the Collegiate teams, reminding the boys that they were very fortunate in having in charge of their sports a teacher with such a high standard of sportsmanship.

Carl Wood, captain of the Collegiate team, made an appropriate reply on behalf of the players, thanking Mr. Kenner for his hospitality.

Mr. Kenner's tribute to the press for assistance tendered various Collegiate teams was acknowledged by F. D. Craig.

ALL-AROUND ATHLETIC

Douglas Carrick, the youthful cousin of Don Carrick, the Canadian amateur golf champion. Doug. is also a golfer of renown and a hockey player as well. He is the club champion of the Sault Ste. Marie Country Club and has defeated the best up there. He will be entered in the Ontario junior golf tournament this coming season and his admirers in the north expect him to make a great showing.

SPORT BITS

Sets New Record

HARTFORD, Conn., March 19 (Canadian Press).—Frank Hussey set a new world's indoor record for 70 yards Saturday night in the Massasvit A.C. meet. Hussey broke the tape in 6 4-5 seconds, one-fifth of a second better than the former record of seven seconds made by Loren Murchisonin Chicago, January 29, 1926.

Represent Mexico

MEXICO CITY, March 19 (Canadian Press).—Robert Kinsey, former California tennis star but now a resident of Mexico, and Claude M. Butline, a British player who has been a resident of this country for several years, will be members of Mexico's Davis Cup team when the United States players come here April 6 for the first round eliminations in the American zone.

NATIONAL PARKS CONSERVE WILD LIFE

Canada's national parks are the greatest wild life sanctuaries in the world. Wild animals roam at will with no fear of man.

During an attack of bronchial pneumonia the heart of an Australian baby ten weeks old stopped beating eight times. Massage was successfully applied by physicians and the child's life was saved.

KITCHENER WINS DECIDING GAME

Eliminate South Porcupine From the Allan Cup Decisively.

TORONTO, March 19. — Tired out from the Titanic test of five games in seven days—the last two in succession—South Porcupine passed from the hockey picture on Saturday afternoon at the Arena Gardens before the Kitchener Green Shirts by an 8 to 1 score, the seven-goal victory giving the senior O.H.A. champions a total of 11 to 3 on the round and the right to advance in the Allan Cup playdowns. The Porkies wilted under the punishment of too much puck-chasing, and in the second game of the series on Saturday only looked like a shell of the team that put up such a stirring struggle the evening previous against the same forces. Only courage and determination kept the Porkies in the game, for they were worn out and weary from their aggressive play of former games.

The old adage "that youth must be served" was again delivered a bump by the crafty play of the veteran, George Karges. Karges was playing hockey when most of the Porkies were in perambulators, but on Saturday he set the pace for the Kitchener triumph. On the defence the old master displayed all his skill at stopping charges with the least effort, while his offensive thrusts were the features of the game. Karges weaved his way through the Porkies with a slow, almost tantalizing stride, that had the Northerners bewildered, and it was his extra experience and ice generalship that extinguished the Northern hopes, just as much as the gruelling grind that burned them out.

MONTREAL CLUB WIN ON ROUND

Victorias Defeat Arnprior Green Shirts 11-2 in Allan Cup Series.

ENTER SEMI-FINAL.

OTTAWA, Ont., March 19 (Canadian Press). — The Ottawa Valley threat for senior amateur hockey honors was swept aside on Saturday night when Montreal Victorias outclassed the Arnprior Greenshirts and belabored them with a 6 to 1 defeat. On the round the decisive winning margin of the Vics was 11 to 2, the first game of the home-and-home series having ended in Montreal last Wednesday with the Arnprior sextette on the sorrowful end of a 5-1 count.

By their victory the Montreal speedsters earned the right to enter what amounts to the semi-final round for the historic Allan Cup. Victorias will now meet the Kitchener winners of the all-Ontario title, with the victors of the series to play Manitoba University for the Canadian championship.

Against the superb combination that manoeuvred with lightning speed, and the close back-checking of the Montreal clan, the Arprior team was outbattled in every department in the tussle that attracted some 4,500 to the auditorium here on Saturday. The Greenshirts showed courage galore, and at times hemmed the Victorias in their own defensive territory by the sheer doggedness of their attack. But once in close the Arnprior crew could not display the generalship necessary to disorganize a defence as sound as that of the Montreal amateurs.

Major Penalties.

The strenuous clip at which the game was fought resulted in viciousness in the last half of the game that brought three major penalties and one double major of ten minutes. Allie Ferguson, Arnprior defenceman, drew the heavier sentence when he clipped Sig Slater in the eye with his stick as the Vic. wingman menaced the Greenshirts' net from close range. Stuart Shearer and Jimmy Thomson of the Montreal club were afflicted with majors, the former for a vicious cross-check, and Thomson for charging bodily into an opponent. "Dolly" Oliver, of the Ottawa Valley Kings, drew the other major for throwing his stick across the ice in a fit of distemper after Referee Marsh had tagged him with a minor for slashing.

Only in the first period did the Montrealers appear to be travelling at top speed. Slater bagged the opening goal on a pass from Abbott, and Shearer and Frank Carlin added two more on solo rushes before the frame had ended. Shearer's tally was a gem, coming after a dash the length of the arena in which he stickhandled past the entire Arnprior team.

The second frame saw the green sweaters going stronger but unable to outguess the Victoria backs. Louis Valois notched the only goal of the period on a lone effort. Oliver was responsible for saving the Arnpriorites from a whitewash when in the final stanza he checked the puck from a charging Montrealer to race in and give the Victorias' goalie no opportunity to save. Valois and Thomson added to the Montreal goal total in the last two minutes of play.

The line-up:

Victorias.		Arnprior.
	Goal.	
Cockburn		Sargent
	Defence.	
Shearer		T. Mulvihill
Carlin		Perguson
	Centre.	
Abbott		Dimmell
	Wing.	
Slater		Oliver
Thomson		A. Mulvihill
	Subs.	
Valois		Slaughter
Grant		Graham

Referee—Lou Marsh, Toronto.

The sumamry:

First Period—

1—Victorias, Slater (Abbott, 8.15.

2—Victorias, Shearer, 3.35.

3—Victorias, Carlin, 7.00.

Second Period—

4—Victorias, Valois, 12.45.

Third Period—

5—Arnprior, Oliver, 2.25.

6—Victorias, Valois, 15.35.

7—Victorias, Thomson, 1.45.

Penalties — First period, Thomson, Carlin (2), T. Mulvihill, Oliver. Second period—Valois, Shearer, Abbott, Thomson (minor and major), A. Mulvihill (3), Oliver. Third period—Carlin (2), Shearer (major), Valois, Ferguson (10mins.), Oliver (major), T. Mulvihill, A. Mulvihill.

Hockey Scores

LEAFS DEFEAT GROUP LEADERS

Beat Canadiens 5-3 — Game Hard Fought, Though Indecisive.

RANGERS WIN EASILY.

TORONTO, Mar. 19.—In one of the fastest and best-played games of the local professional season, the Maple Leafs scored their first home victory over the Canadiens in a couple of years by downing the Habitants 5 to 3 at the Arena Gardens on Saturday night. Right from the start the players showed that the fact that little, if anything, depended upon the result was going to have no bearing on the play, and from the first bell until the final one the two squads swung up and down the ice, with both goalies having a busier than usual night. For a change, the forwards had an edge in the duel with the defences, and as a result the goals had many narrow escapes in addition to the eight counters that were registered.

The Canadiens entered the game with a five-point lead over the second-place Montreal Maroons—a position from which they can hardly be dislodged before the season ends next Saturday night, while the Leafs were definitely planted in fourth place—but all the way through the struggle both teams went at their business as if the group leadership depended upon the result. At times the Flying Frenchmen appeared to take matters a little easy, as if they were confident they could cinch the game whenever they liked, but as the struggle progressed they tried their best to overcome the lead that the Leafs had secured in the first period, and while they twice whittled the margin down to one goal, the locals as often increased the lead to a pair of counters, and they did this with little loss of time.

RANGERS BEAT AMERICANS.

NEW YORK, Mar. 19.— The New York Rangers assured themselves of a place in the American group semi-finals of the National Hockey League here last night by overwhelming the New York Americans by the score of 7 to 3. It was the last local game of the schedule. In the four intra-city games the Rangers have won three and tied one.

The season closed in a blaze of speed, heavy scoring and roughness. Major penalties were awarded to Eddie Bouchard and Red Green of the Americans. Bouchard received his for fighting with Ching Johnson, who got a minor, and Green, who received three minors for cross-checking.

PIRATES TIE COUGARS.

DETROIT, Mar. 19. — If Detroit Cougars are to be in the N.H.L. playoffs this winter it will be because other teams do what they failed to accomplish last night, stop the Pittsburgh Pirates. The Corsairs came to town two points behind the local entry and left on even terms, by virtue of a 1 to 0 victory in the long-awaited tell-tale argument. The Cougars have but one game left to play and the Pirates have a pair. If they whip either Montreal Maroons or the New York Rangers they can do no worse than tie, for Detroit winds up the schedule by entertaining Boston here next Saturday.

DEMAR BREAKS TRACK RECORD

Sets New Time For 44 Mile Run in Boston Meet.

BRAVES COLD WEATHER.

BOSTON, Mar. 19. — (Canadian Press.)—Clarence H. Demar, Melrose printer and five times winner of the Boston Athletic Association Marathon, broke all known records for 44 miles on Saturday when he won the Saint Patrick's Day grind from Providence, R.I., to Boston in 5 hours, 47 minutes and 37 seconds.

Breasting a raw north-east wind and wearing two shirts and a pair of gloves for protection against the cold, the veteran hill and dale clipped nearly half an hour off the best previous mark for a similar distance established in 1882, when W. J. Davies covered 44 miles in New York on Washington's birthday in six hours, eight minutes and 25 seconds.

Demar sprinted the length of Boston Common to the finish line seemingly as fresh as when he started. He was 20 minutes ahead of his nearest competitor, Leon Youell, of Wakefield, last year's winner, who finished in 6:15.07.

The first ten men to place follow:

1—Clarence H. Demar, Melrose Post, 90, A.L. 5:47:30.

2—Leon Yeuell, Wakefield Y.M.C.A., 6:15:07.

3—William Seeley, Newton, 6:40:12.

4—George L. Dodge, Wakefield, 6:46:18.

5—John R. Millbury, Boston Boys' Club, 7:22:45.

6—E. V. Yeuell, Greenwood Community Association, 7:23:00.

7—Theodore E. Miller, Woburn, 7:34:40.

8—John W. Anderson, Melrose A.C., 7:34:50.

9—Robert H. Fisher, Jr., Providence Tech. H.S., 7:59:45.

10—Angelo Mazzone, Sague, 8:09:00.

NO MORE PILES

Pile sufferers can only get quick, safe and lasting relief by removing the cause—bad blood circulation in the lower bowel. Cutting and salves can't do this—an internal remedy must be used. Dr. Leonhardt's Hem-Roid, a harmless tablet, succeeds because it relieves this blood congestion and strengthens the affected parts. Hem-Roid has a wonderful record for quick, safe and lasting relief to Pile sufferers. It will do the same for you or money back. McDermid & Jury, Bond's Drug Store and druggists anywhere sell Hem-Roid with this guarantee.

MAGNATE OF DIAMOND

Lol Solman, Toronto Baseball Club magnate, was all smiles when Fred Burchell, late of Newark and a left-hand pitcher of repute in his younger days, reported to act as coach and road secretary of the Leafs the coming season. His last engagement was at Newark where he managed the Bears for one season.

GRADS DEFEAT MONCTON TEAM

Wearied By Sea Journey Champions Do Not Play Usual Form.

FINAL COUNT 6-1.

HALIFAX, N.S., Mar. 19.— (Canadian Press.)— The amateur hockey champions of the world, Toronto's Varsity Grads, defeated the Moncton Atlantics by a score of 6 goals to one here Saturday night.

Fatigued by a long sea journey and off their skates for nearly a week, the Grads relied on experience and a scoring punch for the winning margin, as the Atlantics outskated the champions practically throughout and forced the goalies of the Grads, Sullivan and Nueller to make many startling stops.

Moncton scored the opening score shortly after the start of the game, Ed. Kervin catching James' rebound in a hot scramble in front of the Grads' cage. Three minutes later Trottier tied it up. Near the close of the third period Trottier skated through to score. Porter went from end to end to increase the Grads' score in the second period. In the closing session Frank Sullivan, Trottier and Hugh Plaxtotn shot tallies.

Some four thousand people attended.

Line-up:

Toronto Grads— Dr. Joe Sullivan, Nueller, goal; Porter, Taylor, defence; H. Plaxton, centre; Trottier, Hudson, wings; R. Plaxton, F. Sullivan, Delahay, subs.

Moncton—McKenzie, goal; N. Cole, Wilson, defence; Kervin, James, Earl Kervin, forwards; Lane, Radcliffe, Carroll, subs.

The Summary.

First Period.
1. Moncton, Ed. Kervin, 4.12.
2.—Grads, Trottier, 7.40.
3.—Grads, Trottier, 17.50.

Second Period.
4.—Grads, Porter, 13.00.

Third Period.
5.—Grads, F. Sullivan, 2.1[illegible].
6.—Grads, Trottier, 5.30.
7.—Grads, H. Plaxton from Trottier, 12.00.

Stops—McKenzie 280; Sullivan 17, Nueller 14.

Referees: Pete McDonald, Halifax, Frank Fisher, Toronto.

LEICESTER CITY DEFEATS EVERTON

Feature Tilt of Saturday Games in English Soccer League.

LONDON, Eng., March 19. Canadian Press Cable. — While the further decline of Everton in English League first division soccer is attracting much attention the admiration of all fans has been excited by the great fight Portsmouth is putting up to avoid relegation back to the second division from which they emerged last season. On Saturday they picked up a couple of necessary points from Manchester United who are also trying to avoid demotion. Curiously enough one of the clubs which is in danger of sinking to the second division is Sheffield United, who have got to the semi-finals in the cup competition Sheffield Wednesday look as if they cannot escape the axe while such a historic team as Aston Villa is not out of the woods

Saturday's games were played in glorious weather and the attendance everywhere was enormous

The feature game was the match between Leicester City and Everton at Leicester Only one goal was scored and that was secured by Adcock of Leicester City in the tenth minute of the match Grim ill luck attended Dean, the centre forward of Everton, who was three times robbed of what seemed to be certain goals by McLaren, the Leicester goalie

Huddersfield town who played Derry County, were out of luck, though the point they got for a draw puts them more definitely ahead of Everton in the standing.

SMALL RETAILERS HOLD MUCH TRADE

Do 80 Per Cent. of Selling in States, Says Oshawa Man.

That the small retailer, where great combines like Sears-Roebuck, Montgomery-Ward, and others had turnovers running into millions, still did 80 per cent. of the business in the United States, was a statement made by G. W. McLaughlin, the first president of the newly formed Oshawa Chamber of Commerce, at the first sub-committee meeting of the Oshawa Chamber of Commerce held at noon on March 16. To make such a statement, Mr. McLaughlin, of the General Motors Corporation, must have been sure of his facts, said Secretary Stinson of the local Chamber of Commerce. Whether the 80 per cent. applies in Canada is problematical, but it is a fact that in some lines in Canada the existence of combines has had a beneficial effect upon certain lines of trade, consequently the small retailer, giving personal attention and service to his customers, and selling reliable merchandise on a fair margin of profit, need not fear the competition of the combine if he is alive to his opportunities.

KAWARTHA LAKES GIVEN PUBLICITY

'Canadian Motor Boat' Contains Three Page Descriptive Article.

That Peterboro's publicity is being well looked after by the Chamber of Commerce and affiliated organization is once more in evidence—three and one-half pages in Canadian Motor Boat, March issue. This publication is one of a group controlled by A. F. Penton & Co., 60-62 Adelaide Street East, Toronto. This company each year occupies a booth at the National Motor Boat Show, New York, close to that of the Trent Waterway Development Association, and in this way increases its United States circulation. Five thousand copies of Canadian Motor Boat are printed each month and distributed all over Canada and the United States.

The Kawartha Lakes and Trent Waterway write-up in the March issue contains information as to how to get here by road, rail, and motor. "Kawartha Lakes and Trent Waterway greater Mecca each year for motor boating and holidaying" is the title of the article, which is profusely illustrated. Scenes shown include the Hydraulic Lift Lock, the canal just above the Lift Lock, and three of Stoney Lake. A half-page cut also appears showing the modern hoist bridge raised just below Campbellford. A similar article will appear this month in Canadian Traveller, the official organ of the Travellers' Association (published by A. F. Penton & Co.), with a circulation of 5,000 among travellers and executives, many of whom have several months of holidays each year, to spend, it is hoped, in and around the Kawartha Lakes.

As a result of the publicity in Canadian Motor Boat, similar articles will appear in similar outing magazines in the United States. Such descriptive material in circulation around this time of year should have a beneficial effect upon the tourist traffic.

IN PETERBOROUGH CHURCHES

ST. PETER'S CATHEDRAL.

To-day, March 19th, being the feast of St. Joseph, the sermons at St. Peter's Cathedral yesterday morning were based on a consideration of his life and virtues. His Lordship, Bishop O'Brien spoke of this great saint as the patron of a happy death, the patron of the universal church, and also the patron of all those who work and especially those who labour with their hands.

St. Joseph was a man who was accorded a Divine revelation and who always thereafter fashioned his life in accordance with the commands of God. He was faithful to the end, through trials and difficulties and sorrows that would have broken the faith of many lesser mortals. Never for one moment did he doubt the truth of the facts that had been revealed to him, with regard to the Divine origin of the foster Son entrusted to his care.

"How dark, my dear people, is not the soul without faith," said His Lordship, exhorting his hearers to imitation of the implicit faith and obedience of St. Joseph. "We live in an age of unbelief. On all sides there is a challenge to Divine revelation."

Speaking of the gift of faith, which may not be earned, but comes directly from the hand of God, either through baptism in infancy or through conversion in adult life, His Lordship adjured his congregations to do everything possible to nourish and increase this gift, to avoid evil-doing and model their lives on that of St. Joseph, to whom the Scriptures give the highest praise when call him "a just man."

Last evening, a special sermon on St. Patrick was preached by Rev. J. Finn.

Y.W.C.A. ACTIVITIES.

Y.W.C.A. ACTIVITIES.

Pageant.— The annual big Gymnasium Pageant will be held in the Opera House May 4th and 5th and a new and spectacular review of gymnasium drills and aesthetic dances will be presented by the 500 gymnasium members.

Pageant Costumes.—Parents of the junior gymnasium pupils are requested to pay for pageant costumes this week if possible. Most of the costumes for juniors are made and as soon as paid for will be assigned to the children.

Foreign Work—Will members kindly bring in their contributions to the Y.W.C.A. Foreign Work this week. The large Triangle recording the gifts is a pretty sight with its bright coloured girls heads indicating $50 already in. A rummage sale will be held the end of March to supplement this fund and donations for this sale will be received at the Y.W.C.A. during the next two weeks.

Schedule for week as follows :

Monday— 4.30, Intermediate Gymnasium; 6.00, World Study Supper; 7.00, World's Study Course; 7.00, Intermediate and Senior Dancing; 7.30, G. R. Club; 7.30, Wood carving; 8.00, Elementary Gymnasium.

Tuesday—10.30, Ladies' Badminton Class; 7.00, Ukulele Class; 7.30, Senior, School Girls' Gymnasium; 8.00, Senior Advanced Gymnasium.

Wednesday—4.30, Babies' Rhythmetic Dancing; 5.30, Normal School Gymnasium; 7.30, Wohelo Club; 8.30, Badminton Club.

Thursday — 7.00, Senior Dancing Class; 8.00, Ladies' Gymnasium; 8.00, Old Country Club.

Friday— 4.30, Senior School Girls' Gymnasium; 4.30, Pollyanna Club; 6.00, Girls' Auxiliary; 7.00, Intermediate Dancing Class; 8.00, Elementary Gymnasium and Senior Gymnasium; 9.00-9.30, Basketball.

Saturday — 9.15, Junior Dancing Class; 9.30, Junior Gymnasium; 10.30, Story Hour; 10.40, Babies' Gymnasium and Babies' Rhythmetic Dancing; 2.00, Sunshine and Everbright Club; 4.30, Badminton Club.

Sunday—4.30, Friendly Hour; 8.30, Sing Song.

1d-67-745.

IN POLICE COURT

Three local men appeared in police court this morning, apparently having imbibed too heavily on St. Patrick's Day. Al lthree pleaded guilty to being intoxicated in a public place. One was fined $15.00 and costs and the other two $20 and costs as their cases were more flagrant.

AT THE CAPITOL.

"THE DIVINE WOMAN"

Has Greta Garbo and much Notable Support—Seastrom Directed Film.

When Greta Garbo came to America two years ago she was practically unknown to any picturegoers of this country. With the release of her last Metro-Goldwyn-Mayer starring vehicle, "The Divine Woman," it is safe to say that she has established herself as the most sensational star of the American screen.

Under the direction of Victor Seastrom, her compatriot, "The Divine Woman" is said to have been translated from the stage play "Starlight" into one of the best pictures made in the last decade.

Seastrom is said to have even outdone his direction of "He Who Gets Slapped," "The Wind" and "The Scarlet Letter." While Miss Garbo has given an even better performance than she did in such sensationally successful pictures as "The Torrent," "The Temptress," "Flesh and the Devil," and "Love."

Lars Hanson, said to be the best picture actor Scandinavia has ever contributed to the film industry plays the featured male role in the picture This actor came to America about the same time Miss Garbo did and his work on the American screen has been almost on a par with Miss Garbo's. He played two leads for Lillian Gish, "The Scarlet Letter" and "The Wind," appeared in one of the principal roles of "Flesh and the Devil," and had the role of the ship Captain in Jackie Coogan's "Buttons."

"The Divine Woman" is Dorothy Farnum's screen adaptation of "Starlight" and concerns the loves of a young French girl suddenly elevated from the Montmartre to a great Parisian theatrical star and mistress of the impresario.

Lowell Sherman is seen in the role of M. Legrande of the Theatre Legrande and gives one of the greatest performances he has ever offered on stage or screen.

The cast includes Polly Moran Dorothy Cumming, Johnny Mack Brown, Paulette Duval, Jean de Briac, Cesare Gravina and others.

AT THE REGENT.

HILARIOUS COMEDY, "CRADLE SNATCHERS" WORTH SEEING AGAIN.

J.Farrell Macdonald, Louise Fazenda, Ethel Wales, Dorothy Phillips and Sammy Cohen in Picture Where Wives Teach Husbands a Lesson.

A hilarious farce of weary wives of wandering husbands, "Cradle Snatchers" will bring out roars of laughter from the audience at the Regent, where it begins a three-day run, starting to-day.

This delightful comedy drama produced by Fox Films from the stage hit which played on Broadway for two years is a gloom chaser without a peer.

It tells the story of three wives who, to teach their philandering husbands a lesson, hire three college boys to play the parts of lovers. Dorothy Phillips plays the part of the wife who concocts the scheme with her niece's sweetheart. He gets his two friends to join him in earning a thousand dollars each. Louise Fazenda as one of the wives insists that she may as well as get some fun out of the business and chooses the most ardent of the college boys as her swain. Ethel Wales in the part of the timid wife joins reluctantly in the scheme and takes a blond viking who is ever more timid than she, till he gets started.

While the wives and their hired sheiks are at the country home of one of them, the husbands show up. The fun, fast and furious till now, reaches a crescendo of humor seldom equalled and probably never bettered.

J. Farrell Macdonald, is one of the husbands and this popular actor probably gives the best performance of his career in this picture. Sammy Cohen, who created a sensation as the fun loving marine in "What Price Glory," brings his share of laughs when he fools his college chums disguised as a girl.

But every member of the cast is admirably suited for his part with the result, that "Cradle Snatchers" is one of the few pictures one would care to see a second time.

O.M.L. DISCUSSES NEW LEGISLATION

Will Oppose Abolition of Spotlight—Membership Now 17,000.

That the Ontario Motor League and affiliated clubs had a total membership, up to March 9th, of over 17,000, was the report of the chairman of the membership committee at the directors' meeting held Thursday, March 15th, which commenced with luncheon in the National Club, Toronto.

Attending from Peterborough were Alderman Harry Huffman and Frank G. Stinson, secretary of the Automobile Club and Chamber of Commerce.

A considerable portion of the time of the meeting was taken up in discussion of new highway legislation embodied in an amendment to the Highways Traffic Act, which prohibits the use of spotlights, except in the case of fire trucks, and provides that all vehicles 80 inches in width must carry green and red light on front and rear.

Abolition of the spotlight will be opposed by the league, was the decision of the meeting, as will be the requirement giving the right to municipalities to demand installation on cars of locks preventing the engine from being started once the owner has parked his car.

Central registration of mortgages and liens on motor cars, which has come largely as the result of agitation by the Ontario Motor League and and affiliated clubs, was endorsed by the meeting.

Overloading of trucks was discussed as was legislation governing width of sleighs between runners, and recommendations made to the government.

Speaking on the subject of sleighs and runners, Ald. Huffman remarked "That while our highways are kept open, the plight of the car owner a few miles away from the highway was vexatious, in that the winter travel of sleighs and cutters did not beat down the tracks in the road that a car could run in, there being difference in the width between the runners and wheels.

Financial statement of the Ontario Motor League, presented by the Provincial Secretary, W. G. Robertson, revealed liquid assets of $33,101.94, and fixed assets $900.00. Liabilities, general, $2,675.59; Contingent liability for special service fees paid in advance, $10,899.55; secured by bonds, $8,000.00, and cash in bank, $2,899.55, not included in assets.

RADIO RECEPTION IS NO LONGER SEASONAL.

A statement by the National Broadcasting Company to the effect that there is no summer seasonal slump in broadcasting program quality is supported by a list of regular weekly features which continue throughout the summer. The programme fare of the listener is remarkably well sustained throughout this period and it is a pity that the tremendous prejudice against summer reception has been built up. This prejudice is a heritage of the days of headphone reception when even slight static impressed directly upon the eardrums of the listeners caused acute discomfort. With modern pick-ups by loops or very small antennas and up to date sound radiation through power loud speakers, reception from near by and local stations is entirely satisfactory twelve months of the year. The seasonal usefulness of a good radio set is no less than that of a closed automobile which is out of service only for blizzard or hurricane for a few hours each year. Radio must make way only for thunderstorms. The only static eliminator required is the encouragement of the use of small pick up devices, either loops or small antennas, rather than the all-too-long antenna frequently employed.—Radio Broadcast.

HEENEY BALKS AT BOUT WITH JOHNNY RISKO

Tex Rickard Shelves Plan For Tunney Bout in June.

CONTENDERS ELIMINATED.

Anzan Would Take On Match With Former Heavy Champion of World.

NEW YORK, March 19.—With the second round of the 1928 heavyweight eliminations out of the way, George Tex Rickard ruefully admitted that his tournament has been a howling success.

All Eliminated.

It has been literally an elimination tournament. Every one who took part has been eliminated, the winners as well as the losers.

Even the innocent bystander, Gene Tunney, who had nothing to do with it, has been eliminated. Every move made clearly indicated that Rickard has abandoned all thought of a championship match in June.

Jess McMahon, matchmaker of the Garden, opened negotiations for a June match between Johnny Risko and Tom Heeney. This was accepted as a tacit admission that Tunney is out. Rickard is having enough difficulty selling his second-grade products without offering them in competition with championship goods.

But Heeney Balks.

Nor is there any certainty that McMahon can land the Risko-Heeney bout. Charlie Harvey, manager of Heeney, has become obstreperous. Charlie flatly refused to consider Risko.

"Why should Tom fight him?" he argued. "He beat Risko only a few weeks ago. Now, Tom ranks as the leading contender in this State.

"I think Tom is entitled to the shot at Tunney without further quibbling. I will make one exception. I am willing to match him with Jack Dempsey if Rickard desires the match. Otherwise, the records show that Heeney is the outstanding contender, and I will stand on our rights.

McMahon is indignant over the attitude Harvey has taken. The matchmaker said:

"Heeney only drew with Sharkey, and Risko defeated Sharkey. Risko has beaten Jack Delaney, Paulino Uzcudun and Jack Sharkey, three men who are listed among the best in the division. If Harvey wants to compare records, Risko has a better one than Heeney. The records show that Heeney lost and drew with Paulino. Risko beat the Basque decisively.

"Harvey is changing his tune. He wouldn't fight Jack Delaney until I signed an agreement to match the winner with the winner of the Sharkey-Risko fight. Now, he's trying to back out of it."

McMahon is regarded as the best judge of a fighter in the country, and he believes Risko has an excellent chance to come through to a Tunney match. In fact, if the match were staged in June, McMahon would pick Risko. Johnny has fought twenty-three times in the past year and Tunney has fought once. McMahon believes the only way to learn to fight is by fighting.

The loser, Sharkey, is still in demand. He was offered two matches one by Rickard on behalf of a Boston syndicate and the other by Humbert J. Fugazy.

Fugazy wants Sharkey for a fifteen-round bout with George Godfrey, the 235-pounds negro. Godfrey recently defeated Paulino at Los Angeles. Sharkey holds a ten-round decision over Godfrey. Fugazy would like to stage the bout in May at Ebbets Field.

Rickard may jump to Boston and promote a bout between Sharkey and Jack Delaney at Braves Field. He is so interested in the match that he is considering it for one of the local ball parks.

Hansen Back On Scene.

The situation was complicated still further by the return of Knute Hansen, the Danish heavyweight, who knocked out Phil Scott. Joe Woodman and George Lawrence were around the Garden, ready to consider anything suggested. They may wind up fighting Godfrey for Fugazy if Sharkey does not accept the match.

Rickard was so depressed that he did not appear at the Garden. He sent word that he had nothing to say.

Tex has been reading his box office statement, and it gave him a severe headache. The Sharkey-Risko bout drew only $96,060, which was only half what the Delaney-Heeney bout drew. In ten days the demand for eliminations has dropped off almost 50 per cent.

EARTH SHOCKS FELT NEAR ST. LAWRENCE

Minor Quakes Reported From Both Sides of the Border.

ALBANY, N.Y., March 19 (Canadian Press).—Residents of Northeastern New York to-day were recounting the details of the earth shocks which yesterday jolted points as widely separated as Malone, Plattsburg, and Lake George. Tremors were felt in Saranac Lake shortly aften ten o'clock yesterday morning; in Malone, at 10.20, and at Warrensburgh and other points between 10.20 and 10.35. They were reported also as having been felt on the Canadian side of the St. Lawrence River.

Man, 78, Milks Cows and Farms 87 Acres

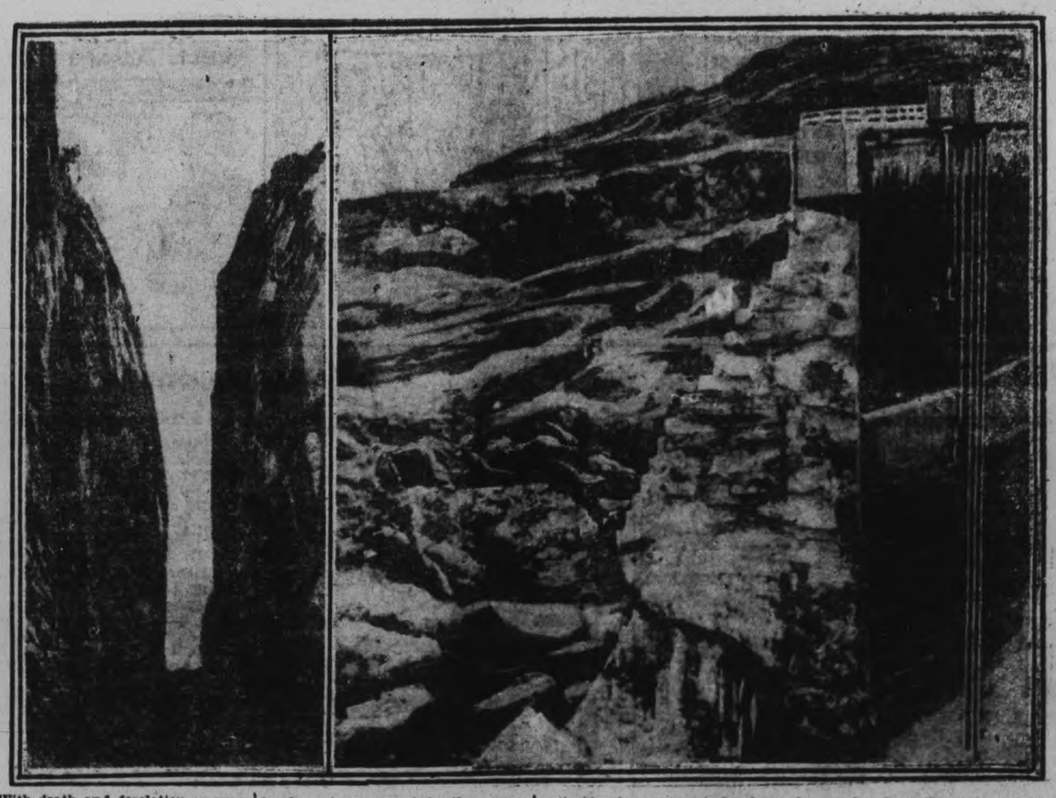
"My husband who is 78 had given up work. Then he took Vinol. Now he farms 87 acres and milks the cows."—Mrs. G. E. Boyd.

Vinol is a compound of iron, phosphates, cod liver peptone, etc. The very FIRST bottle makes you sleep better and have a BIG appetite. Nervous, easily tired people are surprised how QUICK the iron, phosphates, etc., give new life and pep. Vinol tastes delicious. McDermid & Jury, E. L. Payne, McDermid Drug Company.

Lady Mary Bailey Has Reached Cairo

CAIRO, March 19 (Canadian Press).—Lady Mary Bailey, now on a solo flight from England to Capetown, arrived to-day from Aboukir.

GEOLOGIC FAULT BLAMED FOR BREAK



With death and desolation on every hand, an army of searchers deployed through the flood-ravaged Santa Clara river basin are hunting for bodies in the St. Francis dam catastrophe. A movement in the mountainside, on the west side of the dam, due to seepage of a geologic fault, is blamed by engineers for the tragedy. After the west side had crumpled the east side also gave way, leaving only the centre abutments standing. The artist pictures the water breaking through the San Francisquito Canyon into the Santa Clara valley where several little towns nestled snugly along the fertile river basin. Houses were picked up and swept along in the torrent like tiny corks. Whole villages were wiped out of existence. Inset is a view taken in the valley prior to the disaster.

What CAN a Man Believe?

By BRUCE BARTON

Author of "The Book Nobody Knows," "The Man Nobody Knows"

I—A Letter From a Man

THE morning mail of September 25, 1926, contained the following blunt letter from a friend. He is the father of two children and president of the largest business of its kind in the world.

"I have read your two books. I have also read another which is better than you ever thought of writing, the book of Job.

"There is a man I like. He speaks my language. He was successful in business; he had a nice property; he was a good father, and a first-class citizen, trying to do his best. What happened? Suddenly, for no good reason, he loses his property and his health. His wife turns against him, and the whole town regards him as an outcast, punished for some secret sin.

"Worst of all, three theologians come to comfort him with platitudes that Job knows are not true. He tells them so. He says there is no answer to the riddle of the universe: that the wicked get on just as well as the righteous; that, if anything, God gives the bad an even better run for their money, and that his own good record has brought him nothing but misery.

"'Man that is born of a woman is of few days, and full of trouble.

"'He cometh forth like a flower, and is cut down: he fleeth also as a shadow, and continueth not.'

"I am like Job in being fairly prosperous. I am like him also in getting no satisfaction out of the arguments of the godly.

"I see certain men, whom I respect, who seem to have faith. It gives them a satisfaction that I envy. I should like to have such a faith. I should like my son to have it, and the young men in my business.

"But like Job, I shall not be a party to the acceptance and dissemination of bunk. I'd rather take his wife's advice and 'curse God and die' than add anything to the current oversupply of superstition, fear, and outworn creeds.

"I should like to see a book written which would answer the following questions:

"1. Would the world be better or worse off if it should abolish religion?

"2. Has the church done more harm than good?

"3. Of the various religions now extant which is the best?

"4. What few simple things, if any, can a business man believe?

"5. If there is to be a 'faith of the future' what kind of a faith will it be?

"If you will write such a book I will read it. If it meets the questions honestly I will give it to my son and to the younger men in my business. If it dodges the questions; if it tries to creep up behind my reason through the back door of my emotions, I will burn it up as I should any other germ carrier.

"Consider this letter an order for the first copy. The theologians may shoot you at sunrise, but these questions that I have asked are what we ordinary fellows want to know. And that, by the way, might be your title—we want to know!

"But no pretense, remember. No side-stepping in order to keep from offending this sect or that. I can forgive you if you make an honest effort and fail, but if you trot out any of the shop-worn stuff you lose one gentle reader forever."

Tomorrow—Should Religion Be Abolished?

Why Bruce Barton Wrote "What CAN a Man Believe?"

In "The Man Nobody Knows" Bruce Barton interpreted Jesus, and in "The Book Nobody Knows," the Bible, for this generation. They have been the most popular books of the decade. They have gone round the globe and been translated into most of the languages of the civilized world. Millions have found inspiration in them.

But they were, so to speak, only preliminary studies for "What Can a Man Believe?" In this new work is Bruce Barton's dominant theme, the thought that has engrossed his mind from the start:

The constructive idea for an age of doubt.

DUAL IDENTITY REVEALED IN SUIT

Quebec Man Had Bank Accounts Under Two Names.

MONTREAL, Que., March 19 (CP).—Emulating "Dr. Jekyll and Mr. Hyde" in his possession of a dual personality, Alfred Beaune, former manager of the Manoir Richelieu at Murray Bay, kept separate bank accounts in different names, and was known to his intimates under his real name, and to his business associates under another name. When he died he left a holograph will signed with his real name, but a sister, who was not mentioned in the will, took action to have it set aside, and at the hearing of the action the details of Beaune's life was reviewed before Mr. Justice Duclos, of the Superior Court. His Lordship upheld the validity of the will, and characterized it as making a reasonable and equitable distribution of a bachelor's property.

His decision makes interesting reading.

"As regards Helene, the plaintiff, it appears that she was not on intimate terms with the deceased. It is established that, with two or three exceptions, he had not seen or spoken to her for 20 years. It is true, she says, that on the occasion of Mr. Letang's funeral, the deceased had kissed her. I don't blame him. But the emotions naturally aroused when standing beside the coffin of a dead relative may partially account for this tardy evidence of affection.

"Moreover, the plaintiff is a widow without children and is possessed of considerable means. As regards Mrs. Letang, she is a widow with two sons and very small means, who has brought up a niece and nephew, children of a dead sister. This leaves one neice, whom he particularly favored, and four nephews, all of whom he usually referred to as 'les enfants.' They were his children in sentiment, if not in fact. By his will the testator leaves his estate to his niece and four nephews, with a special legacy of $4,000 to the only niece. Can anyone imagine a saner, more equitable and reasonable disposition of the property of a celibate?"

FEW PEOPLE KNOW how white teeth really are. Miss Rene St. Denis, like millions of others, now knows through daily use of Pepsodent.

Whiter Teeth

New safe way urged by dentists—You test it free at home

IT'S been found that dingy teeth come from a film that forms on teeth. A stubborn film old-style dentifrices did not successfully remove. That's why brushing failed.

Run your tongue across your teeth and you can feel that film now—a sort of slippery coating. It is a chief enemy of teeth and gums.

It invites tooth decay, gum troubles and pyorrhea because it breeds bacteria, and is the basis of tartar.

Now, in a new-type dentifrice called Pepsodent, scientific combatants are found. Their action is to curdle the film and remove it. Then teeth become gleaming white.

Leading dentists widely urge it. Druggists have it. Test sent free.

Hairpin production in England has dropped from 4,700,000 pounds in 1913 to 1,100,000 pounds in the past 12 months.

Was Subject to BRONCHITIS Every Winter

Mrs. Wm. Healey, 524 Hill Street, London, Ont., writes:—"My daughter, aged fourteen, was subject to bronchitis every winter.

"She would cough until she was sore from the exertion.

"Last winter a friend advised me to get a bottle of your

Dr. Wood's Norway Pine Syrup

so I got a small bottle to try and was delighted to find that before she had taken half of it her cough was completely relieved.

"I certainly feel justified in recommending it to those suffering from coughs and colds."

Price 35c. a bottle, large family size 60c.; put up only by The T. Milburn Co., Limited, Toronto, Ont.

More than $1,300,000 worth of American washing machines were sent to relieve housework in foreign countries last year.

THE COLONIAL HOME

Lawson & Little, Architects.

In spite of the charming dignity of this little brick Colonial dwelling, there lies a spirit of friendliness which invites our closer inspection.

The happy exterior result portrayed by the perspective, is obtained almost solely by good general form and proportions. Notice the absence of expensive detail work, the doorway only, being accentuated by the simple use of a classic cornice and pilasters.

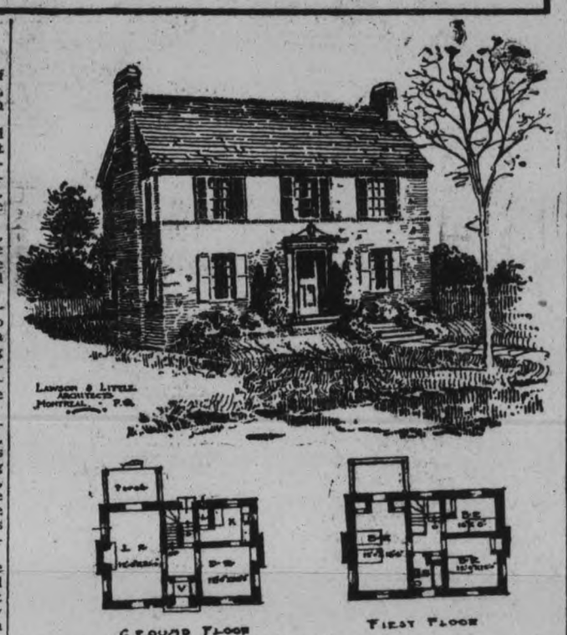
A belt course of bricks on edge, forming where required the sills of the first floor windows, helps to produce the general horizontal effect typical of the Colonial style.

Before leaving the subject of the exterior due attention must be paid to the landscaping, which, although of a simple nature, forms an effective setting for the house. Evergreens, and flowering shrubs, growing from a turf terrace which spans the front of the house, are its chief features.

The construction is of the most lasting kind. With concrete foundations, brick walls, slate roof, and stone walks and steps, this home will be serving its purpose long after many others, built at this time, have fallen into the wrecker's hands, while what is of more immediate concern to the owner, is the fact that upkeep costs will be practically non-extant.

Entry is made through a vestibule having a coat closet on each side, and a tile floor, into the hall. The left and right hall walls are taken up by the living room, and dining room openings respectively, while opposite the entrance are the stairs, and a door leading to the rear grade entrance and kitchen.

Beautiful interior effects on this floor have been obtained by the use of rough plaster in shades of cream for the ceilings and walls throughout. Imagine the charm of the living room with this type of wall, oak floors, and in common with the remainder of the ground floor except kitchen, gumwood trim. A well designed fireplace is located in the centre of one side, while wrought iron and tile electric fixtures grace the walls.



In the dining room, instead of the fireplace being in the centre of the wall, it is placed to one end. Apart from the exterior balance which alone would necessitate this position, a decided interior advantage will be obvious, when it is realized how much easier the fireplace may be avoided when arranging seats at the table, so that nobody need endure the discomfort occasioned by its heat striking directly on the back.

At the rear of the dining room is the kitchen, which is very compactly and conveniently arranged, and from which both front, and rear doors, may be quickly and easily attended to.

Returning to the hall, and ascending to the first floor, we find the same beautiful wall and ceiling treatments prevailing, with cream enamelled trim. The main partitions are located directly over those of the ground floor, which besides resulting in a good simple plan constitutes another element of the structural soundness for which this house may be particularly noted.

The largest bedroom, of course, is that located over the living room. It contains ample space for twin beds, as shown and is provided with two clothes closets, between which a door gives access to a balcony situated over the living room porch.

Two other bedrooms are provided, each having one clothes closet. That in the larger bedroom is very cleverly incorporated in the space usually occupied by a fireplace. A tiled bathroom, with recess bath, and a linen closet in the hall, completes the accommodation of this floor.

A dry well-lighted basement extends under the house, and contains a hot water heating furnace—the form of heating installation generally considered most satisfactory to meet house conditions.

This house was built on a standard lot of 50 feet, which, as the house itself is 34 ft. 6 inches wide, provides just enough clear space for effective treatment, and to assure light and air on both sides.

This home cost approximately ten thousand dollars, exclusive of lot.

Readers desiring further information regarding a house of this design should communicate with MacLean Builders' Guide, 345 Adelaide St. West, Toronto, Ont., who will see that it is supplied. When writing please mention design number 116. Copyright, 1928.

Question: Our neighbor built a house that does not line up with the street. He gave away soil and then had to buy more to fill up low places in the lot. Cannot these things be avoided? How?

* * *

They can be avoided. First have your building site and lay of the building on it accurately surveyed by a competent surveyor. Have the contractor pile the excavated material in two piles, one of top soil for future dressing of the lawn, the other of excavated material which can be used for filling, and the excess disposed of in any way that may be feasible. The best way to handle a matter of this sort is to employ a good contractor and make him responsible for your complete satisfaction under the direction of an architect.

Pupil Nurses Wanted

NEW CLASS NOW FORMING. 1d-67-734

EDMONTON, Alta., Mar. 17 (Canadian Press).—When the party of Canadian farmers touring Britain on their overseas marketing travels were entertained at Buckingham Palace, a pleasing little story of reception appeared in the London Sunday Pictorial. Queen Mary had an especially warm spot in her heart for the visitors from Alberta in which province lies the Prince of Wales' ranch. Here is the item.

"Have you seen my son there?" was the question regarding the Prince of Wales which the queen put to Mrs. Warner, wife of D. W. Warner, who is a farmer in Alberta. "I told her I had seen the prince and that we felt very much honored on that account. She seemed quite pleased and was very kind to us.

"The King extended a hearty greeting to the farmers, who went to the palace in bright red coaches and wearing ordinary clothes. The party remained for nearly an hour and had tea."

PHARMACY DRAWS BRITISH WOMEN

Many Take Up Chemical Profession—Percentage Small in Canada.

KINGSTON, Ont., March 19 (CP). —The editor of the Whig-Standard notes that pharmacy in Great Britain is attracting a remarkably large number of girls as well as boys. It appears that it is being taken up by many girls as an interesting occupation to last until other hopes which they cherish are realized. The knowledge they gain in the work might very well become useful to them when they are married and have children. It would certainly help them in cooking. There is much wider scope for chemists nowadays than there used to be, for so many more industries are appreciating the value of laboratory assistance and research.

The Whig-Standard says "The subject is new to us, and we have had no time to inquire thoroughly into how far pharmacy is being taken up by girls as a profession in Canada. But so far we understand the number is very small, only about one or two per cent as compared with men. There is every opportunity open for them to do so. We believe an arts course is necessary, then an apprenticeship, and then application to the college of pharmacy."

According to the Ministry of Health of Great Britain, 20,292 persons have been continuously in receipt of outdoor relief for three years or more.

FEMALE VOICE CHOIR CONCERT

Mrs. E. B. Heard, whose small pupil, Ardyth Richardson, played so well at the concert given on Friday evening last, under the auspices of the Female Voice Choir, in the Canadian Legion Hall, also played two duets with the tiny musician.

CARD OF THANKS.

Mrs. A. Pinch and Family desire to thank all kind friends and neighbors and William Hamilton Foundry for kindness shown them, and floral tributes, during their recent sad bereavement.

CORRECTION

Mrs. Joseph Huard and family regret that the wreath sent by the Buffing and Plating Room of Westclox Company, was overlooked in the Card of Thanks, due to the wrong card having been placed on it. They wish to thank the donors for flowers and sympathy in their late bereavement. 1d, 67, 751

Obituary

MRS. A. E. HUESTIS.

TORONTO, March 19. Canadian Press. — Mrs. A. E. Huestis, prominent church and philanthropic worker died here to-day. Mrs. Davidson of Peterboro, is a daughter.

The funeral arrangements have not yet been completed.

MRS. THOMAS DERRY.

On Sunday, March 18, 1928, there passed away at her home, 520 Gilmour Street, Peterborough, Elizabeth Weir, relict of Thomas Derry. Her demise loses to Trinity United Church, one of its oldest members. The late Mrs. Derry was born in Kingston, and was eighty-nine years of age.

The funeral, which will be private, will take place from her late residence, 520 Gilmour Street, on Tuesday, March 20, 1928, to Little Lake Cemetery at 2.30 p.m., Rev. David Wren, of Trinity United Church, conducting the service at the house at 2 p.m.

SISTER MARCELLA

Yesterday evening, at 5.50, after a lengthy illness, the death took place at St. Joseph's Hospital of Sister Marcella, a member of the Community of St. Joseph, who had long been a member of the teaching staff of the Peterborough Separate Schools.

The funeral will take place from Mount St. Joseph on Tuesday morning; the Funeral Mass to be celebrated at nine o'clock.

MRS. HARRIETT ARMSTRONG

SPRINGVILLE, March 19. — The funeral of the late Mrs. Harriett Armstrong took place on Saturday, March 17th, from the family residence at Springville and proceeded to Little Lake Cemetery for interment Rev. A. H. McConnachie officiated at the services.

Mrs. Armstrong was before her marriage Harriett Crozier, a resident of Manvers, where she was born in 1852. She married John Armstrong in 1883 and together they made their home on a farm in North Monaghan. They had four children, one of whom, Mrs. H. Brown, died in 1910, leaving her infant daughter, Mildred, to the care of her grandparents. About eight years ago they retired and moved to Springville. Four years later the deceased was left a widow and shortly afterward her health began to fail. For the past year she has been a courageous sufferer, never complaining and always showing great pleasure at seeing her many friends when they called to see her.

She loved the quiet home life and found comfort in being alone even through her suffering. Before her death, she particularly requested of her family and friends that there would be no flowers for her funeral.

This wish was fulfilled except for a beautiful spray of lilies and roses sent by Springville church and used afterwards at the Sunday service in memory of one who would suffer no more.

She leaves to mourn her loss, one daughter, Mrs. H. Cathcart, Springville; two sons, Sidney of Bethany and Stanley of Mariposa, and one sister, Mrs. Porteous of Bethany; also Mildred Brown, a granddaughter teaching at Campbellcroft and nine younger grand-children.

Her pall-bearers were: Messrs. William Whitfield, Fred Wilson, Willis Tully, Harry Brown, Will Banisay and Joseph Austin, the two latter being from Port Hope.

MICHAEL MARTIN CAUSES TROUBLE

Quarrel With Storekeeper is Followed By Scuffle. With Officer.

Michael Martin caused a little excitement on Charlotte street on Saturday night. He entered the store of A. Cherney and purchased a wrench. On coming out he thought he had been short changed and returned. Onlookers who saw the purchase being made declared that Martin had received the right change, but Martin refused to leave. In a few minutes Police Sergeant Arthur Thomas happened along. The officer put Martin out of the store, intending to let him go.

Martin raised the wrench as if to hit Sergeant Thomas, but lost it in the scuffle that followed. Martin then turned and ran into Parker's Dye Works with the police officer following him. In the dye works he could not find a ready exit so he broke a window. He got out into the back yard. He ran to the creek and in attempting to cross the ice broke through and got thoroughly wet. Later in the eveing he made his appearance on Charlotte street again and this time, police say, he took a suit of clothes from A. Atkin's store, disappearing immediately after in the lumber piles south of Charlotte street.

THEATRE IS FILLED FOR FINE CONCERT

Splendid Program Given at Fifth of Humane Society Series.

A capacity audience filled the Regent Theatre last night for the fifth of the series of sacred concerts which are being offered there on Sunday evenings under the auspices of the Peterborough branch of the Humane Society. A very fine program was given, every number being received with enthusiastic appreciation. The appearance of Frank Oldfield, of Toronto, who was in the city yesterday as soloist at Knox United Church, and his singing of two loudly-applauded numbers, was the major item of the evening. Dr. J. J. Craig acted as chairman, and will also have charge of next Sunday evening's program. Numbers last night were as follows:

Mixed quartette from St. Paul's Presbyterian Church, composed of Mrs. W. Byers, Miss Jessie Pattison, John Anderson and Harry Flowers, singing "Rock of Ages," with accompaniment by M. B. Chenhall; vocal solo by Miss Ernestine McManus, Rosewig's "Ave Maria," with accompaniment by Miss Florence Giroux; vocal solo by Miss Margaret Dickson, "Sundown," with accompaniment by Miss Gwen Donley; vocal solo by Miss Ethel Maybee, "Come Unto Me," with accompaniment by Miss Gwen Donley; cornet solo by Joseph Minicolo, "The Rosary," with accompaniment by Miss Marguerite Rome; readings by Mrs. F. McNeely, "The First Settler's Story" and "Jimmy Douglas"; vocal solo by Miss Geraldine Collins, Gounod's "Ave Maria," with violin obligato by Arnold Spencer, and piano accompaniment by Miss Gwen Donley; vocal solo by Mrs. Ross Williamson, "The Lord Is My Light," with accomapniment by Miss Gwen Donley; violin solo by Roy Rome, Schubert Wilhelmj's "Ave Maria," with accompaniment by Miss Marguerite Rome; vocal solo by Miss Alma Blanchard, "Sun of My Soul," with accompaniment by Miss Musa Cox; male voice quartette from St. Paul's Church, composed of Charles Clark, John Anderson, Horace Hope, and Harry Flowers, singing "The Comforter Came," with accompaniment by M. B. Chenhall; and two vocal solos by Frank Oldfield, who sang "Nearer, My God, to Thee," and "Honor and Arms,' with accompaniments played by Miss Muriel Bridge.

Ushers for the occasion were T. E. Sargent, D. C. Grant, F. Goodfellow, J. Juby and J. S. Chandler.

MINES.

F. G. Oke & Company wire as follows:

TORONTO, March 19. — What appeared to be a bear drive on Sudbury Basin stock this morning was the most outstanding incident on the mining market. Judging from the manner in which all offerings were quickly taken and the way the stock reacted from $9.75 to $10.60 per share, cheap stock is in strong demand. Rumors of $15.00 for Sudbury Basin are on street, and in view of a small issued capital such a price would not be surprising.

Information is in the hands of shareholders this morning regarding the annual general meeting of Abana Mines, Limited, which will be held at the Windsor Hotel, Montreal, on March 24, at 3 p.m. Much important news is expected to be announced at this meeting, and which is expected to have a bullish effect on the market for Abana stock. There seems little doubt about Abana producing about the end of the coming summer, and if ore continues to be blocked out and put in sight as has been done during the past few months, then the future for Abana market wise seems in the $10.00 class of stock. Also the promising prospect adjoining Abana, of Abonde Mines Limited should not be overlooked.

Abonde stock is selling pre-listing price 30 cents per share, and there is very good reason to believe that some of Abana's rich copper gold ore bodies extend into the Abonde property.

Further work on Abonde is expected to result in important discoveries.

Amulet was easy this morning, but this is another stock which we believe should be purchased at prevailing prices for although there are many conflicting reports regarding ore reserves, it is generally considered among wel l informed circles that Amulet will prove a mine of considerable importance.

Towagmac was in strong demand at current quotations, presumably on reports of favorable discoveries on their Sudbury properties. We believe this stock should be watched closely as the present market action seems to presage further advances.

As a whole the market was firm and higher prices generally are predicted on street during the next few weeks.

Advance at ... ...

CHICAGO, March 19 (Canadian Press).—Helped upward by an unexpected advance in wheat quotations at Liverpool, the wheat market here scored early gains to-day. Liverpool reported a better demand for wheat and there was also a decided falling off in the amount of wheat afloat for Europe. Opening at ¾ to 1 cent advance, Chicago wheat later scored additional gains. Corn and oats were also firmer, corn starting ⅝ to ¾ cent up, but subsequently reacting somewhat. Opening prices were:

Wheat, March 140⅜, May 139¼. Corn, March 98, May 100⅝. Oats, March 58, May 58¼.

Toronto Exchange Trend Is Downward

TORONTO, March 19 (Canadian Press).—A general downward tendency was shown in the morning session of the Toronto Stock Exchange today. International Nickel continued active and after opening at 93 dropped to 91½ at the close for a net loss of 1¾. Page Hersey advanced ½ at 95¾, while Canadian Canners First Preferred and Second Preferred moved fractionally higher at 90¼ and 2¼ respectively. C.P.R., after selling up to a new high on Saturday, eased down to 215 to-day for a loss of two points. Massey Harris was very quiet and sold down factionally.

The unlisted section of the market was rather quiet, with the majority of stocks remaining unchanged. Carlings and Goodyear Tire both recorded slight gains.

Sudbury Stocks Firm As Most Shares Drop

TORONTO, Mar. 19. — (Canadian Press.)— The newer Sudbury issues were conspicuously firm in an indefinite list on the standard mining exchange this morning, while Sudbury Basin suffered a reaction from last week's big advance. Sudbury Basin eased half a dollar at 10.60, but Sudbury Mines gained four at 24 and Sudbury contact advanced five at 40. Sherritt firmed at 725 and Amulet advanced 25 to 3.80, but the rest of the list was inclined to be heavy. Teck Hughes softened 16 at 8.59, Lake Shore eased 25 at 23.50 despite Kirkland Lake's three point gain at 2.39, Pend O'reille at 17.50 and Hudson Bay at 17.60 were easier, and Noranad softened slightly at 18.20.

Utility and Rubber Shares Being Bought

NEW YORK, March 19 (Canadian Press). — Speculative interest in today's stock market was divided between brisk accumulation of Public Utilities and Rubbers and heavy profit-taking in some of the recent pool favorites. The price movement was decidedly irregular, but the gains, which ran from one to seventeen points, outnumbered the losses, several of which ranged from three to nine points. Trading failed to maintain the terrific pace set in the closing days of last week, but it was fairly heavy, nevertheless. Public Utilities, which provided about half of the score or so new high records created during the early part of the session, were bought in reflection of expanding earnings and the revival of merger rumors. Mackay Companies jumped eight points to a new top at 125½ on buying presumably influenced by the recent upswing in other communications issues. International Telephone moved up more than five points to a new high in expectation of the issuance of valuable "rights" before the end of the year.

New Nickel Mine Is Making Progress

(Special from The Financial Post Syndicate)

Publication of the International Nickel Company's annual report last week drew attention to the steady progress that is being made in bringing the company's Frood mine to the production period. President Stanley stated that the shaft is now down 2,500 feet and should bottom at 3,000 feet early this year. Cross-cutting, raising, and station construction will take several months, and the ore body may not be reached until the beginning of 1929. He estimated that it would take possibly two years for the equipping of the mine, the opening up of stopes, and the construction of the Frood Surface plant and the additions necessary to the Copper Cliff smelter to take care of the Frood's output, and that both mine and smelter will be in operation in 1931.

Diamond drilling has indicated that high grade ore lies below the Frood's 2,000 foot level, and that copper is associated with the nickel in such large quantities that a large output of copper is assured. It is also known that the precious metal content of the Frood Ore body is greater than that of the Creighton, but exact estimates will not be possible until the ore is cross-cut and further developed.

In the Frood Mine, the International Nickel Company is credited with possessing one of the most valuable mines in the world. It is believed that the Frood Mine contains at least 100 million tons of ore. In addition to the nickel and copper contents, the new ore deposits carried a high percentage of metals in the platinum group, as well as gold and silver.

How great a value International Nickel puts upon the Frood may be gauged to some extent, by its commitment to a development program that has already called for the expenditure of $1,600,000, and calls for an expenditure of approximately $12,000,000 more over the next three years, exclusive of the erection of an electrolytic copper refinery, if this should be decided upon.

The heavy buying of Nickel on the Canadian Market during the past year has given rise to the statement that control is passing, or has passed, into Canadian hands. This is certainly not borne out by the directorate of the company, as of the fifteen members on the board, but two are Canadians.

That certain interests are seeking control of the stock, which is becoming increasingly more closely held, is indicated by the fact that common stock shareholders of record December 31st, 1927, were 1,199 less than the preceding year, and stood at 11,162. Preferred shareholders numbered 1,350 as compared with 1,433 the previous year.

"Give wings to the Canadian prospector, engineer and geologist and these courageous and trained mining men will find more mineral deposits in the next five years, than have been discovered in the last half century."

John E. Hammel, well known Canadian prospector, mining promoter and millionaire, the sponsor of the Flin Flon, the Howie and Harker mines, has adopted this as his slogan, and organized Northern Aerial Minerals Exploration Limited.

This is an aerial transport company designed to apply the airplane in a practical manner to the problem of exploring, prospecting, and developing Canada's great pre-Cambrian shield which extends from Newfoundland on the east, across northern Quebec and Ontario, and the prairie provinces into the Yukon, of which it is estimated not more than 15 per cent has been prospected and many thousand miles of which have never been visited by a white man.

Hammell will carry the prospector to promising mineral areas, keep him in supplies, and co-operate with him in bringing in operating companies to work the valuable property he may locate. The scheme while bold, is by no means visionary, as one aerial transportation company has been engaged in conveying passengers and freight into several of Canada's isolated mining fields for a number of years with marked success.

BOY HURT COASTING.

Ennismore Lad Badly Cut When Sled Runs Into Barn.

ENNISMORE, March 19. — On Saturday the eldest son of Mr. and Mrs. Patrick Murray met with an accident. He was sleighriding down a hill towards the barn, when the sleigh stopped suddenly throwing him against the barn door.

He received a bad cut in the upper lip and was immediately taken to a Peterboro doctor, who dressed the wound.

SPRING FASHIONS

The Evening Examiner

SPRING FASHIONS

IF IT WILL HELP PETERBOROUGH AND DISTRICT, THE EXAMINER IS FOR IT.

VOL. LXI., No. 67 PETERBOROUGH, TUESDAY, MARCH 20, 1928 PRICE THREE CENTS

The Flower of Fashiondom is Displayed in This

Spring Fashion Number

In which Examiner reporters and Peterborough merchants tell of the smart apparel awaiting madame and mademoiselle in city stores. There are descriptions and pictures here of the smartest in frocks, suits, coats, millinery, lingerie, footwear and accessories, besides the many items of house furnishings that will be found needful at this season.

This Section is indeed

La Parade des Modes

Greet Spring with a Smile! Every page of this Fashion section has dainties that will make you happy just to think about. And isn't it great that everything pictured and described here can be seen and bought right in Peterborough!

Larger Women Prefer Navy for Spring

Next in importance with those who are not slender are black, beige and navy blue. These color facts hold true in ensembles, coats and in frocks.

Handkerchief Scarfs Grow in Popularity

Apparently there is no hour of the day in which the handkerchief may not appear to advantage. Once the exclusive property of the sports outfit it now flaunts its charms, not only on evening frocks, but on lounging pyjamas as well.

EASTER FASHION NEWS

Is Your Handbag Wearing Out?

Be glad of the fact for you will then have the opportunity to replace it with one of the new diagonal-lined bags of calfskin. Lizard skin set in metal forms the mounting.

New Corselettes

Since the new apparel for spring shows a tendency toward more moulded lines it is only natural that corselettes and corsets should be fashioned accordingly.

In addition to supporting the figure adequately, the newer models, fashioned of novelty materials, allow an uninterrupted sweep from bust to thigh.

Will Easter Find You Ready to Promenade?

The fact that there is very little time left in which to choose a costume for Easter need not disconcert anyone. Certainly not those who have the benefit of our displays wherein all the most desirable new modes are to be found. Nor do you have to make up your mind as to the type of outfit you want. It is so much easier to do so here where every phase of the mode may be investigated and any modes you particularly admire tried on.

Ensemble

A Suit is an indispensable part of the spring wardrobe when it happens to be an Ensemble, such as we are showing in beige Omar cloth. The Coat is a straight-line effect, with trimmings of self-shade satin. With this we show a Skirt gracefully pleated, and to set it off a Blouse of self-shade satin with trimmings of Omar cloth. Have you seen this exclusive three-piece Ensemble?

Priced at $69.50

The New Blue

For the afternoon mode, sport types are replaced by more feminine and flattering lines in a lovely Frock of chin-chin blue georgette. This Dress shows a deep surplice collar gracefully draped to one side and tied in a large soft bow at the waist. The Skirt is softly draped to the same side, and to set it off a floral shoulder trim of little spring rosebuds in a deep rich red.

Priced at $39.50

REDFERN SHOPPE—SECOND FLOOR

The KARLROY Suit

FOR MEN

YOU SIMPLY CANNOT MATCH IT AT THE PRICE

With spring and bright sunny days come lighter shades in men's attire; fine English worsteds and tweeds with a tint of springlike tones.

"KARLROY" SUITS keep their good fit, their good shape lines and style. You cannot wear out their good appearance.

THE MATERIALS—New "Tyburn" fabrics in tweeds, new "Bristol" stripes in worsted. Direct from the best English mills.

THE COLOR—Light shades, yet mild and conservative; fancy mixtures, popular with the young men; very practical yet colorful stripe fabrics.

THE STYLE—The Special "Karlroy" Suit is here in styles for young men and men; also types for the short and tall fellow. Both single and double-breasted models.

If YOU are hard to fit, just step into the Men's Shop and try on YOUR model.

Sizes 34 to 46

BABIES' OUTFITS ARE STYLISH TOO

Dainty Clothing For Little Ones Offered at Fancy Goods Store.

"Blue for the boy and pink for the girl" is the slogan of one faction, while another, inclining to the Old Country belief which places the girl under the protection of the Madonna, gives her cerulean color to the girl and the pink to the boy.

At any rate, anyone who wants either of these colors combined in the sweetest and daintiest things for the little man or woman can have a wide range of choice at the Peterborough Fancy Goods Store, managed by Miss Alice Curtis at 184 Hunter Street. Here are lovely babies' outfits in silk and wool, also Madeira-embroidered dresses in batiste and hand-made slips. Children's dresses

and coats have a place here and little hats. The cleaving to the line of adult fashions is visible in the tiny pieces of lingerie in pastel hues and silken meshes.

A pair of sweet little party dresses are developed in pale blue voile trimmed with Valenciennes lace. Small "pantie" frocks are cute, too, one with a little pocket on which appears an apple with green leaves and a face outlined on the fruit.

There are many other things of interest in the way of embroidery supplies and exquisitely embroidered linens for bedroom and bathroom and dining-room, also cushions, all demonstrating the latest ideas in such things, that change with fashion's whim in the same manner as clothes. There are card-table covers, boudoir accessories in taffeta-clad dolls and jewel cases, lovely flowers in velvet and silk and georgette, dolls and dolls' supplies and sewing sets.

KNIFE PLEATING IS EVER PRESENT

Many Contradictory Notes in Ladies' Wear This Season.

One of the contradictory style notes of the spring mode that makes a lady's dress blouse at the front above a band and tie at the back with a narrow belt is demonstrated in a pretty dress that also displays a popular combination of navy and red and the always present knife-pleating, in the store of Morris Abramson, at 289 George Street.

Here also is an assortment of many things; woollens and gloves and hosiery, aprons and lingerie and hats in the combinations so favored this season.

The coats include the style modes of kashas and tweeds and charmeens, with plain and furred collars. The frocks also are up to date. One model of navy georgette over a crepe slip has a front made entirely of Swiss embroidery, while another interesting effect is gained by a rich Malaga red whose reversible fabric makes the trimming of the gown.

Another pretty gown shows the two-tone combinations of soft shades that appear to be so good this year, as well as the bright tints and the sharp contrasts which make some of the dresses. This frock is of canton crepe, in a very faint brown, with trimming on the blouse and skirt of the sandish shade known as Mother Goose. The very popular blacks in regular and out sizes are also shown, with trimmings of lace and reversible satins.

HAT TUCKS.

Tuck treatments make new imported hats as unusual. The brim of a large drooping natural bakou has two-inch tucks from the crown. Flowers trim it.

SPRING SKIRTS ARE PLEATED

Many Arrangements of Material Shown in Swartz Store.

BUTTONS FOR TRIMMING.

Pleated, tiered and draped. There you have the spring's ideas of what to do with skirts. Or again you may have them flounced, but not so often. If they are pleated, it may be only in the front, or at the sides, and seldom at the back, unless the material is very sheer and the fabric is knife-pleated all around.

An interesting idea in this pleating of the skirt is developed in one of the gowns in the store of A. Swartz at 422 George street. It is of the new blue called "duck's egg," a soft dark sky blue, and its three tiers of knife-pleating that form the silk crepe skirt are held together by broad vertical bands of self-colored cire ribbon with a shiny eggshell finish. The top portion is of blue georgette in the same shade.

One of the intriguing new printed crepes that are so lovely has an unusual and very effective fashioning. It is blue with a floral design and is made over bright rose color. Round pearl buttons trim it and a white gardenia at the shoulder gives a finishing touch.

Another odd combination is in a plain black satin-faced crepe skirt and rose georgette top. Embroidery in black silk and a front plastron showing petals of green, rose, and orange give a vivid effect.

A dress of rosewood crepe has a design in colored glass beads, and there are a number of pretty two-piece knitted suits.

For adults and juniors are shown a full line of coats in charmeens and tricotines, in kashas and tweeds, while the hats are very attractive. One little model of close-fitting type is made of violet straw in three shades. The top is dark while the brim is a shade lighter and the crown is ornamented with wheels of straw in the three tints.

Orange and henna wheels trim a small shape of almond green, and a model of rose corded silk has a maline tiara effect in front and a band of sequins in shades of rose, gold and green.

Accessories of all sorts, with lingerie and hose, also form a portion of the stock at A. Swartz' store.

FROCKS ARE SHOWN IN HALF PORTIONS

Half Style Cape Adds to Beauty of Dress at N. Sukloff's.

Half portions are popular this year, at least in ladies' styles. Other places babble of full capes, for instance, but Peterborough likes the half style better and uses it on many of her dresses for women. In the store at 441½ George street which is managed by N. Sukloff, one black dress has this arrangement. It is a very pretty frock with two wide bands of rose stitching on the skirt, in braid effect, its half cape lined with rose and finished with a long tassel, and its collarless neckline edged with the same bright color.

A black and red dress, a favorite combination this season, has a round yoke stitched in black and finished with a frill of pleated crepe. Plain bands of red outline the skirt hem and cuff edges.

A handsome coat of black charmeen is trimmed with bands of black and white checking on the collar and cuffs, a tweed basket cloth coat has little, button-trimmed tabs of self on its wide pockets and collar and a natural kasha shows the vogue for black satin trimming.

In Mr. Sukloff's store are quantities of staple merchandise, in hosiery and lingeries, woollen goods, sweaters, gloves, scarfs and handkerchiefs.

PALE, LANGUID GIRLS.

Need the Blood-Making Help of Dr. Williams' Pink Pills.

When a girl grows languid and dull, when her color fades and nothing seems to interest her, you may be sure she is becoming bloodless. Before long breathlessness and palpitation will confirm that she is anaemic. Unless prompt measure are taken there is danger of a decline. What is needed is new, good blood, such as Dr. Williams' Pink Pills add to the system. The new rich, blood created by these pills will quickly banish anaemia and bring about robust health, keen appetite and high spirits.

There are throughout Canada thousands of girls who owe their present good health to the blood-enriching qualities of Dr. Williams' Pink Pills. Among this host is Miss Annabel MacDonald, Churchview, N.S., who says:—"I feel it a duty to tell you of the great benefit I have derived from the use of Dr. Williams' Pink Pills. I was pale and very weak. I was generally greeted by my friends with, 'My, how pale you are'. The least exertion would leave me breathless and depressed. One day my mother bought a few boxes of your wonderful Pink Pills and I began taking them. I did not notice any improvement from the first box, but before the second was finished I knew they were helping me, and by the time I had taken three or four more boxes, I was feeling in the best of health, was no longer pale, but had rosy cheeks. My advice to all weak girls is: 'Take Dr. Williams' Pink Pills.'"

A little booklet, "Building Up the Blood," will be sent free to any address. All medicine dealers sell Dr. Williams' Pink Pills, or you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

PRETTY LINGERIE MOST ESSENTIAL

Combination Designs Very Popular—Hose Comes in New Shades.

"Undies" form so much of a problem with the smart feminine dresser that new ideas in their make-up are always interesting. Now comes the combination of bloomers, vest, and slip, all in one garment, and another combination of bloomers and vest has garters attached. These, along with other dainty things in lingerie, may be had at the Jean Riddick Yarn Shop on George Street.

There are hose, too, in silk and wool, in all the new shades of atmosphere and nude (both variations of sand), rifle (which is a very appropriate name for a gunmetal shade), moonlight and svenglow and shell (greys), mirage (mauve pink), and pearl blush (shell pink).

There are sweaters of all types, windbreakers, all-wool pullovers, wool plaited vests, dressing gowns and kimonas, printed crepe handkerchiefs and wool flowers, and charming things for His Highness the Baby, also a full line of children's woollen wear, coats, dresses and hats. Dainty coats for the baby are models in "steam shrunk" cream serge and cashmere, embroidered in heavy silk.

PRINTED FROCKS SPRING FAVORITES

Flowers, or Fruit, or Birds Offered in Latest Dress Designs.

Flowers or fruit or birds. You may take your pick. If you like the first or the second or the third, order your dress accordingly, and if you like animals, too, adorn it with some of the tiny gilt animal emblems that are so popular just now. But you must, at any rate, have a printed frock. If you are in doubt what to purchase in this line, cast your eye on the stock in Rogow's Ladies' Ready-to-Wear Store on the corner of George and Brock Streets. They have a great variety.

One of the more popular models is made with bolero-like blouse opening over a soft crush girdle of navy satin. The skirt, also of the printed georgette that composes the top, is finely knife-pleated.

A bright red georgette has a dainty lace collar and a blouse top of transparent silk (a mixture of georgette and crepe woven in the same piece) has a skirt of flat crepe and sand pipings. A rose beige gown shown an unusual treatment of pleats in alternate knife and box styles on the skirt. Little arrow heads of gold adorn the blouse portion.

A kasha gown in straight-line effect has a belt, piping and small Peter Pan collar of red silk crepe and a two-piece suit is developed in steel grey kasha top and red crepe skirt.

A novelty coat of navy charmeen in Rogow's store with red and black lining has a fur collar of grey mole, while butter mole trims several other coats. Inlays and appliques of black satin with a shawl collar of mole make the variations of a navy coat.

A Prince of Wales style has trimming of bands of the reverse of the cloth and is made with long revers, in double-breasted effect.

Several of the very swagger hair-line stripe suits are here, with their mannish lines and splendid finish, also kasha and tweed coats.

One coat is in very odd style. Its long scarf ends can be domed to the front in such a way as to look like a portion of the garment itself, or else thrown over the shoulder in the regular fashion. Still another stylish coat uses lengthy and heavy black silk fringe as a finish for its long and broad throw ties. Horizontal bands around the bottom are insets of black satin.

Here also are dainty hats in the new styles of combinations of felt and straw and silk, with buckle and feather and flower trimmings.

CRISP FABRICS FOR EVENING WEAR

Beautiful Model in Black Taffeta Shown by Botnick Brothers.

An evening gown in stunning design that features one of the crisp fabrics so favored this year forms a portion of the stock at the store of Botnick Brothers, managed by A. Botnick, and located at 378 George street.

This model is a lovely thing in black taffeta, with plain bodice of tight fashioning and skirt whose inverted front pleat is lined with canton silk crepe of tourquoise blue. The same blue appears on the gorgeous flowers that ornament either side of the skirt, huge things outlined with gold thread.

Other dresses are in the prevailing modes of spring, with numbers of the useful blacks in satins and georgettes, with lace and contrasting trimming, also fine woollen suits and jersey combinations with rayon silk weaves, one of the latter being developed in soft almond green. "Out" sizes in matrons' frocks are a specialty here, and there is a full line of spring coats, in blacks, navies, browns and greys, with a few black satin models.

The black satin piping that is featured on coats this year is noticed on snappy seats in tailored styles, and there is black satin braiding on a coat of hairline stripe suiting that has a very smart appearance. A jabot on the front of a blue coat is another odd touch.

Sweaters form one of the lines in stock at the Botnick Brothers' store, and accessories of all sorts, in lingerie, hose, gloves and bags. Shoes show an excellent assortment of the spring's styles, in combinations of leather and suede, in walking shoes with low heels, and in patent and satin slippers, one of the latter showing a buckle outlined with gold thread, and made of soft crush satin. Another full line is in the arch support style and in the shoe that is called an "easy fitter," for feet that are hard to suit.

The spring hats are here, too, in combinations of felt and straw and felt and silk, in flower trimmings and in Angora wools on soft, flexible shapes.

BOLD NOTE.

A bold chevron insert of white silk in the front of a scarlet angora sleeveless jumper relates it to the white pleated skirt with a scarlet border.

ONE-PIECE FROCK.

Pleated one-piece frocks, with long sleeves and shirt collars, are good sports styles this spring. A maize crepe de chine one has brown incrustations.

Westerly winds; fair to-night and Wednesday, becoming little milder.

VOL. LXI., No. 67 PETERBOROUGH, TUESDAY, MARCH 20, 1928 PRICE THREE CENTS

Health Department Change Receives Set Back

BLANK BALLOTS MISSING WHEN BOX IS OPENED

Box Supposed To Contain Unused Paper Found Empty.

POLL BOOKS RETURNED.

Box Containing Other Supplies Apparently All Right When Opened at Investigation.

TORONTO, March 20. — Somewhere between 282 Sunnyside Avenue, Ottawa, and the office of the Clerk of the Crown in Chancery, Toronto, there disappeared 1,350 unused ballots and a sizeable bundle of unprinted ballot paper. To find just where this disappearance took place will be the task of the Royal Commission now sitting on the probe into the Ottawa South elections of December 1, 1926.

The question of how several of the ballots came to be on Aylmer Avenue, Ottawa, paled into comparative insignificance in Court yesterday afternoon, when the new mystery was revealed. It came with the opening of the two big packing cases which were supposed to contain all the supplies which were left after the election was over.

Since the probe opened, three of these boxes have stood in Court. One was opened on Friday, the one which showed vague signs of having been sealed, and which contained the returns from all the deputy returning officers of the riding. Yesterday afternoon, J. R. L. Starr came to the point where it was desirable to open the other two, shipped from Ottawa on January 8, 1927, more than a month after the election.

Unused Ballots Found.

On these boxes the Commission had pinned most of its hopes. Inside one of them were the unused ballots and the surplus ballot paper. F. M. Scott, the returning officer, had told what was to be found inside. The contents consisted of unused poll books and election supplies, returned at the request of C. F. Bulmer, Clerk of the Crown in Chancery. Since that time, they have lain unopened in a vault in the basement of the Parliament Buildings.

One of the boxes was opened. Out of it came a miscellaneous assortment of election supplies. There were blank poll books, a variety of official envelopes, all unused, packages of pencils and pens, a large number of copies of the Elections Act. But there were no ballots or ballot paper.

Mr. Scott turned his screwdriver to the work of opening the one remaining box, while Mr. Starr, J. C. McRuer, counsel for W. E. N. Sinclair, and the Court looked on expectantly. Here, if anywhere, would be found indications of whence the ballots found on the street emanated. If there were less than 1,350 ballots in the box, then Mr. Scott, it was expected, would be called on to explain just how some of the undisturbed ballots happened to be blowing about the street. If the count proved correct, then it would be a matter for the deputy returning officers to explain.

The last screw was removed, and the lawyers and the returning officer leaned forward. A look of amazement came over their faces. The box was empty.

Through the material which had come out of the full box, another careful search was made, but not one trace of ballots or unprinted paper was to be found. The one significant discovery was four pads of ballot stubs, three of them minus counterfoils.

Mr. Scott immediately went back on the stand, to submit to examination by both Mr. Starr and Mr. McRuer. He again declared, as he had done earlier in the hearing, that he distinctly remembered putting something into both boxes. The bundle of ballot paper, he said, was about two feet by six inches by 16 inches, a sizeable parcel.

Were Not Sealed.

The two boxes, containing the unused material, were taken from his home on December 10, and remained in the room in the Hill Block, on Sunnyside Avenue, until January 8. They were not sealed. Also, he said, he had taken the Yale lock off the door on December 11, as he did not consider the material in the boxes of sufficient importance to be guarded so closely, after the case containing the official returns had been shipped away.

He admitted that he might have unknowingly shipped an empty box, but he did not think this was probable, because he had helped load the boxes on an express truck on January 8, and would have noticed if one had been light. He admitted, however, that he did not make a final check on the contents before shipping the case.

Mr. Scott could not explain the presence of the ballot stubs in the box. They should be, he said, in one of the envelopes from a deputy returning officer.

THE CORRECT ANSWER

To the Lift Lock Figure Puzzle, Is

4073

The artist who made the original drawing used figures totalling 4096. Mr. E. M. Elliott erased figures totalling 8, and Mr. Frank Adams erased figures totalling 15. These figures were secured from Mr. Eastwood, of the Royal Bank after the contest closed, therefore, this left a total in the puzzle, as it appeared in The Examiner or elsewhere from time to time, of 4,073.

To guard against error the puzzle was solved and re-checked in our own office after the contest closed until all doubt concerning the correct answer was removed.

Keen Competition for Prizes.

The competition for the prizes was very keen. Apparently contestants, because of the splendid prizes being offered, checked and re-checked their work until they were almost certain of success. Therefore, perhaps, it is not surprising that many more contestants got the correct answer than there are prizes.

Since this is the case, the 50 prize-winners will have to be selected from those with the correct answer. Therefore, according to Rule No. 11 of the contest rules, a second puzzle will be submitted to those contestants who have secured the correct answer to the Lift Lock Puzzle.

"The Special Prizes" for the first correct answers will be awarded at the same time as the regular prizes.

"The Tie-Breaker Puzzle," which is a test in addition, is now being prepared, and we expect to mail this to those contestants with the correct answer on March 23. These will all be mailed to the addresses that the contestants placed at the top of their coupons.

The Contest Department is now carefully checking over the contest records to avoid all errors, but should any contestant who has the correct answer of 4,073 fail to receive the copies of the second puzzle, after allowing a reasonable time from the date mentioned above, for the tie-breaker to reach them, he should immediately notify us, as we cannot be held responsible if contestants fail to do this.

Our readers apparently found the Lift Lock Figure Puzzle extremely interesting and very educational, as great enthusiasm was shown throughout the contest, and we take this opportunity of congratulating the contestants who secured the first correct answer. Also the contestants who did not secure this correct answer have no reason to feel discouraged with their efforts, as we can assure you that this was a real test, and even though you did not secure the correct answer, we are sure that you must have spent several pleasant evenings trying to obtain your objective.

Council Gets Shock; $250 Grant Refused

"Frame that resolution," was Ald. Stocker's comment when a letter was read from the Knights of Columbus at last night's Council meeting, thanking the Council for making a grant of $250, but stating that no request had been made and that the local council did not think it proper to ask for some of the citizens' money for a celebration such as is proposed for the twenty-fifth anniversary of the local council. The Knights expressed their gratitude for the interest taken.

TWO PATIENTS IN HOSPITAL

Two of Those Isolated During February Came From Outside City.

MILK TEST HELPS.

Beyond the regular routine business, there was little to be discussed at the monthly meeting of the Board of Health which took place in the board room of the City Hall this morning at 10.00 o'clock. Alderman Ackerman, presiding, conducted the business with despatch and the entire slate was cleared within the hour.

The report of the Isolation Hospital was a very favorable one, the main points revealed therein being that on February 1, there were three patients in the hospital, two of them suffering from scarlet fever and one from smallpox. Two more scarlet fever patients were admitted during the month, though one of the fever cases and the smallpox case were from outside the city.

There were no death during the month and three of the patients were discharged, so that on March 1, only two patients remained.

The report of Dr. Young, M.O.H., was a bright mark in the meeting. He congratulated the city on its healthy state, for there are but one case of diphtheria and that a carrier case; one case of scarlet fever (which is from Buckhorn), and seven cases of chicken pox within the city limits. He also reported on the examination of milk held from March 1 to 7, which showed only three or four cases of slight sediment, a condition which has been improved upon, according to later tests. In the diphtheria case, the board decided to have the patient removed to hospital for treatment so that the family, now living apart, would be reunited.

For sometime past, residents on Conger street has been in favor of a sewer on that street near the Normal School, and in accordance with this feeling, the Board, on motion of Messrs. Reynolds and Turner, passed a resolution to be forwarded to the city council, expressing the desirability of building the sewer.

Discussion of sewer connections to certain houses not at present connected, and the action to be taken as a result; and other work of Sanitary Inspector Stapleton took place, after which the regular resolution in connection with the passing of accounts was adopted. This concluded the business of the meeting.

MANY ANSWERS ARE RECEIVED

Chamber of Commerce Questionaire Has Aroused Many Members.

Members of the Chamber of Commerce can help materially by attending to nominations and the questionaire which has been mailed them, was a statement made by Frank G. Stinson, when interviewed at the Chamber of Commerce this morning.

A full list of the membership appeared in The Examiner last evening, from which members are asked to select 32 names, representative of every line of business activity in the city. If names representative of each line are nominated, the people in that line will have an opportunity to elect their representatives, who will be conversant with the problems of that particular line of business, and consequently, better able to place facts before the executive, members and citizens.

The questionaire has already aroused many members and started them thinking. In discussing the questionaire with members of the Chamber, the secretary found that one man, a physician, when answering the question: "What do you expect Peterborough Chamber of Commerce to do for the promotion of your own line of business activity," was replying "sell the city to the citizens of Peterborough."

In replying to the question: "What in your opinion as a citizen, is the thing of first importance to be done for the good of the community as a whole," two typical answers are:

"Augment our police force by the addition of one or two speed cops."

"Request Ontario Government to complete the road from Lake Ketchecum to Gooderham, which will bring trade from the north to Peterborough, and increase tourist scope."

"Citizens will perhaps recall," said the secretary, "a promise made last fall, to the Chamber of Commerce by the Honorable W. Finlayson, to make improvements upon the Lake Ketchecum-Gooderham road during the summer of 1928. We must remind him and see that the work is started early."

The above are typical answers to the questionaire and it is expected when they are all in this week, as they accompany the nominations on Wednesday, that by their aid a useful program of work will be outlined.

DAM DYNAMITED LATEST THEORY

Los Angeles District Attorney Said To Have Evidence of This.

LOS ANGELES, March 20 (Canadian Press). — The Evening Express to-day says that the Los Angeles City authorities are carrying on their investigation of the St. Francis Dam disaster on the theory that the collapse of the big buttress was caused by dynamite. Evidence pointing to the alleged act is declared to be in the hands of District Attorney Asa Keyes.

GIVES ADDRESS ON WORK OF NAVY LEAGUE

Samuel Harris Speaker at Meeting of Men of St. Andrew's.

OFFICERS ELECTED.

Varied Musical Program Given By Members—Many Addresses.

The Navy League, its purpose and accomplishments, was the subject of a highly informative, as well as interesting, address, delivered last evening by Samuel Harris, of Toronto, before a large gathering of men in St. Andrew's Sunday School Hall. The gathering, which was also the annual meeting of the men of St. Andrew's, and at which officers were elected, took the form of a supper meeting, and in attendance was a large representation from Trinity United. Together, the two organizations enjoyed a brief but varied program of which Mr. Harris' address formed the main part.

The supper, in itself, was worth while, for the ladies had prepared a menu most appetizing. Two long tables and a third head table were decorated in keeping with the spirit of St. Patrick's Day, and round these gathered the hungry ones sharp at 6.30. There was community singing with lots of pep, two splendid solos by Vern Morphet, whose accompanist was G. F. Liddle, and two selections by the Westbye trio: Mrs. Westbye at the piano, daughter Mary, violinist, and Master Eric, cornet.

The entire program was conducted by President E. F. Reid, who made full use of the time. Following the supper he introduced those taking part on the program and also named those men who had been suggested by the nominating committee for election as officers for the coming term. The officers selected were:

President—H. L. Dickin.
1st Vice-President—Fred Dearborn.
2nd Vice-President—A. McNabb.
3rd Vice-President—M. T. Breckenridge.
Secretary—Norman Brand.
Treasurer—Dr. A. A. Cameron.

Following the main address of the evening, the retiring president expressed his appreciation of the loyalty and support accorded him by the men of St. Andrew's, and his executive as well as the ladies of the church. He bespoke a continuation of this support for the new officers.

In this connection, Mr. Dickin also spoke briefly, asking the co-operation of all the men of St. Andrew's. He desired to help the organization and hoped it would help him.

The speaker was introduced by Hon. G. N. Gordon.

Samuel Harris.

Mr. Harris prefaced his remarks with a humorous story, then turned into his main message, saying:

"I think the Navy League is one of the most misunderstood organizations in Canada. The parent body's main object before the war was to see that the British Navy was kept up to strength. Then came the war, sweeping all such work aside. In 1917 the German underseas fleet was most active, and in that year, after certain U.S. newspapers had suggested that Canada only awaited opportunity to break from the Motherland, the Navy League was organized in Montreal, with the objects of contradicting such stories, and the raising of money to assist Canada's merchant Marine."

After the war, the people of Canada, forgetting the scars of the war, responsibilities and the lessons taught, questioned the wisdom of continuing the Navy League.

"The Scars."

"One of the worst scars was the widows of the men of the merchant marine. Their husbands had gone along, daring death until it overtook them. They had helped in the winning of the war, and their loved ones deserved care." The speaker related incidents showing the splendid spirit of those men.

"Their children should not be handicapped when they come to face the battle of life, and the League has justified its existence by helping them," he declared.

"The Lessons."

"What are the lessons taught?"

"During the war it became apparent that the men of the navy and of the merchant marine were the bulwark of the nation. We are teaching boys in the Naval Cadet Corps, navigation, respect for constitutional government, and what the Union Jack represents.

"Piracy on the sea soon develops without a policeman of the sea, and, moreover, these young seamen form the nucleus of a real naval force in time of war.

"We should maintain our navy and should carry on in the work of maintaining our sea security. The link that binds us to the Motherland is the navy!

"The Empire began with the Navy—hats off to the white ensign — it stands for the British Empire and liberty!"

Vote of Thanks.

The vote of thanks to the speaker, the artists and the ladies was moved by J. W. Fraser and R. F. Downey.

FASHIONS FOR EASTER

"In the spring a young man's fancy lightly turns to thoughts of love" may be a poetic truism, but it is a stern fact that a woman's fancy in the "Printemps" of the year firmly leans towards thoughts of dress. Eastern means a great deal more to the average woman than a religious festival or the ending of the Lenten season. It means always a new hat and very often an entire new outfit.

From the many stores that cater to women's longings in the fashion realm these articles have been gleaned, and it is an interesting fact that, although in many instances the stores stock up with the same types of ready to wear models, in just as many cases they have something different.

It has been an aim in writing throughout these columns to present a different mode in each article. If you incline, for instance, toward one of the fascinating new coats with fur cuffs and scarf collars, you will find them mentioned particularly in one article, while lingerie has a special place in another, hosiery in a third, blouses in a fourth, and so on. A comprehensive estimate of what Miladi is wearing this year, may be gained from a perusal of the entire edition, with many of the stores, of course, catering to almost every feminine need.

Several of the merchants consider the lady with an outsize figure, others go in for special lines in shoes, or children's clothes, or exclusive brands of underwear. It is mighty interesting to brouse among the various shops and find out just what is being sold. Another thing—colors have different names with different wholesalers. If you happen to meet with a surprised look when you call a certain color a bright red, for example, don't be discouraged. It is exactly that. One shop will tell you it is Castilian, another christens it Goya, a third calls it flame, a fourth declares it is blood red, and a fifth proudly announces that it is the real English hunting "pink." A painter would call it vermilion and be satisfied. But, like the cat in the recitation about the circumspect walker, it is bright red, "a' the same."

Someone has asserted that sophistication is the keynote of this season's modes, but it is rather an atmosphere of ultra femininism that the study of the new styles imparts to the observer. Anyone who reads the Daily Horoscope in The Examiner may have noted that forecasts have been made throughout the winter of a decided return to the older standards of womanly sweetness, to be manifested in clothes as well as in manners. And the springtime models certainly carry out this idea. There is an atmosphere of gracious softness about many of the lovely gowns and coats that have departed from the rigidity of the tube silhouette and the straight lines of the boyish frocks of several seasons back. Uneven hemlines, materials that are tucked and folded and pleated and shirred and smocked and hemstitched, cascades and jabots and lace, embroideries, draped skirts and surpliced blouses—these all spell softness and femininity and the whimsical flux of thought and manner that is a departure from the set, stern lines we have grown accustomed to.

Flowers are everywhere! In formal and irregular patterns they group themselves over the fabrics of the moment. For party frocks, for day-time wear, for morning even, they disport themselves on chiffons and satins and cottons. They trail over the soft whiteness of a dainty voile. In little baskets and bouquets of rose and green and blue they peep from the folds of pastel-tinted lingerie. They are embroidered in pin-point on the centers or corners of handkerchiefs. They wander along the rim of a glove and masquerade in intricate designs through the meshes of lace. They bank and mass themselves over the spring hats. And they perch gaily on shoulders and on coat lapels. Say it with flowers is the answer to the spring dress problem.

The softness and flattery of fur has its place on collars, on huge cuffs and in neckpieces that incline to full-furred animals or two skin scarfs that dispense with the heads.

And then there is the cape and the scarf. The former cuts itself in half and drops gracefully from one shoulder. It divides itself into two portions and then tries to meet in the back. Or it scallops its edges and forms part of a sleeve of a coat. The scarf attaches itself to a collar in two long satin ends and winds itself about the throat in witching fancy. Or it contents itself with being a separate accessory to the tailored suit.

As for these tailored suits, they are trim and smart and stylish, but they are never severe. Above all, they are chic. They may start out with mannish lines and with mannish devices like flap pockets and revers bound with braid and coat sleeves that finish with a tiny slash and two bone buttons. But see how they end! With the fondle of fur about the wearer's throat, with a flower boutonniere, with a blouse that is made of the softest of satins and boasts a lace jabot, and with a hat that is the last word in coquettish charm.

These little hats are intriguing. Summer may bring the larger shapes but spring inclines to the hat that the French call the "cloche." If you like a hat brim that covers up the bristly ends on the back of your neck, you can have it, in the "all round" new idea, and if you like the cutaway shape at the back, you can have that too. The younger set pulls on a snug-fitting felt, nips the crown in a whimsical turn and departs with rakish nonchalance. But distinctive lines mark the models designed for their seniors. There is a fastidious smartness to the bewitching curve over one eyebrow or the shape that turns sharply up at one side and just as sharply down at the opposite. There are no rigid shapes. Like the spring styles, they are soft and flexible in material and display cleverness of idea in their adornment.

A slightly higher waistline is noticeable and skirts are certainly not getting any shorter. Sleeves, even on the most modish and luxurious frocks, show a curiously plain tendency, with a popular finish in a tiny band and a little button self-covered. The irregular hemline or the plain, all-round style may be used, with the former favored for evening wear. Tiers are shown on many of the skirts, and pleats are everywhere, in inverted and box styles, in knife and accordion formation. Not to have a pleat somewhere on the skirt is to be distinctly out of style, even if it commences hapahazardly somewhere near the belt line and then ends a few inches down. Triangular tucking, decorative and slot seaming, underlays and insets of contrasting material, are features of coats, dresses and hats alike. Even shoes show this tendency to combine more than one material and color, and gloves go in for it occasionally.

The intriguing charm of old-time fashions is curiously noticeable in some of the modern gowns, in the plaided effects and printed silks, in the little white rounded collars that end often with a floating tie, in the turned-back cuffs that fasten to the sleeve with glass or crystal buttons, in the smocking on so many of the gowns, and in the adorable "spoke" or double hemstitching or fagotting that sometimes makes the entire trimming of a frock.

But always—the mode is ultra feminine—soft, gracious, alluring in its charming, simple elegance.

Jeanette.

Full Time M.O.H. Resolution is Lost By Six-Four Vote

Aldermen Turn Down Motion Dispensing With Services of Dr. T. W. H. Young and Appointing Dr. A. W. McPherson To Care For Health of City.

"BRING IN A NEW RESOLUTION AND START OVER" MAYOR SUGGESTS TO THOSE FAVORING CHANGE

Salesman Annoyed By Council's Method of Dealing With Rut Problem After Having Demonstrations — Matter Shelved Until Fall—Much Paint Needed at City Hall.

Turning down a resolution presented by Alderman Ackerman and Greene last night, the City Council set the question of employing a full time Medical Officer of Health back almost to where it was when the matter was first opened up last fall. Mayor Denne indicated how far the matter had been put back when he answered Ald. Ackerman's query as to what steps he now proposed to take to carry out the council's previous decision to appoint a full time officer by saying, "Bring in a new resolution, and start all over."

Two weeks ago the aldermen voted nine to two in favor of a resolution asking the Minister of Health to approve the appointment of Dr. A. W. McPherson as full time M.O.H. Last night they voted six to four against a resolution framed to suit the department, to dispense with the services of Dr. T. W. H. Young, the present part time officer, and appoint Dr. McPherson in his place. Aldermen Ackerman, Greene, Macdonald, and Hamilton supported the motion, and Aldermen Phelan, Cotton, Stocker, Huffman, McIntyre, and Lowe voted against. Ald. Huffman did not want to vote, claiming to be not sufficiently informed, while Ald. McIntyre declined to vote until the yeas and nays were called for. Mayor Denne did not vote, but indicated his disapproval of the resolution. The resolution read as follows:

"That whereas in the opinion of this council of the city of Peterborough the public health interests of this city can only be served adequately by a full time medical officer of health;

"Therefore be it resolved that in order to appoint a full time medical officer of health the services of Dr. T. W. H. Young, the present part time medical officer of health, be dispensed with and the position of medical officer of health be declared vacant as from June 30, 1928; and that further, Dr. A. W. McPherson be appointed full time medical officer of health for the city of Peterborough at a salary of $4,500 per year, his duties to commence on July 1, 1928.

"This resolution is to be subject to the consent and approval of the minister of health for Ontario under the provisions of section 36, sub-section 1, of the Public Health Act.

"It is further resolved that in the event of Dr. A. W. McPherson later obtaining the department of health qualification for the position that his salary shall be increased to $5,000 per annum."

A letter from Dr. W. J. Bell, deputy minister of health, explained to the council the method to be followed in changing over to the full time medical officer of health system. It is first necessary, he said, that the council, by a two-thirds vote, ask the minister to release the part time M.O.H. It has been the practice, in such cases, for the minister to approve of release for this purpose. The council may then appoint either the present or another medical officer and submit his name to the minister for approval. A second letter intimated that when this course is followed the appointment of Dr. A. W. McPherson will be approved.

Introducing the motion, Ald. Ackerman pointed out that if it were given a two third majority, it would only be necessary at the next meeting to pass a bylaw confirming it. It was so worded, he said, that it would meet with the approval of the department. He proceeded to read it.

"I take the same stand I did before," Ald. Phelan opened the debate after a few moments of silence had followed the reading. "I'm not fully convinced that we need a full time M.O.H.. It's going to run into a lot of money. I think it should be thrown open to the medical profession of the city."

"In voting for what I did at the last meeting I admit that I did not know very much about it," confessed Ald. Cotton. "We have a Medical Officer now. Are his services not satisfactory?"

"That's a matter of opinion," replied the Mayor.

"To get rid of him we have to show cause," continued Ald. Cotton.

"Changing the system is cause," explained Ald. McIntyre.

MANY HAPPY RETURNS.

E. G. PATTERSON,
Works Manager of the Canadian General Electric Company, whose birthday this is.

SCOUT LEADER BEGINS COURSE

Arthur Paddon, of Headquarters, To Help Local Association For Week.

As a result of a request from the Peterborough Scout Association, Arthur Paddon, of the Provincial Headquarters, Toronto, is in the city this week, conducting a vestibule course in scouting. Following the close of the course, which is being put on in the Lyceum Hall the first three days of the week, he will be available to the local association as a field worker in scouting and it is the intention of the local organization to take full advantage of his visit to Peterborough.

Such was the information and spirit of the regular monthly meeting of the Scout Association, held in the Chamber of Commerce Council room at 5.15 Monday afternoon. Discussion of the vestibule course, and plans for the work to be carried on by Mr. Paddon were the chief business items of the meeting beyond the passing of usual accounts and reception of a few communications.

Example of Honesty.

The honesty of Scoutmaster Wheeler, of Galt, who, while in attendance at the Leaders' convention here, found a one dollar bill, the owner of which could not be located, is to be held up as an example to other scouts, if the plans of the local association carry through. It appears that Scoutmaster Wheeler, having enjoyed the city's hospitality, did not feel that he should carry away that which was not his so left the dollar with the local association to be used in any good work which it might choose to devote the money to.

Gerald Duffus, of Peterborough, who had lost a similar amount about that time might well have claimed it, but honestly declined since it was found it in a different part of the city. A small thing it may seem to some, yet it is a lesson in honesty which reflects great credit on those concerned.

It was suggested by Harry L. Dickin that a small shield should be obtained and the money used to help pay for a suitable inscription upon it. In keeping with the idea, Secretary Taylor's suggestion that it be given each year to the local scout performing the best "good turn" was adopted by the association.

R. M. GLOVER, Managing Director.

TUESDAY, MARCH 20, 1928.

THE CHAMBER OF COMMERCE.

The local Chamber of Commerce is to be commended upon the democratic manner in which it is seeking to secure its board of directors for the ensuing year's activities and the effort it is making to obtain the views of its members generally.

All members of the Chamber are given the privilege of nominating the directors, and furthermore, all members are being asked, by means of a questionaire, to make suggestions as to the policy and objects of the organization.

This is a duty that should not be shirked.

Obviously no sixteen citizens, acting as a board of directors and no secretary, can originate all the good ideas needed to promote the growth of the community.

The Chamber of Commerce should have the benefit of the combined views of all its members if it is to get the results it desires.

It is therefore of much importance that the questionaire that has been sent to all the members, with a letter dealing with the nominations, should be filled in and returned.

All those who are associated with the Chamber, whether as new or old members, should make their suggestions as requested.

Unless a large number do so the plan adopted will be of lessened value, whereas a one hundred per cent. response should result in something well worth while.

THE LONDON DISMISSALS.

Interest in the London case in which two teachers of the Central Collegiate Institute have been dismissed is increasing as the result of intervention by officials of the Provincial Teachers' Federal and of reports of a students' strike.

The point at issue is of importance to all communities.

It is briefly whether or not any school board has the right to dismiss teachers without giving reasons why such a course has been followed.

Those in London who are fighting on behalf of the dismissed teachers maintain that if there were logical reasons why the two men should be discharged these reasons should have been made public, and that the board is in error in dismissing them without a proper explanation.

The Teachers' Confederation naturally emphasizes that principle, and the controversy in London is regarded as of much significance in deciding just what is the right of school boards in regard to the dismissal of teachers.

It seems reasonable to think that teachers who have been discharged should be given to understand just why the axe has fallen, and that it should not be possible for dismissals to be made without reasons being given.

ALBERTA COAL.

The action of the Dominion Government in establishing a test rate of $6.75 per ton for the transportation of Alberta coal into Ontario transfers the onus of proving that much of Ontario's fuel wants can be taken care of by importations of Western fuel to the people of the two Provinces.

The arrangement provides that the test is to be continued over a period of three years, at the end of which time the Railway Board, under whose supervision the movement of Alberta coal is to be made, will be able to state what the coal rate should be.

The transportation of Alberta fuel at a reasonable rate is therefore assured for the next three years, and now the problem is to interest the Ontario consumer in Western coal and ensure a market here for the product.

The advantage of buying coal in Canada, providing work for Canadian miners and keeping at home the huge sums of money annually sent over the border for American coal, are self-evident.

But Ontario people are accustomed to burning the American fuel.

They will have to be shown that the Alberta coal is equal in quality to what they have been used to, or otherwise in normal years when there is no shortage of the imported fuel the Western product will find a scant welcome.

The matter is of great importance not only to the people of the two Provinces but of Canadians generally, and now that one great obstacle has been removed for three years anyway the campaign to put over Alberta coal should be carried forward with energy and enthusiasm.

A BRIGHT SPOT.

"A bright spot on the gold map lies in Canada," writes John Hays Hammond in Nation's Business. According to this most eminent of American engineers the bright spot is needed and is especially welcome.

Between 1874 and 1915 the world's gold output rose from $90,000,000 to $468,724,918, but it has since declined. The lowest point was touched in 1919, when the production was $319,420,100, but there has been a recovery to $398,557,400. As Mr. Hammond says, the adoption of the gold standard by most of the nations was predicated on the assumption that the gold supply would be adequate, but the commercial and fiscal needs of the world have reached proportions that were not then foreseen and there is some doubt as to whether gold production can keep pace with rising requirements. The earth's surface has been pretty well covered by explorers, and the mines of South Africa and Australia are declining. Hence the importance of the Canadian gold fields. He predicts that "the gold of the future will come forth laboriously and more slowly than in the past. It seems to me it would be safest to figure the money conditions of the future on that hypothesis."

Mr. Hammond puts the annual gold output of Canada at $35,000,000. These figures are two years old. The production in Ontario alone in 1927 was $33,000,000 and will be greatly exceeded this year. New gold mines in British Columbia are materially adding to the supply. Next year Canada will probably surpass the United States, where the mines are petering out. Canada is indeed the bright spot on the world's gold map.—London Advertiser.

POLICING THE OUTSKIRTS.

A general feeling of uneasiness and alarm, in some instances almost of terror, has developed in the south end of the city during the last month as a result of the reports of attacks upon women after dark and to some extent by the calls of a begging tramp. Reference to this state of apprehension has been deferred until now in the hope that the reported causes were only isolated cases and that nothing more would be heard about them. But they have persisted and have been repeated at distant parts of the south end until it is realized that silence is no longer helpful.

Naturally this feeling of alarm is to a very considerable extent exaggerated by the frightened fancies of the imagination, especially among women and girls; but even if these conditions were not true there remains the frequent annoyance of prowling automobiles that seem to be starting out this year with a boldness that demands prompt and effective police action.

But these other conditions are true, and at present are the chief cause of disquietude, to use a mild word which certainly inadequately describes the panicky fears of many girls and women who have to be abroad in the south end after dark. Police officers verify the reports that have been coming from different sections of the south end, and this state of affairs must cause many ratepayers to realize that a feeling of insecurity on the streets at reasonable hours of the evening is an economy that simply costs too much.

It recommends itself to no one, and least of all to the fathers of families, husbands and brothers who have a right to enquire of the city authorities whether they have given the question of police protection all the careful consideration it deserves.

The citizens are not blaming the police. They are aware of several very simple facts. One of them is, that a few years ago the residents of the south end used to see a policeman on his rounds and met by a patrol sergeant, who was nevertheless a constable also. Now they never see a policeman unless he is called out or sent out upon some specific duty. The people know that at that time Chief Newhall had sixteen men, that today he has thirteen men, and they also know that this reduction of the force was necessitated by the City Council's refusal to grant Chief Newhall the requisition which he considered necessary for the proper policing of the city. He undertook to provide two additional nightmen during the milder seasons at a total expense of $1,100, and right now the people of the south end of the city are in a mood to demand of the Council that they reconsider their action.

Residents of the south end are convinced that the City Council made a mistake in depriving Chief Newhall of the means of giving the outlying sections of the city the police protection to which they are entitled. But the Council does not assume any direct responsibility to the residents of the south end, who by the way have no resident representative in the Council. Blaming the Council is not going to produce the two or three men Chief Newhall says he needs.

The fact is that mothers and daughters and other members of families in the south end are actually worrying, and have been uneasy for weeks.

No! blaming the Council will get nowhere, but the ratepayers of the south end have a right, if they feel that protection is needed, to demand of the Council that action which will restore the feeling of security which existed several years ago when Chief Newhall had men enough to operate an extensive system of patrols and calls.

If the people decline to make that demand of the men they helped to elect they thereby signify to the Council that they are satisfied with a police force that is apparently too small to provide reasonable protection for the mothers and daughters of the south end who are on the streets at respectable hours of the night.

In that case the responsibility rests upon the ratepayers themselves. But they have telephones and they can easily make their wishes known to members of the Council. If they want police protection in the south ward now is the time to emphasize its need and to ask that Chief Newhall be helped and not hindered in carrying out what he believes to be his duty.

THE POOR MOTORIST.

Although changes are necessary from time to time in order to meet changing conditions as faults are revealed, it may be that our laws governing the operation of motor vehicles are becoming so complicated that the general public will soon be unable to remember them at all.

This week, for instance, the Hon. George S. Henry, Minister of Highways, introduced a number of amendments to the Act, including one which will give cities the power to pass bylaws requiring every passenger automobile to be equipped with a locking device, which must be locked every time a car is left unattended. The purpose of the measure, of course, is to reduce the number of thefts. It does seem reasonable, however, that no one should be more interested than a motor owner in preventing his car from being stolen. If he is careless and his car is stolen, why should the Department of Highways worry? If he is dishonest and arranges to have his car "stolen" for the purpose of collecting the insurance, then a change in the law will not stop him anyway.

Practically every motor car now is equipped with a locking device. Experienced motor thieves, however, have developed an expert system of picking locks and moving cars away. Nevertheless, a good lock is a great safeguard. It seems to be going rather too far, however, to fine a man because, for hurry or other reasons, he forgets to snap the lock on his car while he steps into an office or store for five or ten minutes. What with "No Parking" signs everywhere he turns, stop-and-go lights, one-way streets, no left-turns and a hundred and one other restrictions—most of them absolutely necessary—the poor motorist has a pretty difficult time these days.—Border Cities Star.

EDITORIAL NOTES AND COMMENT.

When Viljalmur Staffanson says that people can live on an all-meat diet, we presume he meant that millionaires can.

The Ontario House will be prorogued before Easter, according to present predictions. The end could have been hastened had the Budget debate not been needlessly spun out.

Tomorrow marks the official opening of spring, and most of us are hoping that nothing will interfere with the ceremonies.

The song birds may be slightly delayed, but the seed catalogues have all come through on scheduled time.

The Malta affair will cause many people to think that a mistake was not made in having jazz bands considered at the disarmament conference.

The argument as to what wave lengths are to be assigned the various Toronto broadcasting stations does not interest local listeners-in so long as the new Cheerio station is assured of ample time on the air. It can be "got" when general reception is a blank.

CATTLE, GRAIN AND PRODUCE

TORONTO LIVESTOCK

TORONTO, March 20. — Trade opened slow, with buyers bidding 20c to 25c lower than last week's closing prices. The light run offset the effort to lower the market, and after an hour or so of haggling cattle began to move over the scale at unchanged prices. The only change was in calves, which were again lower, with only an odd calf or so fetching top price at $14.00. Hogs were steady.

Receipts.

Union Stock Yards — Receipts: 2,969 cattle, 403 calves, 859 hogs, 263 sheep and lambs.

Heavy steers, choice	$10.50 to $11.00

ENSEMBLE DRESS IS SEASON'S BEST

Dress, Coat and Hat To Match Offered By Miss Williams.

"Ensemble," so the dictionaries declare, means the whole. It is a popular word this season, and the idea is also a very popular one. To have the frock match the coat and the hat match the two, is an ideal that most women strive for.

To make this as easy as possible is the aim of Miss Alice Williams, and the garments displayed in her showrooms in the Bank of Toronto Building carry out the undertaking quite satisfactorily. For the beautiful gowns that are exhibited, there seems always a coat to correspond, even though the outfit may not be of the two or three-piece order. For sports and dress wear, for formal and informal occasions, there is plenty to choose from on these hangers.

The wool crepes and wool georgettes that have appeared this year make some pretty things. Lucerne blue in the latter and a shade called banana that is just like its fruit namesake in the former, are developed in two models, while an extremely smart ensemble in crepe Elizabeth is of cocoa and beige in a two-color combination. It has a cape over each shoulder and is worked with eire eyelet embroidery.

Mountain green, that lovely bluish green that is also called blue spruce and is just like the misty hue of a blue spruce tree, makes an entire dress of heavy silk crepe that has a surplice closing to the front and draped panels to the skirt, with self-dyed Chantilly lace as trimming.

A stunning model in printed chiffon uses black Chantilly lace in its adornment, with a hube cabachon of shirred self material at the belt line, from which falls a slender jabot of the material.

Another outstanding model is in navy georgette, with floating panels and a top embroidered all over in white "shoestring" effect in a Japanese design. The blouse is made in bolero or Zouave effect.

A fascinating sports suit of rose beige embroidery on a green ground has a striped jersey top and skirt of rose beige crepe.

A novelty in ornamentation is shown in the chenille flowers of brown and yellow on a frock of peach beige silk crepe, while a three-piece model in navy georgette has a sleeved gown and sleeveless jacket with white top crossed by diagonal lines of spoke faggoting.

Jerseys and peau de peche, the latter a lovely material with the soft, lustrous finish, are liked for sports wear this season. An exquisite model in the peau de peche is developed in faint spruce green.

Although summer is still in the offing, it is impossible to neglect mentioning the adorable frocks in cotton voiles, wonderful hand-made things of simple yet effective fashioning, that are on view here. They come in pastel tints of rose, green, yellow and blue, but the whites are superb. They are made with softly gathered skirts to a natural waistline, rounded necklines and short little sleeves, stopping well above the elbow. Their charm is in their handiwork, in the lines of "spoke" hemstitching that weave throughout their lenght and breadth, and in the dainty hand embroideries in colors that adorn them. One fascinating model has pinpoint embroidery of tiny garlands of rosebuds, and another is in maize, with piping of blue, and embroidered blossoms in rose, gold, green and blue.

The spring coats in Miss Williams' stock are very interesting, also shown in sports and dress types. One of the prettiest is a lettuce green chiffon broadcloth with collar of softly-dyed brown summer ermine. Beige fox matches exactly the bananas shade of a featherweight tweed coat, while a novelty in a cape coat is made of soft, suede-finish Velleraine in rose beige shade, with fitch cuffs.

BELLEGHEM STORE NOW 50 YEARS OLD

High Grade Furniture Shown in Keeping With Firm's Reputation.

Fifty years ago at 188 Hunter street west D. Belleghem established his furniture and household furnishings store, and ever since that time this firm has been supplying many of the needs of Peterborough and surrounding district in the furniture line.

D. Belleghem and Sons to-day have on exhibit in their fine three-storey store a most up-to-date line of house and office furnishings of which 98 per cent is made in Canada and 85 per cent comes from factories in Ontario.

Two lines of furniture are carried, the medium and the high grade, in mahogany, walnut and native woods. A splendid array of chesterfield suites in latest design make up the greater part of one floor. Beautiful sitting room, parlor and sun porch suites are to be had, any of which would add a refined touch to the modern home.

The handy kitchen cabinet that saves the housewife hundreds of steps daily is to be found in large assortment. any small tables, chairs, footstools and other articles of furniture that put on the finishing touches to the up-to-date home and make them a little more comfortable are shown in every style and design. Bedroom suites, mattresses and springs complete a splendid array of furniture and household furnishings.

BROWN SHADES OF SHOES LEAD

Honey Beige For Ladies and Tan For Men This Spring.

The range of spring styles at Smith's Shoe store is calculated to suit the tastes of all, whether the demand be for ladies' dress shoes, sport shoes, or men's business or dress footwear.

For street wear, ladies are shown the new nut brown and stroller brown calf shoes in o[illegible]tie styles with cuban leather heels, also one-strap shoes with cuban and medium spike heels. Patent leathers and the light colors, especially honey beige (a medium shade of blonde) predominate.

For afternoon wear Smith's store has stocked patent leather oxford ties [illegible]r sh[illegible] of kid with covered heels of the same leather in spike and cuban styles.

For men, tan and black calf oxfords with wide toes, are shown, particularly for young men. Large perforations and fancy stitchings are noticeable. Tan will be the better sellers.

The more conservative dresser will probably choose the plainer sho with medium rather than wide toe A few kid shoes in light br[illegible] an black, made on the straight "London last are shown, and the combinatio fitting blucher cut is, as usual, likel to be a good choice.

In other words, the slogan of thi store is "Snappy shoes for young men and pretty shoes for women."

M. FINE, 427 George St.

{A FEW DOORS NORTH OF EXAMINER}

PETERBOROUGH, ONT.

STORE CLOSED

As our lease has expired, we are now preparing for a complete closing out of this $25,000.00 stock of Ladies' Ready-to-Wear, Millinery, Men's Wear, House Furnishings, Bedding, Etc.

Everything will be sold! Only the bare walls will be left. Watch for Double-Page Add. in this Paper tomorrow, announcing day of opening — Also Prices! Stop your buying NOW— and wait for this Great Event to Open!

INDIGESTION Troubled Him For Two Years

Mr. H. C. Harvey, Novar, Ont., writes:—"I have been troubled with indigestion for the last two years.

"I have taken everything I have seen advertised, but have never had any of them do me so much good as

BURDOCK BLOOD BITTERS

"I have taken six bottles and haven't had an attack since. It is the finest medicine you can take for the blood."

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

NEW SPIDERWEB MATERIAL IS FEATURED AT FAIR STORE

Buttons Much Used as Trimming For This Spring's Frocks.

KNIFE PLEATED LACE.

Scarfs and Hats To Match Shown Here—Flowers Used as Trimming.

Although the casual observer might think that spring styles would bring a similarity in examples of the modes, in different stores where merchandise is displayed, it is a peculiar fact that each store has something new to offer the shopper. This is decidedly the case at the drygoods store of Robert Fair and Company, where many new angles are encountered, both in fabrics and in hats and ready-to-wear garments for ladies.

The spiderweb material that resembles a wool georgette is displayed here in dresses of an interesting type that have little gilt buttons and the gilt animal and bird ornaments that are so popular just now and come in glistening small dogs and parrots that adorn the fronts of these gowns. They are made with the new "spoke" faggoting or hemstitching, and come in sand, rose beige, and green.

Gold silk embroidery appears on several of the models in motifs applied to the blouses. A different treatment of lace is shown in the trimming of a matching shade of lace to a georgette gown that has a great deal of knife-pleating to its makeup. The lace is also knife-pleated, another new note.

An idea that is quite novel is sequin trimming in shadow effect. The sequins are embroidered thickly beneath the georgette that makes the gown and appear shining through it. A black gown has this sequin trimming, also Swiss cutwork embroidery and lace.

Wide folds of the material making an entire skirt appear on a black georgette that has a flesh colored vestee, while the new self-covered buttons trim profusely the knife-pleated length of a coat dress in seafoam green, made over a biege slip.

The rosewood shade of brown that is called oak heart is used in a canton crepe costume with circular skirt flounces, while black and silver banding in embroidery trims the vestee of another black gown.

The hats here are very pretty. The idea that uses the same material for scarf and hat or hat trimming is demonstrated in a Paillison straw like crochet) in black, bound with black satin with a band of figured georgette just like the scaf that goes with it. Another scarf is exactly like a small hat of figured silk stitched elaborately around the crown.

A Balybuntle straw (a material that resembles Panama straw and is very flexible and soft) has felt bands as trimming while the vogue for flowers is exhibited in several shapes made of hair braid, softly transparent, with tiny veils as finishes. One especially striking hat that has a taffeta crown and hair brim is faced with pink with a tiny veil egded with cut steel beads.

Cire ribbon with its glistening surface makes the unique loop trimming that bands a hat of black hair braid, in matron's style.

A specialty here is a full line of children's hats.

Coats of all types are on view, in dress coats of charmeens and swansdown and also in tweeds and kashas, and there are suits in tailored effects. The negligees are lovely, one coolie coat having a striking adornment in stencilled design to the black silk knit ground with its rose bandings. Pajamas suits match kimonas in colors and outlines.

Besides the linens which are always carried in full stock and are a specialty at Fair's store, are new fabrics of odd weaves. There are figured crepes and silk foulards, rayon silks, all-wool plaids, "Japshan," a pure silk material in plain and plaid patterns, silk and jersey mixtures, and a silk and wool weave called "Sheen." One of the figured georgettes here has a variation to the floral design in an inclusion with it of slender fronds of maidenhair fern.

All the dainty accessories that mean so much to Milady's wardrobe may also be had at the Fair store. There are full lines in the latest models, in silk lingerie, in hose in all the varying shades used for spring-time wear, in gloves and scarfs of bright and lustrous materials, and in handkerchiefs. The latter show variations this season, in a large variety of pure whites as well as colored linens, the color being noticed in the corner and central designs of floral and basket embroideries in silks.

DANCE FROCK MADE OF SOLID SEQUINS

Elegant Simplicity Marks Dress Shown By Jeannette Style Store.

A dance frock that is made of solid sequins, in black, without a touch of relieving color, depending for its elegrant simplicity on its glistening fabrics, is one of the interesting models in clothes at Jeannette's Style Store at 390 George Street. Evening clothes are used at any time in spring as at other seasons, and this is a stunning gown.

A dress in black satin crepe with a handkerchief collar in printed silk, belt of the silk and panels of it on the skirt, is another good model, while a cape effect at the side of a collar that ends with a long scarf is noticed on a dress of rose beige, embroidered with motifs of rose, sand and gold.

A navy and sand combination, also embroidered, shows a three-quarter handkerchief collar and a black georgette with top finely tucked in horizontal lines has a triple trimming of soutache braid, silk fringe and narrow rose velvet ribbons.

A V neck on a satin-faced crepe is piped with reverse bands of the same material, the same reverse side trimming the skirt. A monkeyskin georgette shows the vogue for lace in its inset ornaments.

The coats are interesting in their varying treatment. A navy tricotine uses red fox cuffs and tabs to its long scarf collar and the popular cape idea is manifested in a tweed coat with half cape over one shoulder and side tucking. Amber and red fox and natural oppossum trim other garments for outdoor wear, while tailored suits and coats have a place on the hangers, with novelty tweeds and kashas. One of the novelty tweeds has smart tabs on the cuffs and over the belt.

Two and three-piece suits in jersey materials are shown, also kashas in plain and ensemble effects.

One lovely suit dress is developed in rosewood georgette with eyelet work embroidery as trimming.

The small hats are modish examples of spring styles. Fuchsia, a soft violet tone, makes a combination hat of felt and straw, with the self-colored velvet flowers that are so popular this year. Sports and dress models are also featured.

LAWN FURNITURE MOST NOTICEABLE

Willow and Fibre Chairs For Outdoors Featured at Comstock's.

Who has not a penchant for the nicer things in furniture? And who would not delight in a visit to Comstock's Furniture House? Try it and see.

For the living-room, the bedroom, the parlor, the verandah, or the lawn, there is a stock of furnishings which must be seen to be appreciated. Particularly noticeable is the verandah and lawn furniture—settees, rockers, and armchairs — of fibre and willow, in shades of rose and grey. With them, one classes footstools and tables made of the same material, some in combination color designs with grey and blue quite popular, while the ever-useful steel cot and verandah swing are not to be overlooked. Folding tables and chairs are shown, too. Their coverings are in accord with color schemes carried out on the other out-of-dors furniture.

In bedroom furniture there is a leaning toward bird's-eye maple in pastel green, various shades of grey, royal blue, black, natural, or antique moire, as well as high-lighted walnut. Louis XV. and Elizabethan designs predominate.

As in the bedroom furniture, dining-room chairs, tables, and cabinets are mostly in period designs, figured woods and chippendale, being immensely popular. Thus comes into its own the hand carving craftsmanship, for the carving and cabinet work on these is done with the same fine care as is a portrait.

The living-room of to-day lends itself to change, small furniture being greatly in vogue at present. Beauty rather than comfort seems to be the keynote. Occasional tables in fine, figured woods and carvings are used extensively while the skilful placing of mirrors, at present quite permissible, completes the decorating of walls.

Turning to the more staple lines, one notes that even the dignified chesterfield suites have taken on new appearances through the employment of wraps and tapestries rather than the once popular mohair coverings.

READ THE WANT ADS.

NEW TAILORED COAT NAMED FOR PRINCE

Popular Garment of Present Season Shown By Loftus' Ladies Wear.

H.R.H. the Prince of Wales has a special place in the hearts of many of his subjects this year, not, perhaps by reason of his popularity so much as the favor with which the tailored coat that is named after him has come to be regarded by feminine devotees of fashion. Samples of these snappy garments have a pleace in the stock of up-to-date clothes shown at the Loftus' Ladies' Wear store at 366 George street. They are particularly smart with satin revers and pipings and little narrow band cuffs.

Charmeens, broadcloths and tricotines, with fur collars and strappings and inlays of black satin, are also good, along with novelty tweeds, and there is a full line of junior coats in styles modelled on those of their elders.

In the dress section; embroidered and fringed trimmings are much in evidence, also the flat applique flowers that are so effective when outlined in gold stitching. These applied flowers and fringe appear in conjunction on one gown of navy silk crepe. Silk braiding in intricate design ornaments a black and red frock whose draped bodice outlines have long tassels as finishes.

The knife pleating that is so popular is demonstrated in red crepe on a navy gown with tight-fitting bodies, while a rose blonde flat crepe shows flares of lace in self tones. Fine tucking makes the trimming of an ensemble with long coat, in green of almond hue, and a lighter "April-een" green has box pleats on the front of the skirt and gold braiding as adornment. Gold threading is pretty on a red gown with cape collar and lace yoke. Printed silk is used for variation on a navy georgette with panelled skirt and scarf collar.

The sports suits are developed mainly in jerseys and tweeds. An ensemble outfit has a natural kasha skirt and top of marron glace brown, the jacket, cuffs and pocket stitched stiffly with brown silk. A black edging to pointed collar and cuffs appears on another brown jersey ensemble. There are also many differing hues in jerseys, in rose, blue and the smartness of black and white.

Red jersey is used for the blouse portion of a three-piece suit of imported tweed.

In the Loftus' store are pretty small hats in various styles, shapes,

HATS ARE SMALL; MATERIALS VARIED

Wide Range of Colors Shown in Mrs. Wilsons Stock.

The cloche, the cap, the skull. These make the shapes of spring hats. The eyebrow curve, the uneven brim line, or the brimless model. These are the turns that the front adopts. Felt and corded silk, felt and straw, hair and flowers, daggers and buckles of brilliants, embroideries, soft feather mounts. These are the ornaments. Blues and browns, sand and beige, red and pink, black and white. These are the colors.

Variations of all of them may be found at the millinery parlors of Mrs. J. Wilson, on George Street.

In three tones of sand and orange and brown are the motifs that are appliqued to crown of a hat of petaline straw, stitched with gold. The same gold threading outlines the felt swirls that adorn a rose felt shape. A very trim model is in soft grey with applied ornaments of brown velvet and sand silk.

Cellophane, which is a rather coarsely woven shiny black straw, composes a small hat which is made with its left side brim turned down and the right turned up. It has a facing of black silk, a tiny veil and crossed lines on the crown of sand and red straw.

The same idea of slashing the brim in jaunty and irregular curves appears on a little hat of navy grograin silk that has a wide band showing yellow, red and blue stitching.

An odd treatment of sand tulle, embroidered with gold thread, and brown straw in alternate narrow bands is shown on another small hat with little veil over the eyes, while diamond-shaped ornaments of black straw trim a hat of black silk. A tab of the straw extends down over the right ear.

A hat of figured silk has a narrow sand-colored band of cire ribbon. Black lace makes the crown and covers the ribbon band of another sand-colored model, while one of the trim glycerined feather mounts ornaments a companion shape.

Hats made entirely or partially of little velvet flowers are very lovely, one exquisite thing being developed in a violet hue. Green velvet flowers alternated with a band of greenish gilt leaves form the top of a second shape.

A pretty thing in Pekin blue has a perky look. It is a small, close-fitting hat of brocaded ribbon with a huge circle of the ribbon perched over the right ear, is edged with straw in self shade and finished with a loose bow end.

Mrs. Wilson has a complete stock of hats for all occasions, for dress and formal occasions, for sports and business and for casual wear.

An intriguing sample is a grey straw with blue alternate bands uses a tiny brim edging of blue grosgrain ribbon and a band of blue and silver. A mohair straw in black that has a stunning upward tilt to the front and a V shap to the back is trimmed with a brilliant buckle. Gilt straw outlines the circles of blue and green and gold georgette that ornament the side crown of a sand crochet shape.

A pale green straw in one of the leading shades for spring shows a felt brim and side effect and is ornamented with swirls of green, brown, and rose corded silk.

TWO BIRTHDAYS HONORED AT PARTY

Final Social of Winter Series Held at Meyersburg Church.

NORHAM, March 20.—The last of the winter's series of social evenings was held under the auspices of the Myersburg Ladies' Aid in the church hall on Friday evening. The hall was artistically decorated in green and white and blooming plants in honor of St. Patrick.

Rev. D. R. Clare was chairman and the following program was given: Violin solo, Mr. Dillworth; reading, "Habitant" by Owen Finlay; monologue, "Aunt Nan Goes Travelling", Miss Pomeroy; instrumental duet, Mr. Dillworth, violin and Oscar Blakely, piano; reading, Mrs. Jones; duet, Mr. Blakely and Mr. Dillworth. Several games followed, after which Mrs. A. Bertrand the worthy president of the Ladies' Aid was called to the platform and presented with a beautiful flowering azalea in honor of her birthday. Mrs. Bertrand was taken completely by surprise but thanked the ladies and spoke of the spirit of co-operation in all work of the society during the many years she had been president.

During the lunch hour, a large two-layer birthday cake, with many candles was placed in front of Mrs. Bertrand, as the gift of Mrs. Jones. It was discovered that Mr. Goucher was also celebrating a birthday, so he shared the place of honor at the head table with Mrs. Bertrand.

Community singing and several violin selections by Mrs. Goucher brought the evening to a close.

BIRD ORNAMENTS.

A close-fitting beige ballibunti hat with deep crown has five tiny dark brown birds atop its turned-up narrow brim.

PLAY PRESENTED AT PETHERICK'S

L. O. B. A. Puts On Good Program — League Studies Citizenship.

PETHERICK'S CORNERS, March 20.—L.O.B.A. 139, held a St. Patrick's concert in the Sentinel Hall on Friday evening. A three act comedy, "Patsy", which centred around the innocent pranks of a little Irish servant girl was the main item of the program. The part of Patsy was exceptionally well taken by Gladys Simpson. The first and second acts were filled with laughs as Patsy made trouble for the bride-to-be, played by Mrs. H. C. Simpson, and her aunt, Mrs. John Simpson. Mr. Ernest Irwin and Miss Alma Simpson as a business girl and a friend of the bride, respectively, were other leading characters. Others in the play were Mrs. Southworth, Mrs. Reid, Miss G. McKenzie, Miss F. Dunk and Messrs. George Donald, Wilfred Spencer, and Ernest Irwin. Little Isabel Irwin as flower girl took part in the act which consisted of a program by members of the cast. The Spencer orchestra assisted by Ernest Irwin supplied music during the evening. The proceeds amounted to over $23.00.

League Services.

George Brunton, citizenship convenor, had charge of the League service, with the Whippet group in the lead. Mr. Brunton presented a well balanced and instructive program being the first to score perfect points in this way, which consisted of a reading by Miss Nellie Bennett and a vocal duet by Misses Evelyn Barnum and Gladys Petherick. The topic for the evening was "The real value of church membership." A contest on the Kings and Queens of the Bible was won by the Whippet group. Miss Nellie Bennett and Earl Fairman were elected as debating team.

Use ROYAL YEAST CAKES for Perfect Home made Bread

NOTE: If you take YEAST for your HEALTH, use Royal Yeast Cakes. Write for free booklet, "ROYAL YEAST FOR BETTER HEALTH".

E. W. GILLETT CO. LTD. TORONTO, CAN.

Auction sales have been few and far between this year, so that a large number attended the sale of farm stock and implements held by Andrew Milne, with C. W. Clancy as auctioneer. Horses sold from $105 to $120, and hens from 31 cents to $1.33. The fine herd of dairy cattle was the chief attraction, selling from $84 up to $109, with heifers from $65 to $73. The holstein bull, two and a half years old, brought $100, while calves sold from $24 to $37. Oats brought 91 cents a bushel and were perhaps the most above market value of anything sold.

WAKE UP WITH COLD GONE, SAY DOCTORS

Advise Hospital Tested Method That Brings Relief Overnight Is Ideal for Home Use!

Head colds, coughs and chest colds may now be ended almost overnight by an economical home method approved by doctors at the hospital. And druggists say that hundreds of Peterborough people, like Mrs. Arthur Price, have been surprised to find how quickly it brings results, even in severe cases where all other remedies used had failed.

Fearing pneumonia as her cold got worse, Mrs. Price called the doctor for advice. Her head and chest were congested; she felt "feverish" and the inflammation was spreading down into her bronchial tubes. The doctors then recommended Ayer's Cherry Pectoral—a concentrated mixture of ingredients, which hospitals have found to be the quickest, safest, and surest to end colds.

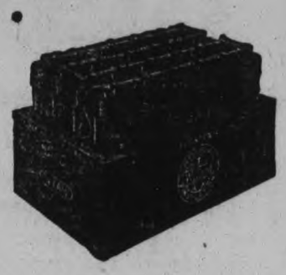
With the first pleasant spoonful she felt the comforting, healing warmth—from her nose passages deep down into her chest. It eased her cough almost instantly. In a few hours her feverish "grippy" feeling began to disappear. By morning her head had cleared up, and in a day or so all traces of the cold were gone.

Note: Other cases reported daily—all certified by the physicians who treated each case.

Doctors find that this hospital medicine does far more than stop coughing instantly. It is absorbed by the whole system. This quickly checks phlegm, heals irritation and drives out the cold from the nose passages, throat and chest.

Just a few pleasant spoonfuls of Cherry Pectoral now and you'll feel like a different person tomorrow. Hospital directions with each bottle

AYER'S Cherry Pectoral for COLDS and COUGHS



Before You Buy NEW Parts

It's easy to run up a big hill for Spring Overhauling. Check up on the battery first. You may not need those new distributor points and spark plugs after all. Your trouble may be a corroded terminal or a loose connection that we could fix in a jiffy. Have us look after the "starts" before you buy new "parts."

A NEW SUITE

is Guaranteed in writing if moths do any damage to a Sani-Bilt

Sani-Bilt Combines Beauty and Sound Construction with Absolute Mothproof Protection

A CHESTERFIELD suite means an investment deserving real care. Nowadays, there is no need to take any chances of losing your money because of moths.

Choose Sani-Bilt—the thoroughly mothproof living room furniture.

Beware of "surface treatments." Pay no attention to mothproof "claims and promises." Remember they will mean nothing, absolutely nothing, if moths damage your suite.

There is only one brand of upholstered living room furniture which is protected from moths by a replacement contract—Sani-Bilt! Only Sani-Bilt carries a signed guarantee contract to replace the suite if it is damaged by moths. And it is good for all time.

A wide range of prices places Sani-Bilt furniture within reach of everybody. But never assume it is genuine Sani-Bilt until you see the Sani-Bilt Guarantee Tag attached.

Home and Hospitality

By Marjorie Howe Dixon

Sometimes one finds a happy association of ideas, that bring pictures of delight to one's mind. Lilacs, spring with all its fairness; Normandy, white clouds shimmering over a clear blue sky, and apple trees in bloom. Against all this set a quaint old home of whitewashed brick and stone, built about a fat round tower, with a peaked cap on it like the little caps they used for snuffing candles. Does this not appeal to your imagination? Could this not very well be the "home of your dreams' 'that the enthusiastic real estate salesman is so fond of talking about?

Perhaps among the homes of the French chateau type you will find your desire. So often they succeed in combining a genuine hominess of feeling with that other crowning grace, hospitality. Doubtless it is their informality that aids in completing this expression.

Harmony in Architecture and Furnishings.

The furnishings of a room to fit that type of house in Gascony, let us say, or Lorraine or Provence, are a pleasant combination of rural simplicity of treatment and the French love of ornament. A bedroom, for instance, would arrive at a halfway point between the austerity of the Spanish and the elaborate sophistication of the periods of the Louis.

Blue and white are the sprightly little patterns that climb up and down the short drapes at the deep set windows. A low bedstead with no footboard wears a white woven spread of linen, the squares of which are of alternate open weave and closed. Sweeping down from a point high on the wall to the floor, either side the bed is a long graceful drape, also blue and white.

Various small pieces of furniture, not one of which is large and overbearing, are of beechwood. This wood is most interesting to examine. It takes a dull, glossy polish, and in color is like walnut yet lighter, and at that, is not the red tan of maple. Carved drawer pulls are worthy of notice. What a restful guest room this would make.

At the same time the French rural home is receiving merited attention, the English country home with its endearing qualities of fitting into the landscape, and inviting the lonely wayfarer to stop a while, has won our love and affection. The finished settled characteristic would take a while to develop, but it could be done in time. Flagged walks, old poplars creepers over the brick-and-half-timber construction, these are not all acquired in a year's time.

Once having built such a home and having shared it with one's friends, one could surely watch and work to "age" it, as the seasons roll by.

A Charming Interior.

The interior would need affectionate study and exercise of taste to mellow it and to round out the charm one dreams of. A dining-room in such a home might be handsomely paneled in oak. Failing that, patterned paper of dull orange that makes you think of batik could be used above the chair rail.

A carved dining set would fit in. On the high buffet with its doors carved in linen fold paneling, you would want to place your collection of pewter plates. Copper, too, might be used here effectively.

To set the table embroidered linen mats could be placed under serving plates of burnt orange on the bare table. Goblets of amber glass or pewter mugs would add to the ensemble. The color of the serving plates would repeat that of the curtains.

A fireplace with a fine Tudor arch over it at one end of the room would share the hospitable welcome extended to the guest or homecomer, and here a copper coal scuttle must needs reside, to replenish the fire so that he may be warmed at the little grate. A wide winged chair would await him surely. From this comfort he could look about at the portraits of his distinguished ancestors. It has always been a secret wonder with us why they should be called distinguished at all, and what the artist thought about when he had to paint them.

A Home of Colonial Inspiration.

If it should happen that your particular "dream home" that will best express your ideal of a hospitable house should be Colonial or even Georgian, you will find the details, outside and in, a most fascinating study. Is there not an entire literature devoted to Colonial hardware—locks and latches, hinges and hasps? Besides there are all the extra things like lanterns and andirons and candle molds and Betty lamps to read about. What is a Betty lamp? Your great-grandmother used it to hang on the back of her chair to bring the light close for her reading or sewing.

A Colonial living-room in its furnishings might very well carry a distinct sea tang. Why not? Many a skipper returned to New England to build himself a fine home, overlooking the ocean if possible, and so it he quite naturally brought the accumulated treasures of his travels.

A Modern Art Treatment.

Now try to arrange a few art treasures on your cupboard shelves. The answer is, try it, and find out how very few things will fit. Some of the new Austrian grotesques, a Chinese elephant or two — a bronze figure in severely rhythmic lines, a modern clock, a brass bowl perhaps —one or two pieces of colored glass, these may do.

The coffee table will not be quite so difficult, for a smart coffee service, an ash tray and a cigarette case will take care of it. The dressing-case will take more thought. Perchance there will be drapes over the mirror. They must express the stern folds of the bronze figures you will use elsewhere. By special effort you may finde a dresser set in the modern style — very beautiful mirror backs and brushes have been designed, by the craftsmen.

The general effect of your modern art room should be a colorful combination of masses of geometric shapes, imposed one upon another, and with intervals of rhythm and odd accents in your objects of art. Through it all should be felt a strong consciousness of fine crafts—the finished work of the woodworker, the artistry of the silversmith and the glassmaker.

It may be that your particular expression of home and hospitality may include not one of the ideas herein discussed. That shouldn't disturb us, should it? Just so it is home, in the springtime, and just so you share it with some one, some friend—then we agree pretty well, do we not?

SLEEVES' IMPO`TANCE.

Negligees for spring focus on unusual sleeve treatments. Gold lace medieval sleeves hang gracefully from a red and gold brocaded negligee.

PYJAMA BERTHA.

The old-time feminine bertha is the inspiration for a deep cape collar on a tailored pyjama suit of black with tiny figures in red.

MEDIUM HEELS FOR LADIES' WEAR

Two-Tone Shoes Share Popularity With Plain White for Outings.

Milady will again choose shoes of light parchment shades with medium high heel, to complete her spring wardrobe, if a visit to Howden's shoe store may be taken as a criterion. The above-named firm has stocked this type of shoe and expects it to be greatly in demand.

For the out-of-doors, there is no great change from last season, though the trend seems to be toward the common rubber sole, rather than the thicker crepe rubber. Two-tone uppers or novelty trims and ornamentally protected edges will vie with the plain white shoe which is expected to enjoy a much wider popular choice than for the past several seasons. Of course, it will be used especially for the very warmest days.

For business wear, men are favoring the tan shoe with wide or medium toe, and in accordance with this trend, the Howden store has stocked a splendid line of Slater shoes which combine style with quality to a marked degree. For sport wear, the more standard lines are expected to out-sell "fad" offerings.

YELLOW-BROWN.

New on the beach this summer will be the yellow-brown combination. An old-gold jersey bathing ensemble has inserts of brown satin and a satin cape.

FANCY COATS.

The fancy coat, or embroidered kasha or other lightweight woollens, will have a big vogue this year, the styles indicate. A straight-line rose-beige one, embroidered in coin dots in tans rose, and gold, is very decorative.

MULTITONE STRIPES.

Fine multitone stripings, in every pastel shade, distinguish the jumper of a sports suit of pleated orchid skirt, 'kerchief cape and beret.

HAND-WORKED WOOL.

Spring coats will see handwork desert silk for wool. Hand-faggoting, hemstitching, and openworked polka dots enrich colorful kashas and other light woollens. A lavender kasha has its faggoting in geometric design.

Lock the door.....on the world's most common Enemy of Health

MILLIONS of people the world over suffer from sickness directly traceable to constipation. Many more millions fail to enjoy bounding health because the elimination of waste from their systems is less than perfect.

Nature provided food roughage to prevent constipation. Man has taken food roughage out of his diet. Put it back in *yours* by eating Post's Bran Flakes every day. Delicious Post's Bran Flakes is the ideal food roughage.

FREE TRIAL PACKAGE

Mail to CANADIAN POSTUM CO., LIMITED, 252-28 METROPOLITAN BLDG., TORONTO 2, ONT.
Please send me your free trial package of Post's Bran Flakes.
Name.....
Address.....
City..... Prov..... 35

Make this two weeks' test and note the difference

Constipation must not be neglected. Start a two weeks' test now. Order a package of Post's Bran Flakes from your grocer.

Start by eating a dish of Post's Bran Flakes for breakfast. Eat it as a cereal with milk or cream. You will be delighted with the crispness and the delicious flavor. You will find it as good as any cereal you ever tasted.

Do this every day for two weeks. We predict you will find a real difference in the way you feel, and that you have been "regular" all the time.

But don't stop at the end of two weeks. Eat Post's Bran Flakes every day for health and regularity.

Post's Bran Flakes is sold by all grocers in a waxwrapped package. Ready to eat.

It is dangerous to experiment with patent medicines and drug laxatives. They bring only temporary relief and may make matters much worse. Ordinary cases of constipation brought about by too little roughage in the diet should yield to Post's Bran Flakes. If your case is abnormal, don't experiment. Consult a competent physician.

POST'S BRAN FLAKES

NARROWER BRIMS ON HATS FOR MEN

Leaning Towards Browns is Evident in Suits Also.

Maher and Wesley, men's furnishings, have a well-balance stock of spring wearing apparel worthy of attention. In visiting this store on Charlotte street one notes a stock of hats, many of them in brown and tan shades with either the raw, bound or welt brims which are slightly narrower than last season's while the bands are nearly all of plain colors. This leaning toward the browns is apparently in accordance with present popularity of the brown suit in many patterns, which will this year be sold more extensively than in the past couple of years. While the single breasted model is expected to be the better seller, the double breasted suit will be almost as popular.

The spring and fall coats seem particularly attractive, this firm having a wide range for choice, running from the rougher tweeds bordering on donegals to the connamara, a hand-woven Irish tweed. The coats are of the loose-slip-on models, though the raglan coat is suggested by some firms.

Maher and Wesley have also prepared for a run on the new ensemble shirt, being tie and shirt to match. The attached collar style, always popular for summer wear, is expected to be greatly in demand again this season.

BASKET-WEAVE MOHAIR.

A travelling suit of frock and three-quarters coat is fashioned of lovely soft grey mohair in a new basket weave, with flat crepe in blue for bandings.

To enjoy an even temperature of smiling Florida warmth place your next Coal order with us. Less trouble to keep the fire-box clean and much more economical if you use our specially screened Coal.

HIGH-PLACED BELT GIVES NAME TO FLAPPER FROCK

Coats and Dresses Shown With Belts of Contrasting Shades.

HOLLYWOOD TI-TI.

Bright Colors in Varying Patterns Used in Newest Styles.

Hollywood Hi-Ti! There's a title for you. It isn't a new sort of drink or chocolate bar or even a name for a Pullman car. It's the intriguing cognomen bestowed on a new type of dress and coat that is designed especially for the needs of flappers, and it gets the latter part of its make-up from the "high tie" in belt placing that distinguishes it from the lower form still favored in adult dresses and coats.

Barrie's, Limited, have a number of these Hollywood Hi-Ti garments in their ladies' ready-to-wear showrooms. One of the coats is made of red velvet in a warm shade that has a high-placed belt and trimming of black satin on the collar and pockets.

One of the dresses of this type is also in the favored Castilian or bright red of the moment, with long sleeves and pointed neck line and gold metallic trimming.

A stunning dress of yellow in sports style has a top done in the zig-zag batik patterns, and the same bright batik appears in the triangle collar that makes the high note of grey and crimson on a jersey frock. In the Klingaling jersey fabric appears a three-piece costume of rose color, with a jumper top of plaid taffeta and cardigan coat. Bordered kasha is developed in a two-piece gown with V-neck and wool shoulder flower, while another spot of lovely bright color is the Sunlight peau de peche gown with its softly glistening surface.

A wonderful dress that makes one think of heavily-laden orchards and hothouse products is a "fruit" pattern in printed georgette, with a narrow black velvet belt and the fruit idea carried out in the bunch of cherries at the shoulder. Another printed georgette of more subdued pattern has black lace with it, a two-tiered skirt draped at the side front and long sleeves.

Dresses in the new weaves of flashtone (somewhat like the old Roshanara crepe), block tone (checked design), and French hand-drawn fabric are shown here, while Rodier French jerseys combined with silk and crepe are indicated for sports wear.

A pretty dress in this Rodier weave, with novelty stripes of metallic thread in horizontal lines, is in black and white top, with a plain silk crepe skirt and collar and buttons of black and white.

In the ensembles are shown many variations; a black suiting with a fine hair-line stripe of white, whose top shows an applique design in Angora wool with a colored border and silver buttons. Another suit of this type has a pullover top of fine grey jersey, with its skirt and short box coat developed in Provence blue novelty tweed.

A stunning little gown composed of the dull and bright colors which feature so many of the season's frocks is of black silk crepe trimmed with batik in orange, navy, and robin's egg blue. Knife-pleated collar and cuffs and deep hip-band of this bright fabric make the model very striking.

The coats at Barrie's are notable also. One black kasha garment which is lined with canary yellow has a collar and cuffs of monkey fur, and a black broadcloth coat with a cape-like collar has a whole ermine skin trimming each cuff. Another black kasha coat, button-trimmed, has its half-cape lined with green.

An interesting variation in treatment is noticeable in the navy charmeen garment with a scarf of Roman stripe taffeta. A natural kasha facing on the long collar is a feature of another black coat model.

A stunning coat of imported tweed in rose and blue mixture has a deep border, almost like embroidered self-material, and grey lynx collar. Tailored coats of Prince of Wales type in charmeen and tricotine are lined with kasha and trimmed with black satin.

The flowers and scarfs on view at the Barrie Store are very lovely. The former include all the newest ideas in lacquered violets, velvet geraniums and crystal blossoms of various sorts. Violets come in mauves and whites, in purples and blues and yellows, and in the softly mixed hues of special bouquets. The misty soft colors of the scarfs, in Rosy Dawn, pinefrost green, and pale yellow, have stencilled and painted and batik patterns, in floral and geometrical designs.

SQUARE TABLES FEATURED NOW

Canadian Department Stores Show Long Rows of Dining Room Suites.

MANY REFRIGERATORS.

Ten dining tables, ranged in two rows, with the chairs arranged neatly around them, are the most prominent feature in the furniture department of the Canadian Department Stores, Limited. Each set is placed as if for a meal, and only the table linen and silver are needed to make the visitor sit down and look round for the waiter. Formerly popular, the round or oval table seems to have been shoved into the background, the rectangular one, and seven [illegible] set up were of this type. The [illegible] ones shown were smaller, [illegible] leaves could be inserted.

One would almost think the [illegible] person had knocked out the [illegible] separating a number of apartments and gathered the furniture [illegible] together for at one end of the display of dining room tables were ranged the kitchen furniture at the other could be found [illegible] easy chairs, etc., of the living room, with the bedroom furniture further along.

Refrigerators are numerous in the kitchen section, running from little ones less than three feet high and two feet square to big double ones that look large enough, almost for a restaurant. Neat kitchen tables with shiny porcelain or marble tops offer the particular housewife a chance to have her kitchen shine as brightly as her living room.

Between the rows of dining tables are ranks of dining room furniture, china cabinets, buffets, etc. to match. Most of them are in walnut finish, some being dull and some highly polished. A feature of the dining room chairs is that those of every set have completely upholstered tops, mostly in dull blue or grey, although a few are brown. These have supplanted those with solid wood seats and the old style with the perforated veneer centres, as well as the later variety with a leather cover and surrounded by wooden strips about three inches wide.

FABRICS as the Stylists View them

Great fresh bolts of fascinating fabrics are arriving daily in the shops and are more alluringly lovely than ever. Stylists have favored no one type and we see silks, woollens and cottons being introduced for spring in a most decidedly friendly fashion . . . all sharing honors amicably in their own time and place. They have a most important fashion duty to perform and all appear most anxious to please.

We have our doubts if there is any normal feminine who can resist the fabrics for spring. To the writer they never seemed more charming nor the variety so complete.

Every color around the sun and every color under the sun appears in the gay silk prints of the new season. Multicolored effects are most prominent . . . these to be worn either for sports or afternoon functions. Crepe de chines, georgettes and chiffons in new floral effects are seen in the immediate vicinity of brilliant jungle prints whose colors were no doubt inspired by the gay and exotic colors of the natives' costumes. Fruits are not overlooked in the 1928 spring silks and one striking piece that is noteworthy was of wild cherries in an exceedingly smart design.

Spring Woollens

The overwhelming success of the tailored frock and the sports ensemble is, no doubt, a decided factor in the great importance which is attached to the beautiful new woollens for spring.

Wool crepes, jersey, kasha, tweed, and cashmere all are highlighted in the mode. Novelty tweeds, which will go to make some of the most fashionable coats of the season, favor small, indefinite patternings or weave effects patterned along geometric lines. Spring frocks will be made of smooth surfaced tweeds in beige and brown mixtures, oxfords and deeper brown shades.

Pastel Kasha Coats

The success accorded the pastel kasha coat at the southern resorts during the past season was evidently only a forerunner for its already evident spring popularity. Nile green, natural and pink are the favored shades and badger is the favored fur trimming on this type of coat.

Jersey is without a question of a doubt, one of the most popular of spring fabrics. In many cases, it is content to form only the blouse of a smart sports or street ensemble; again, it fashions the entire dress; and in some cases, it is the sole material of the two and three-piece ensemble. Crosgrain ribbon in matching or contrasting shade is the trimming the Parisienne loves, on jersey.

[illegible]ing Cottons

Among the most important tub fabrics for spring are printed piques, lawns in English garden effects and patterned linens.

LINGERIE COMES IN MANY SHADES

Trimmings of Many Kinds Appears On Dainty Under Garments.

Lingerie of the dainty type that Miladi chooses as a foundation for her pretty frocks makes one of the offerings at Brass' Ladies' Wear Store at 345 George Street. These delicate things in pale pastel tints come in embroidered garments that are trimmed with lace and sport tiny flower-embroidered motifs and net edging, or else appear in severely tailored styles that match tailored gowns and coats.

There are pleasing varieties in the lovely hats on view at Brass' store also! little models made of combinations of straw and felt, like the sky blue hat with its trimming of felt grapes, and in straw and corded silk.

There are gloves of the latest types in kid, suede and chamoisette and wool, hand-painted scarfs, flowers for the coat and gown, hosiery, dainty dresser accessories of seductive charm and collar and cuff sets in lace, net, and georgette.

PURPLE RICHNESS.

Stunning for spring is a purple cashmere corduroy sports coat for wear over an ombre shaded lavender flat crepe jumper with tiny purple corded trimmings.

SPRING POINTERS in Men's Haberdashery

As in suits, so in the smart accessories that go with them, color is the word.

If the indefatigable neckwear designers, and their brothers in the shirt, hosiery, handkerchief, and muffler fields, have left the poor spectrum a single color they haven't ravaged, the finder could probably claim a substantial reward.

For a time it looked as though we would have to chronicle the demise of the brilliant stripe combinations in reps and mogadors, but they still have a lot of life in them, judging from late reports.

Small Figures—Bold Colors

However, small figured patterns and neat all-over designs in bold colors have taken the lead, with London checks, Spitalfield motifs, and other geometrical designs having a bit the best of it—and in the offing, a tendency to modernistic ideas, with sport motifs as the basis. Also the plain colored tie is showing signs of life.

White shirts will still occupy generous room in the favor of careful dressers. But so far the colored shirt, in a multiplicity of figured and striped designs, with collar to match, shows no signs of going into eclipse.

Light pastel and white grounds will be the favorites, with neatness of effect the objective aimed at.

Green Trying to Edge Into the Picture

In some quarters, green—especially in end-to-end madras collar-attached shirts—is receiving considerable attention.

Hosiery, having sown its wild oats in a riot of bold designs the past season or two, is now going in for neater patterns, with vertical stripes and small broken check effects coming to the fore.

In the more expensive lisle and silk hose, fancy clocks are much in evidence.

Colored Border Handkerchiefs

Handkerchiefs with colored borders—striped or block designs—white centres, and hand-rolled edges are smart for the breast pocket. Or if one prefers, those with centres in neat all-over colored patterns and white borders may be worn.

The number and variety of the color combinations and patterns are legion, but it is quite evident that neatness of effect has been the aim of the designers—and certainly one must agree they have achieved it in a very tasteful manner.

In Sports Wear

In sports wear, as in all other realms sartorial, the tendency is to finer, more tasteful effects.

The vogue of the very wild sweater is dying. Colors no longer blare across the fairway in a manner to distract attention from the ball. At Palm Beach and other winter-sunshine resorts, smaller designs and quieter colors have been much in evidence with plain colors—tans, grays, heather greens—in both hose and sweaters having quite a following.

More Rational Knickers

Knickers have become more rational in length and width—avoiding the extremes of both and very light colors in checks and overplaids are in the ascendant. Many golfers will prefer linen, in natural or white; while still others will exercise their option on white flannel trousers, either plain or pastel striped.

In all departments of dress, the effect to be sought is neatness, harmony, good taste. Use care in the selection of colors, and give equal thought to choosing patterns. Make every part of your wardrobe help out every other part. It's more satisfactory and—what interests most of us—it is more economical.

HOLLYWOOD TI-TI.

Bright Colors in Varying Patterns Used in Newest Styles.

Hollywood Hi-Ti! There's a title for you. It isn't a new sort of drink or chocolate bar or even a name for a Pullman car. It's the intriguing cognomen bestowed on a new type of dress and coat that is designed especially for the needs of flappers, and it gets the latter part of its make-up from the "high tie" in belt placing that distinguishes it from the lower form still favored in adult dresses and coats.

Barrie's, Limited, have a number of these Hollywood Hi-Ti garments in their ladies' ready-to-wear showrooms. One of the coats is made of red velvet in a warm shade that has a high-placed belt and trimming of black satin on the collar and pockets.

One of the dresses of this type is also in the favored Castilian or bright red of the moment, with long sleeves and pointed neck line and gold metallic trimming.

A stunning dress of yellow in sports style has a top done in the zig-zag batik patterns, and the same bright batik appears in the triangle collar that makes the high note of grey and crimson on a jersey frock. In the Klingaling jersey fabric appears a three-piece costume of rose color, with a jumper top of plaid taffeta and cardigan coat. Bordered kasha is developed in a two-piece gown with V-neck and wool shoulder flower, while another spot of lovely bright color is the Sunlight peau de peche gown with its softly glistening surface.

A wonderful dress that makes one think of heavily-laden orchards and hothouse products is a "fruit" pattern in printed georgette, with a narrow black velvet belt and the fruit idea carried out in the bunch of cherries at the shoulder. Another printed georgette of more subdued pattern has black lace with it, a two-tiered skirt draped at the side front and long sleeves.

Dresses in the new weaves of flash-tone (somewhat like the old Roshanara crepe), block tone (checked design), and French hand-drawn fabric are shown here, while Rodier French jerseys combined with silk and crepe are indicated for sports wear.

A pretty dress in this Rodier weave, with novelty stripes of metallic thread in horizontal lines, is in black and white top, with a plain silk crepe skirt and collar and buttons of black and white.

In the ensembles are shown many variations; a black suiting with a fine hair-line stripe of white, whose top shows an applique design in Angora wool with a colored border and silver buttons. Another suit of this type has a pullover top of fine grey jersey, with its skirt and short box coat developed in Provence blue novelty tweed.

A stunning little gown composed of the dull and bright colors which feature so many of the season's frocks is of black silk crepe trimmed with batik in orange, navy, and robin's egg blue. Knife-pleated collar and cuffs and deep hip-band of this bright fabric make the model very striking.

The coats at Barrie's are notable also. One black kasha garment which is lined with canary yellow has a collar and cuffs of monkey fur, and a black broadcloth coat with a cape-like collar has a whole ermine skin trimming each cuff. Another black kasha coat, button-trimmed, has its half-cape lined with green.

An interesting variation in treatment is noticeable in the navy charmeen garment with a scarf of Roman stripe taffeta. A natural kasha facing on the long collar is a feature of another black coat model.

A stunning coat of imported tweed in rose and blue mixture has a deep border, almost like embroidered self-material, and grey lynx collar. Tailored coats of Prince of Wales type in charmeen and tricotine are lined with kasha and trimmed with black satin.

The flowers and scarfs on view at the Barrie Store are very lovely. The former include all the newest ideas in lacquered violets, velvet geraniums and crystal blossoms of various sorts. Violets come in mauves and whites, in purples and blues and yellows, and in the softly mixed hues of special bouquets. The misty soft colors of the scarfs, in Rosy Dawn, pinefrost green, and pale yellow, have stencilled and painted and batik patterns, in floral and geometrical designs.

SQUARE TABLES FEATURED NOW

Canadian Department Stores Show Long Rows of Dining Room Suites.

MANY REFRIGERATORS.

Ten dining tables, ranged in two rows, with the chairs arranged neatly around them, are the most prominent feature in the furniture department of the Canadian Department Stores, Limited. Each set is placed as if for a meal, and only the table linen and silver are needed to make the visitor sit down and look round for the waiter. Formerly popular, the round or oval table seems to have been shoved into the background by the rectangular one, and seven of those set up were of this type. The round ones shown were smaller, although leaves could be inserted.

One would almost think that some person had knocked out the walls separating a number of apartments and gathered the furniture neatly together for at one end of the display of dining room tables were ranged the kitchen furniture and at the other could be found couches, easy chairs, etc., of the living room, with the bedroom furniture farther along.

Refrigerators are numerous in the kitchen section, running from little ones less than three feet high and two feet square to big double ones that look large enough, almost, for a restaurant. Neat kitchen tables, with shiny porcelain or marble tops, offer the particular housewife a chance to have her kitchen shine as brightly as her living room.

Between the rows of dining tables are ranks of dining room furniture, china cabinets, buffets, etc. to match. Most of them are in walnut finish, some being dull and some highly polished. A feature of the dining room chairs is that those of every set have completely upholstered tops, mostly in dull blue or grey, although a few are brown. These have supplanted those with solid wood seats and the old style with the perforated veneer centres, as well as the later variety with a leather cover and surrounded by wooden strips about three inches wide.

FABRICS as the Stylists View them

Great fresh bolts of fascinating fabrics are arriving daily in the shops and are more alluringly lovely than ever. Stylists have favored no one type and we see silks, woollens and cottons being introduced for spring in a most decidedly friendly fashion . . . all sharing honors amicably in their own time and place. They have a most important fashion duty to perform and all appear most anxious to please.

We have our doubts if there is any normal feminine who can resist the fabrics for spring. To the writer they never seemed more charming nor the variety so complete.

Every color around the sun and every color under the sun appears in the gay silk prints of the new season. Multicolored effects are most prominent . . . these to be worn either for sports or afternoon functions. Crepe de chines, georgettes and chiffons in new floral effects are seen in the immediate vicinity of brilliant jungle prints whose colors were no doubt inspired by the gay and exotic colors of the natives' costumes. Fruits are not overlooked in the 1928 spring silks and one striking piece that is noteworthy was of wild cherries in an exceedingly smart design.

Spring Woollens

The overwhelming success of the tailored frock and the sports ensemble is, no doubt, a decided factor in the great importance which is attached to the beautiful new woollens for spring.

Wool crepes, jersey, kasha, tweed, and cashmere all are highlighted in the mode. Novelty tweeds, which will go to make some of the most fashionable coats of the season, favor small, indefinite patternings or weave effects patterned along geometric lines. Spring frocks will be made of smooth surfaced tweeds in beige and brown mixtures, oxfords and deeper brown shades.

Pastel Kasha Coats

The success accorded the pastel kasha coat at the southern resorts during the past season was evidently only a forerunner for its already evident spring popularity. Nile green, natural and pink are the favored shades and badger is the favored fur trimming on this type of coat.

Jersey is without a question of a doubt, one of the most popular of spring fabrics. In many cases, it is content to form only the blouse of a smart sports or street ensemble; again, it fashions the entire dresse and in some cases, it is the sole material of the two and three-piece ensemble. Crosgrain ribbon in matching or contrasting shade is the trimming the Parisienne loves, on jersey.

ing Cottons

Among the most important tub fabrics for spring are printed piques, lawns in English garden effects and patterned linens.

LINGERIE COMES IN MANY SHADES

Trimmings of Many Kinds Appears On Dainty Under Garments.

Lingerie of the dainty type that Milädi chooses as a foundation for her pretty frocks makes one of the offerings at Brass' Ladies' Wear Store at 345 George Street. These delicate things in pale pastel tints come in embroidered garments that are trimmed with lace and sport tiny flower-embroidered motifs and net edging, or else appear in severely tailored styles that match tailored gowns and coats.

There are pleasing varieties in the lovely hats on view at Brass' store also! little models made of combinations of straw and felt, like the sky blue hat with its trimming of felt grapes, and in straw and corded silk.

There are gloves of the latest types in kid, suede and chamoisette and wool, hand-painted scarfs, flowers for the coat and gown, hosiery, dainty dresser accessories of seductive charm and collar and cuff sets in lace, net, and georgette.

PURPLE RICHNESS.

Stunning for spring is a purple cashmere corduroy sports coat for wear over an ombre shaded lavender flat crepe jumper with tiny purple corded trimmings.

SPRING POINTERS in Men's Haberdashery

As in suits, so in the smart accessories that go with them, color is the word.

If the indefatigable neckwear designers, and their brothers in the shirt, hosiery, handkerchief, and muffler fields, have left the poor spectrum a single color they haven't ravaged, the finder could probably claim a substantial reward.

For a time it looked as though we would have to chronicle the demise of the brilliant stripe combinations in reps and mogadors, but they still have a lot of life in them, judging from late reports.

Small Figures—Bold Colors

However, small figured patterns and neat all-over designs in bold colors have taken the lead, with London checks, Spitalfield motifs, and other geometrical designs having a bit the best of it—and in the offing, a tendency to modernistic ideas, with sport motifs as the basis. Also the plain colored tie is showing signs of life.

White shirts will still occupy generous room in the favor of careful dressers. But so far the colored shirt, in a multiplicity of figured and striped designs, with collar to match, shows no signs of going into eclipse.

Light pastel and white grounds will be the favorites, with neatness of effect the objective aimed at.

Green Trying to Edge Into the Picture

In some quarters, green—especially in end-to-end madras collar-attached shirts—is receiving considerable attention.

Hosiery, having sown its wild oats in a riot of bold designs the past season or two, is now going in for neater patterns, with vertical stripes and small broken check effects creeping to the fore.

In the more expensive lisle and silk hose, fancy clocks are much in evidence.

Colored Border Handkerchiefs

Handkerchiefs with colored borders—striped or block designs—white centres, and hand-rolled edges are smart for the breast pocket. Or if one prefers, those with centres in neat all-over colored patterns and white borders may be worn.

The number and variety of the color combinations and patterns are legion, but it is quite evident that neatness of effect has been the aim of the designers—and certainly one must agree they have achieved it in a very tasteful manner.

In Sports Wear

In sports wear, as in all other realms sartorial, the tendency is to finer, more tasteful effects.

The vogue of the very wild sweater is dying. Colors no longer blare across the fairway in a manner to distract attention from the ball. At Palm Beach and other winter-sunshine resorts, smaller designs and quieter colors have been much in evidence with plain colors—tans, grays, heather greens—in both hose and sweaters having quite a following.

More Rational Knickers

Knickers have become more rational in length and width—avoiding the extremes of both and very light colors in checks and overplaids are in the ascendant. Many golfers will prefer linen, in natural or white; while still others will exercise their option on white flannel trousers, either plain or pastel striped.

In all departments of dress, the effect to be sought is neatness, harmony, good taste. Use care in the selection of colors, and give equal thought to choosing patterns. Make every part of your wardrobe help out every other part. It's more satisfactory and—what interests most of us—it is more economical.

LUXURIOUS LITTLE SHOW-ROOM CONTAINS C.D.S.L. LADIES' WEAR

New Colors and New Materials Are Offered For Approval.

RODIER CLOTH POPULAR.

Dresses All One Color or Offering Violent Contrast Predominate.

The Redfern Shoppe is the name of the very attractive little showroom for exclusive garments for ladies' wear, fitted up on the second floor of the Canadian Department Stores' establishment. Here, in pleasant privacy, the shopper can sit in a comfortable wicker chair, amid luxuriously fitted-up surroundings, and look at the many garments provided for her choice.

These garments include the latest of the season's whims for feminine wear, in all the new colors with their intriguing names, and in the new materials. In the two-piece dresses which are so favored just now are models in the Rodier basket weave, a knitted fabric which has an appropriate name. One dashing frock is developed in shadow (yellowish) green, the Rodier cloth in the top, with its smart scarf collar and anchor motif, and the skirt made of pleated silk of the same shade.

Another of these pretty suits for sports wear is in the warm marron glace shade, which is a greyish sand. This has a henna-colored stripe and the same type of plain silk crepe skirt with pleats that is so fashionable this spring.

An afternoon frock is of irisglow (orchid) georgette, made without any variation in color throughout the entire garment. Dresses this year appear to be of this all-color type or else those showing striking contrasts in materials and hues. Or one can have a mannish cut to one's outfit, in strictly tailored style, or else be as feminine and frilly and ornamented as one pleases. The styles offer a variety in this way.

A black and white tailored frock in the Canadian Department Store's stock shows the popular piping of sand to the little button-trimmed cuffs and has a long sand vestee extending from the neckline to the hem.

One of the most stunning coats in stock has the one-side shoulder drape of the black charmeen that fashions the entire garment. It has a black satin shawl collar, a lining throughout of Pekin blue crepe and a shoulder flower of black and blue grosgrain ribbon.

Charmeen with mole collar and trimming of little tucks and folds of self makes another distinctive gar-

ment, while a striking model in the kasha coats which are so prominent this year is tailored, with deep collar and cuffs made from rows of brown soutache braid.

Hurlingham is the title of another style of coat, strictly tailored, of soft brown invisible plaid, with large flap pockets. A tweed that stands out from its companions is in a red and fawn mixture with brown crepe lining. It has a leather belt and novelty buttons of red and brown enamel.

One steps out of this little show room into the millinery parlor, but just a moment! Look at this frock in the show case and note the many little style notes of this spring, that has attraction as its main idea in clothes. Here is a little love of a canton silk crepe dress developed in the flashing Goya red and white, with grey in a soft dove shade as a trimming. Isn't that an odd combination? But decidedly effective. This model has a knife-pleated skirt of red which is edged with a band of white, rimmed with grey. Its top, which is of white, has a ducky little cape of red, a soft wide belt sash edged with grey and two tiny side pockets.

The well-liked crochet and Visca strawa make the snug-fitting small hats, most of them rimless, which are shown in the millinery department here. Faille silk, corded silk, crochet-

ed or embroidered straw crowns, variations of felt and silk or of straw and felt, are all shown. Bangkok (tailored) straws trimmed with ribbon, are much in evidence and Angora wool embroidies, which outline the applique ornaments made from a chintz-like material placed on the side crowns.

In the shoe department, a novelty much liked for spring wet wear is the Rainette, a new rubber overshoe which is also termed a goloshette, made of supple rubber in a lower shape than the ordinary Gaytee.

These are neat in appearance. They come in beige and brown tones and fasten with large button-fronted domes.

On the fabric counters are the new spring materials; Celanese voiles, like silk chiffons, in startling flower and fruit and bird patterns, crepes in floral designs and in colors of pinks, blues, greens and browns, thin kasha crepes for dresses and kasha tweeds for suits, and Shenella, a silk and wool mixture for sports wear.

The Mode Does Much with it's Accessories

There are so many interesting accessories in the stores and shops for the spring season that it is difficult to know just where to begin. On every side there are things new, things exotic and things typically modern for us moderns to wear with chic spring costumes.

For no reason at all, except that they are so unusually smart and interesting this year, umbrellas will be mentioned first. The most important are imported affairs with hook and crook shape handles of compositions of tortoise-shell and these will face spring showers with silk coverings of solid color. Changeable silks in shades of green are much seen; and diagonal, slightly rounded hooks of crystal are combined with contrasting composition in handles that top umbrellas of changeable silks.

Spring Handbags

When you go to select your handbags for spring, you will be beset with a multitude of considerations, for all are so lovely, so chic and so utterly Parisian. Since it is a rule of the mode that shoes and bags must match, it is not to be wondered at that the newest bags are appearing in pastel and light colored glazed kidskins and pastel patent leather, as those are some of the smartest shoe leathers for spring 1928.

Bags with top handles are most important and the more tailored ones favor pouch styles. Unusual shapes of new and contrasting colors appear to be very prominent as we enter the season. For afternoon and semi-formal wear metal frames of fine lacy filigree ornaments inset with colored stones harmonize with the color of the bag. Alligator and snakeskin are used in new and novel ways as appliques on calf and patent leathers.

Gloves are Versatile

The gloves for spring go hand in hand with fashion and are to be seen in both novel and simple versions. Some of the fascinating ones have flaring cuffs with contrasting leather insets, often in a very vivid shade. It is doubtful if fashionable women will ever give up the popular slip-on glove. Washable suede and antelope in all its well-known guises appear to be most in favor and are hand sewn.

Scarfs Flutter

In the spring neckwear family, there is nothing more favored than the silk scarf. Great squares of silk they are, exotically colored in all the new and brilliant colors of the mode. Many of them were designed by famous artists both in this country and in [illegible] with trig little tailored suits or smart spring frocks. These are to be thrown nonchalantly around the shoulder and tied either in the front or [illegible], on one shoulder.

FIBRE FURNITURE IN GREAT DEMAND

Home Furnishing Company Sells Many For Porch Use.

For almost twenty years the Home Furnishing Company has been a well established firm in this city, always carrying a most up-to-date line in furnishings for the home. This season there is to be found in its store on Charlotte Street a splendid line of graded furniture and house furnishings required to fit a home from cellar to garret are on exhibit, and from the display seen the furnishings of the home to-day will be far more attractive and comfortable than in years past. The company sells on a weekly paying basis, which makes it easy for any family to secure the most attractive furniture that they want. There are beautiful dining-room suites in oak and walnut, and nice mohair and silk chesterfields, with reversible cushions, an added attraction to any housewife.

The Reed fibre suite which is greatly in demand this season for living-room and sun-porch is something that will add comfort to these rooms, and from the sale the public appears to have fallen in love with this new idea in home furniture.

Floor lamps in both the piano and bridge style are very much in evidence. These are of neat design in many different colors that will add the homey touch to many rooms.

Baby is not forgoten either in this store. A splendid line of baby carriages in the latest design is on exhibition. The carriages are made by the Lloyd Manufacturing Company, and some have plain tops and others the roll design. They are finished inside in beautiful Princess corduroy upholstering, and the outside is in straw in ivory, grey, blue, and brown colors. The body sits on four heavy artillery wheels.

Fables and Fabrics

By Marjorie Howe Dixon

In a quaint little book of "Select Fables for Good Boys and Girls" are a number of stories each with a "Reflection" attached,—often longer than the tale itself. Perhaps "reflection" was a simple disguise for "moral," a most unpalatable sort of thing to attach to a story.

The pleasant thing about fabrics is that though they tell a tale, and many times illustrate an elaborate and intricate symbolism, they seldom adorn their narratives with morals, —is not this a very great wisdom?

Fabrics in Symbolical Designs

For instance a square of tapestry shows a vigorous and active bird in the centre, clouds above and waves below and a top piece overhanging with five characters evenly spaced. The central design is the Ho Ho bird, a symbol of the Empress. The five characters are the cardinal virtues, and the colors themselves, red, azure, yellow, black and white represent uprightness, humanity, virture, honesty and sincerity.

A dragon on a Chinese coat must have the proper number of toes to indicate whether he is just the common garden variety, or an Imperial Dragon. Everyone is familiar with the beautiful Tree of Life of East India prints.

That stories in fabrics are fables indeed, may be illustrated by a Napoleon toile de jouy showing the siege of Egypt. War is a pretty and picturesque performance if one is to believe this design. Napoleon had an easy time of it. In one place surrounded by his generals, he is receiving Egypt,—a lady with trailing robes and proper abject expression of defeat. In another a group of men are bowing to him as conqueror, while an angel floats above him about to drop a crown of laurel on his cocked hat. In another group the angel is accompanying him while several people of English peasant type kneel to do him homage. A few pyramids are scattered about so that you can be sure of the country in question. This pattern would take its place nicely and quite in keeping with the spirit of a Directoire room.

Fabrics for a Variety of Uses.

Among the patterned materials always good are the chintzes and hand blocked linens, while mohair is receiving more attention with new patterns resembling chints in sunfast colors in broad stripes, checks, and flower designs.

Satin too comes in broad stripes for upholstery and drapery fabrics. Crash may be desired for some places where a heavier striped material is necessary. Denim, rep, and monks cloth are among the sturdier types of materials to withstand wear.

Curtain materials of lighter weights to let in the light are made under many names. Grenadine, voile, casement cloth and shimmering gauze are some of these. Voile has a lovely soft quality to it and is being developed in broad stripes and gay patterns. There is something delightfully fresh and simple about it.

Taffeta is always popular among the plain materials,—and taffeta rep, too, is being furnished.

With so many kinds of materials from which to select, the problem becomes most interesting. Because the way you will hang your drapes or arrange your slip covers has still to be decided.

Spring always brings with it the desire to freshen things up and to get away from the wools and velvets that seem so comfortable in winter. Slip covers are the solution as far as furniture is concerned. It is not necessary to have all the pieces covered to match. In fact if you use a large gay pattern on a winged chair, it would be too much to cover the davenport with it. A striped material on the davenport would seem more satisfactory.

An Unusual Window Treatment

A room in the modern art style offers much opportunity for one's imagination when it comes to choice and arrangement of drapes. The keynote of the new things seems to be simplicity and the pattern of masses in geometric forms against each other. Thus a divan with its odd shape must be covered with a plain material drawn smoothly over it.

On the curtain drapes, you may use folds of materials and obtain from them definite rythm. Loops and swags of drapery do not seem right. In one room taffeta was used effectively. It lent itself to geometric folds and was caught back with star-shaped nail heads about four inches across. The folds of the silk suggested star forms. Besides the drapes at the windows, there were similar drapes either side a large mirror, over a dressing case.

At this point, if this were a properly constituted fable, a moral should be deftly inserted. Instead, however, since fabrics really have one's attention, even a lengthy "Reflection" will be omitted. Let the Conquest of Curtains draw to a close,—as curtains at one time were drawn over the windows, to shut out the cold.

A reflection of spring in our draperies and in our slip covers is heartily recommended and you can arrange a moral as in 'Alice in Wonderland": 'The more there is of mine the less there is of yours."

PRINTED FABRICS

Printed Fabrics

To Fashion Distinctive Spring Costumes, For Dickson Store Patrons.

LOVELY printed crepes—sparkling with fashion-rightness—Silks, Paris sponsored—that will be worn by women "in the know" of fashion. Flowered and modernistic effects, smartest colorings, all in a dazzling array and at an amazing price.

Spring Silks Are Here!

WOMEN OFFERED OPPORTUNITY FOR INDIVIDUAL PREFERENCES IN STYLES OF SPRING SEASON

Teco Store Displays Great Variety of Seasonable Apparel.

FEMININITY STRESSED

Athletic Ladies Also Catered to in Clothes Shown in Big Store.

Will you meet the Springtime sisters, Felicia and Prudence. They are home from the Teco Store, where they bought their new outfits. Do you like them? How different they are, you say. Certainly they are different. This is Leap Year and women are exercising their individual preferences. The stars, it is said, indicate a return to graceful femininity this year. Doesn't Felicia look deliciously feminine?

She is wearing one of the new coats with the half cape. Isn't it adorable! The material has a name that suits it beautifully — charmelaine. Yes, it's black, and that lining to the cape and the coat is Canton blue silk crepe. One of the new heavy crepe satins in black makes the long scarf ends at either side. Mark the whimsical idea in the cuffs of red fox. Let us see her frock. When she removes her coat, she looks like a flower. That is one of the printed silk crepes in a floral design. Note the colors: Rose and sand and blue and green. Could you imagine that they would blend so beautifully. Yes, everything is pleated this year. You can have them in box pleats, or knife, or inverted or accordion style. But they must be pleated. Her gown is blue, too, as you see, in two tones called Chin-Chin and Pekin. Most of these blues have Chinese names, but blue is the color of the Celestial kingdom. Orientals associate it with heaven. This dress has the one-sided tendency, just the same as her coat with the cape on one shoulder and her hat with the flowers all banked on one side. Isn't it interesting? As you notice, the blouse is made in bolero effect and has scalloped edges that are outlined by self pleatings. It has straight plain sleeves with little turned back cuffs that use the same pleating as trimming, with the collarless V neckline so much favored, and a soft crush girdle of satin.

Her hat is chic, too, don't you think? Half of it is shiny cellophane straw in black and the other half is a mass of soft blue velvet flowers in a shade matching her dress. It has a tiny eye veil with silver lace edging. Her hose and bag and gloves are soft pigeon grey. Her patent leather pumps have Junior Spanish heels.

But don't spend all your time with Felicia. Here is Prudence, her sister. You see, her ideas are different and she also expresses her individuality in her clothes. Isn't she snappy looking?

That's a hairline stripe suiting in navy mannish effect. Note the details that are exactly like a man's suit; plain sleeves with two bone buttons notched lapels and tiny pockets bound with black silk braid. She is wearing with it a straight-line blouse with the surplice front and a silk monogram stitched in heavy silk floss. Her scarf is a full-furred fox in the new shade of honey beige that also appears in her hose, her melon-shaped pouch bag, with lizard grained finish and her shoes, which have a double narrow strap with instep buckles and covered Cuban heels.

What about her hat? That is one of the most fetching items in the whole outfit. It is one of those darling little caps of navy felt that have the eyebrow curve and the upturned brim line. An arrowhead of brilliants is its only trimming.

Felicia, who plays Badminton, wants a sports frock, but she will get that after a while. She has her eye on one of the new fancy jerseys with rayon silk striping. It is almond green, with a skirt, pleated, of course, in the front and plain in the back, and scarf of flat crepe. She wants one of the new "Vagabond" felts for this suit, the sort of hat that has a rolling brim and a grosgrain ribbon band. For shoes, she will require a pair of "Mayfair" models in golden brown calf, with a very sensible heel. And her coat must be of golden brown tweed in the new indefinite pattern. The model she has picked out has bands of stitching on the cuffs, closed with points. The same stitching is repeated on the collar that stands up in the new fashion with a roll that frames the face.

In their shopping tour of the Teco Store, they saw so many pretty things that their heads are swimming. They can't begin to describe them.

The hats draw their attention first. Snug-fitting cloches of fur felt with irregular brims; corded silk and straw and felt and straw combinations that combine so well with springtime coats, trimmings of embroidery in silk floss and Angora wool, brilliant rhinestone buckles and daggers, cutouts and insets of contrasting material, or the little feather-duster ornaments of glycerine feathers, stiffly protruding from the side; cellophane straw with its glistening surface, Milan braid and Visca and crochet straws; blacks, navies, greens, blues sand, or, as the new name has it, India spice; and, crowning the lot, those exquisite arrangements of massed and banked velvet flowers, with fascinating silk veils to give a final touch.

Then the coats, which are so important this spring. Formal coats in broadcloth and charmeen and charmelaine, with soft fur collars in mole

and fitch and fox and flying squirrel, and sports coats in tweeds and kashas. Soft, enveloping, feminine, with flattering fur trimming and fluttering satin scarfs, or severe and masculine, with straight lines and slim silhouette. Again the contrast between the extremely ornamental and the strictly utilitarian type of garment.

Many of these coats of dress type show the new treatment of the collar that frames the face in soft fur in Mary, Queen of Scots, fashion. Again, they use the lovely half-cape effect on one shoulder and the long scarf ends of black satin that make a graceful throw.

The same idea is repeated in a brown tweed coat that has a cape over each shoulder and a long scarf of plain sand Canton crepe. Another of the feather weight tweeds that has a soft, suede-like finish has a very good idea in a detachable fur collar, making it practicable for spring and early summer wear. This model has long stitched revers, a narrow belt and narrow under collar.

The ensembles and two-piece costumes are interesting in their combinations of several materials and colors. One of the former is developed in navy and rosewood crepe georgette, trimmed with the lace that appears on so many of the season's gowns, and rose pearl buttons. Shadow crepe, a lustrous artificial silk fabric, makes the blue and orchid top of a suit of very fine navy jersey, and a reversal of the usual treatment is noted in the plaid taffeta skirt of a black and white outfit that has a plain top enlivened by a taffeta scarf.

Several of the newest notes of spring are manifested in a gown of soft black georgette that has a fine white lace vestee ending in a point that is finished with a long jabot of pleated goods. The wide tucking of the skirt is joined by the new 'spoke' faggoting that resembles wide hemstitching.

An uneven hemline, pleated skirt front and plain back and top that shows fringe as trimming, are further innovations in the mode of a navy flat crepe dress.

Printed materials are extremely good this year. In crepes and chiffons and silks, in cottons and jerseys, the floral idea is paramount, as it is in the hats. This is going to be a flower year, if the stylists can manage it. Conventionalized and natural, in bunches and groups, in isolated blossoms that are ringed with contrasting colors, in all-over patterns and in weaves that show embroidery of silken buds, they appear everywhere. The floral crepes are exquisite, and, when combined with flowing draperies and knife-pleating and lace, form some of the loveliest gowns of the moment.

Flowers worked in heavy Angora wool or in chenille are another novelty. Chenille is used in this way on the sleeves and collar of a lustrous black satin crepe with box-pleated skirt and surplice closing to the top.

Children come in for a great deal of attention this year, and their small garments are modelled to a certain extent on the styles that mark the clothes of the elders. A cape effect appears on the pretty coat of rosewood tricotine that makes one attractive small covering for a little girl. It has a collar of soft platinum coney. The throw scarf idea is repeated also in a smart little tweed coat of rose and brown mixture, with bands of garnet velvet as trimming. A kasha coat for the junior miss has a half-cape and is trimmed with silver buttons. The little girl may be as severely correct as Miss Prudence when she has done a tailored coat in Prince of Wales style.

There are fascinating bloomer frocks for children, also. One is developed in bright yellow Fuji, with cunning little white collar and cuffs and trimming of smocking in yellow and gold. Green smocking, which is so effective is a trimming, appears on a rosewood model, and a charming little frock is made of tub silk, in a polka dot pattern of red on white.

Sweaters for adult wear show the new fabrics in light wool and rayon mixtures, with plain V necklines and patch pockets. The majority are in the cardigan style.

For wet weather Miladi has a choice of pretty things. No longer do rainy days call forth the muddy tones of half-worn garments. In red and green, in soft blues and browns, she can face the moist day with a light heart. There are new heavy raincoats of "Durogloss" with warm lining, or garments of Scotch origin of slicker type, or coats of oiled cambric and rubberized silk. With them come intriguing small hats to match, with smart, stubby umbrellas and neatly-fitting "Raintees" in the same hues.

Negligees for languid hours are not

forgotten. And these, too, are decorative. Whether you like them in cotton or silk, in brocade and lace, or in plain, tailored effects, they are all lovely. You may have, if you are a bride, an adorable creation in brocaded satin of baby blue and rose, with long, silk fringe as trimming, or a dawn pink that sports yards of cream lace as frilly adornment. Or you may appear in a coolie coat of vivid orange with Chinese characters scattered all over it and bands of black as edging.

A house dress is supposed to be a very useful garment, but it may be attractive, too. When you get one of these floral cottons that has darling little rosebuds or forget-me-nots scattered all over it and make it up with chambray collars and cuffs, or invest in a dainty checked gingham, then you have a pretty dress for housework.

Hose also are ornamental this year. They have Cuban heels as a preference, but medium and high Spanish may also be obtained. They follow the vogue for combinations of materials in a style that combines suede with patent, or suede with kid, in cutout and inlay designs. And they adore buckles. With black satin evening slippers, you may have upstanding buckles of brilliants or rhinestones. The Colonial gore pump sports its usual trim buckle in square or round outline, and the one and two strap models boast tiny buckles as instep fastenings. Honey beige is popular, also blonde, soft grey, black and brown, the latter, in a golden shade, being particularly good for sports wear.

Accessories fall in line with the dainty and interesting modes of the springtime. Umbrellas come in bright shades, in variations of straight and crook handle, with blunt ferrules and tape edges.

Bags incline to the pouch shape, in alligator grained goat, morocco, smooth kid, and lizard grain, with novelty clasps and leather handles.

Shoes show variations in the "slipper" heel, in full-fashioned service weight that is silk to the welt, or in silk to the top and in seamless types. All come in the spring shades of atmosphere, patio, chaire, dune, nude, cedar, sonate, and black. Sports hose of wool and rayon show diamond patterns and checked designs.

One of the new type of handkerchiefs is of fine linen, with a hand-rolled hem and an inner border of white damask, while a tailored linen kerchief has a corded inner border. Hand-embroidered corner pieces in colors, colored linen centres, and lace edgings are also good.

Gloves come in kid, suede, washable chamois, and chamo-suede, in shades of white, butter, bran, dove, doeskin, moon, honey, beige, rose beige, deer, and toast, plain and with fancy cuff effects.

The new scarfs are lovely, in pastel and vivid tints and in plain white grounds, with floral designs in conventionalized forms, in geometric and architectural motifs.

One and all, with countless other desirable articles and materials, they have a home at the Teco Store.

NEW COLLAR.

A purple jersey sports outfit of long jersey jumper and pleated skirt has a flat, round collar of cream that terminates in the back with a tie with monogrammed ends.

SPRING STYLES FOR BOYS TO OFFER DAPPER ATTIRE

Brown Will Be Most Popular Shade, With Light Favored.

FLAPPER PANTS.

Blue Flannel, Double-Breasted Sport Coat Is in Demand.

Youngsters who are smart sartorially as well as scholastically will be pleased with the dapper attire that is destined to be popular this spring. Suit colors will be medium-light and light, reflecting the brightness of the season. Cassimeres and twists will be the most popular fabrics with tweeds not far in arrears.

Blue cheviots will surely be good; the same material in a diamond weave and in herringbones will find plenty of favor likewise.

Brown Shades Popular.

In hue the various shades and grades of brown will prevail. One manufacturer asserted that seven out of ten of his spring suit orders were for this color. Excepting for reddish-browns, however, the general tenor of the color range will be light, as stated above. Tans—yellow tans, in particular—will find favor.

Suit Models.

In general suits from sizes 6 to 13 will have golf pants, and 14 to 18, long trousers. There will be few of the two-pants suits with one long and one short pair of pants. Most suits will have two buttons and peak lapels in the single-breasted style. The blues will be mainly double-breasted with three buttons in sizes 2 to 11. The few double-breasted vests that will be sold will be found in the cadet suits (sizes 12 to 18) with six buttons.

As to Topcoats.

Redolent of vernal gaiety will the topcoats be, running to light colors and plaids principally. Tans and grays will be the colors as usual. While most of the topcoats will be of medium weight, the light but relatively warm camel's hair coat will surely find favor. The latter is found in sizes 1 to 18. For the juvenile—sizes 1 to 8—the reefer coats of blue cheviot with the naval emblem, double-breasted effect, and brass buttons will sell big. It is freely predicted.

From sizes 12 to 18 the single-breasted topcoat with three buttons, notch lapels, and set-in sleeves will be noticeably popular.

—And Odd Pants.

Mothers with the economy instinct will buy their progeny odd pants as usual. Plus fours will be light of hue and fancy in pattern in sizes 10 to 18.

For sizes 2 to 8 the "flapper pants" with the short cut, wide bottom, and belt to match is prescribed by many. One other item that is increasingly popular is the blue flannel double-breasted sport coat, just the thing for spring outdoor wear.

Spring Ushers in Masculine Style Readiness at GRAFTON'S

ALWAYS a bit in advance with the newest styles of the season—that's our policy. Our designer is one of the recognized leading men's clothing artists in America—keeps Grafton's on top. We use only British and Canadian woollens, every inch of cloth used in our factory is "Made in Canada" or "Made in the British Empire."

Classy New Suits

Men and young men who know what's what in smart things to wear—and don't mind unusually good values!—are invited to see the new spring suits. They're beautifully tailored from fine worsteds, cheviots, and cassimeres in the new tans and gray-blues. All the new patterns—all the smart models.

The popular price for our dressiest suits is

$25.00 to $28.50

Swagger Top Coats

The regulation straight-lined box model in the button-through style seems destined to be the popular model again this season. There's a tendency away from the extreme lengths of last spring, with 44 and 46 inches the leading lengths.

Very light colors — tans, gray mixtures, and heather effects—are the spring favorites, with tweeds leading the procession in fabrics, and coverts a close second.

Grafton's maker-to-wearer prices range

$16.75 to $19.75

The Big Double Store with Big Double Values

FLOWER TRIMMED HATS LEAD MILLINERY LINE THIS SPRING

Some Creations Shown Are Made Entirely of Tiny Flowers.

NECKS FURLESS NOW.

Coats Shown in Hall Store Have Fur Trimming on Sleeves.

"The flowers that bloom in the spring, tra la! have nothing to do with the case." The energetic gentleman who sang this long ago (wasn't it in "The Mikado?") wouldn't have a leg to stand on if he repeated the statement this year, especially to the makers of ladies' bonnets.

The Richard Hall, Limited, Store has some of the daintiest models in flower hats, the little snug-fitting things that are made this year, some entirely of tiny colored flowers, others in a half-and-half effect. One of the latter has a whole left side of white velvet violets, with a tiny bunch of these dainty things over the right ear. The rest of the hat is made of glistening black "petalline" straw.

A "paillosson hood" as another little hat is called, made in hood style, coming down snugly over the head, is also of black in a coarse weave of straw, and has a tiny, flame-colored upstanding feather ornament in the front as its sole trimming.

A bright red straw hat that is enchanting in its trimness has a band of heavily-embroidered silk and a three-quarter scarf to match, while a sand felt that shows a variation in a larger brim has an inset of a wide band of scarlet felt.

Several of the coats in the Hall Store mark the new vogue for furless necks and furred cuffs. A light green broadcloth of the shade christened "pinegrove" this season, has a scarf treatment to the neckline and deep cuffs of red fox. But a navy coat in chiffon broadcloth uses a whole skin

of red fox attached to the collar.

A coat of broadcloth has no variations in its soft brown hues. Its novelty leather belt, its shawl collar of golden mole and its shoulder flower, an accessory that finishes most of the spring garments of any type, are all of wood-like tints.

In the dresses, there are many pretty things. One of the three-piece ensemble that are so popular this season is developed in navy and sand, with a very effective treatment in the motifs, which are sand-colored on the navy and navy on the sand. The collar finishes with long stole ends.

One of the new fabrics, wool georgette, a light-weight, almost transparent woollen material of supple type, is in a dress of Harvest Island shade, made with long sleeves, its pockets trimmed with tiny buckles and lizard skin, which also appears on the collar and makes the trig narrow belt.

Coat styles appear in several of the georgette and crepe romain gowns with plain backs and long tunics. One model in navy georgette has a trimming of tiny silver buttons and cavalier lace cuffs, those interesting sleeve finishes that give such an impression of dashing smartness. Again, flared cuffs form a variation in the sleeves of a garment that depends for interest on its uniformly fine tucking, and a pointed outline to the inner slip of sand under navy georgette.

There is much gold and navy thread used in the fine embroidery of one model with a very lengthy tunic, long sleeves, button-trimmed, and neck fastening of a large cameo brooch. Another costume shows a finish of lace used in jabot effect.

A dress of the soft, silvery "pine-frost" green has a little belt of green suede and embroidery of scarlet and gold braiding that gives it a dashing military air, while a little sports dress of natural and rose kasha is developed in sleeveless style under a short jacket, and a silk crepe of Chin-Chin blue (bright sky blue) has a pleated skirt that appears on nearly every-one of the season's dresses and a fancy jersey top of orange and black, finishing with a belt of gilt leather.

On the main floor counters of the Richard Hall Store, are the novelties of the spring mode; entrancing flowers in silk and velvet, smart scarfs in bright batik designs, in square, triangle, and three-quarter cut, georgette collars of handkerchief style that come in peach and green and blue and white, dainty collar and cuff sets with plain and lace edgings, and the picturesque "pirate" or Van-dyke collars in lace and georgette, with their their variations of pointed fronts and backs.

MAKE WEARERS SEEM SLENDER

Graceful Dresses for Large Ladies Offered at Chesler's.

LONG, SLENDER LINES

Slenderizing lines for the full figure. That's an aim that any clothes manufacturer or the day might be proud to shoot at, and that's what several of the matronly dresses in B. Chesler's store have as a main attraction in their contriving. The lady who is fond of chocolates and whipped cream can still indulge her cravings. If she encases herself in one of these garments, she looks pounds lighter.

One of these graceful gowns is in evening or afternoon style, because it can be worn without sleeves or with the long tight sleeves which come with it. It is of soft crepe satin in black with a one-side drape effect that is fastened to the wide crush belt. The whole skirt is covered with long black silk fringe.

Another outfit of long slender lines that also hints of Oriental splendor is of navy georgette. The dress is made in absolutely severe effect, with a collarless neckline outlined by red. It is the coat that draws the attention. This is very long, knee length, and is worked with eyelet embroidery and a floral design in silk at either side.

A silk crepe frock in soft Madonna blue has narrow pleats extending in vertical lines from the neckline to the hem, crossed by the narrow belt. There are long sleeves to this dress with separate cuffs of beige georgette trimmed with ecru lace. The same effect is carried out in the little collar, while a lace-trimmed sand handkerchief peeps from the little pocket at the left side.

A variation in the ensembles, which come usually with sleeveless dresses and jackets with long sleeves is the black georgette which reverses this arrangement, thus allowing the wearer the pleasure of two dresses in one. The half-length jacket is trimmed with brass buttons in little groups at either side and has a collar of Paisley silk. This same bright silk also makes a wide sash belt and finishes the edges of the two tiers of knife-pleating which form the skirt section.

What the trade knows as a 'chicken" dress is of flapper type, and is composed of navy silk crepe de chine with a novelty in a shaped cape collar which is very shallow at front and back and develops into a cape over either shoulder. This portion is edged with Paisley silk which also forms the lower half of the skirt, made in a flary draped style.

Wheels of gold stitching form the ornaments on the skirt of another navy crepe which has a bertha collar of flesh-colored georgette, edged with lace. This model has oddly shaped sleeves that follow the natural curve of the arm in their fashioning.

Dyed blue lace in a Pekin shade forms a flounce on the skirt of a silk crepe of the same color and makes the little round collar also. A navy with a plain skirt has a striped silk top with black silk crepe used in its pointed yoke and cuffs. This same idea of pointing is developed in a beautiful model of rose beige that

uses self-colored silk lace in sections in yoke and flounce.

In the coats, there are trim garments strictly tailored, with black satin piping, kashas and tweeds with and without fur collors, broadcloth coats in navies and blacks with satin inlays and one odd coat whose broad scarf collars at either side, when thrown over the shoulders, gives a cape effect at the back. These scarfs and the shaped, bell-like sleeves are trimmed with flat silver buttons.

The little hats are very pretty with their tiny veils edged with silver, and the flowers which adorn so many of them. One is made entirely of red and black striped ribbon with a bunch of cherries at the right side, and another navy corded silk has fine lines of scarlet straw, a floral band and a tiny veil.

In Chesler's store can be found also full lines of shoes, lingerie, hose, scarfs, bags, and gloves.

The stock of shoes in Chesler's Store is a large one and is devoted exclusively to ladies. A gunmetal shoe is a novelty here that is very striking, made in pump style, with round buckles, and also in ties. There are black satin slippers and patents with spike heels, Oxford ties, Colonial pumps with sparkling buckles, sensible walking shoes in brown calf with low heels, and cutout effects that are attractive, one notable example being developed in patent leather, with blue leather ornaments at the sides.

OLD-TIME FLAVOR IN MODERN GOWNS

Full Plaid Skirts Are Displayed in P. Black Store.

Daguerreotypes of olden days showed the faces of gentle ladies who wore plaid silks made with tight bodices and full skirts, with glass buttons for trimming and big cuffs that turned back and fastened with the same buttons in smaller sizes. If the lady of the picture were to come to life today and wish for such a dress once more, she might find it in the window of P. Black's store at 381 George Street. It would have a shorter skirt, of course, but it would be practically the same garment.

"Aren't they quaint and old-fashioned looking? And yet they are the newest Spring ideas!" says a little lady looking at these pretty things in the window. Another picturesque gown with this up-to-date old-time flavor has tiny bows down its front, a top gathered to a full skirt, and a vestee of sand color. Still another odd effect of two tones in the skirt has a sand pleated section directly adjoining the rose pleats which form the balance of the skirt section. Rose and sand embroidery form the top.

A demure style and a garish color are developed in the bright "flash" red of a girlish frock that has a cape collar, a tiny over-collar of white edged with black and an upper section which ends in square tabs through which a belt passes. The knife-pleated skirt shows bandings of black.

Still another jaunty little dress with tight-fitting bodice and flaring skirt is developed in black silk crepe, its sand vestee laced with narrow rose velvet ribbon which also, with a rim of sand, forms the edging of the skirt.

Again this idea of tight bodice and full skirt appears in a navy and red crepe, trimmed with narrow yellow ribbon and yellow silk stitching.

A soft blue dress depends for effect entirely on its tie which is tucked in squares.

In the two stores of Mr. Black at the corner of King and George streets are also many staple articles of clothing for women and children, in gloves and lingerie, scarfs and bags, hats and coats of all type, in the latest colors and modes of the spring fashions.

Narrowing The Toe a Spring Trend in Men's Footwear

The outstanding style development in men's footwear fashions is the trend toward the narrowed toe and custom lines.

You can recollect, no doubt, the time when shoes assumed tabletop dimensions and "dogginess" was the thing. But the old order changeth and the keen edge of style smartness trims down the toes until they resemble the higher priced custom made lasts.

This movement, however is not carried to its extreme, and the medium broad toes will still prevail as popular models, especially among the young men. This change finds a synchronization in the trend toward narrower trousers and is commendable because it creates harmony in one's turn-out.

Oxfords will predominate, and as the season advances toward warmer weather, weights will decrease so as to provide a full amount of foot comfort.

The real light shades of tan are being replaced by the richer looking, medium shades. Black is holding its own, and in several centres is becoming more popular. Patent leather will find some adherents in shoes for general wear.

The wing tip is staging a revival on shoes shown by some leading manufacturers, but is evidenced by a simpler and smarter presentation. Neater stitching effects are also supplanting the heavy pinkings and perforations commonly associated with the balloon toe.

Heels find partisans for both rubber and leather. Individual preference makes the selection here and either will be in good taste. The higher heels promised for last season failed to materialize and so the medium height heel still supports the manhood of the country.

Shoes For Sports Wear.

All signs point toward a big sport season. Here your taste for color can revel in the black and white, tan and white, and two-tone tan combinations. Soles will be either of rubber or leather. The golfer who longs for a solid foothold in anticipation of a long and mighty drive will instantly select the spike sole shoe.

The widespread use of reptiles finds a foothold in men's sports shoes and is shown quite frequently in alligator grain.

For informal evening wear with dark sack suits, black calf and patent leather in the narrowed toe oxford evidences discriminating taste in style judgment. The tuxedo calls for dull black leather or patent, while full dress accepts nothing else but patent.

It would not be amiss to mention that the ownership of several pairs of shoes not only enhances one's turn-out, but also emphasizes economy. Three pairs of shoes worn on alternate days will last much more than three times as long as will one pair worn every day.

And so now, fortified with this style information, let us step along the avenues of Smart Dress and Good Taste.

DAINTY SCARFS ATTRACTIVE

Offered To Satisfy Present Vogue For Pretty Finery.

COMBINATIONS ODD.

The vogue for pretty things that has an outlet in bits of charming finery is demonstrated in the dainty scarfs with hand-colored designs, that occupy one of the front showcases in Moses Fine's store at 427 George Street. These are very attractive, soft-colored squares and oblongs of pastel-hued silk and crepe.

On the racks are some pretty dresses also. One is a black silk crepe with cape-like collar of white georgette rimmed with tiny black flowers in a petal-like design and edged with red and gold braiding. Another model shows the flair for odd combinations in colors that mark some of the season's models, in a mildly tinted green silk crepe that uses bright red buttons and piping for trimming, with tiny over-collar and cuffs of sand. A Goya red gown has a deep hip-band of black satin and gilt buttons down the front.

There are coats here of charmeen in navy and black and beige, with mole collars and button-trimmed sleeves, one sand-colored model having an interesting variation in long side panels of fine tucks. And there are coats of novelty tweeds. A line of new hats, in felt and straw and grosgrain ribbon combinations, also occupies a conspicuous place in the show-rooms of M. Fine's store.

Spring Footwear Fashions

Displaying the Latest in Styles and Shades

Ladies' Smart Strap Effects, Open Tie Oxfords and Pumps are here in their most appealing manner, in patent leather, stroller tan, honey beige and rose blush shades. These are priced from **$2.45** for Ladies' Patent One-Strap up to **$7.50** for the highest grade corrective Shoe.

RILEY & HICKEY LTD.

PETERBORO'S SMARTEST STORE FOR MEN 337 GEORGE ST.

Men's Spring Hats are BRIM-FULL of Smart Style Pointers

Topping the spring styles for men, the hat has become an increasingly important adjunct in achieving a smart sartorial effect.

This is due as much to the growing importance of color as to the requirement that the shape selected should be becoming to the facial type of the wearer.

Select Your Color With Car

A hat of the wrong color, out of harmony with the rest of a man's turnout, will murder an otherwise smart effect. And in this connection the matter of complexion should not be lost sight of.

Some men can wear a green hat most becomingly. Others take on a cadaverous, seasick tinge the moment the green hat settles on their head That is one reason so many men eschew the green hat in spite of persistent attempts to popularize it. They're not willing to take any chances. But it all depends on the shade of green.

Light Grays and Tans Favored

The most popular colors will be very light tones of grey and tan, with a leaning to browns and pastel shades in other colors.

The snapbrim hat with the raw edge will continue its present reign among the younger men for a time at least but there is increasing evidence that the welt-edge hat worn with the brim up all around and a single crease in the centre will eventually take the lead.

The popularity of the homburg hat is unabated among certain smart dressers, men who give a great deal of attention to the selection of the various articles of their attire.

The derby, too, is proving very much alive as a style item, especially among Eastern university men. Indeed, the vitality of this vogue is confounding many style authorities who affected to see in the recrudescence of the stiff hat a passing whim.

Brims a Trifle Narrower

The principal changes observable in the new soft felt hats is the narrowing of the brim and a tendency to a sharper pitch in the crown.

The term "narrower" may call up visions of the scissored-off effect so jauntily sponsored by first-year men in certain leading universities. But the actual width generally accepted as correct for the coming season is 2⅜ inches, the 2¼ inch brim being regarded as too narrow for the average face, and the 2½ too wide.

There will, of course, be certain stores offering all of these widths, to meet the demands of those strong-minded persons who want what they want as they want it—and are never satisfied till they get it.

Fancy Bands Moribund

Fancy bands on felts, according to the majority of authorities, have seen their halcyon days. Henceforth the plain band in harmonizing or contrasting colors will be most in evidence.

The points to keep in mind when selecting your new spring hat are: first, the type—whether snap-brim, hombourg, or welt-brim second, the proportions most becoming to your face; and third, the color in relation to you complexion, and to the other items of your wardrobe.

Straw-Style Straws

From present indications, there will be little change in the styles of straw hats. The sailor, or boater as the British call it, will maintain its customary supremacy, with the white leading the tans and brown shades by a wide margin. Colored bands will continue in favor, but very careful dressers will give their suffrage to black.

Panamas, in the favored optimo, telescope and fedora shapes, Leghorns, Milans and Bangkoks will be worn in about the same proportions as last year.

Higher of crown and narrower of brim is the model spring headpiece for the man of style; at the left is a dressy, silk-bound curl brim, a smart complement to the double-breasted Chesterfield coat; above, the welt-edged brim and, below, the snappy snap brim. All these hats are in pearl felt.

TWIN BELTS.

Some frocks go in so strongly for belts this spring that one does not suffice. A green and white printed silk has two one-inch suede belts, the top one white, the bottom green. They are placed two inches apart.

PRINTED COAT.

The printed coat over plain material in the frock is one of Paris' interpretations of the mode. Black shadowed crysanthemums in white background makes the coat of one white frock.

WHITE JADE.

White jade kid pumps and sandals will be worn this summer with white dresses. White jade is an off-white of soft beige tone.

NEW HOSIERY.

Chiffon hosiery, in opal mauve, is a newcomer. It answers the question of what to wear with the new purply shades of silks.

TWEEDS LEAD IN NEW SUITS

Large Variety of Colors and Styles Offered Men This Spring.

"ARMOUR" FOR BOYS

Scotch and Irish Tweeds form a leading part of the assortment of spring and summer suits that are to be found in the LeBrun men's clothing store. There is also a large variety of fine worsteds. In all large clothing stores there must be ample variety for the conservative and the stylish young man and no matter what style he wants he will find a large choice in this men's clothing store.

For the conservative dresser there are many plain greys and blues, both in the two buttoned single and double-breasted styles. For the stylish young man there are many suits of lighter color in tweeds and fancy worsteds. The young men's coats follow the lines of the body more closely than in former years.

Something new for boys is to be found in the "Boys' Armour Clad" suits. These are made with double elbows in the coats and double knees and seats in the pants. There are also two pairs of pants, a pair of longs and one of bloomers. A vest goes with the suit, and the coats are single and double breasted in fancy tweeds, grey, browns and many kinds of blues. Boys between the age of six and eighteen have a very wide choice in these made-to-wear suits.

Spring overcoats are in the slip-on and double breasted model and like the suits are very pleasing in color. The prevailing type is the Donegal loose woven tweed. For the quiet dresser there is a wide range of topcoats in brown and dark grey.

The snap brim prevails in the soft hat market, but the Christie is becoming more fashionable and will be extensively worn this summer. Caps are in Donegal and fancy checked tweeds.

More color is seen in the ties, with the Mogodor stripe prevailing. Shirts with the collar attached will be very popular this summer and in LeBrun's there are many to be found in dark shades and blue stripes. Broadcloth shirts are always a necessity in the well-dressed man's wardrobe and these can be found in white, blue, cream, and light stripes. Socks are much more colorful than ever and are found with beautiful patterns and colors.

Fashions for Future Debutantes

When little ladies of fashion put in their important appearance at the smart affairs of the springtime, you will see them garbed in modes that are veritable replicas of older sister's. This idea started in France and is sweeping this country with any amount of success.

The vogue among the 'grown-ups" for brightly colored fabrics has extended to the younger generation, and little girls' school and play dresses are in bright colors to keep pace with the elders in the family. Gay harmonizing tones appear to take the place of the practical navy blue of former years and cunning little frocks are to be seen in delicate pastel shades. Dresses that tub easily and successfully are in high favor, both with mothers and with their fashionable little daughters and these are smartest when in linen or cotton.

Printed silks are important, too, in the more dressy type of girl's frock, and these are generally trimmed with harmonizing band of plain materials, smocking and insets outlined by hemstitching.

It is our opinion, after our jaunt through the shops and stores, that the tan shades are to be the most popular for spring. All shades of blue are good, too; and red, always a favorite with the future debutante, appears in brilliant profusion.

Costume Ensembles

Already the costume idea is pervading the children's realm of fashions. One of the smartest we noticed had a coat of navy blue twill that was in the fasionable seven-eight-length and this was worn over a one-piece tailored frock of bright red crepe de chine and the coat was lined with the red crepe.

Other adorable ensembles were of tweed, much in the manner of feminine elders.

Coats Wear Capes

It is the fasion this spring for little sister to wear her coat wrapped sungly about her, thus emphasizing the importance again of the slim silhouette, so much favored just at this time. Capes are here to stay and one smart little model was of a lovely soft shade of blue, in kasha, and the cape was scalloped.

Scarfs of Material.

If the youngsters become vain over the new little coats, most certanly they are to be pardoned for although she is young, she is already very feminine and conscious that when she throws the smart little scarf that accompanies her new coat about her neck, she catches the admiration of all eyes.

Red Coats.

The shops are showing more red coats this season than ever before and the brick shades are the most prominent. Other popular coat shades for the spring season are navy, tan, rose and green.

PELICAN GRAY GOOD IN COATS

Leader Stores Display Many New Colors in Clothing.

SOME ODD IDEAS.

The soft pelican grey that is said to be very good this season makes an attractive coat of charmeen displayed in the stock of the Leader Stores at 291 and 293 George Street. This model has an effective trimming in bands of mixed black and white silk on the collar and cuffs.

Another coat of "pinegrove" green has a collar of white fur, while grey fur tops, a navy garment trimmed with black satin insets and tiny tucks. Other coat models are in the favored lines for spring wear, as are the little, snug-fitting hats of straw, felt and silk.

A pretty suit developed in the brown that is called marron glace has a crepe skirt and a top of silk and wool jersey, a material with horizontal stripes of silk in a woollen body. A bright rose canton crepe dress has an odd treatment in the sharply scalloped collar of knife-pleating which appears also in a band below the wide sash belt.

Shoes form one of the staples here and there are other articles, like gloves and lingerie and woollen sweaters, also children's wear. One dainty little pair of rompers is in rose color with sand flaps to the pockets and a floral design in yellow silk stitching.

WASHING MACHINE CUTS DOWN LABOR

Grant and Thorpe Sell Savage Line—Radio Service Important.

Savage mashing machines are at present the most interesting and striking articles displayed in the electrical shop of Grant and Thorpe, and Charlie Thorpe waxed enthusiastic as he described the many good points in the most improved model put out by this firm, for which they have been agents for several years.

"Gone! washday's last hard half," is the slogan of the company for this machine, and the description given by Mr. Thorpe would seem to justify it because there is no separate blueing, rinsing, or wringing to be done. The clothes are spun in and out of the water during the washing and spin-rinsed and spin-dried without handling. The washer is filled from the hot water tap and drained through a pump and hose attachment, making it absolutely unnecessary for the housewife who has hot water plumbing to lug pails of water. In fact, the spinning process can be carried so far that the clothes need only a short airing between the washing and ironing processes.

Radio service is a leading part of the Grant and Thorpe activities. They have apparatus for testing tubes and will test any without charge. While they sell the Westinghouse line of receiving sets, both battery and batteryless, they service all makes and sell parts for the man who prefers to build his own. Burgess batteries in all sizes are handled, a large stock being carried for the convenience of dealers in the district. Radiotrons are another specialty.

An English speaker unit, which Mr. Thorpe declares beats anything in that line for clarity and volume, has been imported by the company and installed in horns and bases made in this country.

Findlay electric ranges are sold by the firm, which stresses the fine finish. It is possible to keep the range looking as beautiful in the kitchen as it does in the showroom, according to the literature which goes with it.

Electric lighting fixtures of all kinds are an important part of the firm's stock. They do wiring of all kinds and handle a complete line of fixtures to go with them. That they are all up-to-date is stressed by Mr. Thorpe.

We Save You Money

On Fixtures and Wiring

NO MATTER how large or how small the job of installing fixtures or wiring, from complete buildings to single rooms, our expert busy workers can save you money and give satisfaction. Spring opens to-morrow, so

Let Us Figure on That Job

We shall be glad to give you an estimate without obligation. All work guaranteed to conform to the insurance and building codes.

A COMPREHENSIVE SHOWING OF ACCEPTED FASHIONS FOR SPRING 1928

Is Announced for

Wednesday, Thursday, Friday

March 21st, 22nd, 23rd

Spring is here and Fashion has given her last word in style correctness for the new season which has been interpreted and will now be revealed to the public.

The task of selecting and assembling these new styles has been difficult. though most enjoyable. The responsibility of style leadership must of necessity cause us to be very exacting in every detail.

Those who look to this store for guidance in authoritativeness, not only in style correctness, but for exclusiveness, quality and moderateness in price, will find each factor fully expressed in this fashion exhibition to which a cordial invitation is now extended to all.

AWAITS CALL FROM PEOPLE

Prince Carol, of Rumania, Willing To Return To His Country.

FOLLOWERS HOPEFUL.

PARIS, Mar. 20. — (Canadian Press.)—Awaiting the call of his people is the manner in which the policy of former Crown Prince Carol of Rumania is described by certain persons who heretofore have been considered his friends. They refuse to enlighten enquirers concerning the prince's present whereabouts, although they admit he is in seclusion in Paris—"alone."

One who had acted as the prince's secretary said yesterday:

"The intense enthusiasm of Carol's followers and the great demonstration of the Peasant party at Bucharest Sunday makes it appear as if Carol retained some of his popularity.

"There will be no bloodshed," he added. "Carol will return to the throne of his fathers legally and constitutionally, or will remain in Paris."

The former crown prince was still in Paris last night.

DRINK WATER IF BACK OR KIDNEYS HURT

Begin Taking Salts If You Feel Backachy or Have Bladder Weakness.

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means drink lots of good water every day.

CAVAN LADIES' AID ARRANGES SOCIAL

St. Patrick's Day Chosen For Successful Tea and Concert.

CAVAN, March 20.—The Cavan Ladies' Aid held a St. Patrick's social on Friday evening in the basement of the church, which was decorated with green appropriate to the occasion.

Lunch was served at small tables, and the program consisted of readings, music, games and contests, with Richard Matchett as chairman. Mr. Totten read a humorous Irish selection, and Miss Doris Tinney gave a recitation "The Wearing of the Green", after which Miss Annie Tinney sang a solo. Mrs. Snyder conducted a spelling match, and Mrs. Kennedy was in charge of a potato race and Mrs. James Douglas a peanut throwing contest.

Personals.

Misses Gwen Hunter and Alma Perrin, of Peterborough, spent the week-end at their respective homes.

Mr. Rose Carr was a recent visitor to Toronto.

Mrs. J. Swain spent the week-end with friends in Toronto.

Messrs. Archie Matchett and George McKnight attended the seed-judging contest in Cobourg on Friday.

Snow plows are being used on the roads getting them cut down before another thaw comes.

DANCE IS SUCCESS DESPITE BAD ROADS

Warsaw U.F.O. Social Well Attended—Debate Postponed.

WARSAW, March 20.—The U.F.O. dance held recently was well attended in spite of the dreadful condition of the roads.

The Presbyterian Ladies' Aid was postponed a week, in order to allow the ladies to go to Lakefield.

The Y.P.S. debate has been postponed for another week.

The salt ordered by the U.F.O. arrived in Lakefield last week. What is not taken at once by the farmers is to be placed with the local storekeepers and sold.

The bright sunshine for a few days last week settled the snow several inches. There is not much left on the fields, but a great deal of water, for there is no chance for it to get away.

The stage made a trip both ways every day last week.

FARM RESIDENCE BURNED TO GROUND

Frank Wilson Loses House Near Havelock and All Its Contents.

HAVELOCK, March 20.—The residence of Frank Wilson, on the Cordova road was completely destroyed by fire about two o'clock Monday morning, with all its contents.

When Mr. Wilson awakened the smoke was so dense that he was nearly overcome and it was with difficulty that he carried his sister, who is crippled, to safety. The cause is unknown, and a little insurance is carried.

BALDWIN REFUSES TO ORDER INQUIRY

Labor Member Expelled For Calling Statements Untrue.

LONDON, March 19 (Canadian Press).—Premier Baldwin, taking part in the notable debate in the House of Commons today on the Labor motion demanding an investigation of the famous "Zinovieff letter" incident of 1924, refused to order the inquiry demanded by the Labor party. He declared that no British secrets had been betrayed and no disservice to the nation done.

While the Premier was replying in this manner to Ramsay Macdonald, former Labor Premier who had opened the debate, there was a scene of disorder when Tom Williams, Labor, interrupted with the accusation that the Premier was making a series of lying statements. Williams refused to withdraw his remarks as demanded by the Speaker, and then was ordered to leave the House, which he did.

OBITUARY

REV. CHARLES H. BARLTROP.

TORONTO, March 20. — After a brief illness, the death occurred on Friday of Rev. Charles H. Barltrop, at his residence, 126 Pacific Avenue. The late Rev. C. H. Barltrop, who was in his 84th year, came to Canada with his parents from England when six years of age. He was ordained in 1870, at Norwood. He entered the ministry in 1866, serving as the circuit preacher of ten stations in the Owen Sound district.

MRS. AMY DOUGLAS HEUSTIS.

TORONTO, March 20.—Mrs. Amy Douglas Huestis, who passed away on Saturday morning at her home, 54 Huntley Street, was the second daughter of the late Richard Brown and Elizabeth Robinson. She was born in Toronto 1865, and married Arthur Edward Huestis, son of the late Dr. Stephen Huestis of Nova Scotia. Mrs. Huestis is survived by her husband, four children and three grandchildren. The children are: Mrs. Elsie Gillespie Fellows of Salem, Virginia, Richard Douglas Huestis of Montreal, Edward Archibald Huestis of Hamilton, Mrs. Victoria Mary Davis of Peterboro. The late Mrs. Huestis was a member of Sherbourne United Church and, as long as her health permitted, was a faithful worker, particularly during the years of the war.

MISS E. K. P. GRANT.

APSLEY, March 20. — The death occurred on Friday morning last of Miss Emma Kate Psyche Grant, at the Red Cross Hospital, from heart disease, at the age of seventy-five years. Miss Grant had made her home intermittently for more than twenty years with Mrs. Grant, her sister-in-law, in Apsley, and was well known and highly respected. She was prominently connected with the Women's Auxiliary of the Red Cross here during the war, and did good and faithful work in that connection in sending comforts to the Apsley boys at the Front. Her father, Rev. Dr. Grant, gave up the position of principal of a Grammar School in Kent, England, to come to Canada with his family sixty years ago when he was appointed rector of Tullamore, Ont.

The funeral service was held in St. George's Church on Sunday afternoon, and was largely attended, Rev. C. A. G. Spence, rural dean, officiating. Interment being made alongside her brother, Dr. Grant, in the family plot in the churchyard.

The pall-bearers were: Norman Lean, Hubert James, Jim Downing, Norman James, Philip Willis, and Stanley Windsor.

MRS. DUNCAN CAMPBELL.

NORWOOD, March 20.—Word was received here on Thursday last of the death of Mrs. Duncan Campbell in Regina, Sask. Deceased, whose maiden name was Hannah Honey, was a resident of this village for many years before going to Regina. The body is to be brought here for burial, and the funeral will be held from the Presbyterian Church on Tuesday afternoon.

HEINTZMAN Pianos

THE singing voice of the Heintzman Piano does not limit itself to the experienced hand of the great concert pianist. Even the first hesitating notes of the child pupil possess the rich timbre for which the Heintzman is world famous.

SPRING PAGEANT of FASHIONS

Wednesday and Thursday, March 21st and 22nd

And Continuing Every Day Thereafter in All the Departments of the Store

You Are Invited to Attend a Noteworthy Display of the New Modes on Living Models in the Women's Apparel Department, Third Floor, Wednesday Afternoon at 2 and 4 O'clock---Thursday Morning at 10.30, and Afternoon at 2.30 p.m. No Admission Charge.

ENTER SPRING! Fresh, buoyant, beguiling—arousing a definite restlessness and urge, which in the woman is crystallized in the desire for—new clothes. What about it—Madame and Mademoiselle—are you posted on the new fashions? Do you know the difference between this year's and last year's prints? Do you realize the significance of the new notes in coats—the scarf, the cape, the fur cuff, the higher belt, the off-shoulder fur? Have you given thought to the vogue for the ensemble, and the many ways in which it expresses its chic this season? Are you conscious of the return to femininity in the fashions for Spring—the frequent use of the scarf, the oft-recurring tight bodice and flaring skirt—the cognizance of hip lines? Do you know the trend of evening wear—the uneven hemline and the tendency toward individuality, with no one particular silhouette supreme? Are you aware of the importance of color in the mode for Spring?

All these twists and turns and radical changes will be on view next Wednesday and Thursday in this exhibition of Spring fashions. You will find it well worth while to attend and observe at first-hand the new in Spring wear.

A Summary of the Coat Mode

Its Fashion Marks

THE SCARF COLLAR—with one long end or two—or dissolving itself into a cape.

THE CAPE—with a flavor of the old pelerine—divided at the back—or with a half cape.

THE DEEP FUR CUFFS—sometimes placed above the end of the sleeve—invariably escorted by a furless collar.

THE CRUSH FUR COLLAR—a swagger mode united with furless cuffs.

STITCHING—rows of it on belts, collars and cuffs of tailored coats.

ENCRUSTATIONS AND TUCKINGS—usually on a diagonal line.

Its Fabrics

KASHMIR has tremendous chic in many versions, varying from a wide twill to a suede finish.

LIGHT - WEIGHT WOOL LENS.

TWEED—small patterned.

BROADCLOTH.

HOMESPUNS AND BASKET WEAVES with striking borders.

SATINS used for encrustations and scarves of woollen coats.

Its Colors

Beige from natural to warm tan beige, black, navy, green and grey.

The Ensemble Is Important

To every season it's outstanding feature. This years it is the ensemble. At its inception the ensemble was the garb of formal afternoon or the town costume de luxe. Now evening gowns have their matching wraps. Gay and practical sports ensembles have been added to the list. The tailored suit engaging so much of the attention of the Grande Couture has given the ensemble movement its greatest impetus. And, of course, the very new thing is the dress of printed silk with cloth coat lined with silk to match the dress.

Fashion is determined to have harmony. Yet so varied are the types and materials that there is no suggestion of a livery. Never in all the history of Fashions has good taste been so evident. Many ensembles are presented in this exhibition.

The Vogue of the Tailored Suit

Back comes the trig tailleur as a costume of high importance. The well-dressed woman is choosing it for Spring's first balmy days. And in the wake of the classic jacket and skirt of mannish cut, follow many variations in a more feminine spirit, which includes the suit ensembles with blouse or sweater—the sports suit—and the youthful short jacket.

Spring Brings The New in Accessories

Scarves Strike a Dominant Note

Gay printed patterns, clever harmonies of Spring's new shades. Recent arrivals are in square or triangular shape.

Flowers— The Costume's Color Accent

The important point about the Corsage Flowers this Spring is their gorgeous realism. Lovely representations of all manner of wild flowers. Fashioned from the materials that best depict their subtle textures, their delicate lines. And colors — ravishing, bright shades that fairly sing of Springtime.

Smart Shoes in a New Color

"Honey Beige" is the intriguing name of a new and lovely shade. The Spring footwear stresses this shade and exhibits it in smart models for daytime wear. Black continues popular, and it follows that many straps, gores and ties are of Black Patent Leather.

Hosiery Achieves Color Distinction for Spring

Such quaint names as they have!—the newly conceived shades for Spring Hose. There is "Blue Fox" and "Chaire" and "Patio" "Rose Taupe" and "Chateau." And lovely shades they are, too, graciously playing an important part in the current mode.

Paris Says the Hand-Bag Must Be In Harmony

The new, smallish, Envelope Purse, in cleverly combined colors—Beiges and Browns being featured. Leathers are Patent, Crushed Morocco, and others of a smooth, plain graining—a refreshing change from the heretofore popular reptile leathers.

And to the Home, Also, Comes Springtime

New Curtains and Draperies

Shot and Hair-striped Taffetas are something definitely unique. So are new Satin-finished Damasks in bold flower designs. And Rayon Nets, plain or patterned in modern Tuscan or Fishnet weaves. The newest trend in color is towards Biscuit and Champagne.

New Linens

Luncheon Sets and Doylies show decorative scalloped edges and much perforated work. Alice Blue, Gold, or Mauve are the shades used in bold, Brocaded patterns on very modern Linen Luncheon Sets.

The Tailored, for Daytime Wear

As much difference between night and day in smart clothes as there is between darkness and light. Straight-line, easy-fitting tailored frocks on one side of the wardrobe. Flounces, filminess, and color on the other. Lightweight woollens, knitted fabrics and precise prints for daytime. Lace, satin and flowering chiffon for evening.

Dresses Are Newly Feminine And Strikingly Individual

The Flounced Skirt

RUNS THE GAMUT FROM SLENDER OVERSKIRTS TO FULL BOUFFANT TIERS

"The frills, ruffles, pleatings, diagonal and spiral flounces of 1890 thinned down to 1928." Thus writes our Paris correspondent of the Patou collection. The flounced skirt is one of these late Victorian modes to be generally revived. And even in its modern restrained versions is still eloquent of feminine grace.

The Draped Line

INSPIRES JABOTS, MOULDED GIRDLES AND IRREGULAR HEMLINES

So many frocks exploiting draped effects in the new season. There are wide cascades, tiny ruffles, jagged points and diagonal lines. You have only to glance at any collection of spring frocks to see how ubiquitous is the vogue.

The Scarf Collar

STRESSES THE CASUAL NOTE THIS SPRING

There are scarves that swing from necklines—scarves with one or two long ends. There is the versatile kerchief that is worn on frocks for sports, afternoon or evening. And many similar collars with a jaunty, sportsmanlike air.

Millinery

This season it's the BRIM that makes the difference. Fashion has slashed it, rolled it, or tucked it under in a manner never seen before. Or it is conspicuous by its absence. By their brims will you know the Hats of 1928. And by a subtle touch of the feminine that's been missing for many seasons. You'll find much to interest you in this formal showing of spring modes.

The Mode for Wee Folk

New Sweaters

Are hand-knit of soft White Wool, with dainty hand embroidery in Pink or Blue.

New Bonnets

Faille or Crepe de Chine, brimmed with Satin Ribbon and delicate Lace Frill and trimmed with tiny Rosettes.

New Blankets

Are woven of soft Wools, the warp and woof being of contrasting colorings—which forms a pleasingly novel woven pattern. In Pink and White or Blue and White, Satin-bound at the edges, a few with dainty cross-stitch embroidery in gay colors.

SPRING FASHIONS
Make Their Bow

... arrives . . . the stage is ... as last season's modes step ...ringly off the sage of fashion . . . those of spring, 1928, appear, ...e alluringly gay than ever, more ...thful and more chic.

...is not to be wondered at, for ... recent Paris showing launched ... number of fascinating new ...es with the Canadian and Amer... ... particularly in mind.

...or regardless of what anyone has ... in the matter, the women of ...s continent have considerable ef...t on the trend of style and ...nch designers are most conscious this . . . hence we find the styles they are being shown in the shops ...rticularly suited to our smart types femininity.

...nger Skirts Introduced

...t begins to appear that the very ...finite attempt toward longer ...rts by designers, for several sea...ns, is beginning to have some ef...ct, as the very latest word from

Paris indicates that such as the ...ase. This may or may not become a fact, for women have grown fond of the freedom of the short skirt and it will be decided entirely by the favor with which it is received.

Other big news in the world of fashion, so far as the spring mode is concerned, is the expansion of the silhoutee. This is accomplished in a number of ways. Hemlines grow more irregular as the season advances and we see width being introduced in circular cuts, flounces, tiers or gathered fullness.

Hips, however, are fitted snugly and with the fullness extending from the hip line to the skirt hem. Jabots are entered into the lengthening process in many of the newest models for spring that naturally were conceived in Paris—begining at the neck line and extending to the hem of the skirt.

The only species of the mode that resists the irregular hem line to a large extent is the sport mode, although scallops appear in some of the most exclusive models that the shops are showing. There is no added length, the plaited skirt continues to be the favorite for sports wear although the circular cut, being more feminine, is favored by some of the smartest women.

Variety in Dresses

There is a world of variety in the new dress collections as they are being offered for spring, 1928. Colors run rampant and gay figured materials are important. Intricate cut and manipulation of fabric continues to be the high light, thus carrying out the elaborate formal air that has been so important for the last few seasons, perhaps because it gives the tall and slender look so favored by the fashionable women today. We find tunics in extremely good standing . . . many are wrapped tightly around the figure with shirred or plaited or circular fullness appearing at the opposite side.

Perhaps the most important single feature of the spring frocks is the scarf, either attached or separate, and in most cases, it is possible to be draped around the throat as milady wishes it. Oftentimes, the scarf is tied cowboy fashion in a double knot on one shoulder. As a rule, these scarfs are in great gay printed squares of lustrous silk and sometimes of double thickness. Little shoulder capes are prominent, too, in spring dresses and some of them are bertha-like, crossing the frock in the front and the back.

Lace is Important

At all the smart afternoon gatherings this spring, lace will be most important. It appears in many new and unusual ways and places and is always extremely becoming and unquestionably dainty. The more formal afternoon frocks favor entire yokes of lace that appear again on the sleeves in deep and narrow cuffs and invariably the lace cuff extends over the hand.

Two-piece frocks appear again in great abundance with lovely monograms, fascinating little pockets and interesting color bands serving as decoration.

Never has there been such a selection in delightful printed silks as are to be found in the shops this season. Sheer and heavy crepes come into their share of popularity with small designs in cluster arrangement favored. Sheer crepes and flat crepes in plaint colors are also favorites. Light weight woollens have been developed in all sorts of interesting styles for street wear and sports wear.

Coats Have Capes

Perhaps the two most interesting fashion features of the spring coats are the cape themes and the three-quarter length effects. Capes are cunning little affairs that flare about the shoulder . . . some reaching to the elbow . . . others to the wrist, while a few of the most exclusive models have coats that reach almost to the hem of the skirt. There is a decided tendency toward the normal and slightly higher placement of the waistline on the newest coats.

Women will be glad to hear that kasha and kasha types—materials so popular for balmy spring days—appears again to be the fabric of supremacy in the cloth coat realm, while silk coats are developed of dull finished silks. Other materials popular are cheviots, twill, novelty reps, covert, kasha and broadcloth.

Fur trimming for our new Spring coats is more as a matter of Madame's choice for the reason that both are equally smart but perhaps the very newest is the furless coat

which strangely enough and smartly too, is entirely collarless, depending thoroughly upon its smart simplicity for its success. Bleached red fox and beige fox are the most favored furs and appear in some of the more intriguing sport coats as well as coats of the more formal silk type.

One thing to remember when you set about to select your spring coat is the fact that the fur must be either on the cuffs or on the collar, bu it rarely appears on both Scarfs of the coat fabric flutter from many of the smartest necklines and are drawn through slots of material.

Sport coats have wide tuxedo collars of self material with great pockets, narrow front belts and large fox cuffs. The smartest coats to be found in the shops appear in pattern tweeds in check and herring-bone designs and it appears that soft tans and greens are the most favored.

The Tailleur Prominent

Without a question of a doubt, suits are to be the outstanding feature of the spring mode. For what woman doesn't revel in the feeling of smartness that a two-piece tailored suit gives her? This year the tailleur is perhaps more interesting than ever and especially are the skirts cunning. Plaits of every type and description are used and add interest to the new little suit skirts. Mannish materials are the most favored in the two-piece tailored suit—coverts, reps, oxfords, kashas and tweeds are important. With the tailleur, satin blouses or knitted jumpers are favored, while white pique vests are also frequently seen. These of course are strictly tailored after the manner of the suit with which these vests are worn. Navy blue is again the favorite for spring suits while oxfords run a close second.

Fascinating Ensembles

With the passing of the seasons, the ensemble has been growing in importance and this season finds some very fascinating modes for both the sports and dress wear. For sports wear, the shops are featuring the seven-eighth length coat.

Blouses of the ensembles have snug hips and collarless neck lines—one in batik that we noticed on our fashion jaunt through the stores, was a black kasha jacket model with finely checked black and white skirt, trimmed with vertical panels of the same fabric.

Shoes for the Feet of Fashion

It's to be a gay and brilliant season for the feet of fashion this spring—what with all the lovely new models to select from!

The shoe fashions for spring trip their way to fame and fortune as blithely and calmly as the first spring breezes, waft themselves upon the waiting world of fashion. For is there one amongst us women folk who isn't "itching" to slip into our new spring costume and slip our feet into bewitching spring slippers and hie ourselves off for a jaunt on the boulevards?

It has been written that as spring arrives there is a decided tendency toward a greater luxuriousness in shoes than ever. Light colored suedes, antelope and reindeer leathers, trimmed with vivid or harmonizing kids or reptiles are some of the most favored models for spring wear. For late spring the gay printed and embroidered linene are expected to be good and these will whirl with much success throughout the summer with chic little sport frocks of plain materials and saucy plaited skirts.

Pastel Kidskins New.

What is spring without several pairs of the lovely pastel kids? And the shoe designers, being very designing men and women and knowing this, have presented us with a host of lovely shoes in light shades of exquisite kid. Colors such as "cascade," a very neutral beige, almost white; "Fantom," a cool and subtle gray; Marron, a rich and lovely brown are three of the smartest shades for spring.

Frosted leathers and pearlized kids are being shown in great profusion and are exceedingly smart for afternoon wear.

Effective Combinations.

A great many combinations appear on the horizon of spring footwear. Kid is trimmed with lizards, pythons, water snake and astralac. Great important is attached to the almost startling revival of reptilian leathers. Water snake is particularly smart for spring.

Types For Spring Wear.

With the tailleur and the ensemble, strap effects are very good, also the oxford and the open type oxford with medium toe. The materials most fashionable for street wear are brown calf and kid, black kid and calf, reptilian leathers, patent and suede leathers.

When milady lunches, bridges or teas, she will wear any of the following with equally fashionable ease: light strap effects, pumps either trimmed or plain, low-cut step-ins and airy tie effects and these are in patent, rose blush and honey tan kidskin, black leathers and black satin.

In the evening with sheer and lacy evening gowns, straps and pumps remain the most important patterns and the favored materials are silver and gold kid, bullion brocades and satins of all shades to match the gown.

SPLIT BRIM.

A new green ballibuntil has its wide brim split and rounded in at the front and bound all around with matching satin.

FLANNEL ROBES.

Solid colored flannel coolie coats, with monograms elaborately embroidered, are favorites this spring for the beach.

STITCHED PATTERN.

Very fine hand-stitching in a cobweb pattern entirely covers the crown of a peach felt sports hat that tops a peach linen jacket.

ODD COMBINATION.

A string colored handekrehief linen one-piece dress has a top coat of transparent woollen in midnight blue which has a cute bow tie collar of the linen.

ALMOND TONE.

"Light bronze" is a new French green of lively shade that has an almond tone to it. A satin coat of this color tops a cream lace frock.

SILK PIQUE.

White silk pique is the charming medium for a guimpe in a red crepe frock, with matching cape. Silk pique promises great vogue.

DISPLAYING THE NEWEST AND SMARTEST

EVERY new color—every new modeling—every new interpretation of fine footwear—is exhibited in our display of shoes for spring wear.

FOR MEN!

The SLATER, styled along custom lines, is neatly stitched, and shown in Tan or Black, fine quality Calf leather; oak leather sole. Best value in Canada.

FOR LADIES!

For Ladies' wear, there is a bewildering display of new Spring Footwear. Light colors predominate, with contrasting trims, some with reptilian effects.

For Children and Misses, we feature the McFARLANE SHOE.

Prices always moderate in the extreme—marked in plain figures

HOWDEN'S

QUALITY FOOTWEAR - 406 GEORGE ST.

ROBT. FAIR CO. LTD.

The Fashion centres have contributed of their best to provide a Spring display of such lavish profusion as is now being shown at Fair's. Marvellous colors first catch the eye, followed by little gasps of pleasure as the charming models are revealed in all their daintiness of form and exquisite texture of materials. Both Garments and Hats correctly interpret the mode of Spring, 1928.

Lovely Spring COATS

Spring brings with it an excellent selection of Paris inspired Coats. Their handsome lines will fascinate you, and you will like their smartness and their interesting new cuffs. Fur trimmings are seen on either collar or cuffs, and the light, fluffy furs are the most important trimmings for early Spring wear. Kasha Coats, Black Satin Coats, Tweed Sport Coats, Coats for every occasion are here in a gala collection. Select your coat now, for the first Spring Coats are always a bit more individual.

Delightful New FROCKS

The Frocks of Spring have made their debut in Peterboro's Fashion world. Gay, alluring frocks they are with new frills and flares and bits of brilliant embroidery. Lace is lavishly used. The wider silhouette is seen, also the fitted hip line. The new Spring Dresses at Fair's are authentic models—many being copies of Paris originals. Everything new in line, color and trimming, as approved by Fashion's dictates. We do not stress the extreme in style, but the rich, lady-like garments, or youthful frocks of girlish loveliness.

Visit the ready-to-wear department on second floor. Take the elevator.

Second floor front is the home of our select millinery show-room.

HATS
For Spring
Dainty and Becoming

The Hat quietly assumes first place in Spring's ensemble with all the nonchalence of this gay, sprightly season. There is a new note of individuaity in every one of these crisp new models, fashioned by the nimble fingers of clever modistes. The irregular outline is outstanding in the mode—crowns are snug and round and brims attain all sorts of irregularity.

New Silks, plain figured---New Fabrics for Spring wear---New Wash Goods---New Linens---New Curtains and Drapery---New Floor Coverings, Rugs, etc.

Upon Your HAT Spring Smartness Depends

The time is at hand when madame and mademoiselle must select her spring wardrobe. Of course, she has been thinking and planning and contemplating that very thing for many weeks . . . but the time has come when important selections must be made . . . for spring is here!

Being a woman of fashion and a very wise one at that, she knows full well that any costume can be made or marred by a hat. For that reason, she goes about this business of hat hunting very relentlessly and before choosing, considers her new spring chapeau from every angle.

Variety Is Infinite.

But in selecting her hats for spring, 1928, she will find little difficulty in finding the hats of her dreams for the variety is infinite, the colors are spring's own and the models were conceived in Parisian minds . . what more can we ask?

And so realizing the fashion importance of hats, she sets about to make her selections. And here is some millinery style information that she kept in mind when making her all-important selections:

A New Silhouette.

There's an entirely new silhouette in the hats as they are being presented for spring. This quite naturally was conceived by the French and the whole secret lies in the novelty of the brim. The general idea, however, is one of simplicity, but the lines are unusually complicated. This new silhouette pertains solely to the brims, the crowns remaining snug and following the contour of the head closely, and are just as simple as ever.

Not only do we notice in the first spring hats that this complicated idea is limited to felts alone, for the straw hats appear to be very soft and flexible in that they are creased, tucked, draped and plaited in every way the felt is used. Straws are particularly prominent for spring, although felt never will lose its smartness and chic. In the straws, ballibuntl, sisol, bakou and parabuntl are the most prominent.

One thing is certain; that with so much variety, it is a simple matter to find a hat that adapts itself to one's face. Spring hats are utterly becoming. We notice the new more feminine aspect—the reason is they have more trimmings—and the silhouette is framed about the face in soft flattering lines, thus getting away from the plain sports-like effect so long in vogue.

Turn Up In Front.

Turned up in front hats are being sponsored by many of the leading Paris designers and we notice this effect throughout most of the spring collections in the stores and shops. Brims take on width and are turned up and slashed, plaited and laid back flat to the crown. Some are flat under the brim itself and render a smart note of novelty.

For the reason that turned up in front hats are youthful and flattering, it is expected that they will meet with no end of success. Hats for sports wear take on the wider brims; perhaps this idea was conceived by quick thinking designers who realized the importance of the collarless coat. The eyebrow effect is much in evidence, both in the brimmed and brimless models.

Embroidery Is Used.

Embroidery is used in new and novel ways. Colors are important and we find bright light greens, coral reds and soft yellows introduced in hats of black. All the light green shades in the interesting apple tones and many of the light blue greens are highly favored. The pinky coral tones that every woman loves appear in both felt and straw models.

And so the woman who loves color may choose to her heart's content for it's to be a season of gaiety and brilliance so far as spring hats are concerned.

The Larger Hat.

Several of the Paris designers have made very definite attempts toward the larger hat in their spring collections. And since there will always be devotees of the capeline, it is expected that these will be chosen by women who are the type that can wear them successfully and comfortably. But for the majority of us feminines, it is safe to say that the small hat will be the favored one. . . especially so, when it is very definitely accepted that the tailored suit and the collarless ensemble are two of the smartest features of the spring mode.

Ornaments Are Varied.

Gold and silver ornaments have found such favor in mlady's eyes that we see them again in all shapes and sizes on the newest spring hats. Some of the very smartest are of three metals. . . frequently a black metal, platinum and copper are combined. Usually they are along geometric lines. Composition ornaments and pins of miniature floral motifs and tiny rhinestones are being used on some of the most exclusive hats.

Designers invaded the jungle again and have come forth with all sorts of interesting animal pins, such as elephants giraffes, and running dogs.

NEW RIBBONS.

Crepe de chine ribbon and a new cire are chic as hat trimmings this spring. A rustic straw braid in natural shade has a wide brim on one side, the other short brim augmented by a big crepe de chine bow.

Fashion News of the Sport World

Fashion scouts have been scouting around Paris and cables have been flying back and forth across the Atlantic, flashing the latest news of fashion as it affects the sport world for spring.

And how interesting and fascinating it is . . . containing all sorts of sparkling new and very choice information for women who take their sports so strenuously and the matter of their sportswear so seriously.

Before we even begin to tell you about all the fascinating new things about spring sportswear, we want to tell you just how important the ensemble theme has become. It began its career several seasons ago and because of its chic and practicability, it has grown by leaps and bounds until now it appears at every smart sports occasion with equally smart nonchalance.

Tweed—that sturdy material, popular for centuries in Scotland—is the leader of a merry band of fabrics that go to make the charming costumes for both sports and travel wear. The tweeds that are smartest for spring, however, are not the small patterned woollens, rather the fine mixtures and plain cloths. For street wear, light-weight woollens are extremely important.

One and Two Piece Frocks.

Whether you go in for active sports or are content merely to be a fashionable bystander, you will be interested to hear the news that the one and two-piece dresses are equally important. Three-piece jumper dresses are even more smart and are most informal in nature insofar as they are developed of novelty knitted and woven fabrics.

While wandering about the fashion shops and ready-to-wear sections of the stores, we saw many interesting variations of the one-piece dress. One that particularly caught our eye was a white kasha which was appliqued in unusual modernistic designs in black. Another was a tan-beige cashmere, accented by bandings of brown. Another dress that would be equally at home on the street or in the field of sports was a gray tweed with triangular insets of black. We also noticed one of rose-beige wool crepe with insets of a darker shade. This darker shade appeared again around the neck and cuffs.

Feminine Note.

There is a decided feminine note struck in the woollen costumes for spring with the introduction of pastel tones. We saw a luscious violet blue woollen outfit. Another was in bright yellow.

For many seasons, prints have made very serious attempts to enter the world of sports fashions. This year it is our guess that they have exceeded their fondest expectations for the reason that we see prints prominent in sports costumes. Sometimes the print fashions the coat, with a frock of plain material and in just as many cases the idea is reversed. Plain crepes in all the rough surfaces, such as pongee and shantungs, are self trimmed and extremely simple, yet utterly chic.

Cardigan Re-appears.

When the Cardigan was introduced not so many seasons back, little did the world of fashion realize the heights of favor that it has apparently reached in the spring collections. Those for spring, however, are different, insofar as they are longer and belted and fit more snugly around the hips.

Others come with capes—and by the way, capes are one of the outstanding features of the 1928 spring sports wear. These little capes are often merely coverings for the shoulder, yet in many cases reach to the wrist. One of the smartest sports coats we noticed, had a cape that extended almost to the hemline in black and was cut away from the front of the coat.

With the Cardigan and one and two piece frocks, huge scarfs of silk are thrown nonchalantly about the shoulder and appear in brilliant colors or in plain shades to harmonize with the costume with which they are worn. These squares can be folded to conform to oblong lengths or can be folded on the triangular and draped over one shoulder, either tied in back or front or on one shoulder.

Sweaters Important.

Sweaters are no longer an accessory to fashionable sports wardrobes. They have assumed the importance of a necessity. Sweaters are particularly favored by debutantes and young matrons who take their golf and tennis seriously for they realize and appreciate the comfort of a sweater, to say nothing of its smartness.

The newest sweaters feature two-tone contrasts that are attained through stripes, sometimes encircling the shoulder and just as many times extending only halfway around. Diagonal effects seem just as important. A few lovely sweaters attained importance by the use of metallic stripes and gleaming threads.

Sports Jewellery.

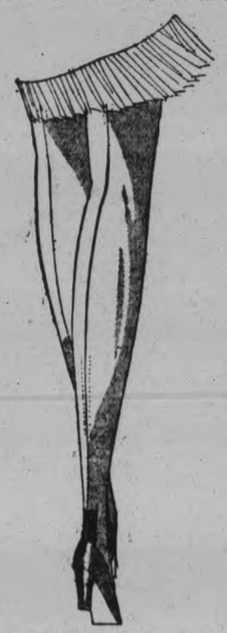
The vogue for sports jewellery continues to be most important. Vivid color effects are seen in jade green, lapis blue, rose and ruby shades and various shades of purple are combined in unique links of silver or gold. Sweater chokers are made of transparent stones in a large variety of colors. Crystal pins are introduced for sports wear and golden necklets, bracelets, brooches and earrings of the pendant type are exceedingly smart. Novel ornaments for sport hats are introduced in silhouettes of feminine figures playing tennis or golf. Serpent jewellery in both gold and silver and composed of several strands that are flexible, remain exceedingly smart.

BLACK BOTTOM HOSE POPULAR

Lavoie Knitting Store Offers Latest in Fancy Stockings.

NEW COLORS SHOWN.

The Black Bottom is still with us, perhaps not as popular as formerly on the dance floor, but very much up-to date in stockings. There is a variation in these hose with their black heels, however. From the colored oblong at the back stretch out little divided spikes of the same hue and black stitching outlines the seam all the way up the back. They come in the new shades of white jade (between fawn and light grey),



in honey beige (subdued yellow), in pearl blush (soft pink), and in Even glow (light gunmetal grey).

All these may be had at the retail store on George Street of the Lavoie Knitting Company ,as well as lingerie for women and children in the popular Maybelle brand, including brassieres in the new "cup" style, hand-painted handkerchiefs and scarfs, the new sweaters with fur trimming and the new jersey knit suits with soft maribou-like fur around the hems. Bathing suits and sweaters and hose for children are another line, and gloves of silk and chamoisette and silklisle. A novelty glove is the Swiss chamois suede with a cuff which extends in two little tabs fastened by a button and lined with colored silk. Stitching generously outlines the seams, the thumb, the backs of the fingers, and the cuff edges.

A new idea in hose at the Lavoie store designed to meet the varying requirements of the mode, has a foot made entirely of silk, with no mercerized section ,and an inner reinforcement of lisle. This does away with the appearance of the mercerized section, as often happens, either above the heel of the shoe or through a cut-out portion of the leather.

BUSINESS MEN APPRECIATE "THE NATIONAL" SERVICE TO THE WEST.

A quick trip to Winnipeg, combined with every comfort and convenience that modern railroading provides, makes "The National" a popular train for business.

"The National" leaves Toronto nightly at 9.00 p.m. arriving in Winnipeg at 10 o'clock the second morning. A short stop-over is provided in Winnipeg—time for important business engagements—before going further west.

Library— observation— buffet car (radio)—standard and tourists sleepers—diner and coaches; make up the equipment of "The National."

Tickets and information from Canadian National Agents.

Chest Colds Need Direct Treatment

It is an obstinate cold indeed that can resist the direct double action of Vicks. Rubbed on the chest, it acts 2 ways at once:

(1) Direct to air passages with its healing vapors released by body heat;

(2) Direct, like a poultice, it "draws out" the soreness.

acts 2 ways at once

VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

H. ABRAMSON

NOTHING BUT EMPIRE PRODUCTS ARE SOLD BY GRAFTON STORES'

Company Features British and Canadian Woollens in Clothing.

CHECKS POPULAR

Two-Button Sack Coats for Young Men—Boys' Suits Are Attractive.

Nothing in the store or factory but products of Canada and the Empire is the proud boast of the Grafton Company, which features British and Canadian woollen goods.

Grafton's spring-like clothing for men and boys gives a personal touch to the well-dressed man. After a personal visit on the part of this firm's leading cutter and designer to leading fashion displays, this firm offers the very newest models. For the young man, there is a two-button, soft roll sack coat with either clover leaf or notch collar. These suits are in a wide range of patterns and color with the large overcheck seemingly most popular. For the older man, the three-button, soft roll collar sack coat is chiefly worn.

The boys' suits are exceptionally attractive this spring in light fancy tweeds, of double-breasted model with bloomer and long pants up to the age of fourteen. Beyond this age, the boys are wearing double-breasted coats with long trousers.

At Grafton's, the kiddies' suits range from the fancy Oliver Twist suits to the middy.

The spring overcoats are exceptionally attractive ranging in design from the heavy overchecks to the fine diagonal weaves. Lighter colors predominate.

TANGO TANGERINE FAVORED FOR MEN

Shirts, Ties and Socks Brilliant in Al. Sharpe's Store.

Color is playing a feature part in the well dressed young man's clothes as they are shown by Al Sharpe, one of Peterborough's leading clothiers and haberdashers. Spring and summer clothes are there in smart tweeds. Kynoch makes a feature of the Tango Tangerine, which is a smart new shade and of a most pleasing color from sunny Spain. These are finished inside with a beautiful satin lining guaranteed to stand two years' wearing. Blue and black worsteds in fancy stripes also form a large part of this season's stock. "Butternut Brown" has also made its appearance along with many other shades of brown, which seem to be strong favorites.

Crew-neck sweaters, a thing that every young man wants for the cool summer evenings, are making a big hit. These are heavy jumbo knit in most pleasing combinations of brown and scarlet, and black and white.

Style is not forgotten either in suits and present indications point to a two-buttoned single-breasted model with slightly more body tracing lines than has been the case in the last two seasons. There is also a beautiful showing of double-breasted and three-button models.

Top coats, like the suits, are also very highly colored and are shown in double-breasted and slip-on models. There is also a new model, with a raglan sleeve and patch pockets, that will catch the eye of every well dressed young man.

Hats this season are much the same style as formerly. The snap brim still holds sway for the young man, and is shown in grey, vogue, moose, fawn, and medium shades of brown.

Shirts, ties, and hose have plenty of color, corresponding with the highly colored suits.

SPRING COATS

The Coats for spring show the straight lines that give them the dressy appearance. Fabric, design and color in the display at Chesler's are the last word in correctness and beauty of model.

DRESSES

The new Spring Dresses at Chesler's have the wider silhouette and a trifle of added length; every interesting new fashion detail has gone into the making of our beautiful Frocks for 1928 spring wear.

Easter Hats

We show a truly remarkable selection of brilliant Hats for spring. Fresh from the master milliners, just opened up for your inspection.

Ladies' Shoes Exclusively

We show the finest and most complete selection of exclusively Ladies' Footwear in the city. Specializing in Women's Shoes only, we feature the best makes and aim to have a Shoe to go with every costume. Our prices are kept down to the lowest possible.

Ask about our Deferred Payment Plan.

SUNNI YELLOW PLEASING SHADE

Some Pretty Dresses Are Shown in This Pale Golden Tint.

PLENTY OF LACE.

Sunni yellow, the pale golden tint that reminds the onlooker of sunlight is the color of one of the pretty dresses in the springtime stock of Nathan Fine's store at 283½ George Street. It has a variation in trimming in the smocking which appears on the pockets at either side and on the yoke, and it is finished with a narrow belt of gilt leather.

There are pretty party frocks of taffeta, one in yellow also, with orchid lining to the scallops on the hem, and another is a bright rose pink with a lot of dainty cream lace.

On the racks are the season's modes of many fabrics, dresses for afternoon, morning and street wear, dressing gowns, and hosiery in all the leading shades, and little, close-fitting hats in various colors.

DAINTY WEAR AT FLORENCE SHOP

Ethereal Model in Pale Grey Georgette is Really Exquisite.

Softly pretty dresses or severely tailored frocks are the mode this season. But for house wear, the new note in youthfulness is paramount. This doesn't mean the type of frock to which we have grown accustomed; a straight-line affair with a V neckline and a skirt barely covering the knees. But it indicates a departure from that idea, in flowing draperies, flaring skirts and trimming of tiny bows, buttons or lace or ribbons that float from neck to waistline.

Illustrative of this new accentuation of feminine grace and softness are some of the frocks in the Florence Exclusive Shop at 311 George street. Exquisite is the only term to use in looking at one ethereal developed in pale grey georgette. The front of the skirt is knife-pleated and the back is plain. The whole top of the dress is embroidered with silk flowers of rose and blue and gold.

Another gown that is quite extraordinary is a changable silk crepe in several shades of rose, trimmed with

faggoting and showing the very plain sleeves that appear on some of these dresses with the fussy bodies.

An unusual gypsy-like effect is achieved by a plain red silk crepe top, embroidered with gold thread and a skirt of navy georgette posed over bright red. Still another intriguing gown in ensemble style is developed in navy, with scarf collar of bright Paisley silk. Geometrical figures in an all-over design of black and red appear on the top of a model whose pleated skirt has a red border.

The spring hats have a home here also, and there is an odd suit in tweed that used red and pink as its ground colors and has a green velvet jacket of half length. An interesting brown tweed coat with darker brown kasha on the pointed cuffs has a collar of beige fox fur.

BLACK PATENT SHOE POPULAR

Neill Store Offers Tan and Beige For Late Spring.

OXFORDS MUCH WORN.

For early spring the R. Neill shoe store is featuring ladies' strap shoes, pumps, and oxfords in an immense array of styles and colors. Black patent leather with smart trimmings of fancy leather predominates for early spring wear, while tan and honey beige will be quite as popular for later use.

For street wear the tie oxfords in plain and cutout patterns of patent leather or tan calf with reptile trimming of different shades are much featured.

For men and boys the black and tan oxfords and the high shoes on the new medium toe lasts will meet with the general approval the honors being about equally divided as to the color. The misses' and children's department is crowded with new styles of strap slippers, oxfords, tie oxfords, and high shoes for all, even from the tiniest tot to the older school children, at the most reasonable prices.

THIS YEAR'S HATS GOOD ALL AROUND

Extension of Brim at Back is Feature of Models at Jean Horsfield's.

A story appearing some years ago in a popular magazine told the romance of a far-sighted lady who engaged the attention of the gentleman of her choice by always sitting in church in such a position that he regarded her from the left side. She had to change her usual pew to do this, but she explained it later by saying that hats were all trimmed that season on the left side, and she looked much more attractive from that angle.

This year, hats are attractive from any angle, even from the back. A new wrinkle in their formation that is prominently displayed in the millinery showrooms of Miss Jean Horsfield at 435 George Street is the wider back and the brim which extends all the way around, instead of

the cut-off like back brim which has been in style. This extension of the brim gives a softer effect to the back and a nicer outline to the hat itself.

One of the little models that demonstrates this back droop is of pale rose straw with a very wide band of rose grosgrain ribbon embroidered in silk flowers.

This idea of embroidered flowers is much used on headgear this spring, as well as the real blossoms in velvet and silk that make so many of the charming small hats. A dainty little model of "Sunni" yellow in finely corded silk and another of the same shade in straw show similar treatment in the diamond-shaped ornaments which are placed around their soft crowns, made of yellow and brown velvet.

An all-black hat of soft crepe satin has a tiara-shaped facing formed of silver beads and gold silk stitching.

A two-tone hat of violet and orchid hues is made of the new petaline straw, which also forms the foundation of a black shape whose left side is covered with a wide felt band of rose, blue and sand. Colored circles in felt ornament a black model which has a top of hemstitched corded silk and a tiny black veil.

These little coquettish veils that are really only eye-brow length in many instances come in silver and gold edged effects and wide mesh. Another pretty idea in hats for summery wear is stitched georgette, one white model showing red designs and a red applique motif.

Combinations of georgette and straw make two beautiful summer models in Miss Horsfield's parlors. One is of rose pink and white in a large picture shape. It has a rose facing and large hand-made georgette flower trimming at the left side. The other hat is somewhat similar,

developed in yellow with a hand-painted facing and band of yellow velvet, looped at the side.

One very dainty and striking small model is in olive green with bands of straw as trimming. These are made of blue, rose, sand and green. The top is plain in a checkerboard design of green silk and a flat bow of the straw bands, caught by a silver buckle, shows at the right side.

There is a fine line of matrons' hats in black and navy, with an effective sample in a tam-like crushed crown that is stitched all over its navy ground with grey and gold silk thread.

Lesson No. 10

Question: **How can our kiddies keep well and strong?**

Answer: **By building up a resistance against sickness, and that's easy and pleasant if they take**

SCOTT'S EMULSION

FLAPPER FANNY SAYS:

The average woman tries on everything in the store except the lamp shades.

NATIONAL COLORS SHOWN IN DRESSES

Red, White and Blue Combination is Popular This Spring.

"Hurrah for the red, white and blue!" is one of the favorite national choruses of the very patriotic country to the south of us that might well be sung by some of the spring's popular dresses, which stress combinations of these three colors. In the store of M. S. Zacks at 424 George street, appears a fetching sample of this mode. It is a navy canton crepe, with a pointed band of knife-pleated goods at the bottom and the same pointed knife-pleating extending down the left side from the shoulder. It has large white buttons outlining this trimming at the top, a collar of white and red joined by faggoting and a red and white belt.

An odd combination in colors in this store is a gown of rosy pink ornamented with pale yellow. The new bell sleeves that have such a graceful effect appear on a black silk crepe that has a yoke of white embroidered stiffly in gold.

One of the older modes which is coming back this year is the shirred joining of the skirt to the bodice, with a demonstration here in a bright red dress that has rows of self-colored ribbon as trimming, in an adorable treatment of horizontal lines of the ribbon on the skirt and tiny bows of red extending to the hem from the edge of the bertha collar of pale sand, edged with red.

Here are little hats of the "eye-brow" mode of the moment, in straws and felts, coats, fur-trimmed and made in strictly tailored fashion, and lingerie in up-to-date shades and fashionings.

HOROSCOPE

The Stars Incline, But Do Not Compel

Wednesday, March 21, 1928.

Although to benefic dominates today, according to astrology, the planetary government is read as rather uncertain.

All the signs point to commercial progress, and it is wise to make the most of the day's opoprtunities.

There is an encouraging aspect for those who start new enterprises, or enlarge old ones.

The seers warn that now is the time for independent individual effort in business, for soon co-operation and co-ordination will blot out all small concerns.

Big business is to be so much bigger than the liveliest imagination ever painted it that it will absorb to the uttermost all independent enterprises.

This is not a fortunate day for bettering one's condition and efforts to obtain new employment should be delayed, astrologers declare.

New power for workers everywhere and especially in Europe is foretold.

The seers again give warning that agitation against the British Government may gain in strength, owing to the heavy taxes and depressed financial conditions.

Jupiter is read as favoring arbitration and peace conferences, but there is danger of military alliances instead of disarmament pacts, according to astrology.

Wireless and other means of rapid communication will be of more avail in preventing war and bringing about international understandings than any number of conferences among the world Powers, the seers declare.

This is read as a lucky day for beauty culture and for physical training. American women are to be acknowledged as the loveliest in the world, the stars indicate.

Persons whose birthdate it is may have an uphill march this year, but they will benefit in the end.

Children born on this day probably will win high place, but success will come through merits and not because of mere luck.

BLACK TAFFETA.

Black taffeta ensembles will be smart this spring—the coat usually three-quarters. For diversity, chartreuse crepe fashions the coat lining and the blouse of one.

BABY CARRIAGES SELL WELL NOW

Spring Season For Them, Says Gerald McFadden—Has Good Line.

BREAKFAST SETS GOOD.

"Spring is the baby carriage season," says Gerald McFadden of the furniture store of Martin McFadden and Son, and the double row of carriages of various sizes and types shows that his store is in readiness for it. Wicker carriages, small and large, grey and cream colored are offered to suit every taste. Ranged as they are facing the door, all that is necessary is for the purchaser to walk in, pay his money, grasp the handles, and walk out.

The most popular type of furniture offered at present, according to Mr. McFadden, is the breakfast set. A pretty little set in blue grey occupies a prominent position in his store. Four Windsor chairs of rather uncommon design go well with the little drop leaf table and small buffet, the whole making a nice set for a breakfast nook or apartment dining room where space is at a premium.

Daybeds and davenports, popular articles of furniture in these days of apartments and small houses, are prominently displayed. Various types are ranged in the front window, but all serve the same purpose, being double beds by night and single couches by day.

What are technically known as "case good," that is bedroom and dining room suites of staple design, are the principal offering of the McFadden store, and many fine specimens of furniture are ranged along the walls. Beds, metal and wooden, mostly walnut finished but with a few in white, are accompanied by their appropriate dressers, chiffoniers, and other bedroom accessories, while dining room tables, buffets, china cabinets, etc., are neatly arranged for inspection.

A card table is almost a household necessity now that bridge, with its social amenities, has almost entirely replaced the plainer games of poker and euchre, and the latest in these are included in the stock. With a rubberized top, these tables can be washed and the spilling of tea, etc., will not harm them. The washing of a bridge cover after every evening of cards is thereby made unnecessary.

PRINTED SATIN.

New and lovely is an afternoon ensemble of rose-tinted flowers on a grey background in a new printed satin. Grey lace decorated it.

PINK LINEN.

A sleeveless tennis dress of pink line has tucks in squares decorating its waist. Its skirt is circular for contrast and a tailored belt with buckle joins them.

SINCE 1872 **H. LeBRUN & CO.** THE CLOTHIER

GEORGE STREET - - PETERBORO, ONTARIO

As You Enter the Portals of This Great Clothing Sale!

PETERBORO'S GREATEST SALE!

10 DAYS

STIC TO KEEP IT UP LONGER!

DAY, MAR. 21 9 A.M. sharp

Store Closed
Two Full Days

MONDAY and TUESDAY, March 19th and 20th, to arrange and mark down the entire stock for quick selling. This is absolutely necessary, as every item must be sale-tagged, marked to the low selling price that will make it move fast and furious.

A SALE WITH A REASON

In these days of extreme competition it takes a store with strength, breadth and the force of a giant organization to prepare a sale with bargains that eclipses them all. Such a store is H. LeBrun & Co., and WEDNESDAY, MARCH 21ST, opens such a SALE. After 55 years of successful business, we can truthfully say: The progress of this Store is more than physical—it's truer, higher even than this, for we are building it on a solid foundation of quality, service, honesty and fair play. YES, we are building it well for the regards of the people—their esteem, their confidence. It has grown and enfolded us—and NOW our BIG SALE—OUR GREATEST SELLING PAGEANT, coming as it does right before the EASTER SEASON when everyone is wanting their spring clothes. AND, we have included all our

New SPRING GOODS

in this Great Sale. This Sale has two reasons—one is to reduce our large stock to half what it is now; the other is to REACH OUT, grow bigger and get acquainted with at least ONE THOUSAND NEW CUSTOMERS, to create greater enthusiasm in our already satisfied customers.

H. LeBrun & Co. have never misled the public during all their 55 years of business in Peterboro. And throughout this GREAT SALE you will find that we are going to live up to the reputation of truthful advertising and square dealings. COME! This is an event that will pay you to travel 100 miles to attend.

SATURDAY SPECIAL

GEORGE STREET - - PETERBORO, ONTARIO

Victorias Win First Game of the Semi-Finals

VICTORIAS PLAY MACHINE-LIKE HOCKEY TO WIN

Show Efficiency and Experience in Gaining and Holding Lead.

FINAL SCORE 2-1.

Kitchener Loses One Count In Third Period—Break Through Stubborn Defence.

TORONTO, March 20. — Kitchener Green Shirts, champions of the Ontario Association and conquerors of the North Country's best, toppled before a clever, crimson-clad machine from Montreal last night at the Arena Gardens, and Montreal Victorias go into the second game of the eastern final of the Allan Cup series on their own ice with a one-goal lead. The final score was 2 to 1 for the Vics.

For two periods the shifty Montrealers checked the Green Shirts to a standstill and then maintained a stubborn defence through the final twenty minutes. The Vics rapped home their two goals in the initial period and Kitchener hurled back the Maroon defensive screen for one goal that was counted and another that was not in the third period. With two minutes to go in the final dash Molson passed out to Seagram, who had Goaler Cockburn at his mercy ten feet out. The big boy shot and the railside fans behind the goal jumped to their feet, crying for the score as the play continued.

The red light did not flash, and Referee Marsh allowed the play to go on until he heard the angry shouts of the crowd. He rang his bell and asked the goal judge whether or not the rubber had crossed the line. The goal judge replied that it had. However, Referee Marsh was "on" the play and disallowed it, claiming that the puck had struck the post without going into the net. Thus the Vics earned their margin of victory.

Aside from the goal scoring the Vics certainly did have a distinct edge on the play for two periods. In the parlance of the ring, the Montrealers took the first two rounds and Kitchener the last.

Game Lacked Interest.

It was a colorless contest. With Kitchener unable to get going under the close checking of the Vics' front line and the visitors always appeared willing to take a penalty for illegal blocking to prevent a score, if a Green Shirt did break through. Kitchener have shown in their series with Varsity and South Porcupine they are willing to open the play and provide the color and action a real fan likes, but the Vics went at their work with machine-like deliberation that spoke of efficiency and experience at the sacrifice of dash and daring.

CURLING

AT LAKEFIELD.

Result of games played Friday, March 16th at Lakefield for the Dawson Cup:

Dr. Lingwood	H. Miles
J. A. Porter	J. Knox
N. Payne	E. H. Northey
B. Q. Dench	D. H. Charlton
Skip 9	Skip 8
L. Webster	F. S. Brown
W. W. Yale	W. Robinson
Dr. G. E. Renwick	E. Watson
N. R. Wagar	J. E. Galvin
Skip 8	Skip 5

G. H. Spence won by default from C. Waldon.

N. A. Moore won by default from J. H. Payne.

Result of games played on Saturday, March 17th, at Lakefield in semi-finals for the Dawson Cup:

L. Webster	Dr. Lingwood
W. W. Yale	J. A. Porter
Dr. Renwick	N. Payne
H. R. Wagar	B. Q. Dench
Skip 12	Skip 12
C. A. Putnam	F. Madill
Rev. T. M. Wesley	H. J. Sutton
R. J. Jory	J. M. Simpson
N. A. Moore	G. H. Spence
Skip 11	Skip 7

The finals will be played on Monday night.

WAS VERY WEAK NERVOUS AND MELANCHOLY

Mrs. Geo. McKenzie, Campbellford, Ont., writes:—"A short time ago I was troubled very bady with my heart and nerves, the cause of it, I think, was my going through the change of life.

"I was very weak and melancholy, and so nervous I could hardly bear to hear a clock ticking, and I did not sleep well.

"I was advised to try

so I sent at once for a box; took them and got another, and before they were all gone I felt good, my nerves are fine, I do not mind any noise, and I can sleep well. I cannot recommend them too highly to those suffering as I did."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Newton Forced Out of Marathon When He Suffers a Sprained Ankle

WINSLOW, Ariz., March 20 (A.P.).—Arthur Newton, leader of the parade in the 3,400 mile foot race from Los Angeles to New York, was forced to drop out yesterday when he suffered a sprained ankle.

The pace-setting British runner, who had a lead of more than nine hours over his closest competitor on the basis of elapsed time, was six miles along on yesterday's 2.41 mile jaunt when his luck failed him. Newton has won 7 of the 16 laps since the large field of the runners left Los Angeles. He will remain with the runners to act in an advisory capacity.

His withdrawal enabled Andrew Payne, Claremore, Okla., to move up to first place in the competition. Nestor Ericksen, Port Chester, N.Y., won yesterday's heat from Two Gun Camp to Winslow in three hours flat. He averaged a shade better than eight miles an hour. The distance from Los Angeles, the starting point, to Winslow, is 575.72 miles. Ericksen's elapsed time is 107:19:37, placing him in fourth.

ONE TITLE BOUT SAYS RICKARD

He Will Stage Only Battle For Tunney's Title This Year.

OPPONENT NOT KNOWN.

MIAMI BEACH, Fla., March 20.—(Canadian Press).—Tex Rickard said yesterday there will be one heavyweight boxing championship match this year and he will stage it. His announcement followed a conference with Gene Tunney, the champion, and he added, "other promoters who want Tunney's services might just as well think of something else to want." The fight will be held in July against an opponent to be selected and at a place not yet determined, he said.

LEAF PLAYER ON SICK LIST

Prudhomme Twisted Ankle During Basketball Game Over Week-end.

SATTERFIELD ENTERS

ALBANY, Ga., March 20.—There was consternation in the camp of the Leafs yesterday when Johnny Prudhomme of no hit fame reported with a lame ankle. He could hardly hobble, and it is not likely that he will be able to get into action for several days. "Prudy" twisted his ankle on Saturday during the course of a basketball game played indoors because of the rainy weather, but kept the fact of his injury a dark secret until it became so painful that it had to require medical attention. This is the first casualty of the training season here. All the other players in camp are in the best of shape, and it will only be a matter of a few days before the Leafs will be ready for action of a serious nature. An effort will be made to arrange games with the local Southeastern League club, which reported today, and also with Atlanta of the Southern Association.

Manager O'Hara is delighted with the prospects, although he would be better pleased if Detroit would send along the catcher owing to the club. He has been unable to get any satisfaction from Pres. Navin in this regard and is beginning to fear that Phillips, who was originally promised, will not be shipped to the Leafs. He will be quite content with Red Hargrave or Shea, failing Phillips. In the meantime Fred Walmsley, the sturdy youngster from Coppercliff, is helping out in the backstopping department and making a fine fist of it. He is a decided find and will not be released outright. This also goes for Bedore, the stalwart infield recruit from Chicago. Jacobson, Collins, Rabbitt, Songer and Sexton are the only absentees. All but the first two named have signed and will be along in a day or so.

Jacobson is needed, as, barring Keyes, and perhaps Sumpter Clark, none of the newcomers possess much class.

There are twenty-five players in the camp, of whom ten are pitchers. In this particular there is no questioning the strength of the club. Don Hankins, who signed his contract this morning, Jess Doyle, Clarence Fisher, Johnny Prudhomme, Stan Lucas, Lynn Bobo, Billy Martin, Arthur Fraser, Frank Riel and Claude Satterfield make a fine crew. Martin is the only southpaw, but Manager O'Hara is hopeful of getting Billy Bayne back from Cleveland. There is still a possibility that Collins will come along.

Satterfield's appearance on the scene was a surprise, as he had announced that he was gong to retire from baseball for the insurance business and no attempt was made to make him change his mind. Apparently he was only bluffing, as he came to camp and signed his contract like a little man. Stan Lucas has better than an even chance of remaining with the club. Burchell likes his style and predicts a bright future for him. It is a little early as yet to pass judgment on the merits of the others. They are all huskies with the exception of Martin and Fraser, who are a little on the small size. The Leafs are in need of a first-class catcher to help out Rensa and Styles, a couple of experienced fly chasers and another southpaw. With these additions they will have a team worth while.

LEAGUE TITLE STILL IN DOUBT

Outlaws and Hydro Battle Ninety Minutes at Campbellford.

GAME ENDS ONE ALL.

CAMPBELLFORD, March 20. — The fans who saw the town league sudden death game last night got full value for their money. After playing thirty minutes overtime the teams were tied one all, and the prospects for a play-off this season are slim. The game was between the Outlaws and the Hydro and one team had to win to decide the championship of the league.

With the weather turning milder ice has become an uncertain commodity and it was hoped that the game last night would be the final but there will have to be another one yet if the league is not to be declared a draw. Both teams were in fine form and from the first, the game was well worth seeing. Tommy Stewart handled the bell and kept the players on their toes. Whenever there was any indication of loafing Tom took the necessary steps to pep them up. The penalties were like hens' teeth, few and far between. The goals were something of the same nature.

The Hydro scored the first goal when Cowell got a counter in the second period. In the third period Lambert scored on a rebound and the score stood one all. Thirty minutes overtime and no score found the players well fagged and in spite of their original intention to play till the game was won they found it advisable to postpone the play-off. There is a possibility that a second attempt will be made to-night, but at a late hour last night this had not been definitely settled.

Although there were no scores in the first period, Badgley managed to get hit above the left eye with the puck and had to retire to the dressing room. He was able to continue the second period. Later in the game Dr. Johnston got a couple of his teeth loosened and found that the pace was telling on him. He was relieved for a brief period. More than once his cool science saved a serious situation. Sam Flint, Outlaws, did some fast work as well. For the greater part of the play the Hydro found the rubber in their territory and the Outlaws had the upper hand. The goal tenders were frequently brought into the limelight and did some good work that seemed almost impossible. The entire game was of the standard that assures spectators that each team is out for victory.

The teams:

Hydro.		Outlaws.
Saunders	goal	Fox
Badgley	rd	Dr. Johnston
Beatty	ld	Sam Flint
Cowell	centre	Sarginson
Johnston	rw	McArthur
Ayrhart	lw	Blue
Wilks	sub	Rannie

CURLERS WANT ARTIFICIAL ICE PLANT FOR NEXT WINTER'S USE

Will Interview Rink Company—Committee Was Appointed.

ANNUAL MEETING.

J. H. Sedgwick New President —Prizes Presented.

The name of William G. Ferguson was written into the records of the Peterborough Curling Club probably for the last time at the annual meeting last night. To most of the younger members the late William G. Ferguson they knew was just an old man. Some of them perhaps remembered that his photograph was in the gallery of past president and therefore he must have been, once upon a time, an active curler. He was, and far more than that.

To the remnant of older members William G. Ferguson was one of the men who had established far and near the Peterborough Curling Club's enviable reputation for sportsmanship. The name of Peterborough was respected, even cherished, not only by neighboring clubs, but among curlers of Scotland, who had been received here with the warmest hospitality, and who remembered this town because of their association with such men as W. G. Ferguson. He loved curling because it was a gentleman's game, but especially because Scotsmen, much like himself, had brought it to this country. And, if curling ever become commercialized, as it were, and loses its traditional atmosphere of good fellowship, sociability and sterling sportsmanship, it may still be played with stane and besom but it will not be the same old game.

Alex C. Kay reported to the club last night that Mr. Ferguson, who died a few weeks ago, had left to his son, Thomas Ferguson, a large painting of an outdoor curling scene in Scotland, and his son expressed his willingness to present it to the club if it would be acceptable.

Mr. Kay moved, seconded by R. M. Waddell, that the picture be gratefully accepted and that Mr. Ferguson be notified to that effect.

Discuss Refrigeration

And, as a farther departure from the days of the Fergusons, Camerons, Rutherfords and their fellows, the club appointed a committee to interview the Curling Rink Company with respect to the installation of an artificial ice plant and that they report back as soon as possible. The committee is composed of Ira Moore, Ross Dobbin, John Marshall, W. J. Henry and Alex. Kay.

Mr. Moore said that a 35-ton compressor with ample capacity to freeze the three central sheets would cost $12,000. By their proximity the outside sheets would be hardened during mild weather and in "soft spells" there would always be three solid central rinks. Hamilton put in a four-sheet plant and used the ice for skating from November 15 until Christmas with a revenue of $4,000.

George Cairns said Kingston was figuring on refrigeration for two sheets, and Belleville had a committee at work.

As a director of the Rink Company, Walter Oke said that a recommendation from the club would carry weight. "We'll have to come to it," he remarked. "Oshawa are at work on their plans."

Officers for 1928-29.

John H. Sedgewick, last year's vice-president, opened the meeting, announcing that the president, Gray Copping was prevented by illness from attending. Shortly afterward, Mr. Sedgwick was unanimously elected president. He thanked the members for the honor they had conferred upon him and assured them of his best efforts to make the club as successful as possible next season. He asked for the support of every member because the work was no easy task, and it was only by generous co-operation that the desired results could be attained.

The new officers are:

Hon. President—Gray Copping.
President—John H. Sedgwick.
Vice-President—T. O. Donaldson.
Committee of Management—Herb Martin, Dr. N. H. Sutton, R. L. Dobbin, John Penrose.
Auditor—T. F. McArthur.
Representative to the O.C.A.—Ira D. Moore. Alternative, A. C. Kay.
Open bonspiel committee was reappointed as follows: W. G. Morrow, H. F. Foote, J. J. Howden, M. B. Chenhall, W. D. Campbell, Gray Copping.
Chaplain appointed—Rev. W. McDonald.
Umpire—Angus McIntosh.
John W. Mayneord continues as secretary-treasurer.

Financial Statement.

In reviewing the financial statement, which he submitted as secretary-treasurer, J. W. Mayneord said that it was not quite as favorable as most other annual statements. During the year a lighting account had been rendered by the Utilities Commission for the sum of $232. It was found that by some oversight the meter at the rink had not been read for several years. As a result the bill had accumulated, but was paid out of this year's revenue. The open bonspiel committee had asked for an additional grant of $100 and the membership was eight fewer than last year's, and the ladies' club was seven fewer than the previous years. These three items accounted for a total of about $450. To offset this shrinkage the club had to draw on its savings account. The retailed report follows:

Receipts.

Previous bal.	$267.51
From savings acct.	50.00
157 members at $15	2355.00
31 lady members at $4	124.00
Rink Co., half cost of sand ..	25.00
Telephone calls	.70
Refund express	.65
	$2,822.86

Payments.

Rent..	$1014.00
Salaries and wages	594.60
Light, 1925-26	203.38
Light	64.55
Water	27.11
Fuel	80.24
Insurance	50.40
Telephone..	27.00
Brooms	49.25
Printing and postage	32.85
Engraving	8.50
Prizes..	145.80
20 loads sand	50.00
Open bonspiel grant	300.00
Registration	45.05
Sundry accounts	48.35
Balance	81.78
	$2,822.86

T. F. McArthur reported that he had audited all the accounts of the club and found them in first class order.

Resolutions of Condolence.

R. M. Waddell moved that the condolence of the club be expressed to the families of the late W. G. Ferguson, Herb Hair and C. H. Pennyfather, the latter of Walkerville. The motion was seconded by John J. Howden. In presenting the resolution Mr. Waddell recalled that W. G. Ferguson had not only been a president of the present curling club but also of its forerunner, the old Peterborough Curling and Skating Company and "was one of the finest men that ever trod in shoe leather in this city."

Presentation of Prizes.

The feature of the season's games was the record made by F. C. Weber's rink in winning the Rober Neill trophy in the district bonspiel, second place in the scheduled games and the E. G Patterson cup, representing the first prize in the vice-skips' bonspiel Instead of selecting separate prizes for these three successes, the committee pooled the money and bought a single prize, an exceptionally fine club bag for each member of the rink. Its personnel was John T Braund lead, Harold Freeman second, R. C. Herald vice-skip, and F. C. Weber skip. Mr. Kay congratulated the rink upon its outstanding achievement and said he believed it was a club record.

Mr. Weber attributed the success of his rink to regular attendance, harmony, enthusiasm, good luck in the pinches, and a little good curling.

The second prizes, thermos jars, in the Neil trophy competition, went to Wm. Lang's rink, his assistants being A. W. Pratten lead, Magistrate Langley and J. C. Strickland.

As winners of the first prizes in the scheduled games Ray Best skip, Geo. Cairns, Jim McDonald and Don Fitzgerald received the James Kendry trophy and four silver cake dishes presented by W. R. Widdess.

John J. Howden presented the third prizes in the scheduled games to the rink skipped by J. R. Marshall, with Manson Comstock vice-skip, B. W. Watt and Oscar McGill. The prizes were stainless knives.

Second prize in the vice-skips bonspiel went to George Hill skip, Jack Wiley, R. Hutchinson and Gerald McFadden. The prizes, cake plates, were presented by W. D. Campbell.

For the sixth time F. C. Weber won the R. M. Waddell trophy for the highest score in the local points competition.

A memorandum relating to the open bonspiel was laid over until the autumn meeting.

TUNNEY DEFEND TITLE IN JULY

Will Be Only Title Match For That Class For 1928, Rickard Says.

OPPONENT NOT SELECTED

MIAMI BEACH, Fla., March 20 (Canadian Press)—Gene Tunney will defend his heavyweight championship next July in a bout against an opponent not yet selected. It will be the only title fight in that class for 1928.

That much came out of a conference here yesterday between the champion and Tex Rickard, New York promoter, together with a sharp warning from Rickard that other promoters dickering for Tunney's services haven't a chance, and an expression from the latter of his willingness to "fight any man in the world."

To Rickard has been left the task of picking a suitable antagonist for the champion, Tunney announced in a formal statement with the comment that "every contender so far has had his chance and it seems to me that any further talk of elimination is idle."

Rickard contributed the statement that he would name an opponent at an early datee.

A place for the bout also is yet to be selected.

The definite retirement of Jack Dempsey from the ring caused a hitch in their previous tentative plans for a fight in June and another later in the year in which the former champion and the survivor of Rickard's elimination tournament were to have figured as opponents for Tunney, they declared.

Both agreed in separate statements that with Dempsey having left the picture, only one match this year was possible, and that one would be all that would be essayed, because of the lack of a second opponent.

MORE LAMPS USED WITH FURNITURE

Piano and Bridge Lamps Shown in Profusion By McBride and Franks.

A pleasing variety of furniture for any part of the home, whether it be the bedroom, the breakfast room, dining room, living room or verandah is to be seen at the furniture store of McBride and Franks, Charlotte Street and as in clothing or any other line of merchandizing, there are many new features that have come with the spring season.

Chesterfield suites, always popular, are shown with coverings of mohair in taupe, plain wine, mulberry and green shades, while to set such furniture off, there is a tendency on the part of the home furnisher to employ more than one bridge, floor or table lamp.

Breakfast room sets are rapidly gaining in popularity and at this store, they may be seen in enamelled finishes with combinations of colors such as black and yellow, blue and grey. They consist of buffet and drop-leaf or gate-leg table and four windsor type chairs.

Walnut and oak in solid or five-ply veneers are used in making the better class suites for the dining room with copies of the periods, and heavy turned legs being the styles most seen. Butt valnut veneer is very artistic when shown in this furniture.

This season's stock of bedroom furniture provides a wide range of styles. There is a noticeable tendency to return to the straight end bed rather than the bow end type, with walnut, walnut veneers, and walnut finished birch the chief materials used. Steel beds, springs, and mattresses are quite popular with turned spindles similar to those of wooden beds.

Coil and cable springs with steel frames and a long life guarantee and the felt mattress are being sold, while to the customer who desires the very best, is shown the Fischman spring mattress which is the last word in bed comfort.

While the triple mirror is still seen on the vanity dresser, there is a decided tendency toward the single mirror, whether it be stationary or swinging.

Sun room sets are to be had in a wide range of willow, reed and fibre, the finishes being plain and enamelled. Of the three, the fibre is to be given first consideration. Chairs and rockers of split cane in natural finish and varied color trimmings are shown for the verandar.

Miscellaneous pieces, each with its own charm, are convenient and beautiful. Walnut and reed sewing baskets, gate-legged tables, chesterfield and chesterfield end tables, tea carts and windsor chair are still popular as well as odd chair in solid walnut with seats and backs upholstered.

Silk and Swiss panelling for windows and plain silk nets in ivory and golden shades are always popular in the curtain line, while fine fillet nets are shown in a wide variety at low prices for the bedroom to the better grades for the living room. Side drapes and portieres are seen in plain velours. Silk fabrics in plain and stripe effect and poplins are shown as are colored casement cloths for bedroom use or Scotch madras for bedroom, dining room, or den.

GRACEFUL LINES ACCENT CURVES

Cylindrical Silhouettes of Recent Years Out of Style Now.

McNABB OFFERINGS.

To look like a tube or a cylinder was the aim of the lady of some years back, when she sallied forth to choose her spring clothes. This year, the curving lines of the circle seem to be in evidence. Not that slimness has gone out of fashion. Not at all. Now we have the slimness that is not aggressive or bony, that is accentuated, when you possess it naturally, by these soft, graceful lines, and that is simulated, if you happen to be inclined to stoutness, by the flowing draperies and elegant simplicity of the mode.

This effect of slim elegance is noted in many of the frocks and coats at McNabb's Ladies' Wear Store at 373 George Street. The ensembles are especially good. One in navy and white crepe romain has the entire skirt pleated finely in tiers. The white top ends with a wide band of red and silver. Another skirt in accordion pleating in the lovely shade of green that is called "pinefrost" has a top with cape collar of georgette and insets of gold lace.

A Blackshire model in navy georgette has an inner camisole of lace and a silk braiding ornamentation that gives it the effect of a sampler. A gray pelican lining gives a striking effect to a second navy gown that uses lace-like embroidery with narrow tucking, for trimming, and has a lace jabot to the blouse portion.

Flemish blue georgette with a gold lace vestee, bloused top and draped skirt, has a wide tucked belt, while a dress of Misty Morn (fawn) georgette has applique embroidery of flat silk flowers in a maroon glace (brown) shade. A red and white velvet flower finishes the top, which has a square neckline.

Something just a little different is the old triangular neckline of a peach beige dress that has pointed inlays of self-colored lace on the blouse front and back and the skirt. A blue and rhinestone buckle makes the finishing touch.

Bell sleeves, diamond-shape insets of embroidery, accordion-pleated ruffle to the Peter Pan collar and a tiered skirt are features of a sand and blue ensemble.

The black and white combination that is always so stylish is noted in a georgette frock with cascade draperies on the blouse and skirt. A new idea in this frock is the scarf which depends over the right sleeve and the five parallel rows of steel beads that make a chain-like belt.

The polka-dot idea in silk embroidery is very noticeable on a navy and Goya red ensemble with scarf tie, finger-length jacket and box-pleated skirt front. The same polka dots make embroidered sleeves on a dress of navy, varied with Cora Bell (rosy red).

The coats at McNabb's store are up-to-date examples of the latest mode for spring wear. Blanket cloth comes in rose and Flemish blue and there are coats of kasha and tweeds in feather and regular weight. One model that uses a scarf collar can be worn in three ways. Coats of charmeen and tricotine have fur and plain collars.

The little hairline stripe suits in tailored effects are in stock here also, to be worn with the smartblouses that are developed in white flat crepe, in white crepe satin, in pussy willow silk and printed silk. Triangular yokes outlined with stitching, soft front jabots, dangling cuffs and the new neckline that is an enlarged V defined by geometric lines of hemstitching, are features of these smart blouses.

TONES OF NATURE USED IN CLOTHES

Men's Garments of Many Colors Sold By Teco Stores.

In the Teco Store this year it would seem as if the weavers turned to Nature for the colorings of the new fabrics for men's clothes. The new tan and brown shades were inspired by the sands of the desert—the warm browns with glints of brighter colorings were prompted by the granite rocks of Scotland—the blueish greys may be seen in the mists o'erhanging an English heath or moor of an early spring morning. Whatever the source, they are the smartest for spring.

Suits will be more square of shoulder with the trim lines of the athlete accentuated at the hips. The trousers will remain medium width, some will slightly taper from the knees to the more narrow cuff.

The topcoats are single breasted slip-ons with the English fare to the skirt or—plain box backed Chesterfields are favored. There is a more definite turn to the Raglan shoulder noted, in keeping with the trend towards the athletic figure.

The new hat, accordng to Teco, emphasizes the narrow brim of unusual fineness and slightly higher crowns. These are also shown in bound edge in standard blocks as well as the popular welt brim. The colors include light pearl, medium grey, light fawn and brown.

The ensemble idea in shirts is designed to become this season's vogue —that is, wearing a shirt and tie that more or less match. Green shirts with green ties—blue shirts with blue ties, and so on.

Tie patterns this year seem to include everything—stripes, checks, and small all-over figure designs. Bows are in the batwing and butterfly shapes, featuring small figured designs and polka dots.

In shoes there are to be found many trim looking styles, heavier models for street wear, smart styles and stitchings for younger fellows, and straight last sand plainer models for men of more conservative tastes.

Fancy English wool half hose featuring the new shades are on the shelves. They are of a medium weight for early spring wear. The patterns are smart and something entirely new. They have various figured effects in contrasting colors on grey, fawn and new lovat ground.

NEVER KNEW A WELL DAY UNTIL SHE TRIED TANLAC

It's terrible to be sick all the time. To drag through the day tortured by the griping pain of indigestion and blinding headaches. To be driven almost frantic at night by twitching nerves that keep one wide awake hour after hour. To see one's self slipping away in weight and strength. To try remedy after remedy without results. To become so discouraged as to think health would never come back. This was the unhappy life of Mrs. Elizabeth Dubry, 129 Windsor Avenue, Windsor, Ont., until one fortunate day "A druggist advised me to try Tanlac. The very first dose gave me relief; and day by day I could feel myself gaining in strength. By the time the first bottle was empty, I had a good appetite, my stomach did not pain at all, and my nerves had quieted so that I could sleep at night. After finishing the second bottle of Tanlac, I had gained eleven pounds, was eating my meals with a relish, and I felt a new person. This was more than a year ago, and I have never had a sick day since."

If your trouble is the same as Mrs. Dubry's, do as she did—take Tanlac. This good, pure medicine contains roots, barks and herbs—Nature's own remedies for the sick. The cost is less than 2c a dose—less than 6c a day to be free of pain and suffering. Get a bottle at your druggist's—your money refunded if not satisfied.

THEATRES

AT THE CAPITOL.

"THE DIVINE WOMAN"

The Capitol has an excellent program for the first three days of this week. McNabb's annual Spring Fashion Show, which is described fully in another article, with the feature picture, "The Divine Woman," a very interesting production, a good comedy and the usual run of entertaining short reels, makes up a lengthy evening's program.

"The Divine Woman" is one of the very human type of pictures which deals with romance and love, with passion and temperament and drama. It is said to have been based on the life story of the "divine Sarah" Bernhardt, but does not carry its principal character along to the finale which marked the close of the great actress' career.

Greta Garbo is superb in the role of Marianne, child of a gorgeous demi-mondaine of Paris, who is disowned by her mother and goes out on the street to meet Lucien, a poor and handsome young soldier of France.

Lucien falls madly in love with the vivacious, warm little creature with the pale face, and takes her to his aunt, a woman, by the way, who is ugly but extraordinarily interesting in her few appearances on the screen. Through his love for Marianne, Lucien fails to join his regiment in time for departure for Algiers, and is imprisoned as a deserter. In the meantime, Marianne, who helps the friendly aunt to do the washing which makes the latter's livelihood, is discovered by the patron of her own mother, while peeping slyly at the stage performance at one of the Paris theatres. This man, Monsieur Legrande of the Theatre Legrande, is impersonated by Lowell Sherman in a truly outstanding performance, whose insouciance and calm imperturbability under all conditions is remarkable, giving more than a hint of the type of stage acting made so popular by the versatile Adolphe Menjou.

Legrande offers to give Marianne the desire of her heart; a chance to act, and she accepts, forgetting Lucien and becoming involved in the maelstrom of Parisian stage life. She becomes a famous actress.

Later, Lucien comes and denounces her for her unfaithful and evil life and then bids goodbye to her forever. Right here is the psychological moment of the play. Marianne is confronted by a choice between the life, the wealth, the fame, that she covets, and her real love for Lucien. The picture tells you the ending, and it is well worth seeing.

It is a really fine production that owes its supremacy to the acting of Greta Garbo, with splendid foils in Lars Hansonas Lucien, and Lowell Sherman as Legrande. The other characters are also very fine, especially the beautiful and frail mother of Marianne. The atmosphere of the stage projects itself through the entire picture.

It is rather curious that types like Marianne's, full of Gallic fervor and life, and Lucien's intense and concentrated passion, should be portrayed so well by two actors of Scandinavian and cool-blooded lineage The programe had a capacity audience last evening.—Jeanette.

AT THE REGENT.

"CRADLE SNATCHERS" SERMON IN LAUGHTER DELIGHTS AUDIENCE

"Cradle Snatchers," a mirth covered sermon brought gale after gale of laughter, from the audience who witnessed the first showing of this hilarious farce at the Regent yesterday.

Without exaggeration this is the best comedy drama shown locally in a year. The story of three wives who find their their husbands go hunting, not for ducks as they claim but for chickens, and who turn the tables on their deceivers by hiring three college boys to make love to them to arouse their husbands' jealousies, is screamingly funny.

The sub-titles which accompany the action, the casting, direction and the story itself, make all together a perfect picture.

Louise Fazenda, gorgeous blonde who insists on having a real Spanish lover with a kick, while she is at the business of getting even with hubby is ideally cast and gives a perfect performance of a neglected wife who turns loose for the time of her life. While J. Farrell Macdonald as her duck hunting husband who finds too late that his wife was not as easy as she looked, brought down the house.

Ethel Wales and Dorothy Phillips as the other two wives, and the three college boys hired to act the Romeos for the occasion, do their share toward making "Cradle Snatchers" the unqualified success it is. An entertainment supreme from every angle

What CAN a Man Believe?

By BRUCE BARTON

Author of "The Book Nobody Knows," "The Man Nobody Knows"

II—Should Religion Be Abolished?

THE ship l'Orient carried a distinguished company of men upon an exciting errand that summer evening in 1798. The youth of twenty-eight, who had flamed across the sky of Europe like a comet, was on his way to greater glories.

"Europe is nothing but a mole hill," he exclaimed. "It is only in the Orient that there have been great empires and great revolutions, there where six hundred million people live."

So he was headed for Egypt to found an Oriental empire, and he was taking with him as helpers the best engineers and scientists of France.

On this evening he sat relaxed but interested, while the savants talked about religion. They said that while Egypt's religion had made its history, the religion itself was only myth and humbug. This was true of all religions. During certain phases in human development they had their uses, but the time for them had long since passed. There was no God, and men had now reached a point where they could dare to say it. Thus they argued, these scientists in whom the spirit of atheistic revolt was so strong, as it was rampant in all France at that hour. And Napoleon leaned back and smiled and listened. Finally he rose to leave them, and as he did so he lifted his hand and pointed to the stars that shone brilliantly through the deep black sky.

Napoleon's Reply

"Very ingenious, Messieurs," he said, "but who made all that?"

Here is another story, also about a warrior, Captain Martin Scott, that famous crack-shot of our southwestern frontier.

"I was once buffalo hunting in Arkansas," said the doughty captain. "I was on a strong, well trained horse, pursuing a bull, when we arrived at a rent or crack in the prairie, so wide that it was necessary for the animals to leap it. The bull went over first, and I, on the horse, following it close, rose on my stirrups, craning a little that I might perceive the width of the rent. At that moment the bull turned round to charge; the horse perceiving it, and knowing his work, immediately wheeled also. This sudden change of motion threw me off my saddle, and I remained hanging by the side of the horse, with my leg over his neck. There I was, hanging on only by my leg, with my head downwards below the horse's belly. The bull rushed on to the charge, ranging up to the flank of the horse on the side where I was dangling, and the horse was so encumbered by my weight in that awkward position that each moment the bull gained upon him.

"At last my strength failed me; I felt that I could hold on but a few seconds longer; the head of the bull was close to me, and the steam from his nostrils blew into my face. I gave myself up for lost: all the prayer I could possibly call to mind at the time was the first two lines of a hymn I used to repeat as a child: 'Lord, now I lay me down to sleep'; and that I repeated two or three times, when, fortunately, the horse wheeled short round, evaded the bull, and leaped the gap. The jolt of the leap, after nearly dropping me into the gap, threw me up so high I gained the neck of the horse, and eventually my saddle. I then thought of my rifle and found that I had held it grasped in my hand during the whole time. I wheeled my horse and resumed the chase, and in a minute the bull was dead at my horse's feet."

It is a long jump from Napoleon to Captain Scott; what have two such dissimilar characters in common? Why link together two anecdotes so seemingly unrelated?

Mysterious "Something"

Both stories are illustrations of the same curious fact. In every human being, whether emperor or cowboy, prince or pauper, philosopher or slave, there is a mysterious *something* which he neither understands nor controls. It may lie dormant for so long as to be almost forgotten; it may be so repressed that the man supposes it is dead.

But one night he is alone in the desert under the starry sky; one day he stands with bowed head and damp eyes beside an open grave; or there comes an hour when he clings with desperate instinct to the wet rail of a storm-tossed boat, and suddenly out of the forgotten depths of his being this mysterious *something* leaps forth. It overreaches habit; it pushes aside reason, and with a voice that will not be denied it cries out its questionings and its prayer.

"Now I lay me down to sleep!" What a prayer for a man like Captain Scott, whose feet are fast in the stirrups, who hangs in double danger from the horns of a bull and the hoofs of his own horse, expecting within five seconds to be gored or trampled to death! Could any words be more ludicrous? Yet the form of the words is negligible. The significant fact, the amazing fact, is that such a man in such a situation prays, and the prayer he prays is the first he ever learned.

Tomorrow—Of What Stuff Is Religion Made?

FULL TIME M.O.H. RESOLUTION IS LOST

(Continued from page one.)

"The letter from Dr. Bell this evening explains that changing the system is cause," added Ald. Ackerman.

"Why not keep the same M.O.H.?" queried Ald. Cotton.

"That's up to the council," said Ald Ackerman.

Ald. Lowe asked if Dr. Young would be able to collect his salary up until February. The act said that the M.O.H. was appointed in February he said.

Alderman from Missouri.

"A friend loaned me a copy of the act," Ald. Stocker began, "and I find that you are conferring on this man more power than the Mayor of Peterborough. I'm from Missouri: you have got to show me."

"The Department of Health has written explaining how we can go about it," countered Ald. Ackerman. "The council can do as they like. A great deal of thought has been put into it. As far as raising expressions of doubt now after two previous motions, it looks as if they were no willing to go ahead."

Answering a second query from Ald. Lowe, City Solicitor Wearing expressed the opinion that the Medical Officer was not appointed from year to year and that all that would be necessary would be to give him sufficient notice.

Ald. Phelan questioned whether the courts would, if Dr. Young should sue, accept the minister's decision as to what was cause for dispensing his services. The matter had, replied Mr. Wearing, never been dealt with by a court. He agreed with Ald Phelan that it would be better to have a bylaw to dismiss an officer appointed by bylaw.

"I stand where I did at the first of the year," declared Ald Macdonald. "There are a few difficulties to be overcome but we should stand together and meet them, and stand behind our committee."

Ald. Ackerman recounted the previous votes on the matter. The first time, Ald. McItnyre and the Mayor had voted against the resolution, and Ald. Hamilton had been away. Ald.McIntvre had said that he had more information and with Ald. Hamilton, had supported the matter the next time. The vote of nine to two should satisfy the ratepayers that the aldermen favor having a full time M.O.H. The question had been discussed thoroughly and the resolutions brought in had been a result of that discussion.

Should be Thrown Open.

"I'm just the same as I was before" Mayor Denne declared. "I am opposed to the way that it was brought in. Dr. Young should have been given a chance to hear what the committee intended, resign, and apply for the job if he wanted it. The job should have been thrown open. I have nothing against Dr. Young or Dr. McPherson."

"I'm of the opposite opinion to what I was then," began Ald Cotton. "I think Dr. Young should have been given a chance and we should show reasons why he should not be continued. I don't know either man well, but I don't think we did the right thing."

"I did vote for it the last time but since have changed my mind," admitted Ald. McIntyre. "I think the council should pass a two-thirds vote favoring the appointment of a full-time M.O.H.. The thing should then be thrown open. Change your motion," he suggested to Ald. Ackerman, whose answer was a short "No."

The first vote on the motion was a four-four tie. When Ald. Ackerman called for the yeas and nays Ald. Huffman and McIntyre, who had not voted, joined those opposed to the motion.

"My mind is not made up," Ald Ald. Huffman began in explaining his reason for not wishing to vote "The information I have gathered since the last meeting has been for and against. I don't know either well enough to decide which will be the better man. I have information that some citizens think that any citizen who pays taxes should be given a chance. I have been told that Dr. McPherson was a good M.O.H. before he went overseas to do his bit, and that he has been good on the schools."

"I think it strange that after all the work, and the council being apparently in favor of a full time M.O.H., the council should now be voting against it."

"You are both out of order," interrupted His Worship. "You should have discussed it before the vote."

"It seems to me a funny position," continued Ald. Greene, "and if you haven't faith in this committee you should appoint another committee."

"Go on with the business," instructed His Worship, but Ald. Ackerman held it up long enough to ask what are the Mayor's plans for reopening the matter being told that a new resolution would have to be introduced.

"As far as I am concerned," declared Ald. Ackerman "I am quite prepared to work on the matter in council, but not on any committee, in view of the course taken."

Much Paint Needed.

"You're taking all the appropriation for the police officers," remarked Ald. Stocker, as Ald. Ackerman read a list of all the rooms of the city hall which needed to be painted. The appropriation is $200 and Ald. Ackerman wanted to know how much he could spend. The police rooms, clerk's office, council chamber and committee room were included.

"Can't the City Trust do it?" asked Ald. Macdonald.

"I think we ought to do it ourselves," replied Ald. Phelan. "If the City Trust does it they charge it to us next year."

"I think it is too early in the season to exceed the appropriation for work," declared Ald. Greene. "I would move that Ald. Ackerman be instructed to sspnd the $200 on the most urgent report."

"We started out to fix up the three offices," said Ald. Stocker. "Now we're going over all the building. I second the motion. The police commission got $25,000."

An amendment that no action be taken carried.

Ald. Cotton asked what could be done for the former Ashburnham town hall. Ald. Ackerman stated that the hall was wanted principally for one organization and it would open up other matters of a similar nature.

Ald. McIntyre took exception to this. The hall was used by many organizations for concerts, etc., and now they have to come across the river.

Ald. Phelan pointed out that the City Trust gets the revenue from the stores and suggested that it be ordered to do something to fix up the hall.

A motion reiterating the council's wish for further information about the gas plant was passed, although Aldermen Greene and Stocker were of the opinion that it would be as well for the Hydro Electric Power Commission to sell the plant to some private company if it had an opportunity.

Methods Censured.

A. G, Turnbull, saleman for the Adams Grader Company, launched into a condemnation of the Council's methods of dealing with the salesmen offering machinery to deal with the rut problem, but was headed off. He had a machine in the city last week for a demonstration and was anxious to know when a decision would be reached as to whether the council would buy it or not. He seemed little pleased to hear that still another was to be shown. Told that the Board of Works was handling the matter, he still sought a definite date, and Ald. Phelan moved that the whole matter of the purchase of a grader for removing the ruts be left over until fall.

"I thought that you were really intending to take care of the matter this spring," he retorted. "That's why I was glad to demonstrate. Each year when the ruts appear the council gets busy looking for a machine and arranging demonstration. If I had known the matter was going to be passed over—"

"Move we adjourn," interrupted Ald. Greene, but the Mayor mentioned another matter.

"—It costs a lot of money to bring machines here," resumed Mr. Turnbull, but Mayor Denne porceeded to ask Ald. Stocker to arrange with the Border Transit Company for the use of the truck to smooth off the ruts when they are softened by the sun at noon., and Mr. Turnbull subsided.

Ald. Greene mentioned that the ruts are bad on Charlotte street and Ald. Huffman retorted, "We just put the matter over until next fall."

MANY QUESTIONS ARE DISCUSSED

Legion Members Hear Reports of Committees and Uphold Ban on Gambling.

BEGIN PLANS FOR PICNIC.

The last remaining barriers that appeared to be a means of restraining unattached ex-service men from becoming Legionnaires, were effectually swept aside by an irresistible frontal attack that characterized the C.E.F. members of other days at last night's meeting of the Legion. The meeting was one of the largest held mor many months. The debate on the many questions brought up for discussion was of a high order, and the speakers taking part showed considerable ability as orators in presenting their respective arguments. The auditor, W. Swanger, Vomrade Crowe, chairman of the Euchre Committee, and A. Spencer, of the Entertainment Committee, presented reports. The president reported on relief work.

The question of prohibiting members playing cards that flavored of a gambling nature, a step recently taken by the Executive Committee, was discussed at length and with great heat, but when the vote was taken, the action of the directors was sustained.

Each member present pledged himself to try to bring in a new member at the next meeting. If this is done, an additional 150 members will be enrolled.

A sub-committee, consisting of Comrades Morley, Hardie, and McNelly was appointed to gather data with a view or organizing a monster picnic for ex-service men and their dependents, this to include all Peterborough County and outlying districts.

A vote of thanks was accorded to the retiring secretary-janitor for his services during the past ten years.

McNABB FASHION SHOW.

McNabb's Annual Spring Fashion Show, which is a feature of the performance on the stage at the Capitol Theatre during the evenings of Monday, Tuesday and Wednesday of this week, forms a very interesting portion of the programme. It was watched with much interest last night by a large-sized audience, which filled the house to capacity.

The showing was extensive and included examples of nearly everything in the way of spring attire, in coats, frocks for dress and sports wear and evening gowns, the latter forming a gorgeous ensemble for the closing. The furs worn were from the showrooms of Wm. Lech and Sons, the hats from Mrs. J. Wilson's millinery parlors and the hairdressing was done by Madame Merriam, who also assisted in the make-up. Canes, swagger sticks and purses were from Warne Brothers' store.

Mannequins were from the Peter Robinson Chapter I.O.D.E., and were Mrs. Homer Borland, Mrs. R. C. Cummings, the Misses Mildred Morphet, Grace Allen, Violet Davidson, Florence Adams, Olga Johnston and Miriam Rutherford.

Vera Johnston, radio artist, of Toronto, was a special feature of the entertainment, wearing a very pretty evening gown in bouffant style, and singing several songs in pure, clear soprano voice that brought her plenty of applause.

The showing opened with a trim sports costume of grey kasha, the long coat lined with the Goya red that made the top of the dress and appeared in the little close-fitting hat. A very odd effect was achieved in another gown by a material resembling leopard skin in a black and gold weave that former the top of a black skirt portion.

Printed silk was much in evidence, both in entire frocks and in blouse sections over dark skirts. The ensemble suits which were shown demonstrated one example of this, in a short navy jacket and navy skirt, pleated in front, the top and little coat collar being developed in the printed silk.

The capes which are such a becoming style note this season appeared in several instances, one novelty in a little garment that had a cape in the back and a jacket-like buttoned arrangement in the front, being worn over a dress of printed material. Scarfs also were on several of the dresses and on many of the coats, the tailored examples of the latter achieving an especially smart appearance with long scarf collar ends over the shoulder, plain lines to the back and front, and the snug-fitting little hats with tiny veils, with which they were worn. These little hats were fascinating examples of the mode, developed in many shades and in variations of ornamentation. The stylish full-furred scarfs showed black, red and beige for skins as favorites, while slender swagger sticks added a final touch of interest.

Coats were in the furred and furless collars of the season, with dark models trimmed with diagonal bands of self-trimming in some instances and with the straight, graceful lines that are sometimes varied by equally graceful cape collars in full and half styles.

A striking suit in the ensemble section was developed in black and white, with narrow red bands, and the same interesting colors, black and white, were noticeable in an unusual coat with long-cuffed sleeves, button-trimmed. Touches of embroidery in contrasting and metallic effects were on many of the gowns, with green chosen as the trimming of a two-piece suit of faded rose. All the season's favored colors, from black and white to Lucerne blue, pinefrost green, rose beige and a very bright tango shade, were demonstrated in the various frocks.

The final ensemble was in evening dresses. The majority of these showed the popular uneven hemline and were considerably longer than the customary type. Sleeveless, with tightly-fitting bodices and bouffant skirts, they were developed in taffetas and lace, one gorgeous model showing maize all-over lace posed over a rose pink taffeta painted in large floral design. Scintillating ornamentation in silver and gold was on several of these exquisite frocks. A large silver flower was the only ornament of one model made of pale blue taffeta, with a differing treatment of the neckline in the pointed lace yoke of the front and the rounded yoke of lace at the back.

Fire Kills Three.

BOSTON, Mar. 20 (Canadian Press) —Three persons met death in a spectacular fire which swept an apartment house in the congested Uphams Corner district of Dorcester to-day..

Obituary

MARGARET ANNIE SAUNDERS.

The death occurred in Peterborough on Monday, March 19, of Margaret Annie Saunders, in her 23rd year. She leaves to mourn her loss a sorrowing mother, one sister, Mrs. H. Davey of Ottawa, and one brother. William, of Smith Township.

The funeral will take place from the family residence, 495 Cross Street, on Thursday, March 22, at 2.30 p.m., and proceed to the Little Lake Cemetery, the Rev. Mr. Mills officiating.

MRS. WALTER BLAKE.

HAVELOCK, March 20.— The funeral took place on Saturday afternoon from the residence of her daughter, Mrs. Peter Haig, Concession street, to Maple Grove Cemetery, of Mrs. Blake, widow of the late Walter Blake, who predeceased her eight years ago. The services at the house was conducted by Rev. W. R. Archer, and was largely attended by sorrowing friends. The floral tributes were many and beautiful.

Mrs. Blake suffered a stroke about two years ago and has been in ill health since then, being confined to her bed for seven weeks prior to her death which occurred last Thursday evening. She was 67 years of age and before her marriage was Sarah Jane Buck, daughter of the late Mr. and Mrs. Daniel Buck of Asphodel. She has been a resident of Havelock for thirty-two years and was held in high regard and beloved by a large circle of friends. She leaves to mourn her loss, one daughter, Mrs. Haig, of town.

MARY EDNA REGAN.

MARMORA, March 20.—The death took place at Gravenhurst on Sunday evening of Mary Edna, beloved wife of William Michael Regan, and daughter of Mrs. Susan Meehan, of Marmora. Mrs. Regan was thirty years of age and had been a patient at the Sanitarium for the past six months. She had a very bright and cheerful disposition and her death cast a gloom over the village. Mr. Regan is well known over a large territory as a popular baseball player and was recently made president of the local G.W.V.A.

Those who survive beside her husband are three children, Ronald, Helen, and Kenneth, and three brothers and two sisters, James, William, Arthur, Lillieth and Eileen, all but William residing at Marmora. Mrs. Regan was a granddaughter of William Bonter, who died a few weeks ago.

The funeral will be held on Wednesday afternoon at Marmora.

FUR ON CUFFS NOT COLLARS

Fur cuffs as trimming, with furless collars that have, usually, a scarf at one or either side, make snappy finishes to the plain sleeves of many of the season's coats. Several garments of this type, which is one of the most fascinating of the springtime fancies, may be seen in the show rooms at H. Abramson's store at 370 George Street, along with other models that follow out the latest ideas in ladies' ready-to-wear garments.

A navy charmeen that has a lining throughout of grey flat crepe show red fox cuffs and long scarf ends of black satin, ending in silk fringe. A variation in a two-tone lining of grey and blue is used in a grey charmeen with grey mole collar and mauve shoulder flower. A navy coat owes its trim appearance to panels of horizontal fine tucks, while inlays of black satin trim a coat of navy tricotine.

Kashas and tweeds for sports wear are shown here, and there are duplicates of senior garments in the small coats in the same materials for children, who also have a special compartment for their trim, up-to-date dresses and suits.

The dresses display to advantage the season's whims and designs, both in materials and treatment. A black satin with bloused top has a skirt with a differing arrangement in pleats, which are stitched at the top and allowed to open loosely at the bottom. This gown is trimmed with vertical lines of printed silk that makes the pointed collar and cuffs, and it has a narrow red leather belt.

The hats are very pretty, in their snug-fitting styles of blue, brown, and rose shades, in felts and straws and corded silks. Three tones of violet, shading from deep to light in hue, are used in a hat of corded silk that has crossed wheels of violet flowers centred by tiny pearls.

THE MARKETS

(Continued from Page 4.)

higher and upon an all-rail shipping basis from Chicago, corn yesterday established new top price records for the season. Oats and rye also went above the season's previous best figures.

Cpl. C. Powell returned from overseas, bringing his bride.

General.

Air activity over whole western front, while world awaits Germany's last and greatest attack, due to start to-morrow.

SUIT COLORS ARE MODIFIED

Blue is Again Staple Shade For Men's Clothing.

TIES ARE BRIGHTER.

In the men's wear department of the Canadian Department Stores, Limited, local branch, were to be seen a wide range of men's suits comprising the store's advertised Karlroy classification. They were of blue and other colors, or "fancy" materials, the latter being in greatly modified tones when compared with those shown last year, with worsteds being stocked to meet an increased demand for this material in suitings.

In the Karlroy range is to be found a suit for every type ranging from the "heavyweight" to the young fellow of lesser proportion. They are tailored to a standard; hand-finished sleeves, collar and skirt, Hymo fronts, twelve cross-stitch lapel, inside vest pocket, wide outlets at every seam, Baratel pockets, medium rise on trousers.

The young men's models are finished with art silk coa lining and back of vest. The men's and typed models are finished with wool serge linings while each buttonhole is carefully moulded.

A glance into the show cases containing the spring supply of hats, many of them the conventional grey, others of lighter sand shades, shows a slight change in that the crowns have been made slightly higher and the brims a trifle narrower.

Neckwear in gay patterns and shades seem to be most in demand, judging from the supply on hand, while hosiery remains in stapler lines at varying price levels. According to Manager Harvey Henry, there will be a demand for collar-attached shirts of darker shades and covered patterns while in both collar-attached and separate collar patterns, the ensemble shirt—matched by the tie, will be the choice of the well-dressed young man.

A new style of summer underwear which is being well received in the States is of the two-piece pattern, the vest being of cotton or mercerized knitted goods while the trunks are mostly of fancy stripes. Manager Henry intends showing them during the coming season.

SINGLE-BREASTED COATS BEST LINE

Vogue For Double-Breasted Coat Not Passed, However, Says Jack Primeau.

Two-button single-breasted suit coats and and a few of the three-button models, principally tans and browns, are being shown as the newest for spring by Jack Primeau, Hunter Street. Nevertheless, the double-breasted models are also quite popular for this year and many are being shown. At the above-named store The Examiner was shown the various offerings and gained a comprehensive "idea" on what is new in men's clothing and furnishings. Tweeds, worsted, and double twist cloths seem to be the materials used most in making up the wide range of suits for young men and men.

When a fellow thinks of a new spring suit, he naturally couples with it a new spring and fall top coat, such as is to be seen at Primeau's. They are of the slip-on models, with raglan and set-in sleeves, are practically all single-breasted. The materials used are the fancy tweeds.

Since this firm believes that the bowler hat and snap brim soft hat have made such inroads into the sale of caps, it has stocked a wide range of hats in various models, the snap brim being shown most extensively. Grey and fawn shades predominate, while the bands are in plain colors.

A strong demand for shirts of the darker shades with either attached or separate collars is expected. Shirts in pale shades of green will be offered as among the newest.

Would the world be better without religion?
BRUCE BARTON tells you in "What CAN a Man Believe?" in THE EXAMINER To-Day

TAILORED COATS ARE VERY PLAIN

Staple Colors Favored in the Latest Offerings in Coats.

DRESSES BRILLIANT.

In Max Botnick's store at 286 George Street is a variety of things for ladies' wear and for children. There are coats in the staple colors of blacks and browns and navies, in charmeens and tweeds and the plainly tailored Prince of Wales effects, dresses in silks and crepes, in georgettes and jersey cloth, and plenty of garments suitable for the younger boys and girls. Drygoods by the yard, staples of various kinds, hosiery and lingerie, also have a place on the shelves.

A matron's dress of black crepe, with the front pleating that is so fashionable this spring, has a wide satin band at the hem and a vestee of pale pink georgette.

A child's dress of brown kasha has a contrast in the bright blue of the skirt and a pretty frock of bright red with cape collar has pleated ruffles at the Peter Pan collar and an edging of black.

NEW HAT MODELS SHOW WIDE VARIETY

Trimmings of Many Colors Adorn Spring Season's Creations.

The Millinteria, with G. H. Perrin as proprietor, has its home at 163 Charlotte Street, where the season's latest ideas in hats may be found. Here is the well-liked petalline straw in a violet hat of straw with a wide band of corded silk on which appear wheels in subdued colors of brown, orange, grey and navy. Another rose straw of the same type has sand flowers as trimming and a violet crochet straw has a brim of pleated corded ribbon and a band of embroidery. Felt flowers in rose, brown, and green adorn a hat of rose silk, while several of the small black modes are trimmed solely and effectively by a brilliant buckle, one of these simulating a silver dog with red stone eye and green stone collar. Another black hat for matron's wear is studded with rhinestones in an irregular pattern.

One striking small model has an entire crown of pale green small velvet flowers. Its brim is of grey corded silk and it has a half veil edged with silver thread.

TAILORED SHOES WORN THIS SPRING

Narrow Toes Replace Blunt Lines of Last Year for Ladies.

A very pleasing and complete one, is the range of shoes to be seen at the D. C. Grant Shoe Shop, which caters especially to ladies. One is certain to find the answer to almost any requirement, whether it be for dress wear, for walking or for sports.

The spring styles as seen at the Grant Shop are along clean-cut tailored lines with narrow toes rather than the blunt so popular last season. Fine black calf leather, black kid, patent leather, with a fair amount of satins, form the range, while the heel, either straight spike or cuban, is lower in almost every instance.

Tans are also very new, being of the same leathers as the blacks, while a new shade of honey beige is meeting with approval. There is also a showing of buckles in many lines, and they are of very attractive designs. The Grant stock is worthy of inspection.

NEW LIGHT SHADE POPULAR IN SHOES

Straps Much in Evidence in Routley-Braund Spring Stock.

Honey Beigle, a distinctive light shade, is the leading style for lady's shoes in the Routly-Braund store. Straps are more in evidence on the lady's shoes than in former years, and there are many kinds of buckles which appear to have caught the feminine eye. Satins are always on demand, and this store has a nice line of these much-liked shoes. Cuban and high heels are going to be worn this summer.

Men's shoes are practically all Oxfords, with the brown color leading; yet for the conservative dresser the black will be worn. The pointed toe is a thing of the past and the tendency is not towards the wide toe, but to that which gives the most comfort.

Lady's hose in all colors to match that of the shoes are found in this store. There are also all kinds of mens hose, showing more color than in the past, and stockings for the boys, both in the rolled and long style.

MEN'S TOP COATS IN LIGHT COLORS

Sukloff Store Handles Full Line of Men's Clothing.

The Sukloff Store is the agent for the Tip-Top Tailors, and a distinctive line of goods is shown at one price and only one price. There are many samples of blue serges, worsteds, and tweeds in all the latest colors and patterns.

Men's top coats are to be had in light colors mostly of grey, with brown and dark grey, with patch pockets, and in very stylish cuts. Men's sweaters and pullovers in all colors are very attractive. The Fit-right caps in the newest design and in light colors are most alluring to the young men and boys. Biltmore shirts are much in evidence both in wide stripes and in plain colors. The striped shirts are light yellow and white with a blue needlework design.

Nothing to Slip—
Nothing to Bind!

THE May Belle Combination Brassiere Top Bloomer is much loved because of its real comfort and competency! Held firmly in place at the waist by the no-elastic bloomer, the brassiere can neither slip nor catch and bind.

Smartly cut and beautifully tailored, of soft, lovely lockstitch rayon, in fascinating pastel shades, moderately priced and durable, this dainty undie is indeed a treasure and is typical of all May Belle Lingerie.

Let the May Belle label inside each garment be your guarantee for smart, desirable lingerie. The adorable May Belle Junior Lingerie ranges from 2 to 14 years.

BLACK IS GOOD FOR SPRING WEAR

Colored Trimmings Relieve Dresses Made in This Color.

The staple garments and supplies that appeal to the majority of shoppers can be found at the small store of I. Botnick, at 173½ Simcoe Street. Coats and suits, dresses and blouses, underwear for adults and juniors, also a full line of children's wear in coats, dresses and hats, have a place on the shelves.

A black dress demonstrates the vogue for this color in springtime wear, and has its relieving touch in the pale pink vestee of pleated georgette and the dainty silver buckle.

A pink evening dress is heavily embroidered in long lines of white beads.

A brown coat of serviceable weight and material has a soft brown fur collar.

AT GOSPEL HALL

A. N. O'Brien arrived in the city just in time for the meeting last night. A goodly number had gathered in spite of the storm. Jesus washing the disciples' feet, was his subject, which was shown to be an act of service on His part for the express purpose of showing all Christian this all important truth, that love and service be shown the other. It was never given as an ordinance to the church.

Mr. O'Brien is a very clear expositor and tonight the hall will be filled to hear the message.

GRAND SCOTCH CONCERT

Under the auspices of Mark Street United Church Young Men's Bible Class, will be given in Victoria Hall, Wednesday, March 28th. 1d-68-764

CARD OF THANKS.

The canoe used in the opening scene of the "Female Voice Choir Concert" was kindly loaned by Mr. C. Rogers of the Peterboro Canoe Co. Lieut.-Col. Hall and Mr. C. Coleman also gave rooms for choir to practice. Mrs. W. R. Morris and Mrs. J. Mills took tickets and money at door. Mrs. R. Lynch looked after refreshments for choir. His Worship the Mayor was a very efficient chairman. Mrs. Bugg is grateful to all those and others who assisted her.

SPRING FABRICS ARE BRILLIANT

It isn't long. It isn't short. It hasn't any shape or lines or trimming. It can't be worn as it is, but nothing can be worn without it. It is the dress of the future, but one wouldn't know it from the appearance of the present. What is it? It is fabric.

Styles may come and go. They may change as often as they please, but always fabric remains. Without material, you cannot make a dress. That is why fabrics are so important and why a stock of them is so fascinating.

Dickson's drygoods store on George Street has a splendid stock of materials for spring and summer wear. The printed fabrics catch the eye. What wonderfully pretty gowns some demoiselles will have from these printed georgettes, chiffons, crepes, and rayons. Imagine the interest of pleats in knife formation through the folds of this soft crepe, with its gorgeous tones of blue and green and yellow in floral design. Or the futuristic outlook of the lady who wears one of these printed silks like the black with its intricate pattern of flowers in royal blue, red and yellow.

Geometrical and architectural designs feature other fabrics and even the Borden cottons show colorful outlines in stiffly placed bunches of tiny flowers, outlined by green leaves. A checkerboard pattern in blue and white features one piece. The Victorian printed cottons have neat, small patterns, and there are Peter Pan prints for street and house wear and children's clothes.

Plain silks and rayons come in all the shades of the moment, the many hues of blue and sand, of soft brown and rose and beige, of black and white.

In the Dickson Store are full lines of silk hosiery in favored colors, Oxford silk lingerie, house and table lines, gloves in suede and silk and scarfs in bright oral effects.

CREDITORS TO MEET TO CONSIDER OFFER

C.D.S.L. Bondholders Also Called—Canadian Firm Would Buy.

TORONTO, March 20.—On Thursday G. T. Clarkson and the Canadian Credit Men's Association are expected to make known to the creditors of the Canadian Department Stores, Limited, the details of the definite offer received for the 22 stores, all but one being in the Province of Ontario.

There will be a meeting of the creditors at the Prince George Hotel on Thursday morning for consideration of the offer. The holders of the 20-year first and refunding mortgage income gold bonds of Series A are also called to meet in the office of G. T. Clarkson on April 14.

Approval of Sale Expected

In spectors of the estate have approved the offer and Mr. Clarkson, it is understood, is prepared also to recommend its acceptance. The sale of the company to the parties making the offer is expected to be approved.

There are two other offers for the assets of the company, but the one recommended for acceptance has the endorsation of Mr. Clarkson. The amount involved in the deal is reported to be $5,500,000, which will probably give 50 cents on the dollar to income bondholders and 45 cents on the dollar to the trade creditors after satisfying in full the prior claims of the first mortgage, the bank and the legal and bankruptcy expenses.

Well-Known Firm

It is a well-known Canadian firm that makes the offer, which takes into account the fact that it would be much more costly to get together a similar chain if, as can be assumed, the intending purchasers decided to enter the communities where the 22 stores are located.

Canadian business men are greatly interested in the negotiations and the decision to call the creditors and bond-holders together to deal with the offer.

PHONE COMPANY HIRES CANADIANS

Has Engaged 320 University Men During Past Five Years.

The emigration of Canadians to the United States is a subject of frequent lament throughout the Dominion. Where the evidence produced bears on the southward movement of the highly trained groups which graduate yearly from Canadian universities, the search for a remedy is most vigorously prosecuted.

It is worthy of note that the Bell Telephone Company of Canada, in its annual report for 1927, states that in the past five years it has selected from the graduating classes of Canadian universities no fewer than 320 members of its staff. The excellent work done in all departments of the service by these men and women has marked this policy as highly commendable from all points of view. 1d-68-755

GAITERS MATCH SLICKERS NOW

The Rain Gaiter or Golosh, something new in women's footwear for spring and fall, is on display in the John Kylie shoe store. It comes in colors of red, green, blue and brown that will match the color of slicker being worn.

There is also to be found a full line of ladies' oxfords, pumps and shoes, boots and oxfords for the school girl and everything that goes in the line of footwear for the feminine sex.

For men there are beautiful oxfords in black and brown with the medium toe last, boots in the two colors, and all kinds of rubbers.

HATS AND SCARFS MADE TO MATCH

Ennis and Armstrong Millinery Parlors Show Charming Combinations.

Matching hats and scarfs for all-important sports wear are one of the interesting notes in millinery lines this season. A stunning example of the style is seen in the parlors of Ennis & Armstrong at 376 George Street. The little close-fitting hat of stitched silk and the scarf that is of exactly the same material are made of black and white foulard in an attractive pattern.

The spring vogue for violet and mauve shades forms another pretty link in the new use of lovely color in hats. The soft, lighter shade that is called wood violet is shown in a material called "ragmat" braid, with a sort of chenille finish, soft and silky. This hat has a silver band.

Fur felts and Paillison braids with cutouts of the felt are another combination much liked. Heavy silk thread embroidery in an all-over design resembling tapestry makes entire hats, in some instances, and a "Vagabond" shape in slouch style has a wider brim than the little models.

The Visca straw that resembles crochet and felt composes a shape demonstrating two shades of purple, and the popular trimming of straw wheels appears on a little felt hat of bright red, close-fitting in formation.

An extremely chic cap hat of black satin has a crown made entirely of folds of the material, with one of the soft feathermounts in black at the left side.

Straw inserts form the adornment of a small hat of corded silk in rose color. A green hat that follows the vogue for this vernal hue shows ribbon of three shades, making the band. A tailored bow or ribbon finishes the right side and the front is just a little different with tiny rows of stiff tucks in the high band.

A blue skull cap shape is made of alternating rows of blue and silver straw with a silver buckle at the side.

The liking for soft browns in felts and straws, for many shades of blue, and for greens, whose hues are legion this year, is demonstrated in the pretty shapes for dress and sports year that may be seen in Ennis & Arinstrong's show rooms.

FORM FITTING SUITS POPULAR

Straight-Hanging Coat Out of Vogue, Say Riley and Hickey.

There is a very definite style demand among the younger men of today for a new type of suit. This trend now turns away from the loose-fitting, straight-hanging, so-called "University" coat—and in its place comes a newer fashion with smarter lines that add immeasurably to the wearer's appearance.

The Riley-Hickey Peel and Barclay models present the unusual combination of all the attractiveness of this new style trend with the most skillful and most carefully wrought tailoring of fine fabrics.

Two models in box top coats will be shown by many retailers—single-breasted and three-button single-breasted style for the young men following the University vogue. The popularity of tweeds and multo-patterned fabrics in light shades has added somewhat to the demand for Raglan coats.

That colorful headwear will be a a factor in this spring's business is a supposition warranted by the acknowledgment of the fact that light tans are highly regarded as the shades for this season.

More variety in the shirts and collars is predicted for the coming spring and summer. The materials remain the same with white broadcloth leading. However, in conjunction with the increase in solid color shirts and collars, there is a corresponding increase in end-and-end madras. This includes both the collar-attached shirts and the collar-to-match shirts with starched collars. Blue is the leading color in the colored shirts with attached collars, and tan is second.

Striped neckwear in repp shows a slight increase over last year's figures, and in this type of neckwear the three stripe combinations are most popular, with two stripes of equil width and a narrow stripe forming the pattern.

HEELS HIGHER; TOES SHARPER

At Stenson's may be seen a wide variety of shoes in latest styles for this firm believes in offering the best. In looking over the stock of ladies' dress shoes, one notes the change from the stubby toe to a finer, sharper toe, high and medium heels, and that patent and kid are the materials most used. Calf leather in black and brown predominate in the walking shoes.

Lighter shades of brown and tan are shown for summer wear with the new honey beige predominating. Higher Cuban and Spanish heels and sharp toes are features, while the ever-popular Oxford for street wear is being shown quite prominently.

In men's shoes, Stenson's carry such fine lines as the Slater, Invictus, Astoria, and Belmont, and in all of them are seen most prominently shoes with the medium and wider toe, and low heel. Scotch grain leather is made up into one particularly nice street shoe. As usual in spring and summer, the tan shoe is expected to be a better seller than the black.

HERE AND THERE

Insurgents Killed.

MEXICO CITY, Mar. 20. (Canadian Press).—Despatches from Guadalajara to-day said twenty insurgents were killed in the Amega district in a fight with Federals.

Chute Doesn't Open.

PARIS, Mar. 20 (Canadian Press). — A man named Botal, a balloon jumper, jumped 380 feet from the second platform of the Eiffel Tower in testing a parachute. The chute didn't open. He was the second person to die in attempting such a jump.

VOL. LXI., No. 16 PETERBOROUGH, FRIDAY, JANUARY 20, 1928 PRICE THREE CENTS

REPORTS TO HUMANE SOCIETY SHOW 1927 AS YEAR OF EFFORT

Much Done By Humane Society in City and Surrounding District.

MORE WORK PLANNED.

Dr. Thomas Johnston Re-elected President at Annual Meeting.

The annual meeting of the Peterborough Humane Society was held last night in the board room of the Chamber of Commerce. Most enthusiastic reports were given which revealed a year of faithful work for the dumb animals in this section of Ontario. The work of the society was carried far beyond the boundaries of the city and county of Peterborough.

In 1928 a greater effort than ever will be made to secure more members and funds. The City Council will be asked to increase its grant and a representation will be made to the County Council for a grant.

A. B. McLeod, in a brief address, said he was sorry there were so few present. "We must work and let the people know there is a society. Every merchant on George Street should be canvassed and asked to join the Society, for there is a real work to do. To carry on this work more money is necessary, so I suggest that the county be asked for a grant for much of our work in the past has been carried on in the rural districts," said Mr. McLeod.

Inspector Smith, in giving his report, told of the most serious cases that had been brought to his attention and in every case the best thing possible was done for the animal and the guilty person brought to justice. During the year he examined 118 horses; humanely destroyed 12; brought to shelter 46 dogs, humanely destroyed 30, placed 21 dogs in homes; brought 42 cats to shelter, humanely destroyed 72; examined all the circus animals, issued 3 summons, got 2 convictions, investigated 44 complaints, issued 169 warnings, and made 44 emergency calls.

The financial report showed that the society had a balance of $69.94 in the treasury. The receipts amounted to $1,078.55, and the expenditure was $1,008.62.

The following officers were elected:

Hon. President—Col. C. H. Ackerman.

President—Dr. T. Johnston.

1st Vice-President—D. C. Grant.

2nd Vice-President—Miss B. Latimer.

3rd Vice-President—Thomas Sargent.

Secretary-Treasurer—Mrs. Chandler and Mrs. Young.

Directors — A. B. McLeod, J. E. Robins, F. Goodfellow, J. Juby, J. Skinner, Dr. Murray Fraser, Mrs. G. A. Helson, Mrs. R. H. Parsons, and Miss Foote.

Inspector—R. C. Smith.

GALE SWEEPS OTTAWA VALLEY

Every Form of Traffic Delayed During Forty-Mile Blizzard.

ROADS IMPASSABLE

OTTAWA, Ont., Jan. 20 (Canadian Press).—The Ottawa Valley was swept by a blinding snow blizzard last night, and every form of traffic was delayed. Driven by a forty-mile gale from the north-west, the snow was blown into drifts several feet high in the open countryside.

In the capital, the full force of the street railway's storm fighting equipment had to be brought into action to maintain trolley service within the city limits. In the suburbs street car traffic was almost at a standstill.

Most of the country roads within a hundred mile radius of Ottawa had been rendered almost impassable four hours after the first fury of the storm swept into the valley.

Up until nine o'clock last night train service had been only slightly affected by the blizzard.

Drop In Temperature.

WINNIPEG, Man., Jan. 20 (Canadian Press).—A mild wave which flourished in Manitoba early in the week gave way before a biting north-west wind yesterday, and a rapid drop in temperature was recorded. In Winnipeg and district the mercury dropped 16 degrees in four and one-half hours and was hovering around the 5 below zero mark yesterday afternoon.

Further west it remained comparatively mild, but heavy winds were reported.

TOPPLING MOUNTAIN FEARED.

Farming people of the Arbedo Valley, in Switzerland, have been warned by the Swiss Geological Survey that they must leave the valley with all possible speed, for at any moment Mount Arbino is likely to topple into the valley. For a long time the mountain has been known to be sliding. At first its summit moved about one inch every 12 months, but in recent years it has traveled 14 inches. During the coming year heavy rains and numerous earthquakes are expected to precipitate a catastrophe, burying the farms under tons of debris. Farmers are leaving the valley as speedily as possible.

Urges Coalition To Oppose Tariff Move

NEW YORK, Jan. 20.—(Canadian Press.)—A coalition between labor and employers to oppose lowering of the tariff was urged by President W. Warren Barbour, of the American Tariff League, at its annual meeting here last night.

Referring to passage by the Senate last Monday of the McMaster resolution for downward tariff revision, he declared there were six factors opposing protective tariff, which, together with the resolution, have placed the protective policy on the defensive, and made "1928 the biggest tariff year in a generation."

These elements of opposition, he explained, were indifference of American producers, farm opposition and a new political alignment in Congress. All these elements, he said, "constitute a real threat to American agriculture, industry and labor."

Y.M.C.A. ANNUAL MEETING IS HELD

Reports Show Great Deal of Progress Made During Year.

DEFICIT REPORTED.

The annual meeting of the Peterborough Young Men's Christian Association was held last night at a supper meeting under the auspices of Y's Men's Club. During the supper, President Tom Dutton of the Y's Men Club, presided, but for the transaction of the association's business he turned over the meeting to G. A. Gillespie, of the Board of Directors.

Reports were presented by the different organizations using the Y.M.C.A. as a basis for their activities, and by the different departments of the association itself. The financial statement showed that the deficit which had existed at the beginning of 1927, had grown somewhat during the year, and discussion brought out that this is largely due to a great many members letting their membership fees stand unpaid in spite of appeals made by the officials in this matter.

The report of the nomination meeting, presented by Joseph Wearing, proposed the following as directors: G. A. Macdonald, J. Hamilton, P. P. Westbye, Dr. J. J. Craig, G. S. Matthews and C. S. Cummer. They were elected for a term of three years.

A proposal to change the date of the annual meeting to enable the officers to collect more of the outstanding revenue was not adopted. A hearty vote of thanks was extended to the Ladies' Auxiliary, which served the supper last night and was responded to by Mrs. G. H. Roper.

Directors present last night were G. A. Gillespie, Joseph Wearing, G. A. Macdonald, Thomas Barrie, W. A. Richardson, J. J. Turner and J. F. H. Wallace. There were present representatives of the various societies and a number of senior members of the Y.

The report of the General Secretary, G. H. Roper which outlines the general condition and activities of the association, follows. The others will be puublished to-morrow.

A review of the work and activities of the association for the past year would show that while in some things we have not reached our objectives, in the most important phases of our work very satisfying advances have been made. It is perhaps too much to expect that we shall reach one hundred per cent. of our objective in every department, especially when we have placed our objective on a high level, but 1927 has been marked by steady and important progress. Two organizations, which perhaps are the very heart of the association program have made steady advancement, namely the Friday night Supper Club and the Y's Men's Club. At the present time both these organizations are stronger and more effective than at any time in their existence. In membership, the objective for the year was surpassed and the total number of members at present is six hundred and sixty-six, classified as follows: Sustaining 18; Business Men 67; Senior 133; Young Men 136; Social 25; Rural 32; Total men members 410. Boys' membership: Intermediate 72, Junior 92; Beginners 92; total 256.

Religious.

The special series of Sunday evening meetings held at the supper hour were conducted in the spring by Mr. Wearing as the leader, with an average attendance of over thirty. The messages were very impressive and decidedly inspirational in character. The addresses at the Friday night Supper Club have been in most cases of an inspirational character expressed in terms best suited to the thought and feeling of the young men of the group. The Boys' Bible Classes have been conducted most faithfully under the leadership of our Boys' Secretary.

(Continued on page 19).

Two Men Rescued From Stranded Ship

BARNEGAT, N. J., Jan. 20.—(Canadian Press.)— Heavy seas, running before a strong east wind, and a driving rain storm, forced coast guard authorities to abandon efforts to tow the eighty-foot lobster schooner Victory off a sandbar a mile north of here late yesterday.

Two of the crew of five men were taken ashore by coast guard patrols, but the others said they would remain until it became apparent that the schooner would break up. The vessel is owned by the White Lobster Company of Trenton.

W.M.S. MEETING IS CONCLUDED

Reports Presented at Final Meeting of Lindsay Presbyterial.

ADDRESSES GIVEN.

Sundry business and reports, chiefly concerned with young people's work, wound up the closing session yesterday afternoon of the third annual meeting of the Lindsay Presbyterial of the Woman's Missionary Society of the United Church of Canada, which has held a two-day session this week in St. Andrew's United Church. Mrs. R. G. Lawlor, the retiring president, was in the chair. Mrs. A. Bookhout, the new president for the Peterborough Presbyterial, and Miss Dunoon, the new president for the Lindsay Presbyterial, were on the platform and had charge of the devotional services. The minutes of the previous session were read by Mrs. W. H. Morton.

The story of the year's work included the report of Mission Bands by Mrs. E. W. Rowland, Omemee, the report of the C.G.I.T. groups by Mrs. A. I. Brown, Peterborough, and the report of the Circles and Y.W.A.'s given by Mrs. F. Riches, Cambray, followed by an interesting discussion.

Mrs. Rowland reported 25 Bands in the Presbyterial, with an annual membership of 610, and 63 life members, making a total of 673. Meetings held during the year were 253, cash expended on supply work $54.70, annual members' fees $58.50, life members $106.00, thankoffering $63.68, mite boxes $79.42, other sources $582.11. The total amount raised was $891.97, and the total amount sent $820.46. Once again the Busy Beaver Band of Queen Street United Church leads the Presbyterial in financial giving. George Street Band, Peterborough, coming second, and Omemee a close third. Mrs. Rowland stressed the great need for band leaders, and hoped that there would be delegates who would return to their homes determined that they would give their best to this important work.

Five C.G.I.T. groups affiliated with the W.M.S. were reported by Mrs. A. I. Brown. Mrs. J. McKone's Group from St. Andrew's Church, Peterborough, again led the groups, and was given special mention for its work. Mrs. Brown also mentioned the float put on by the local girls for the Diamond Jubilee Celebration in Peterborough, and they chose for the name of this float, "Canada for Christ," in honor of the missionary element in their society.

Mrs. Frank Riches, of Cambray, brought a very interesting report of the Y.W.A.'s and Circles. The total givings sent to the treasurer amounted to $1,682.85 for the Circles and $830.12 for the Y.W.A.'s These jointly show an increase over last year of between $100.00 and $200.00. Financially the banner circle was that of First United Church, of Lindsay, sending in $750.00. One new Y.W.A. was reported at Knox United Church, Peterborough. Mention was made of two of the smaller circles having done good work, Little Britain, with a membership of only seven sending in $50.00, and Lakefield Y.W.A. sending in $35.60 with five members.

The conference for mission bands was led by Mrs. E. W. Rowland, of Omemee, during the noon recess, and many problems were discussed which were interesting and helpful to the band leaders.

Mrs. T. Cruikshank kindly presided at the organ during all the day sessions.

Regret was expressed from members from both presbyterials, regarding the separation that was found necessary to make them correspond with the presbyteries of the conference. During the past two years the work had been done under very harmonious conditions, and the hope was expressed that the same happy conditions would continue in each of the new presbyterials.

Report of Courtesy Committee.

"We, the members of the Courtesy Committee, wish to convey the appreciation of the Presbyterial to the following: For the hospitality met with on our arrival; to those who so kindly loaned their cars for the comfort of the delegates; for the welcome given by the ladies and the splendid meals provided. We feel all was done that could be to make us feel at home. We wish to thank the janitor and Mrs. Stevens for their kindly attention and the comfort of the building; for the untiring efforts of the pastor, Rev. Mr. Gordon, and his wife; for the freedom of the city conveyed by Mayor Denne; for the greetings given by Rev. Mr. Todd from the Presbytery; for the official board for

AUTHORITIES ON LOOKOUT FOR BANDITS

Keep Close Watch on Roads Leading Out of Montreal.

MAKE $10,000 HAUL.

Desperadoes Make Daring Daylight Robbery of St. Dennis Street Branch.

MONTREAL, Que., Jan. 20 (Canadian Press).—Despite an intensive man-hunt the three bandits who yesterday robbed the St. Denis Street branch of the Banque Canadiene Nationale of between $9,000 and $10,000 were still at large last night.

Acting on the theory that the desperados were members of an American criminal gang, railway stations and roads leading out of Montreal were closely watched by police last night. While not making any definite announcement the police indicate that several clues have been developed and that, coupled with good description of the robbers obtained from the staff of the bank, there is every reason to believe that the three men will be arrested before they can leave the city.

Yesterday's hold-up was one of the most daring ever recorded in the city. It was executed perfectly and in a very short space of time. Evidently familiar with the routine of the bank, the three men entered the premises at 12.55 p.m., brandishing revolvers. There was a large amount of cash on hand awaiting removal to an armored car which was to call at the bank shortly after 1 o'clock. Five persons were in the bank, the manager, Armand Robillard, and four clerks. The bandits made no attempt to conceal their actions. They were shouting as they ran through the front door and all brandished revolvers. Speaking in English, the leader announced that they had come to hold-up the bank. At the same time the intruders hurdled the counter and were inside the enclosure where the clerks work. The manager and his assistants were ordered to lie on the floor, face downward. Three of the clerks obeyed, but one, Emilien Cormier, reached for a revolver on the desk. One of the gang violently shoved him to the floor while another administered a kick and an order to "remain there." The manager attempted to reach his living premises in the rear of the bank, but two of the gang seized him and treated him in the same manner as the clerk. With the five employees on the floor and the two bandits standing over them with menacing revolvers, the third member of the band went to the cashier's counter and opened the drawer, emptying it.

Customers Enter Bank

As the drawer was being emptied two customers of the bank entered the front door. The bandits paid no attention to them but walked calmly around the counter and out the front door where they entered the small touring car they had parked near the entrance and made their escape.

The employees immediately raised the alarm and were on the street in time to see the car disappear northwards on St. Denis Street.

Detectives were soon on the scene and obtained good descriptions of the men. They stated that these descriptions did not tally with any persons who might have been suspected and for that reason worked on the theory that the robbers were from out-of-town.

WIND USHERS IN COLD WEATHER

Sault Ste. Marie is Digging Itself Out After Snow Storm.

GALES FORECAST.

TORONTO, January 20 (Canadian Press).—A south-westerly wind with a velocity ranging up to forty miles an hour has ushered into Central Ontario what promises to be a cold snap. A drop of twenty degrees in temperature was effected over night in Toronto and district, where the mercury stood around twenty above zero today. The forecast is for gales and lower temperatures for most sections of Ontario to-day and to-morrow.

Street Cars Tied Up.

SAULT STE. MARIE, Ont., Jan. 20 (Canadian Press).—The street car service here, which was tied up yesterday afternoon and last evening by a heavy fall of snow, is being restored to-day. City plows working during the night had opened many of the roads for motorists. About seven inches of snow has fallen and it is still snowing.

Interferes With Firemen.

Over seven thousand dollars damage was caused by two fires, one at 2.15 a.m. and the other at 3.30 a.m. to-day. A snowstorm interfered with the work of the brigade.

MRS. EDWARDS PRESIDENT OF LOCAL COUNCIL

Annual Meeting Featured By Address From National President.

REPORTS PRESENTED.

Thirty-two Societies Are Affiliated With Council—Good Balance in Treasury.

The annual meeting of the Local Council of Women was held yesterday afternoon in the green room and library of the Young Women's Christian Association, both rooms being needed for the attendance of about one hundred women, representing the affiliated societies and those who took advantage of the invitation to be present and meet the national president, Mrs. J. A. Wilson, of Ottawa, who gave a most inspiring and eloquent address during the course of the afternoon.

Although the reading of annual reports from the affiliated organizations was left over until the next meeting, election of officers took place yesterday afternoon, and the meeting concluded with a reception by Mrs. Wilson and the service of afternoon tea.

Officers for 1928 are Past President, Mrs. A. Stevenson; President, Mrs. C. H. Edwards; Vice-Presidents, Miss A. Lancaster, Mrs. G. Helson, Mrs. F. H. Dearborn, Mrs. J. D. Deyell and Mrs. J. J. Pollock; Recording Secretary, Mrs. J. Wearing; Corresponding Secretary, Mrs. A. Mowat; Treasurer, Mrs. N. D. Seaton; Convenors of Committees Citizenship, Mrs. K. S. Wightman; Films, Mrs. N. D. Seaton and Mrs. R. H. Parsons; Household Economics, Mrs. E. Morrison; Public Health, Mrs. N. H. Sutton; Equal Moral Standard, Mrs. A. Stevenson; Education, Miss Hamilton and Mrs. W. R. Morris; Laws, Mrs. Chas. Ray; Professions and Employments for Women, Mrs. J. Mills; Soldiers' Pensions and Dependents, Mrs. W. R. Morris; League of Nations, Mrs. H. R. H. Kenner; Child Welfare, Police Matron, Amy Wood; Immigration, Miss Leta Brownscombe; Fine and Applied Arts, Mrs. Wm. Blackwell. Tellers for votes were Mrs. A. Stevenson, Mrs. J. Wearing and Miss Might.

The meeting opened with the reading of the minutes of the last annual meeting by Mrs. Wearing, and the treasurer's report by Mrs. Seaton, showing total receipts of $430.43, which sum included a balance from the previous year of $86.80 and $112.40, derived from the film sponsored at the Regent Theatre. Total disbursements were $285.08, leaving a balance on hand of $145.35.

The report of the corresponding secretary, Mrs. A. Mowat, showed thirty-two affiliated societies in good standing and gave a brief resume of the year's work, expressing the hope that the work of the Well Babies' Clinic, in which the Council is greatly interested, may soon be duplicated in the south end of the city.

Mrs. Mowat, in conclusion, expressed the feelings of admiration and respect held by the Local Council for the National president, Mrs. Wilson, who so ably fulfills the duties of her position at all times.

President's Address.

The short address by the president, Mrs. C. H. Edwards, was concise and to the point, expressing succinctly some of the aims and hopes of the Council for the forthcoming year, and outlining various matters in which the members may find scope for their endeavors. Mrs. Edwards spoke first in commendation of the excellent water supply and twice-a-week garbage collection of Peterborough, as contrasted with similar conveniences in Ottawa, which is not so fortunate in either regard. The president also thanked the members for their hearty support and co-operation.

Matters which may be taken up by the Council in the coming year make an ambitious programme, in consideration of ways and means of obtaining a cheaper gas supply, the cleaning up of the Police Station, better lighting in the city's parks, especially in Inverlea Park, a more general pasteurization of milk, police protection for outside sections of the city, preventive forms of work for women and girls, a rest room for farm women at the market, an agitation for mental as well as physical examination for inmates of such places as the House of Refuge, a sanctuary for the bird-life of Peterborough and a better transportation system on the city streets. Increased interest in questions relating to infantile and maternal mortality was also mentioned.

Mrs. Wilson's Speech.

Mrs. Wilson, who was introduced by Mrs. Edwards as "the Prime Minister of our women's parliament in Canada," had a lucid, smoothly-flowing form of eloquent delivery which was marked also by clarity of thought and an especially attractive type of enunciation. With an evident wide grasp of all matters pertaining to the work of the National Council and a thorough knowledge of facts and conditions pertaining to them, she held the interested attention of her hearers during the course of a fairly lengthy discourse.

"Why have we a Council and what good is it?" was a question which was asked and answered by the speaker, who referred to the efficacy experienced in solving problems easily by bringing together many people and to the fact that the Council provides a meeting place for women of every type, "for Jew and Gentile, for Catholic and Protestant," on a common ground. This fact alone, she declared, would justify its existence.

In the Council, each of the affiliated societies has an equal chance to bring up matters of interest to all and its activities include many phases of

AGAIN PRESIDENT.

HIS WORSHIP MAYOR DENNE,
Elected President of the Peterborough Industrial Exhibition for his eleventh term.

MAYOR DENNE IS RE-ELECTED

Heads Peterborough Industrial Exhibition Board For Eleventh Year.

MEETING HELD TO-DAY.

Mayor Denne was re-elected this afternoon for the eleventh consecutive year as president of the Peterborough Industrial Exhibition at the annual meeting of the directors.

The Board decided to limit the number of directors to 55.

The following officers were elected:

1st Vice-President—T. M. McIndoo.

2nd Vice-President—Webber Turner.

Secretary—F. J. A. Hall.

Hon. Treasurer—C. S. Cummer.

Treasurer—Fred Holmes.

Hon. Directors—Father Costello, R. C. Grandy, E. A. Peck, M.P., H. A. Morrow, W. G. Morrow, Adjutant Ham, Dr. R. C. Blagrave, W. H. Bradburn, M.P.P., W. A. Anderson, M.P.P., Hon. G. N. Gordon.

Superintendent—John Gillespie.

Managing Director—W. Knox.

MARINES THINK RUMORS RUSE

Believe Sandino Has Fled To Honduras or Down River to Sea.

CAMP DESERTED.

MANAGUA, Nicaragua, Jan. 20. — (Canadian Press).—United States marines feared to-day that reports of the death of the rebel general, Augustino Sandino might be a ruse. Around his mountain stronghold of El Chipote the only evidence noted by marine aviators was that of death and desolation. Sandino, if alive, it was believed, could have fled through the jungles to Honduras or down the Coco River to the Caribbean. Since the Honduran Government promised to allow no concentration of rebels on Honduran soil, it was believed that Sandino might be heading for the sea.

DIVERS WORKING TO RECOVER BODIES

Seven Men Carried to Bottom of Bay in Huge Steel Caisson.

PANAMA City Florida, Jan 20. — Canadian Press. — Divers were working to-day to recover the bodies of seven men drowned and pinned to the bottom of the East Bay yesterday, when the caisson on which they were at work sank and carried them with it. The huge steel shell, which workmen were putting in place for pouring cement to mould concrete piers, was dislodged, and held the men imprisoned within it, while it toppled to the water and sank to a depth of 55 feet in midbay.

Canadian Cardinal Leaves On Saturday

PARIS, Jan. 20. — (Canadian Press Cable). — Cardinal Raymond Rouleau, Archbishop of Quebec, who arrived here from Rome on Tuesday, was the guest of honor at a luncheon yesterday at the home of the Dominican fathers. Cardinal Dubois of Paris, and Philippe Roy, Commission General for Canada in Paris, were present.

This evening Cardinal Rouleau, was given a reception at the club Le Centre Catholique, which is composed of business and professional men.

He will leave on the Empress of Scotland for Canada on Saturday.

FEDERAL CONSERVATIVE LEADER SPENDS A BUSY DAY AT QUEBEC

New Building Record For Canadian Cities

NEW YORK, Jan. 20.—(Canadian Press.)—A new high building record was established by 65 leading Canadian cities in 1927, the gain over the previous record year being 18.6 per cent., according to S. W. Straus & Company. The year's volume, their survey indicates, was $185,451,271, exclusive of a great number of engineering projects. The average index of wholesale prices of building materials based on 1913 costs was 147.7.

The same cities reported a 2 per cent. increase in December over the same month of the previous year. Straus estimates that building operations of a spectacular nature will continue throughout Ontario during the winter, that province having registered a gain in December, 1927, of 82 per cent. over December, 1926.

ORDER THREE NEW PLANES

Will be Used in Civil Branch of Royal Canadian Air Force.

DELIVERY IN MAY

OTTAWA, Ont., Jan. 20.— (Canadian Press.)—The Department of National Defence has ordered three new aeroplanes, two of which will be built in the United States and the third in Montreal, for the civil branch of the Royal Canadan Air Force. The American-built machines will be specially constructed so that they may be adapted to making surveys at Fort Churchill in the spring. It is intended to establish a temporary air base at Fort Churchill, and from that base two planes will operate, making photographic surveys from day to day of ice conditions at the break-up. The operations are expected to begin some time in May, and will continue throughout the spring.

The work of the observers is closely allied to, although apart from, that now being carried on in the Hudson Straits. The airmen now operating in the Straits will continue their own observations upon the breaking up of the ice an its movements in that region during the spring season. A compilation of the reports turned in from these various air bases will form a valuable guide to the government in its future activities with regard to extending the navigation season in and out of Hudson Bay.

The new planes are scheduled for delivery early in May.

WOULD ESTABLISH CLOSER RELATIONS

Manitoba Farmers and Business Men Discuss Agricultural Problems.

WINNIPEG, Man., Jan. 20 (Canadian Press).—Representatives of the United Farmers of Manitoba and members of the Greater Winnipeg Board of Trade conferred yesterday in an effort to establish closer relations between business men and farmers of Manitoba in solving problems of agriculture, under a plan discussed, representatives of business and of agriculture might get together as occasion might require, to deal with specific problems affecting the farming industries.

Yesterday's conference followed the suggestion of Premier John Bracken of Manitoba, made at the 1927 annual meeting of the Canadian Chambers of Commerce, that a closer relationship be established between commercial and agricultural interests of the Dominion.

The Weather

By way of variety we have had a change to colder conditions. A rapidly falling barometer yesterday afternoon presaged that something was about to happen. It proved to be a wind of gale proportions that whistled and howled during the latter half of the night. The temperature this morning was about twenty degrees. Colder weather is coming but is not likely to be excessive nor long continued. If there had been the amount of snow on the ground that is usually present at this date the roads would have been completely blocked with such a wind as prevailed last night.—W.P.

The boundary line between the United States and Mexico is 1744 miles in length.

Hon. R. B. Bennett Delivers Two Speeches and Tendered Public Reception.

VISITS DIGNITARIES.

Addresses Canadian Women's Circle at Conclusion of Day's Activities.

QUEBEC, Que., Jan. 20.— (Canadian Press.)— Hon. R. B. Bennett, leader of the Conservative party, was a visitor to Quebec yesterday, where he delivered two addresses and was tendered a public reception.

The day's programme started with a reception at the court house, where Hon. R. B. Bennett was received by Chief Justice Sir Francois Lemieux, and Elzear Baillargeon, Batonnier-General of the Quebec Bar. Later the Conservative chieftain visited Mgr. Omer Plante at the Archbishop's Palace, Lord Bishop Williams, and Lieutenant-Governor Perodeau.

Mr. Bennett then addressed the Canadian Club at luncheon and later delivered a speech before the Canadian Women's Circle. This concluded the day's activities and he left in the evening for Montreal and Ottawa.

Develop National Spirit.

Speaking before the Canadan Women's Circle, Mr. Bennett said that one of the most difficult problems to be faced by Canadians was to develop in Canada a truly national spirit.

The speaker traced the role that Canadian women played in the conduct of the country before they were accorded the franchise and, particularly, since the right to vote was granted them, and he stressed the nenecessity for women developing complete understanding of the responsibilities which fall upon them through the use of this prerogative in the administration of the country.

Women's Franchise.

"What should a woman ask herself?" Mr. Bennett asked. "Should she ask how she should vote? No, but she should ask why she is voting." Mr. Bennett insisted particularly that women who studied the history of the county should take a greater interest in the great problems which were apparent in municipal, provincial and national realms, and which needed so much attention. He denied that he spoke as a politician and said that he appeared before them simply as a citizen of Canada who wanted everyone to realise that the riches of the Dominion did not consist only of natural resources or well-filled bank books, but rested above all in the national life and the character of the people who inhabited the country stretching from the Atlantic to the Pacific. "There is where the power of Canada lies," he declared, "and women had added a capital role, even before she was accorded the vote. It is of vital importance that the national life of this great country, where ten million people live, should develop without hindrance. Life was not given to us so that we might pass it entirely in the joys of existence, but in order that we might realize that these joys include Canada. The co-operation of all is needed if we are to prosper, and to this co-operation we should lend all our efforts."

ARSENAL MAY BE MOVED TO LINDSAY

Government Has To Move the Depot From Ross Factory at Quebec.

OTTAWA, Jan. 20.—Complete removal of the Dominion Arsenal from Quebec to Lindsay, Ont., is under consideration as a result of completion of plans of the National Battlefields Commission, entailing removal of the ordnance depot from the Ross rifle factory at Quebec. The Government already possess a factory at Lindsay, which in the latter years of the war turned out munitions, etc. This factory was constructed also before 1914 and has proved its usefulness. It is understood that considerations of economy may actuate the Government in removing the arsenal to the Ontario town since it would be much less expensive to take advantage of the buildings already standing than to construct new ones.

STARTS DRIVE ON PRIZE FIGHTS

New York Senator Introduces Bill.

ALBANY, N.Y., Jan. 20.—(Canadian Press).—A drive against professional pugilism was launched in the New York Legislature yesterday by Senator Alfred Kennedy, Senator Kennedy introduced a bill designed to prohibit boxing or wrestling matches for cash prizes. Numerous protests against the introduction of the measure have been received by Senator Kennedy. The bill stipulates that its prohibitions shall not apply to contests at which prizes other than cash are awarded.

SALVADOREAN DELEGATE MADE HEAD OF IMPORTANT COMMITTEE

Chairman of International Public Law Committee at Pan-Congress.

GREAT STATESMAN.

Antagonistic to Policies of the United States in Latin America.

HAVANA, Jan. 20. — Canadian Press. — Significance was attached in certain sections of the sixth Pan-American conference when Gustavo Guerrero, Salvadorean delegate, was yesterday elected chairman of the most important committee of the conference, the committee on international public law.

Senor Guerrero is reputedly antagonistic to the policies of the United States in Latin America. His name was proposed by Mr. Crestes Ferrera, Cuban ambassador at Washington, and seconded by Charles E. Hughes, chairman of the United States delegation, and he was unanimously raised to the head of the committee at the initial organization meeting of that body.

The committee over which Senor Guerrero will preside has jurisdiction over the most controversial resolutions which the conference has to pass upon. They are the draft treaties for the codifcation of American public international law prepared at the jurists' conference at Rio Janeiro last April, which recommended among other measures, prohibition by treaty of the interference by force of any American country in the internal affairs of another.

It is recalled however that during the Rio Conference, proposals were discussed to extend this prohibition to interfere in both internal and external affairs of another country and views have been freely expressed that the projection of the later proposals into the debates in the present committee headed by Guerrero are extremely likely

Delegate at Geneva

In connection with his election yesterday, officials here remembered that he had been both foreign minister of Salvador and his country's representative at Geneva, where he was reported as urging the American republics to form closer ties with the League of Nations. He is also credited with the organization of an agreement between Salvador, Guatemala and Honduras, which was said to have as its object resistance to foreign interference.

Dr. Enrique Olava, Columbian minister to the United States, heads the committee on Pan-American union affairs. Both Charles E. Hughes and Honorio Bueryrredon, of Argentina, had previously declined to stand for election.

Sampaio Gorre, of Brazil, was chosen as president of the committee on communications, and Tulie Gesteros, of the Dominican Republic, was elected vice president, the latter on the motion of United States Ambassador Fletcher.

This commission temporarily laid aside important scheduled problems, and adjourned until Saturday, when it will be decided what numbers of sub-committees is necessary. Meanwhile Ambassador Fletcher has been made permanent reporter of the general committee.

SMITH OUSTED FROM SENATE

Illinois Representative's Credentials Declared to be Tainted "Fraud and Corruption."

FOR SECOND TIME

WASHINGTON, D.C., January 20 (Canadian Press). — The Senate late yesterday declared vacant the seat to which the people of Illinois elected Frank L. Smith.

By a vote of 61 to 23—more than a two-thirds majority—his credentials were declared to be tainted with "fraud and corruption," and it was decreed that he was not entitled to a seat.

Before finally barring its doors against the former chairman of the Illinois Commerce Commission on account of contributions to and expenditures in his primary campaign in 1926, the Senate voted, 56 to 27, against giving him the oath of office.

This was the second time this session that the oath had been denied, and by excluding Smith without first permitting him to take the oath, the Senate established a precedent in a case unique in its more than a century of history.

Only the staunchest members of the Republican Old Guard stuck to Smith's cause to the finish. They were joined by two Democrats, one from the South, the fiery Bloase of South Carolina, and one from the North-west, Steck, of Iowa.

Curtis, of Kansas, the Republican leader, and Jones, of Washington, the majority "whip," were among the 21 Republicans who joined forces with 39 Democrats and the one Farmer-Labor, (Shipstead, of Minnesota, in excluding the Illinois Republican Senator-elect.

ADDRESS ON MISSIONS.

Rev. M. J. Levason Tells Marmora A.Y.P.A. of Indian Schools.

MARMORA, Jan. 20.—An excellent illustrated address on the Indian Boarding schools under supervision of M.S.C.C. was given in the Masonic Hall on Tuesday evening by Rev. M. J. Levason, rector of Rawdon. The reverend gentleman, having labored for several years in Indian Missions, was able to present his subject with freshness. The meeting was held under the auspices of St. Paul's Senior A.Y.P.A. Rev. A. B. Caldwell was chairman with Mrs. H. R. Pearce acting as organist.

MANY INJURED IN TWISTER

Heavy Property Damage When Storm Sweeps Southern Part of Louisville.

CUTS ACROSS OHIO

LOUISVILLE, Ky., Jan. 20 (Canadian Press).—Fourteen persons were injured and numerous houses and small buildings unroofed and otherwise damaged by a storm which swept through the southern part of Louisville yesterday. Most serious damage was caused in an area extending from the Eighteenth Street Road to Fern Creek. Property damage was expected to exceed $100,000.

Though the wind attained a velocity in excess of sixty miles an hour, no one suffered injuries that appeared likely to prove fatal.

One Killed in Ohio

CINCINNATI, O., Jan. 20 (Canadian Press).—Sweeping out of overcast skies, a line squall, nearing the proportions of a tornado, cut a path through Southern Ohio yesterday, leaving one dead and many injured. Property damage was estimated at $800,000.

The storm was the worst experienced in this territory since the tornado of 1917. Damage was heaviest at Cumminsville, a suburb of Cincinnati, where the loss may aggregate $500,000. Homes and schoolhouses at Lindenwalk, Ohio, felt the fury of the high wind. Two school children were among the injured.

The only fatality occurred at ashington Court House, where A. R. Kruger, salesman, of Dayton, Ohio, was crushed to death by a coping that was blown from a building on to his automobile. Damage in this city, however, was slight.

BURNLEY FACTORY HAD HIGH RECORD

Not as Much Cheese Made Last Year, However—Officers Elected.

When Burnley Cheese and Butter Company Limited held its annual meeting, a large gathering of patrons and stockholders was present. J. A. Murray, district instructor, J. L. Irwin, dairy produce grader, and N. V. Drewry, director of Untied Dairymen Co-operative, were the speakers at the meeting and all gave the Burnley factory credit for its good standing in first grade of cheese. George Oitment is maker and in spite of some losses came out with a high score of 97½ per cent. The make was down considerably from 1926. Burnley had a make of over 102,000 pounds of cheese.

The average price for the season was 18.97 cents and the average price for a pound of butter fat 44.42 cents.

The officers for 1928 are Harry Richardson, president, W. E. Bonney, vice-president, J. Ferguson, L. Lockhart and C. Bull, directors, Peter Brahaney secretary, W. Sweet and M. Minor auditors.

SUNDAY SCHOOL ELECTION HELD

Executive of Omemee United Church Holds Annual Meeting.

OMEMEE, Jan. 20.—The annual meeting of the Sunday school executive of Trinity Church was held on Monday evening. Reports were heard from the secretary, Mrs. Bradburn, the treasurer, Mrs. A. Scott, the cradle roll department, and the treasurer of the Adult Bible Class, Mrs. Robert Wilson.

The resignation of Mrs. E. Bradburn as a regular teacher of the Junior Boys' class, was received with regret. Miss Lillian Race kindly offered to fill the vacancy for a time.

The organization of a young men's class was discussed and it is hoped that in the very near future it will materialize.

The following officers were elected:

Superintendents— Messrs. T. C. Ivory, H. Lamb.
Secretary—Mrs. E. Bradburn.
Treasurer—Mr. A. Scott.
Pianist—Miss Winnifred Bradburn.
Librarian—Miss Marion Rea.
Teachers—Mr. D. Weir, Mr. H. Lamb, Mrs. H. Lamb, Mrs. S. D. Vaughan, Misses Mary Faulkner, Edna Morcombe, Lillian Race, Jessie Lamb, Eva Race, and Winnifred Bradburn.

OFFER REWARD OF $1,000 CASH COSTELLO CASE

Police Commission, on Suggestion of Mayor McBride, Seek Slayers.

FIND NO CLUES.

Mystery Surrounds Identity of Person Who Might Have Lured Girl Away.

TORONTO, Jan. 20.—One thousand dollars cash reward will be paid by the Board of Police Commissioners of the Toronto police department for information leading to the arrest and conviction of person or persons who caused the death of Florence Costello, North Toronto school girl who, coroner's jury said, had been killed by some persons unknown.

This decision was reached at a meeting of the Police Commissioners yesterday afternoon when Mayor McBride, chairman of the board, brought the question up regarding the reward. Not a single clue is in the hands of the police that will give them a lead to unravel this case, one of the most brutal in years. The identity of the person who might have lured the girl away is a complete mystery.

Questioned, Chief Constable Dickson and Inspector Guthrie of the detective department refused to talk about the case beyond stating that they were carrying on their investigations.

Detective-Sergeant George Tuft and Lockhart Trinnell of headquarters with Detective Richardson, North Toronto, are assigned to the crime.

That the police were quite surprised at some of the medical evidence produced at the inquest is known to be a fact. It is reported they were not informed of all the details following the autopsy performed by Dr. Frankish.

It is nearly a month now since the girl was found and the police now have to pick up a cold trail in an effort, if possible, to bring the murderer to justice.

PARIS WANTS GAMBLE.

PARIS, Jan. 20.—Parisians are tired of being forced to journey to distant resorts every time they want to risk their money on anything but race horses. For 16 years there has been a 60-mile restricted zone around the city in which casinos were not allowed. Members of the Chamber of Deputies are working for the passage of a bill to abolish this zone.

The Smithsonian Institution at Washington, D.C., established in 1846, maintains a library of 360,000 volumes.

PONTYPOOL UNITED S.S. CLOSES YEAR

Annual Meeting Held and Officers Elected for 1928.

PONTYPOOL, Jan. 20.—The annual meeting of the United Sunday school was held on Wednesday evening, January 18, in the basement of the United church. The devotional period was in charge of the pastor, Rev. M. Boomham. The secretary's report showed the Sunday school to be in a healthy condition with a small balance in the treasury. The following officers were elected for the ensuing year:

Superintendent—Ernest Bowens.
Assistant Superintendent—Thomas Webb.
Secretary—John Payne.
Treasurer—Miss Iva Shaw.
Organist—Mrs. Albert McMahon.
Teachers:
Adult—M. E. Hinton.
Girls—Mrs. H. M. Richardson.
Boys—Mrs. E. Cain.
Junior—Miss M. Marvin.
Primary—Mrs. George Wilder.

The meeting was closed by the benediction by the pastor.

Y.P.U. HOLDS ELECTION.

Arthur Stinson is President of Omemee Society.

OMEMEE, Jan. 20.—The election of officers for the ensuing year was the chief item of business in connection with the program at the regular meeting on Monday evening of the Young People's Union. Nominations were received for each office after which voting was done by ballot, the result being as follows:

President—Mr. Arthur Stinson.
1st Vice President Christian Endeavor Department— Miss Mary Faulkner.
2nd Vice President, Missionary Department—Mr. Ross Rutherford.
Literary and Social—Miss Florence Rutherford.
Citizenship Department—Miss Eva Pace.
Secretary—Mr. Irvine Connell.
Corresponding Secretary — Mr. Morgan Rowland.
Treasurer—Miss Winnifred Bradburn.
Pianist—Miss Lillian Race.

Communications from the Women's Institute Societys at Janetville and Lindsay were received, regarding repeating the play, "Eyes of Love", put on by the Y.P.U. on Christmas night. The dates were fixed for January 27 and January 31 respectively.

ROYAL SCARLET CHAPTER MEETS

S. C. Warr is Presiding Officer For Norwood District Lodge.

FINANCES GOOD.

The annual meeting and election of officers of the Royal Scarlet Chapter of Norwood district was held in Westwood on January 17. The attendance was good despite the rather disagreeable storm that prevailed during most of the evening. The following Lodges were represented:

L.O.L. No. 2062, Westwood; L.O.L. No. 528, Hastings; L.O.L. No. 34, Norwood; L.O.L. No. 281, Halls Glen; L.O.L. No. 284, Warsaw.

Two candidates were advanced to full membership in the Royal Scarlet. After carefully going over the books and accounts for the year the auditors reported a substantial cash balance in the bank.

Past Commander Bro. E. Baptie conducted the election, which resulted as follows:

W.C. in C.—S. C. Warr.
E.C. in C.—A. Brown.
Chaplain—G. Humphries.
Scribe—J. A. Sargent.
Treasurer—H. S. Nelson.
H. at A.—A. W. Batten.
Lecturers—E. Baptie.

These officers were duly installed in office by Past Commander Bro. E. Baptie, assisted by P.W.C.M. Bro. William Montgomery. During the evening a very attractive lunch was served by the ladies of Westwood.

BLAIRTON SCARLET INSTALLATION HELD

District Officers Are Placed in Office By Past Commander.

HAVELOCK, Jan. 20.—The annual installation of officers of the Royal Scarlet Chapter of Blairton district was held in the Orange Hall on Saturday evening. The ceremony was conducted by Past Wor. Companion in Command, Isaac Barlow.

The officers are:
Wor. Companion in Command—Fred E. Post.
Excellent Companion in Command—W. J. Peoples.
Chaplain—William Yelland.
Scribe—Frank Ellis.
Treasurer—Robert Buchanan.
Herald at Arms—W. F. Post.
First Lecturer—Isaac Barlow.
Second Lecturer—Robert Crawford.
First Conductor—R. J. Peoples.
Second Conductor—R. Sanderson.
Inner Guard—Howard Dafoe.
Outer Guard—William Harris.

SUNDAY SCHOOL LESSON.

JESUS AND LAW OBSERVANCE

The International Uniform Sunday School Lesson for Jan. 22. Jesus and the Law. Mark 2:18-22; 3:1-6.

BY WM. E. GILROY, D.D.

Editor of The Congregationalist.

Text: Mark 2:18-22; 3:1-6.

And the disciples of John and of the Pharisees used to fast and they come and say unto Him, Why do the disciples of John and of the Pharisees fast, but Thy disciples fast not?

And Jesus said unto them, Can the children of the bride-chamber fast while the bridegroom is with them? as long as they have the bridegroom with them, they cannot fast.

But the days will come, when the bridegroom shall be taken away from them, and then shall they fast in those days.

No man also seweth a piece of new cloth on an old garment; else the new piece that filled it up taketh away from the old, and the rent is made worse.

And no man putteth new wine into old bottles; else the new wine doth burst the bottles, and the wine is spilled, and the bottles will be marred but new wine must be put into new bottles.

And He entered again into the synagogue; and there was a man there which had a withered hand.

And they watched Him, whether He would heal him on the sabbath day; that they might accuse Him.

And He saith unto the man which had the withered hand, Stand forth. And He saith unto them, Is it lawful to do good on the sabbath days, or to do evil? to save life, or to kill? But they held their peace.

And when He had looked around about on them with anger, being grieved for the hardness of their hearts, He saith unto the man, Stretch forth thine hand. And he stretched it out and his hand was restored whole as the other.

And the Pharisees went forth, and straightway took counsel with the Herodians against Him, how they might destroy Him.

Few questions have been more important in history than the relation of man to law.

Few questions, incidentally, are more important than this in America at the present hour. Only some rare and anarchic spirit, either of wilful disregard of the rights and privileges of others or of some half fanatical appreciation of liberty as a speculative thing, ever has questioned the value of law and custom, or of what law and custom have meant in the evolution of man from barbarism.

But laws and customs that were designed to meet specific needs crystallize, sometimes, into unjust or meaningless oppressions. Instead of enlarging the vision of man and giving greater scope to his spirit, they may weaken his initiative and suppress his personality and will.

Thus it comes about in history that from one standpoint law breakers have played almost as large a part in progress as law observers.

Back in the very beginning of Christianity when the apostles were admonished by the authorities to do certain things, their reply was, "We ought to obey God rather than men." In much the same spirit John Bunyan at a later day spent 12 years in Bedford jail because his conscience would not permit him to obey the law of the land which forbade freedom in prayer and worship.

Ruling Principle.

What then is the principle that must rule in life in relation to law? Or is there a principle that is easily discoverable and easily applied? A complex matter may be made much too simple, but if there is a principle and solution it would seem to be suggested in our lesson. It is found in the suggestion that there is a higher law that runs through life than the law of custom and convention, or even than the law of the state.

There is an authority of the voice of truth and conscience which, when a man once hears it, subdues every other voice. Here, for instance, was this custom and convention that the Pharisees observed about fasting, but Jesus pointed out that there is such a thing as fasting in spirit, a reverence in the inner sanctuary of the soul, which is much more sacred than any law concerning an external observance. It is possible to fast bodily and yet have very little of this spirit of fasting as an expression of the soul's aspiration.

So, too, in this more important illustration of the question of healing on the Sabbath Day. Custom and Convention said it was wrong. The higher law of humanity, which was the law of Christ and of Christian love, said that it was right to heal and do good on the Sabbath Day. In breaking the actual observance of law and custom Jesus revealed the higher law of life and truth.

In Our Own Land.

The fact that we are face to face with serious problems of lawlessness and law enforcement in our own land has led many people, especially many good Christians, in recent years to face the whole question in a way that has obscured the reality of this principle that the law of conscience in its ultimate expression is above every other law.

The obvious retort is that if this is so, what becomes of the state and of legal authority? If a man is free to disobserve any law that he does not like, or any law in which he does not believe, what are going to be the limits of this disregard of law, and how will any law retain its power and its sanctity?

The reply is that when men are moved by highmindedness, intelligence, and conscience, unless the laws of the land are almost hopelessly wrong, there would be little disposition to disobey them. The great mass of disobedience to law today is not upon high conscientious ground. It is rather upon the ground of self-indulgence and personal preference.

The fact of the matter is that there can be no great citizenship where the element of conscience is neglected or weakened, and where the vast mass of citizens of a state are moved by that conscientious conviction that would lead them to disobey a law that they believed to be morally or spiritually wrong there will be no danger of the law and life of that state being weakened.

Individual Daring.

Progress comes to the world through individual men daring, in behalf of vision and conscience, to disregard convention and custom, religiously and socially, where they believe that these things are lifeless and wrong. When the state passes, as it once did in England, laws that would make an ordinary prayer meeting in a home illegal, what can good Christians who love their independence and their religious freedom do other than persist in worshiping God according to the dictates of their own conscience?

The principle that a higher law runs through all of life is dangerous only for those who seek to pervert a great truth and wrest it to wrong purposes and results. A God-fearing nation will be a law abiding nation because such a nation will have, on the whole, laws that ought to be observed.

It is a profound mistake to set the Lord Jesus, however, upon the side of mere formalism and complacency. He manifested in His earthly life the vigor and independence of the man who rebels against conventions and customs that have lost their vigor through losing their meaning and their reality. It is life that is the supreme thing, and law is great and noble only as it ministers to life, as it enlarges for man and society the sphere of noble living and the highest welfare.

January Clean Sweep of ODDS and ENDS

Inventory time is here so we are clearing out a number of odds and ends, as well as reducing our stock in many of our regular lines. Read this list carefully and come to "Browns'" for bargains.

BELMONT OFFICES FILLED BY COUNCIL

Municipal Positions Are Assigned at First Meeting of Year.

HAVELOCK, Jan. 19.—The inaugural meeting of the Belmont and Methuen Council was held on January 9th, with all members present. After signing their declaration of office, the members took their seats with Reeve Breckenridge in the chair.

Moved by Councillors Sanders and Spencer that Council let to Arthur Coon the contract of placing 150 yards of gravel on the Seymour-Belmont boundary across the west half of Concession 5, Belmont, at $1.00 per yard, providing Seymour Township will meet the grant with 50%.

Moved by Councillors Whitney and Barrons that the council instruct the Treasurer to subscribe for seven copies of the Municipal World.

On motion By-law 681 was given its several readings and passed, signed and sealed. This By-law confirms the appointment of the following officials for 1928

Moved by Councillors Whitney and Barrons that Grant Dafoe be appointed clerk at a salary of $200.00 with postage, stationery, and long distance telephones, calls extra.

Moved by Councillors Sanders and Spencer that Wellington Burgess be appointed treasurer at a salary of $150.00 with postage, stationery and revenue stamps extra.

Moved by Councillors Whitney and Barrons that the assessor be paid $140.00 for his services this year, this amount to include postage and stationery.

Moved by Councillors Spencer and Whitney that Robert Marshall Jr. be appointed assessor for 1928.

Moved by Councillors Spencer and Whitney that James W. Russell and R. W. Burgess be appointed auditors for 1928 at a salary of $12.00 each.

Moved by Councillors Sanders and Barrons, that H. W. Brown be appointed Sanitary Inspector at a salary of $3.00 per day and thirteen cents a mile one way.

Moved by Councillors Spencer and Whitney that Henry Pacey be appointed member of the Local Board of Health.

Moved by Councillors Barrons and Whitney that W. S. Davidson and Terry Fitzpatrick be appointed sheep valuators at $3.00 per day and thirteen cents a mile one way.

Moved by Councillors Spencer and Whitney that Hugh McArthur be appointed Weed Inspector at $3.00 per day and thirteen cents a mile one way.

Moved in amendment by Councillors Sanders and Barrons that James Freeman be appointed Weed Inspector at same salary as motion. Amendment carried.

Moved by Councillors Barrons and Whitney, that the salary of Reeve and Councillors be $75.00 per year.

Moved by Councillor Spencer in amendment that the salary of Reeve and Councillors remain as in the past. There being no seconder to the amendment the motion carried.

Moved by Councillors Spencer and Barrons that the printing be given to the Havelock Standard at $170.00 with extra per name for Part III. Voters' List.

Moved by Councillors Whitney and Sanders that the following road grants and accounts be passed and orders drawn on treasurer for same W. J. Peoples, $5.00; Peck, Kerr and McElderry, $67.04; Municipal World, $7.00; Gilbert Steenburgh, $4.00. Total, $83.04

GIRL RECOVERING; MOTHER STILL ILL

Mrs. Deignton Has Been Unconscious Since Admission To Hospital.

TORONTO, Jan. 19. Canadian Press. — Joan Deignton, the seven-year-old daughter of George Deignton, who is in the Sick Children's Hospital, suffering from severe head injuries she received at the hands of her father on Saturday when he struck her with an axe, is reported to be rapidly recovering. No change, however, is reported in the mother's condition. Mrs. Deignton has been unconscious since her admittance to hospital on Satuday.

DELORO GIRLS MEET.

Sunnyside Club Holds Annual Meeting and Election of Officers.

MARMORA, Jan. 20.— Deloro Sunnyside Club recently held its annual meeting when the girls welcomed five new members and elected new officers as follows:

President—Eileen Mantle.
Treasurer—Elizabeth Tutier.
Secretary—Madeline Gaffney.

The rest of the evening was spent in the usual social manner.

September was the seventh month of the year in the Roman calendar, when it was known as Septimus.

Went To See Mother; Convict Is Let Off

AUBURN N.Y., Jan. 19.—(Canadian Press.)— Because he was shot in the course of capture after escaping to see his mother before she died, Sonny Parlieu, Auburn prison convict, charged with escape from Victory Road Camp on Sept. 9, 1927, has found leniency at the bar of justice.

When arraigned before Justice Rodenbeck in the Supreme Court here, Sonny was given suspended sentence.

ENGLAND STRUGGLES WITH BAD WEATHER

The UPPER picture presents a picturesque view of the English countryside near Epsom during the recent heavy snowfalls, which completely isolated many districts. The LOWER picture shows the Thames river at Walton bridge, swollen by the thawing snow, a short time before it burst its banks and deluged London with one of the costliest floods the old land has experienced in a century.

FRIDAY, JANUARY 20, 1928.

PETERBOROUGH'S TREES.

Under the direction of the Board of Works, many trees throughout the city are being trimmed of useless branches and other dead trees are being cut down.

This is a very useful work and will effect an improvement on many city streets.

There are various sections where a judicious thinning out might be advisable, sections where trees are so crowded that they are interfering with each other's growth and making it almost impossible to cultivate lawns.

At the same time, however, it should be remembered that trees do not mature very rapidly, and sooner or later provision will have to be made to provide new ones where gaps have been left.

Peterborough is most fortunate in the possession of so many beautiful trees.

To look down upon the city from an aeroplane or from the top of Armour's Hill in mid-summer is almost like looking down upon a great park.

It should be the ambition of the city authorities to see that this condition is maintained, and to keep in mind the necessity of replenishing our store of trees when more are needed.

This is a matter that should receive some attention from the City Council.

THE BAR IS NOT WANTED.

Ontario with a population of a little over 3,000,000 people, has about 2,000,000 persons old enough to legally purchase liquor permits.

Yet so far in the present fiscal year only some 218,000 residents of the Province have secured the required authority to purchase liquor.

Making allowances for the fact that there is a certain amount of using one permit for the convenience of two or three people, the total number of patrons of the Government's system of liquor stores and beer warehouses is surprisingly small, and the number who are abusing the privilege forms a decidedly small percentage of the permit-holders.

Under the circumstances it is difficult to justify any demand for the sale of beer by the glass, and it is more difficult to understand the contention of certain temperance leaders that drinking at the open bar would be preferable to the present system.

The Examiner does not believe that the people of Ontario want the bar restored or a return made to the old conditions under such a method of dealing with the liquor question.

They—or the majority of them—are satisfied that so long as the present plan is strictly carried out and there are no more evidences of abusing the privilege than there have been up to the present, that Government control is preferable both to the wide-open sale of pre-war days and to the underhand and up-the-alley sale of the so-called prohibition era.

THE KILLER OF THE HIGHWAY.

The number of people killed or hurt in automobile accidents in the United States last year reached a total of approximately three-quarters of a million.

More than 24,000 lives were lost and 720,000 persons were injured.

These figures are appalling.

As The Calgary Herald says: "It is astounding to contemplate the fact that in a single year and in a single country three-quarters of a million people were either killed or maimed through ignorant or careless operation of a machine that was designed to bring comfort and happiness rather than death and suffering to the human race."

Any disease that caused so many deaths and so much pain would be studied closely by the finest minds in medical science, eager to find a means of checking such a terrible malady.

We are supposed to be sensible people, on the average, on this Continent.

Are we going to let this terrible toll go on year after year, or are we going to resolve that "ignorant or careless operation" of motor cars must come to an end.

The motor cars is here to stay.

We must, therefore, learn to use it so that it will no longer be a deadly killer, but a real friend of humanity.

DO WE NEED TO DO THIS?

Mild spells may be appreciated by the men who hold snow-ploughing contracts, but to the caretakers of the municipal skating rinks they mean nothing but a smaller pay envelope.

The Examiner understands that when, as during the present winter the absence of cold weather has made outdoor skating impossible, these city employees are put on a half-pay basis.

Economy is an excellent thing in the administration of public business, but in the case of men whose remuneration for a week when they are fully employed is but $15.00 and who require every cent of that money for the needs of their families and themselves, there is surely no ratepayer who would complain if these employees were paid their by no means princely salaries even when the rinks are not in use because of a thaw.

When the weather is cold they work long hours in looking after the rinks and keeping the ice in shape for the public, and in view of the shortness of the season and their small rate of pay, they should get the same break as the snow-plough brigade, who get their contract price whether there is snow to remove or not.

A proud and prosperous city like the one we are all so fond of surely does not need to save at the expense of a few temporary employees who are none too lavishly paid at best, and who have a place for every copper of their weekly salary.

CUT THE TAX IN TWO.

Much was said at Chatham on Saturday about the importance of the British market for Canadian tobacco. The Hon. John S. Martin, Provincial Minister of Agriculture, touched another point of no small importance when, addressing Mr. Motherwell, the Federal Minister in charge of a similar department at Ottawa, he asked the Government to reduce the present tax on Canadian cigarettes from $6 to $3 per thousand. Mr. Martin pointed out that millions of cigarettes are being smuggled into this country annually because of the prohibitive tax placed on the Canadian article by our Government, and he believed it would be an excellent piece of business if the tax were cut in two, as suggested in representations to the Advisory Tariff Board some time ago.

Mr. Martin's plea is one of common sense. The heavy impost placed on Canadian cigarettes is a poor piece of business and has been such from the start. Human nature is human nature the world over. It is not reasonable to expect people to pay 35, and even 50 cents, a package for cigarettes, if it is possible for them to secure the same article, smuggled or otherwise, at two packages for 25 cents. Yet this is just the situation now, a situation that is taking vast sums of money out of the pockets of Canadian tobacco growers, Canadian workmen, Canadian manufacturers and the Canadian Government as well.

From Ottawa the other day came an intimation that this year's Budget announcements would likely contain a reduction of the cigarette tax. This should be done. The Canadian levy now is exactly twice that of the United States and it should be reduced to the American level in order to be effective. If this is done the growing of fine cigarette tobacco in Canada will be encouraged, our Canadian manufacturers will have a chance, and Canadian retailers, especially in border districts, will be given an opportunity to get back much of the legitimate business that is now lost to them.

Mr. Motherwell indicated clearly at Chatham that he is anxious to do everything possible to assist the tobacco industry generally. He can perform a real service for it by insisting to his Cabinet colleagues that the cigarette tax be cut in two.—Border Cities Star.

TREAT THEM LIKE NATIVE SONS.

Olav Tellefsen, aged 28, champion of the South Norwegian Ski Association for seven years and winner of more than fifty local skiing prizes in Norway, is going to the Olympic games as a representative of Canada. The Olympic committee is to be congratulated upon taking him in the face of objections which should never have been made.

The objectors were Canadians. They based their protest upon the fact that Tellefsen is naturalized, not native. Yet to be naturalized he had to be a bona fide citizen. He had to prove five years' residence in Canada and he had to swear allegiance to the British crown. That ought to be enough for anybody. If Canada is to secure the best type of immigrants, and if immigrants are to be encouraged to take out papers of naturalization, they must be recognized, when naturalized, as Canadians in every sense of the word. They must be given just as square a deal as the native-born.

The Scandinavians are good settlers. J. T. Thorson, Rhodes scholar from Manitoba in 1910 and today a member of the dominion parliament, is the son of naturalized Scandinavians from Iceland. He is only one of the many who have made good in Canada. Lieutenant-Colonel H. M. Hannesson, former Conservative member for Selkirk, was another; Hon. "Tom" Johnson, attorney-general for Manitoba, was a third. The famous Falcon hockey team, which won the Olympic hockey championship for Canada in 1920 was largely composed of the sons of Icelanders.

Why shouldn't another athlete of Scandinavian descent win skiing honors for the dominion in 1928? Doubtless Olav Tellefsen will. Those who criticized his inclusion in Canada's Olympic team were hard up for something to criticize.—Toronto Star.

THOSE DRIVERS' PERMITS.

Hon. George S. Henry introduced a sound practice when for a dollar apiece he sold driving licenses last summer. The possession of such a license was evidence that the owner was competent to drive, either by reason or experience or after due trial in the case of the quite young or the partly incapacitated. The back of the license was also a handy place for the police to record convictions of the blacker kind.

About the only flaw in the scheme was that a great many people didn't bother to get a driver's permit and managed to see the year out without one.

The Ottawa Journal estimates that there were five thousand people in Ottawa who ought to have paid their dollar for a license and didn't.

The same could be said of a lot of people in St. Thomas and Elgin, and of all the other cities and counties in the Province.

It is to be hoped the authorities will see to it that there is no such slipping out of the obligation this year. It is unfair to the Provincial revenue, and unfair to those who conscientiously obey the law.

These permits are good for the whole of this year, so there is an easy way of getting at the delinquents. Few drivers have taken out their license plates yet for 1928, and it should be made plain by Mr. Henry that drivers must produce their permits when they apply for their car licenses. If they have no permit, then they should be refused their plates unless they buy their driving permits there and then.

This would still enable lots of people to get by; younger members of the family who borrow the car when they want it. These must be checked up by the police, and a good plan would be for the Minister to decree that drivers must do as they do in England—carry their permits with them when driving.

Unless there is teeth in the law this year, people will ignore it in increasing numbers in future.—St. Thomas Times-Journal.

EDITORIAL NOTES AND COMMENT.

The Border Cities Star suggests that Mr. Hanna should examine that barrel-shaped Seymour ghost. It might not have a permit.

Surely the latest atrocity should convince Michigan people that that State requires capital punishment.

The Varsity Grads are taking plus fours to Europe with them. Could you imagine the Peterborough team in that kind of garb if the blue and white had come through last winter!

The St. Lawrence waterway proposition is not producing any electrical energy yet, but it must be admitted that it is developing plenty of gas.

The Campbellford ghost, points out The Toronto Globe, did not "walk" the other evening when reporters kept vigil all night. It is evidently, adds our contemporary, a shy spook and resentful of publicity.

Henry Wise Wood is President of the United Farmers of Alberta for the thirteenth successive year. The veteran head of the farmers' organization knows his wheat, so to speak.

And now the Guelph policemen say they have been hearing ghosts. They should try to keep from dreaming when they fall asleep on duty.

CATTLE, GRAIN AND PRODUCE

TORONTO LIVE STOCK.

TORONTO, January 20. — There were no fresh cattle in yesterday morning, and the few stale left-overs were cleared early. A small offering of 155 hogs and a dozen lambs were cleared at steady prices.

Cattle prices are steady, and unchanged at the week's early decline of about 50c.

Heavy steers, choice	$11.00 to $11.75
Butchers, choice	10.00 11.00
do, fair to good	8.50 9.50
do, common to medium	6.00 7.00
do, heifers	8.00 9.50
Baby beeves	9.00 10.00
Cows, fat, choice	7.00 8.50
do, canners, cutters	2.50 5.50
Bulls, butcher, choice	6.50 8.00
Bolognas	3.50 4.00
Feeders and shortkeep.	8.00 9.50
Stockers, good	6.00 6.75
Calves, choice	13.50 15.50
Springers, choice	90.00 110.00
Milkers, choice	80.00 100.00
Lambs, choice	13.50 14.00
Buck lambs	9.00 10.00
Hogs, f.o.b. thick smooth	... 7.75
Hogs, selects, f.o.b.	... 8.25
Hogs, off cars, selects	... 9.15

MONTREAL GRAIN AND PRODUCE.

MONTREAL, January 20 (Canadian Press). — A feature of the domestic grain trade here yesterday was the demand that developed from exporters for Manitoba spring wheat and sales of several loads of No. 3 Northern were made at two cents per bushel under the Winnipeg May option, c.i.f., bay ports. There was some demand from local buyers for oats and a moderate trade was done at steady prices.

The flour trade was fairly active, and prices for spring and winter wheat grades were well maintained.

The demand for all lines of millfeed continued good, and values were firm. A moderate amount of business was done in standard grades of rolled oats and prices were unchanged.

The export trade in baled hay was quiet and the local demand was also limited, but prices were steady.

A weaker feeling developed in the egg market and prices for fresh eggs scored another decline of one to four cents per dozen, and storage eggs one cent per dozen. This was attributed to the fact that supplies were somewhat in excess of the daily requirements. The receipts were 611 cases.

Owing to the colder weather prevailing, the smaller receipts and a somewhat better demand from local and outside buyers for potatoes yesterday, a firmer feeling developed in the situation, and prices marked up five cents per bag. The trade was more active and sales of car lots of Prince Edward Island Green Mountains were made at $1.20 per bag of 90 pounds; Prince Edward Island White potatoes at $1.10 per bag of 90 pounds; New Brunswick Green Mountains at $1.10 per bag of 90 pounds in bulk; New Brunswick White potatoes at $1.05 per bag of 90 pounds in bulk; and Quebec varieties at 95c to $1.00 per bag of 90 pounds in bulk, ex-track.

Bean Demand Fair.

The demand for imported beans was fair and prices were firm. Car lots of choice white hand-picked were quoted at $2.80 per bushel, ex-track, and broken lots at $2.90 per bushel, ex-store.

The butter trade showed no improvement, the demand being still of a very limited character, but values were unchanged. The receipts were 135 packages.

The cheese market was dull and featureless. The receipts were 123 boxes.

CHICAGO CATTLE.

CHICAGO, January 20 (Canadian Press). — Hogs, 50,000; bulk desirable hogs, all weights, 180 pounds up, $8.25 to $8.40; numerous sales, $8.45; top, $8.45; most hogs at top price 180 to 215 pounds weights; few sales above $8.30 late; bulk 140 to 160 pound average, $7.75 to $8.25; pigs mostly $7.00 to $7.50; few selected lots strongweights, $7.75 to $8.00; bulk packing sows, $7.15 to $7.40; best kinds under 360 pounds, $7.50 to $7.60.

Cattle, 9,000; best fed steers in load lots, $16.25; part load, $17.00; bulk, $12.50 to $14.75; low cutter cows, $5.50 to $5.75; vealers, $12.75 to $14.00 to packers; outsiders, $14.50 to $15.00; few, $15.50.

Sheep, 13,000; top, $13.75 on choice 80 pound averages; choice 87 pound lambs to shippers, 40 cents higher, $13.65; bulk 82 to 90 pound lambs good and choice, $13.25 to $13.65; 92 to 100 pound offerings, $13.50 to $14.25; 87 to 92 pound Colorados, $13.00 to $13.50; fall clipped lambs, $11.75 to $12.00; 107 pound yearlings, $11.25; sheep steady; good to choice fat ewes, 115 to 130 pounds, $7.35; feeding lambs, bulk, $12.50 to $12.75; medium weights, $13.00.

CHICAGO GRAIN.

CHICAGO, January 20 (Canadian Press). — Keeping in step with an unexpected advance at Liverpool, wheat values here displayed pronounced strength at times yesterday, influenced also by unfavorable crop conditions, south-west. On the other hand, corn declined toward the last, owing a good deal to prespective larger receipts here.

Wheat closed firm, ⅛c to ½c net higher, corn ¼c to ⅝c off, oats unchanged to ¼c to ⅜c lower, and provisions unchanged to 10 cents up. Larger trading in future deliveries of wheat here than had been the rule of late was also an outstanding feature, but this stimulus was somewhat offset by late weakness of the corn market. Besides, Argentine wheat shipments for the week were almost 2,000,000 bushels greater than for the week previous, and were also decidedly in excess of the total a year ago. As the day drew to an end, selling to release profits did much also to lop off part of the earlier gains in the wheat market.

Corn prices suffered material setbacks after having scored rather brisk upturns owing to general rains over the corn belt. An increase of offerings from nearby territory, however, was in evidence on the price bulges, and there were also bearish effects from Chicago purchases of about 2,000,000 bushels of corn to arrive. Oats were governed by the action of corn.

Provisions were firmer, reflecting the trend of hog values.

Wise and Otherwise

The hardest thing in the world to hold, besides a royal flush, is your own.

Biologists devote a great deal of their time to cell life—criminal courts too little.

Be circumspect. One of the disadvantages of being a recognized liar is you may want to tell the truth sometimes.

Economist: A fellow who spends all his money trying to figure out how to save a little of it.

You can't always tell. Just because a man is using flowery language is no sign he is handing out bouquets.

An official probe is something that endeavors to find out after the damage has been done what everybody should have known before.

Maybe there is room at the top. But look what you generally have to climb over to get there.

Dictionary. A book to which you refer after an argument over how to spell a word to find out you were wrong.

Life is so paradoxical. A lot of people keep their noses to the grindstone all the time trying to hold their heads up.

Sage advice isn't worth so much after all. For ages platitudinists have been telling us to forge ahead, and look what happened to the blacksmith.

The reason a wife can always find things at home that a husband can't is because she leaves home later in the day than he does.

(Copyright, 1928, NEA Service, Inc.)

A Thought

THOUGHTS ON LOYALTY

If you are working with or for a man, by all that is good and great, be loyal to that man, or be fair to yourself and resign.

To remain in a position and pay and then bite the hand that feeds you—to knock the man who pays you—to try to elevate yourself at the expense of your employer, is ingratitude, injustice—treason.

The dirtiest kind of dishonesty is disloyalty. There is nothing produced on earth quite so low as that of the ungrateful man.

Disloyalty is the abridgment of all human baseness. It is ignorance of head and ingratitude of heart.

No business organization can successfully cooperate, where the corrosion of disloyalty is rusting off the hinges of human effort.

We can lock the safe, count the cash, check up the stamps, and introduce the time clock; but disloyalty must be dismissed or the organization will be ditched.

If you are working with or for a man, work with and for that man and his organization—for your organization.

And remember this: Every time you criticize others in the organization, without showing, in a friendly way, and by your own example, a better way, you are simply costing the concern in cash, in confidence, in cooperation, more than you are worth, no matter what your pay may be.

Finding fault with others in the organization increases your obligation to introduce the necessary means of mending the mistakes.

Constantly criticize, if you want, but do not condemn others until you are ready and willing to help correct what is wrong, and, above all things, be loyal to the man who has placed you in a position to help him help others and to help yourself.

The Salvation Army each year gives about 450,000 Christmas dinners, 175,000 toys, and more than 25,000 Thanksgiving dinners.

Lesson No. 8

Question: Why is the *emulsified form* the more efficient way for me to realize the health-giving benefits of cod-liver oil?

Answer: Because when cod-liver oil *is emulsified* it is more perfectly absorbed, and does not disagree with digestion. Take

R. ANDERSON IS CHAIRMAN

Elected at First Meeting of Havelock School Board.

C. JAMIESON SECRETARY.

HAVELOCK, Jan. 20.—The inaugural meeting of the Havelock School Board was held in the school on Wednesday evening, Jan. 18, with all members present. After the newly-elected members, Trustees Jamieson, Fraser and Rigby had taken their declaration of office, the secretary called for nominations for chairman. Moved by Trustees Anderson and Rigby, that H. W. Roche be chairman.

Mr. Roche thanked the mover and seconder of the motion for the honor but declined to accept. He had the office before and thought there were other members on the Board who should have that honor, and that he would be glad to help in any way he could whoever received the appointment.

It was then moved by Trustees Rigby and Scully, that Robert Anderson be chairman. Mr. Anderson moved in amendment that Mr. Fraser be appointed chairman. Mr. Fraser declined in favor of Mr. Anderson and Mr. Anderson was declared elected.

C. Jamieson was appointed secretary for 1928 on motion by Trustees Rigby and Scully.

A communication was read from R. Buchanan, caretaker of the school, requesting an increase of salary. The present salary is $960.00 and Mr. Buchanan thought in view of the fact that it was a position requiring full time that the salary should be increased to $20.00 a week.

On motion by Trustees Roche and Fraser the matter was left over until next meeting.

An application was received from F. B. McAdam for the position of school attendance office and on motion by Trustees Scully and Roche he received the appointment at a salary of $25.00.

On motion of Trustees Roche and Fraser the following accounts were passed:

R. J. McCutcheon, welding school seat, $1.50; W. C. Hildred, entrance fees and guarantee fund, $7.

Principal P. Yuill addressed the Board in regard to the art exhibit under the auspices of the school to be held on Thursday, Friday and Saturday of this week, the receipts of which are for the purpose of purchasing pictures for the school. Mr. Yuill asked that the Board give them some help in getting these pictures framed, as the number purchased will depend on the amount of proceeds from the exhibit. It was moved by Trustees Fraser and Scully that the matter be left over until the next meeting for more definite information.

It was moved by Trustees Roche and Scully, that the secretary-treasurer be bonded for 1928 for the same amount as 1927 ($1,000.00) the bond to be procured from the same bond company as last year.

After discussion on the condition of the school yard, Trustees Roche and Jamieson were appointed a committee for 1928 to look after school repairs and keeping up the school yard, on motion by Trustees Rigby and Scully.

Voice of the People

Letters to be printed in the Voice of the People column must be received at The Examiner office on the day before it is desired to have them published.

ABOUT THE NEW SERIAL

To the Editor:

Sir.—I am a patron of The Examiner, but I want to beg of you to have a little talk. I have been pained as I read our daily paper. It is sad enough to read of tragic occurrences, but when they are encouraged by the trash of such as the Regent Fox News of the gay and tragic life of the Canary Murder case, to be handed out to the minds of our young men and women of the country, it is too much. The comment of clean-minded people is: What are we going to end up in? No wonder our jails and prisons and asylums are full because of the dope that is poured into the minds of our young people. My young son saw the ad. on page nine, but my pained mind could not bear to let him see the story. I maintain it is scandalous and, if continued, I will refuse to continue the issues any longer. When it is a local paper, it is not supposed to be filled with dime novels.

Sincerely,
A SUBSCRIBER

P.S.—Even my boarder from Scotland said it would not be allowed at home.

Editor's Note:

It is not customary to reply to anonymous letters or to print them in The Examiner, but when an attack is made on The Examiner, we do not object to giving it publicity.

It is unfair at this stage to judge the new serial story. There is absolutely nothing in this story to call forth such a reprimand as the above letter, and the letter is doubly unfair since the writer could not have possibly read the entire story. The Examiner is running it at the same time as hundreds of other newspapers, and only a few in each newspaper office have had the opportunity to read the succeeding installments. We wish to assure readers that this serial story is not calculated to hurt the minds of even young people.

The objection that such stories would not be allowed in the Old Country is based on misapprehension, since there are no more sensational stories published in the world than in the Old Country newspapers and magazines.

RE GHOSTS.

To The Editor of The Examiner
Dear Sir:

Some fifty years ago Mr. A. P. Pousette rented the farm house in the present Nicholls Park and employed me to do carpenter work in it. One day I had to leave it for material when a young woman cleaning there told me the house was haunted and dared not stop alone. She said that ghosts had been seen wandering around. I told her I did not believe such nonsense, but she did and went off and left the work. I told Mr. Pousette about the ghosts and he said they did not like lawyers and would not trouble him. Two days later I went before dark to get a rough fire board to replace it with something more neat. When I reached the veranda I heard a strange noise in the house. I unlocked the front door and in the dark moved crates of furniture and found the racket came from behind the board I wanted. I struck a match and looked over the top, when the thing blew in my face and blew the light out. I then got a club and beat at the noise. I took a bunch of wiggling stuff to the light outside and found it was five night hawks, so heavy that they had broken down the nest. It was the mother bird that had blown out the light. I could tell more similar stories to show there is nothing in most ghost stories if investigated. A mouse caught in a trap by his tail and going down stairs made a splendid story; a rat caught in the wall and screaching one night was stopped by a good thump on the plaster.

Yours truly,
E. COURTNEY.

PREMIER DENIES CABINET RUMOR

No Change Planned, Says Ferguson, When Stories Told Him.

NOT JUSTIFIED.

TORONTO, Jan. 20. — Honors for persistency upon the point of pending changes in the Ferguson Cabinet so far remain even between the local evening press and Premier Ferguson. Reports of the resignation of Hon. Dr. Forbes Godfrey met emphatic denial on Wednesday. Yesterday the same journal returned with a story of the projected transfer of Hon. John S. Martin to the portfolio of education, and the elevation of Col. Tom Kennedy, M.P.P. for Peel, to fill the breach thus created. Premier Ferguson, however, countered this rumor as determinedly as its predecessor, denying that there was any basis for it in fact.

"Like the other," he said, "it is made out of whole cloth. While he is about it the writer might just as well tell me the date of my own resignation."

The Premier declared comprehensively that there was no question of Cabinet reorganization in the air. It had never been suggested or contemplated, he said, adding humorously that he would fail to see the justification for any change in the personnel of the present Government.

Campbellford

CAMPBELLFORD, Jan. 20.—Mrs. Kearn and son, Ferris, Toronto, have returned home after spending a few weeks as the guest of Mrs. Kearn's mother, Mrs. J. B. Ferris, Saskatoon avenue.

The press representatives from all the daily papers who have been in town investigating the Keating Ghost gave up the ghost in more ways than one and returned to their respective offices yesterday.

Lionel Dagleish is visiting his sister, Mrs. Allen, Bedford Road, Toronto.

Harry V. Lockwood, brakeman on the C.N.R. trains number 101 and 100, Belleville to Peterboro, is back on duty again after spending several weeks in the southern states. Mr. Lockwood was granted one month's leave of absence on account of poor health.

Captain T. E. Hyland has intimated that there is every possibility of there being a decided change in the local motion picture management.

GRACE CHURCH HAD GOOD YEAR

Reports Show Progress in All Activities of Millbrook Congregation.

SOCIETIES PROSPEROUS.

MILLBROOK, Jan. 20.—There has probably not been a more successful year in the history of Grace Presbyterian church than was reported at the annual meeting held in the church on Tuesday afternoon, January 17, the pastor, Rev. John Riddell, presiding.

Optimism was the key-note of the large gathering, the congregation being well represented by both men and women, indicating that interest in the activities and welfare of the church is not a mere matter of form but is deeply rooted in the hearts of its people.

The pastor's personal report of the year's work was most comprehensive, covering visitations among his people, an increased number of communicants enrolled on the church register, baptisms, marriages, etc., and the record of the twelve months, as presented by church officials, and representatives of the various organizations, showed progress, faithful service, and a keen desire to fulfill the duties assigned, while finances are in a very satisfactory condition.

W. T. A. Deyell reported for the Sunday school, in the absence of the treasurer, George McKnight, who is at present attending the O.A.C. at Guelph. The school has been growing rapidly in recent months, and is a most flourishing branch of the church's activities.

The Women's League, which embraces in its membership practically all the women connected with the church, had a lengthy statement of work accomplished successfully, the financial result netting $1,325.00. While a considerable sum has been expended on worthy objects through the year, there is still a substantial balance in the bank. The treasurer, Mrs. J. R. Eakins, reported for this organization.

The Woman's Missionary Auxiliary could also look back upon a year of useful and growing activity, its allocation of $100.00 having been more than met, and the Christian Endeavor Society, which was organized in the fall months, with Miss Phyllis Kidd as President, has a large attendance each week, a sustained interest in its varied program, and a bright outlook for future undertakings.

W. T. A. Deyell presented the financial report, for the church, its items and sum total being quite satisfactory. The election of officers for the year resulted as follows:

Congregation Secretary— Charles Thorndyke.

Financial Secretary—H. R. Armstrong.

Treasurer—W. T. A. Deyell.

G. E. BURNHAM NEW CHAIRMAN

Elected at Inaugural Meeting of Millbrook School Board.

COMMITTEE NAMED.

MILLBROOK, Jan. 20.—The school board held its inaugural meeting in the secretary's office on Wednesday evening, and organized as follows for the current year:

Chairman, George E. Burnham; Secretary-Treasurer, A. A. Smith; Management Committee, Messrs. J. A. Vance, L. C. Russell, and H. R. Armstrong.

BARACA CLASS OFFICERS

Harry Blewett is President of Gilmour Church Young Men.

The regular business meeting of the Baraca Class of Gilmour Memorial Sunday School was held on Sunday morning, January 15. The officers for the coming year are as follows:

President—Harry Blewett.

Vice-president—Dawson Paul.

Secretary-treasurer — Reg. McMullen.

Lookout Committee—All the members of the class.

Sports Committee—Gordon McGregor, Clarence Mann, and Dawson Paul.

Teacher—Mrs. J. Gordon Mann.

DIVISION COURT HELD.

Two Cases on Docket Dismissed—Other in Wrong County.

OMEMEE, Jan. 20.—Division Court was held in the village on Friday. Three cases were on the docket, two of which were settled out of court.

The case heard was that of Joel Cornelius suing Herb Biglow, of Cavan, for wages, owing to the defendant not residing in this county. Judge Swayze who presided, declared the case would have to be tried at Millbrook.

WINTER SCHOOL GREAT SUCCESS

United Church Course at Cobourg Attracts 125 Workers.

STUDYING LEADERSHIP.

BAILIEBORO, January 20. — The seventh annual winter school of the Bay of Quinte Conference came to a close at Trinity Church, Cobourg, on Sunday evening.

The classes were largely attended this year, as there were approximately one hundred and twenty-five members registered, and a most interesting week was enjoyed by the members of the school.

Miss Semmons, of Toronto, was in charge of the children's division, Unit 1, and also of the C.G.I.T. group. Rev. J. E. Beckel was leader of the C.S.E.T. group, while Rev. Frank Lankford and Rev. Manson Doyle dealt with materials and methods in the adult or general course in teacher training classes. Rev. H. B. Neal, of Wooler, was in charge of the training in the devotional and worship life. Rev. Mr. Washington, of Fenelon Falls, conducted the morning vespers during the week, and Rev. George A. Brown, of Kingston, the evening vespers. Rev. Mr. Tanton, of Cobourg was in charge of one group for the morning Bible study, and Rev. Mr. Harston, of Campbellford, of group No. 2.

Rev. R. T. Richards, of Port Perry, conducted a series of lectures on "How We Got Our Bible." Rev. Mr. Williams, of Toronto, conducted a series of talks on "Our Mission Fields," and had missionaries from the various fields tell of their work in foreign lands. Rev. Mr. McDonald spoke of his work in Korea, Dr. McKenzie of China, Rev. Mr. Lloyd of Africa, and Rev. Mr. Williams of Formosa.

Rev. Charles D. Daniels, of Campbellford, made a very capable president. His slogan was "Be on time," and he also took full charge of the recreational periods.

Rev. Mr. Bunt, of Enterprise, acted as a most capable secretary, while Miss Alice Scarf, of Cobourg, was the registrar for the school. Miss M. Abernethy, A.T.C.M., of Courtice, presided at the piano during the week.

Rev. J. E. Todd, of George Street Church, Peterborough, conducted the services on Sunday morning and evening, while the president, Rev. C. D. Daniels, conducted the Sacrament service at the close of the evening service.

The school was counted one of the most successful yet held.

Among those who registered at the school were: Misses H. Cannon, M. Hayden, J. Reyner, E. Kerr, E. Woods, A. Gould, D. McCullogh, J. Nichols, G. Blodgett, A. Gould, S. Hare, Mrs. W. Stevens, Mrs. J. Hayden, Mrs. W. Pearce, Mrs. W. Tanton of Cobourg, C. Buttars, W. and R. Benson, Misses B. Brisbin, A. Lander, C. Tinny, Plainville, Miss I. Nelson, Garden Hill, S. Gray, M. Pollard, L. Graham, Port Hope, E. Mann, Baltimore, Maurice Young, Bath, A. Bragg, A. Parker, Newcastle, B. Hancock, Port Hope, A. Robins of Roseneath, C. Clemence, Whitby, M. Rousehorn, Madoc, Rev. R. McVey, Lansdowne, Gladys Simpson, Symore, J. Fry, Symore, R. Benson, Plainville, Clarence Grills, Campbellford, A. Fisher, C. Tamlin, B. Sluggett, Woodville, F. Barnard, Bailieboro, G. Williamson, Camborne, G. Stephenson, N. Taig, Campbellford, E. Harcourt, Port Hope, J. Patterson, Trenton, Rev. C. D. Daniels, Campbellford, Rev. H. Bunt, Enterprise, Rev. A. McLauchlin, Grafton, M. Abernethey, Bowmanville, A. Scarfe, Cobourg, Rev. W. Harston, Campbellford, Rev. W. Tanton, Cobourg, Rev. G. Williams, Toronto, Rev. R. T. Richards, Port Perry, Rev. G. Brown, Kingston, J. Fisher, Camborne, O. Wraggs, Clarke, W. Brown, Maple Grove, B. Brisbin, Fenella, M. Buttars, Harwood, G. Pound, Belleville, B. Cowing, Fenella, L. Millar, Cobourg, C. Courtis, Kingston, Rev. G. Gardiner, Frankville, V. May, Cobourg, L. Locke, of Vernonville, Nina Immell, Grafton, Rev. D. Bridgeman, Toronto, Charles Blezzard, Baltimore, N. Semmens, Toronto, Rev. H. Neal, Wooler, G. Lang, Hull's Corners, N. Harper, of Camborne, H. Buttars, Plainville, R. Brown, Camborne, Rev. S. McKee, Baltimore, Mrs. D. Haig, Cobourg, Rev. C. Washington, Fenelon Falls, G. Cole, Plainville, H. Skitch, Cobourg, B. Curtis, Mill Valley, and many others.

SUB. CREW DROWNED NOT ASPHYXIATED

Doctor Says Autopsy Reveals Water and Oil in Lungs.

BOSTON, Jan. 20. — The 32 men whose bodies were recovered from the sunken submarine S-4 died of slow drowning, the naval court of inquiry investigating the S-4 disaster was informed yesterday. Dr. George B. McGrath, medical examiner of Suffolk County, presented to the court the results of autopsies performed on several of the bodies as well as blood tests made in three instances.

The latter tests, the medical examiner said, revealed no carbon monoxide or chlorine gas in the blood, while the carbon dioxide content with "within limits normal after death."

In support of his finding that death by drowning had been slow or gradual, Dr. McGrath said he had found the lungs of eight bodies on which autopsies were performed filled with water and oil, and a large quantity of water also in the chest cavities. The presence of water in the chest cavities, he said, indicated that a mixture of air and water had been breathed for some time before death.

ALTER RULES FOR BEER SALE

Brewers Confer With Liquor Control Board To Discuss Changes.

SALE BY BOTTLE ONLY.

TORONTO, Jan. 20. — Brewery interests of Ontario, Quebec and Manitoba spent yesterday morning in conference in the quarters of the Canadian Manufacturers Association, and immediately thereafter took the burden of their deliberations to Chairman Hanna and his colleagues of the Liquor Control Board. The result was an agreement between the brewers and the government commissioners to abolish the sale of beer by the half and quarter barrels and also the working out of a revised plan of operation for the brewery warehouses of the province, with a view to preventing discrimination against or in favor of the handling of any particular brand of beer.

The conference is thus regarded as having had a twofold effect of utmost importance. In the elimination of sale by the half and quarter barrel, and the consequent restriction of it to bottles, an important step is believed to have been taken in checking illegal sale in hotels. In the revision of the present system of brewery warehouses an important step is believed to have been taken in ironing out dissatisfaction which has existed amongst some brewers over the treatment which these establishments have been according their product.

Between 60 and 70 brewers attended the meeting, which reached a substantial accord in its views. This accord was afterwards shared by Chairman Hanna and his co-commissioners when matters were discussed with them.

Will Thwart Law Breakers.

The difficulties in regard to sale with which the brewers have been contending were principally concerned with the quarter and half-barrel units. These kegs were declared to be finding their way into the hands of law violators, and particularly to be convenient for hotels to connect to their bar taps if they should desire to break the law. There was general agreement, accordingly, upon the proposal to limit sale in the future to beer by the bottle.

The case with regard to the brewery warehouses was one wihch has been vexing both the brewers and the Liquor Control Board. The plan in the p[illegible] has been for sufficient brewers to associate themselves together so that the expenses of a warehouse could be met, the minimum number necessary being four. The warehouse is then opened, the Government appointing an inspector to supervise its sales and the breweries concerned nominating their own representative to handle the clerical and other labors. The result of this system—an account of which complaint has developed, has been that certain breweries have obtained preponderance in the warehouses. It has even been claimed that influences have been brought to bear upon the salesmen there to induce them to discriminate against certain brands and in favor of others.

Commission Will Control.

The remedy which is being adopted for this situation is to have the warehouse staffs placed under the control of the Liquor Commission. In future the general manager of the brewery warehouses for the Control Board will have full power to hire or discharge not only the Government inspectors there, but also the general staff which handle the goods.

In the course of yesterday's discussion the issue of beer-by-the-glass was raised. The overwhelming consensus of opinion amongst the brewers was declaredly opposed to it on the grounds that nothing which savored of the return of the bar was desired. Sale by the bottle at tables, as in Quebec Province, was generally favored as the trend which the brewers would like to see future legislation follow.

A service for sending photographs by telegraph has just been started between Berlin and Vienna.

A recent census of Manchuria shows that it has 27,490,000 people, which is 5,000,000 above all previous estimates.

HAVELOCK E.O.S. OFFICES FILLED

Members From Belleville Act as Installing Officers for Lodge.

BANQUET FOLLOWS

HAVELOCK, Jan. 20.—The regular meeting of the Havelock Order of Eastern Star was held on Thursday evening, when the following officers were installed for the year 1928 by Sisters Barlow and Taylor, Past District Deputy Grand Matrons of the Belleville Chapter No. 55

Worthy Matron—Sister Stella Johnson.
Worthy Patron—Bro. S. O'Hara, V.S.
Associate Matron—Sister Lee.
Secretary—Sister M. Williams.
Treasurer—Sister B. Hoffman.
Conductress—Sister O'Hara.
Assistant Conductress—Sister L. Cassan.
Chaplain—Sister Vance.
Marshall—Sister J. Peincombe.
Organist—Sister B. Quinn.
Adah—Sister Tripp.
Ruth—Sister E. Williams.
Esther—Sister E. Wright.
Martha—Sister H. Mathison.
Electa—Sister J. Green.
Warder—Sister A. Stapley.
Sentinel—Bro. G. Rigley.

A banquet was served by the ladies which was thoroughly enjoyed by all.

PONTYPOOL Y.P.L. ATTENDANCE GOOD

Contest Serves to Bring Out Larger Number Than Usual.

PONTYPOOL, Jan. 20.—The Young People's League held their regular meeting in the basement of the United Church on Thursday evening, the president, Miss Marvin, in the chair. The meeting was under the leadership of the missionary vice-president, M. E. Hinton, who gave an interesting talk on Missionary Work.

Devotional exercises were taken by the pastor, Rev. Mr. Boomhour. Current events were looked after by Miss. Mable Kellar in a very capable manner The amusement at the conclusion was a peanut contest with Mrs. George Wilder in charge. The winners were J. Brown and Miss M. Kellar, the prize being a nice box of writing paper.

The largest turnout of the season was present, probably due to the contest which was organized at the last meeting. There are two teams, namely, the Orange group, under J. Payne, and the White group, under M. E. Hinton. The contest is to last for four meetings, and the losing team has to treat the winners to a sleigh drive to Lotus. Each member present at League meeting counts one point for his group. Results for this meeting were for the Orange group 18 points, and the White group 11 points. The next meeting will be under the leadership of the Citizenship Department, with J. Payne in charge.

Manvers District L.O.L. held its annual meeting in the Orange Hall on Tuesday afternoon, with the District Master, Bro. Offa Staples, in the chair A goodly number were present and all the lodges were represented with one exception. County Lodge was represented by Bros. Nat. Belch and Bro. Stewart Fallis. The Grand Organizer was expected to be present, but owing to some misunderstanding did not arrive until the conclusion of the meeting. It was decided to have an Orange picnic in the centre of the township during the summer the same to be arranged for at the semi-annual meeting. A donation was granted to the True Blue and Orange Orphanage and some discourse took place in regard to Regulation 17, but no action was taken. The following officers were elected and installed by P.D.M. Hilton Johnston, 64, Janetville.

W.D.M.—Bro. Bert Richardson, 82.
D.D.M.—Bro. Ed. Bray, 1022.
Chaplain—Bro. W. Carron, 64.
Rec.-Sec.—Bro. Alvine McTill, 279.
Treasurer—Bro. Wm. Brown, 1022.
Lecturers—Bros. P. M. Richardson, 82; Bro. C. McNeil, 64.
Director of Ceremonies—Bro. J. Payne, 82.

It was decided to have the next annual meeting in Bethany. The members of L.O.L. 82 prepared a good lunch for the visiting brethren, consisting of crackers, cheese, cake, pie, tarts, coffee, etc., which was enjoyed by all.

Mr. H. M. Richardson is confined to his home, seriously ill, but is progressing as well as can be expected.

Mr. James Masters, who has been ill is practically recovered again. His son, Mr. Harold Masters, formerly of here and now of the North West, is visiting him.

Mrs. E. Carscadden celebrated her 83rd birthday last week and her many friends wish her good health to enjoy many more of them.

I.O.O.F. No. 296 is holding its annual installation of officers on Friday, December 20th, when the District Deputy and his team of Peterborough will be present.

TORNADO KILLS MAN IN SOUTHERN OHIO

Many People Injured and Buildings Blown Down To-day.

CINCINNATI, Ohio, Jan. 19.—(Canadian Press.)—One man was dead, numerous persons injured, and buildings blown down in a tornado that swept Southern Ohio to-day. First reports indicated that the storm extended from Washington court house near the centre of the State, down into the blue grass district of Kentucky.

OILED LOCKS

Locks should be oiled frequently by dipping the key in oil and turning it several times in the lock. Screws should be tightened after rainy weather.

Fordor Sedan

Peterboro's Famous Lift Lock

Phaeton

GENERAL CONTEST RULES

How to Enter

1. The contest is open to everyone **except:**
   (a) Employees of The Peterborough Examiner, Ltd., or their immediate family.
   (b) Prize-winners in any similar contest who have won any of the major prizes.
2. Additional puzzle-charts may be obtained free by writing to the Contest Department or by calling at The Examiner Office.
3. Every figure in the puzzle is complete and entirely free from tricks or illusions. If any contestant is in doubt about any of the figures, send in the chart with the figures marked and the Contest Department will gladly give a ruling on the figure.
4. When you have solved the puzzle, fill in completely the solution blank, which must be accompanied by a remittance for at least a six months' subscription at the regular rates to The Evening Examiner. (See subscription rates.) See also the prize-list and note how the **value of your prize is increased** by paying for a year's subscription and by getting subscriptions from your friends. Renewal subscriptions, or subscriptions in arrears, if paid during contest period, count the same as new subscriptions and will be extended from the present expiry date, but not more than $15.00 will be received on any one solution or subscription.
5. In order that subscribers who pay carrier boys weekly may participate in this contest, books of tickets containing 22 weekly tickets for $3.00, or 44 for $6.00, will be sold. These remittances must be made direct to the Contest Department with your solution. Otherwise it cannot be registered. Each ticket is valued at 15c and will be redeemed from the carrier boy at that price.
6. Readers who give their subscription to some other contestant and later want to send in an answer themselves, may do so providing they fill in the coupon, giving the name of the person they paid their subscription to and the amount paid. No further payment is necessary.
7. The contest will close on March 15, 1928, but send in your solution as soon as possible as we are offering special prizes for the first correct solutions. (See full details under "Special Prizes.") There is nothing gained by holding back your answer once you have solved the puzzle, as a contestant may make several remittances on any answer sent in while the contest lasts up to a total amount of $15.00.
8. Contestants may send in a different answer to the puzzle with each remittance, but if one of your answers is correct the money sent in on your other answers will not increase the total value of your prize, and not more than one regular prize will be paid to one family.
9. Everyone has an equal chance. You can win the first prize and extra cash for only a six months' subscription, but note how the value of the first five prizes increases if you send in more money. Aim to win the maximum Grand Prize. The Evening Examiner is now recognized as the leading daily in Peterborough district and surrounding counties and no difficulty should be found in getting your friends or neighbors to subscribe for it.
10. Contestants who remit by mail or pay at the office should see that these remittances and answers are made on a proper contest coupon to ensure them reaching the Contest Department.
11. If the correct answer is not sent in by any contestant the prizes will be awarded for the nearest correct solutions. In the event of a tie a second puzzle will be presented which will be as practicable and solvable as the first. Only those tieing will be permitted to solve the second puzzle. Should two or more persons be tied in the second puzzle the prizes will be divided equally among those tieing. No cash will be accepted on the second puzzle.
12. In entering the contest, contestants agree to abide by the rules of the contest and to accept the decision of the judges as final. The Contest Department reserve the right to alter and amend its rules if necessary for the protection of contestants or The Peterborough Examiner. It also reserves the right to refund any subscriptions and to disqualify any contestants whom they consider should not be in the contest. Contestants are assured of the same impartial treatment which characterizes The Examiner in all its dealings.

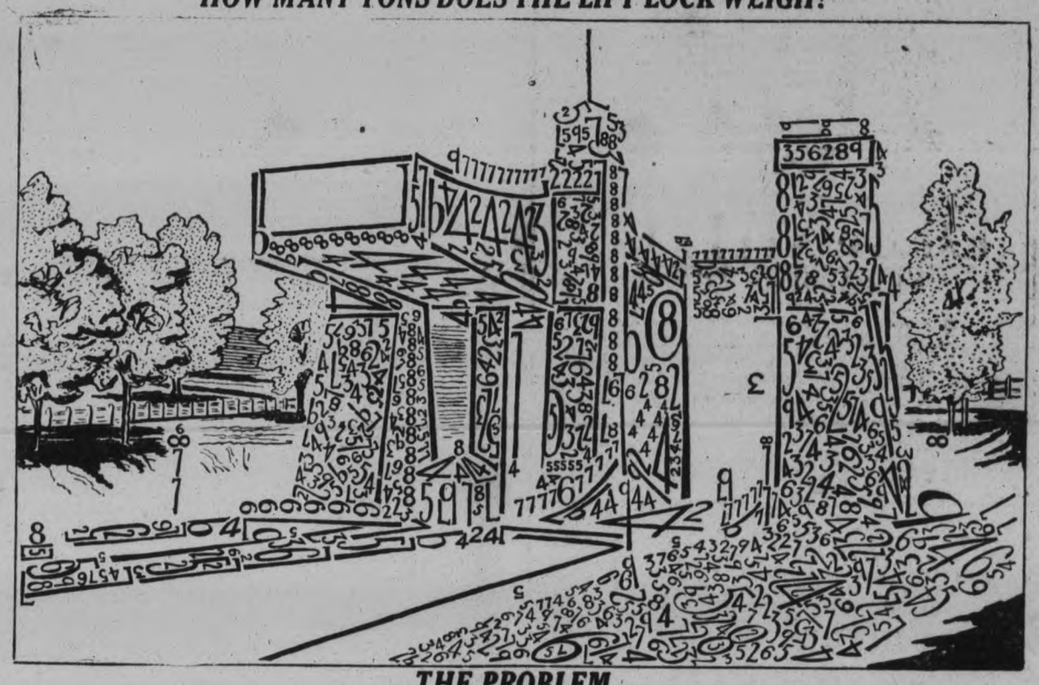
HOW MANY TONS DOES THE LIFT LOCK WEIGH?



THE PROBLEM

The problem is to add together all the figures shown above, which, when added together, represent the total number of tons that the Lift Lock weighs.

The puzzle is entirely free from tricks or illusions, every figure is complete and stands alone. The figures range from two to nine. There are no ones (1) or ciphers (0) in the puzzle. The sixes are curved, while the stem of the nines are straight.

We wish it clearly understood that every figure can be plainly seen. There is nothing hidden in the trees or shadows, but the problem of adding these is a real test of accuracy.

Remember, each figure is added separately. For example, 9777 is counted 9 plus 7 plus 7 plus 7, or, in other words, simply add them as if each figure stood one above the other in a single column.

REMEMBER, NO ONE KNOWS THE CORRECT ANSWER UNTIL THE CONTEST CLOSES

To ensure this we had Mr. E. M. Elliott, County Treasurer, and Mr. Frank Adams, City Treasurer, each erase one or more figures from the original drawing, which they carefully noted and sealed in an envelope and gave to the manager of the Royal Bank for safe keeping until the contest closes.

USE THIS COUPON FOR YOUR SOLUTION AND REMITTANCE

My answer to the problem is.....tons. Please place to my credit the sum of $.....

for the subscriptions given below; if this is a winning answer, send the prize to:

NAME..... ADDRESS.....

SUBSCRIBER'S NAME AND ADDRESS	New Sub.	Ren. Sub.	Amount

Is this your first answer to the puzzle?..... How much money have you sent in to date?.....

If your subscription was sent in by another contestant you must put his or her name below.

NAME..... ADDRESS.....

Note—Please answer all the questions and address your correspondence to—

THE CONTEST DEPARTMENT, OF THE PETERBOROUGH EXAMINER

SUBSCRIPTION RATES:
Six Months, by City Delivery, $3.00; by Mail, $2.40. One Year, by City Delivery, $6.00; by Mail, $4.80.
By Weekly Payments to Carrier Boys, See Rule Number 5.

$2,500 IN PRIZES
50 Free Prizes

FIRST GRAND PRIZE (Total Value, $1,350.00—Being choice of a Car, any make or design, up to a value of $1,200.00, plus $150.00 in cash, being at the rate of $10.00 for every dollar sent in up to $15.00. In order to qualify for this prize the contestant must send in at least $9.00 worth of subscriptions. If the winning contestant does not qualify for the above prize the contestant will then get

FIRST PRIZE (Total Value, $800.00)—Choice of any Car, value $720.00, plus $10.00 for every dollar sent in up to less than $9.00; if contestant sends $9.00 they qualify for Grand Prize.

SECOND PRIZE (Total Value, $400.00)—Being choice of Radio Set or Victrola, any make up to value of $200.00, and $80.00 cash, plus $8.00 for every dollar sent in up to $15.00.

THIRD PRIZE (Total Value, $175.00)—Being $100.00 each, plus $5.00 cash for every $1.00 set in up to $15.00.

FOURTH PRIZE (Total Value, $95.00)—Being $50.00 in cash, plus $3.00 cash for every $1.00 sent in up to $15.00.

FIFTH PRIZE (Total Value, $60.00)—Being $30.00 in cash, plus $2.00 cash for every $1.00 sent in up to $15.00.

SIXTH TO FIFTEENTH PRIZES—$20.00 in cash each.

SIXTEENTH TO TWENTY-FIFTH PRIZES—$10.00 in cash each.

TWENTY-SIXTH TO FIFTIETH PRIZES—$5.00 in cash each.

SPECIAL PRIZES—While the contest will not close until March 15, we are offering Five Special Prizes for the first five correct, or nearest correct, solutions secured by us. The prizes will be: First Prize, $8.00; Second Prize, $7.00; Third Prize, $5.00; Fourth Prize, $3.00; Fifth Prize, $2.00.

A TIP ON HOW TO WIN

Take a pencil and put down the numbers as you stroke them out, then add them up. Some suggest that you cut the chart into dozens of pieces, then check them from all sides; or if you wish, try blotting them out with colored ink or pencil. Others think the best way is to pick out all the twos, threes, fours, etc. Any they miss the first time they find later. Or suppose you try taking a combination of figures which, when added together, makes a total of ten. For example, 5 and 3 and 2 make 10. Tens are not only easily added together, but there is less danger of making a mistake.

Important Points to Remember

1. Everyone has the same opportunity. A person sending in only $3.00 in subscriptions has the same chance of winning the first prize as a person sending in more money. The advantage of sending in more money is to increase the value of the first five prizes.
2. This is a contest for Central Ontario district, or to any subscriber of The Examiner, no matter where he resides.
3. Don't forget to answer all the necessary questions on the solution blank.
4. If you collect a subscription from a friend or neighbour, that person can also submit an answer to the puzzle without further payment.

THE JUDGES

In order that each Contestant shall have fair and impartial treatment, we have arranged with Mr. Roland Denne, Mayor of the City and Alderman Nagel Phelan to act as judges for the contest. Any complaints in this connection will be referred to these judges whose decision will be absolutely final.

Baron Vitrolles, whose offices have been in Montreal, will take up residence in Ottawa. Photos show Baron and Baroness Vitrolles.

"CANARY" THE MURDER CASE

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

(Continued from yesterday.)

CHARACTERS

PHILO VANCE.
JOHN F.-X. MARKHAM, District Attorney of New York County.
MARGARET ODELL (THE "CANARY").
CHARLES CLEAVER, a man-about-town.
KENNETH SPOTSWOODE, a manufacturer.
LOUIS MANNIX, an importer.
DR. AMBROISE LINDQUIST, a fashionable neurologist.
TONY SKEEL, a professional burglar
WILLIAM ELMER JESSUP, telephone operator.
HARRY SPIVELY, telephone operator
ERNEST HEATH, Sergeant of the Homicide Bureau.

* * *

The Story Thus Far.

When thestrangled body of Margaret Odell, known to Broadway as the "Canary," was found in her apartment, New York found itself confronted with one of the most baffling murders in its history. Vance, student of psychology and of crime, is taken to the apartment by Markham. The rooms are violently disordered. The medical examiner gives it as his opinion that the murder was committed about 11:30 the night preceding.

* * *

CHAPTER V.

"I guess that's all, doc," Heath decided. "I'll get the body to the mortuary right away. Let's have the postmortem as soon as you can."

"You'll get a report in the morning." And despite his apparent eagerness to be off, Doctor Doremus stepped into the bedroom and shook hands with Heath and Markham and Inspector Moran before he hurried out.

Heath followed him to the door, and I heard him direct the officer outside to telephone the department of public welfare to send an ambulance at once for the girl's body.

"Such detachment!" Vance said to Markham. "Here are you stewing most distressingly over the passing of one damsel fair and frail, and that blithe medicus is worrying only over a sluggish liver brought on by early rising."

"What has he to be upset over?" complained Markham. "The newspapers are not riding him with spurs . . . And by the way, what was the point of your questions about the torn dress?"

Vance lazily inspected the tip of his cigaret.

"Consider," he said. "The lady was evidently taken by surprise; for, had there been a struggle beforehand, she would not have been strangled from behind while sitting down. Therefore her gown and corsage were undoubtedly intact at the time she was seized. But—despite the conclusion of your dashing Paracelsus—the damage to her toilet was not of a nature that could have been self-inflicted in her struggle for air. If she had felt the constriction of the gown across her breast, she would have snatched the bodice itself by putting her fingers inside the band. But, if you noticed, her bodice was intact; the only thing that had been torn was the deep lace flounce on the outside; and it had been torn, or rather ripped, by a strong lateral pull; whereas, in the circumstances, any wrench on her part would have been downward or outward."

Inspector Moran was listening intently, but Heath seemed restless and impatient; apparently he regarded the torn gown as irrelevant to the simple main issue.

"Moreover," Vance went on; "there is the corsage. If she herself had torn it off while being strangled, it would doubtless have fallen to the floor; for, remember, she offered considerable resistance. Her body was twisted sidewise; her knee was drawn up, and one slipper had been kicked off.

"Now, no bunch of silken posies is going to remain in a lady's lap during such a commotion. Even when ladies sit still, their gloves and hand-bags and handkerchiefs, and programs and serviettes are forever sliding off their laps on to the floor, don't y' know."

"But if your argument's correct," protested Markham, "then the tearing of the lace and the snatching off of the corsage could have been done only after she was dead. And I can't see any object in such senseless vandalism."

"Neither can I," sighed Vance. "It's all devilish queer."

Heath looked at him sharply. "That's the second time you've said that. But there's nothing what you'd call queer about this mess. It is a straight-away case." He spoke with an overtone of insistence, like a man arguing against his own insecurity of opinion. "The dress might've been torn almost any time," he went on stubbornly. "And the flower might've got caught in the lace of her skirt so it couldn't roll off."

"And how would you explain the jewel-case, Sergeant?" asked Vance.

"Well, the fellow might've tried the poker, and then, finding it wouldn't work, used his jimmy."

"If he had the efficient jimmy," countered Vance, "why did he go to the trouble of bringing the silly poker from the living-room?"

The Sergeant shook his head perplexedly.

"You never can tell why some of these crooks act the way they do."

"Tut, tut!" Vance chided him. "There should be no such word as 'never' in the bright lexicon of detecting."

Heath regarded him sharply. "Was there anything else that struck you as queer?" His subtle doubts were welling up again.

"Well, there's the lamp on the table in the other room."

We were standing near the archway between the two rooms, and Heath turned quickly and looked blankly at the fallen lamp.

"I don't see anything queer about that."

"It has been upset—eh, what?' suggested Vance.

"What if it has?" Heath was frankly puzzled. "Damn near everything in this apartment has been knocked crooked."

"Ah! But there's a reason for most of the other things having been disturbed—like the drawers and pigeonholes and closets and vases. They all indicate a search; they're consistent with a raid for loot. But that lamp, now, d' ye see, doesn't fit into the picture. It's a false note. It was standing on the opposite end of the table to where the murder was committed, at least five feet away; and it couldn't possibly have been knocked over in the struggle. . . . No, it won't do. It's got no business being upset, any more than that pretty mirror over the gatelegged table has any business being broken. That's why it's queer."

"What about those chairs and the little table?" asked Heath, pointing to two small gilded chairs which had been overturned, and a fragile tip-table that lay on its side near the piano.

"Oh, they fit into the ensemble," returned Vance. "They're all light pieces of furniture which could easily have been knocked over or thrown aside, by the hasty gentleman who rifled these rooms."

"The lamp might have been knocked over in the same way," argued Heath.

Vance shook his head. "Not tenable, Sergeant. It has a solid bronze base and isn't at all top-heavy; and being set well back on the table, it wasn't in any one's way. . . That lamp was upset deliberately."

The sergeant was silent for a while. Experience had taught him not to underestimate Vance's observations; and, I must confess, as I looked at the lamp lying on its side on the end of the library-table, well removed from any of the other disordered objects in the room, Vance's argument seemed to possess considerable force. I tried hard to fit it into a hasty reconstruction of the crime, but was utterly unable to do so.

"Anything else that don't seem to fit into the picture?" Heath at length asked.

Vance pointed with his cigaret toward the clothes-closet in the living-room. This closet was alongside of the foyer, in the corner near the Boule cabinet, directly opposite to the end of the davenport.

"You might let your mind dally a moment with the condition of that clothes-press," suggested Vance carelessly. "You will note that, though the door's ajar, the contents have not been touched. And it's about the only area in the apartment that hasn't been disturbed."

Heath walked over and looked into the closet.

"Well, anyway, I'll admit that's queer," he finally conceded.

Vance had followed him indolently; and stood gazing over his shoulder.

"And my word!" he exclaimed suddenly. "The key's on the inside of the lock. Fancy that, now! One can't lock a closet door with the key on the inside—can one, sergeant?"

"The key may not mean anything," Heath observed hopefully. "Maybe the door was never locked. Anyhow, we'll find out about that pretty soon. I'm holding the maid outside, and I'm going to have her on the carpet as soon as the captain finishes his job here."

He turned to Dubois, who, having completed his search for fingerprints in the bedroom, was now inspecting the piano.

"Any luck yet?"

The captain shook his head.

"Gloves," he answered succinctly.

"Same here," supplemented Bellamy gruffly, on his knees before the escritoire.

Vance, with a sardonic smile, turned and walked to the window, where he stood looking out and smoking placidly; as if his entire interest in the case had evaporated.

At this moment the door from the main hall opened, and a short thin little man, with gray hair and a scraggly gray beard, stepped inside and stood blinking against the vivid sunlight.

"Good morning, Professor," Heath greeted the newcomer. "Glad to see you. I've got something nifty, right in your line."

(To be continued.)

Stubborn Coughs

For many years PERTUSSIN has been widely used as the most effective remedy for whooping cough.

Physicians and pharmacists have confidence in this safe and harmless medicine. Being entirely free from "dope," it can be given to young and old with perfect safety for any cough or bronchitis.

At all drug stores, bottles 60c. and $1.20.

PERTUSSIN
Safe for Every Cough

TOWNSHIP OFFICERS NAMED BY COUNCIL

Ennismore Council Also Passes Accounts at Inaugural Meeting.

The inaugural meeting of the Municipal Council of the Township of Ennismore was held in the township hall with all the members present. They are Reeve Thomas Cavanagh, Councillors Arthur O'Reilly, John D. Sullivan, Herbert Hennessey and Daniel Hickson.

The following appointments were made under by-law: Charles Perdue, clerk; Daniel Holland, treasurer; Cornelius O'Reilly, assessor; Michael Geary and Patrick G. Sullivan, auditors. Eugene Moloney was reappointed township road superintendent; Patrick O'Connor, township constable and truant officer; Thomas Cavanagh, Charles Perdue, Timothy Murphy and Dr. McNulty, Board of Health, and James Killen, sanitary inspector.

The following accounts were ordered to be paid:

Merchants Press, $25.40; William Bolster, $10.20 for gravel; P. G. Sullivan, $5.13; Crough Bros., $5.42; Michael Geary and P. G. Sullivan were paid the sum of $7 each as auditors; Patrick O'Connor $1.50 for acting as constable on nomination day.

Bones of prehistoric men discovered in East Africa covered 41 different types, but none of them was what is now known as the negro type.

CHILDREN

Ovaltine keeps them well

CHILDREN busy at school, romping about at play, use up energy faster than ordinary food can supply it. They need the extra nourishment Ovaltine gives them. It digests easily and quickly builds strength and energy.

With and between meals, and at bedtime, give them plenty of Ovaltine. The ripe barley malt, fresh eggs and creamy milk in Ovaltine will build sturdy bodies and sound nerves. One cup of Ovaltine contains more nourishment than 12 cups of beef tea or 3 eggs, and children love its delicious flavour. Ask your doctor.

OVALTINE
TONIC FOOD BEVERAGE
BUILDS UP BRAIN, NERVES AND BODY

At all druggists, 60c, 90c, $1.50, and special $2.25 family size. It's economical to purchase the larger size. Drink Ovaltine for health the year 'round. Made in England by A. WANDER LIMITED.

The coupon is for you to use if you care to try Ovaltine at our expense.

A. WANDER LIMITED,
455 King St. West Toronto.
Please send sample o Ovaltine. 10 cents is enclosed for packing and postage.

WOMEN'S PAGE

PERSONALS

Miss Victoria Robinson, of Madoc, who has been ill, has recovered sufficiently to resume her duties as teacher at S. S. No. 11, Smith township.

• • •

Mr. Allan B. Mann is spending a few days in Western Ontario.

• • •

Mr. A. C. Finn, of Enterprise, Ontario, has returned to his home after spending the past three weeks with his daughter, Mrs. P. Devlin.

• • •

Miss Forester Parsons has taken a position with the Department of Education in Toronto and is teaching Household Economics at the Gledhall School.

• • •

Mrs. John Clements, Junior, has returned to Toronto, after being called here owing to the illness of her brother, Mr. George Clark.

• • •

Mrs. Sutherland, of Kitchener, is the guest of her friend, Mrs. D. Eldred, London street.

• • •

Little Frances O'Heron, daughter of Mr. and Mrs. Herbert O'Heron, underwent an operation for appendicitis in St. Joseyh's Hosiptal on Tuesday morning.

• • •

Mr. T. H. Shield, 153 Benson avenue, left this morning for San Francisco, California, where he will give an address on "The Co-operative Marketing of Honey" before a meeting of the American Honey Producers' League.

• • •

Miss May Perry returned yesterday from Toronto, where she was playing at the Park Theatre on Monday, Tuesday and Wednesday of this week, in a twenty-minute sketch put on between the picture programmes. Miss Perry has several return engagements for this sketch, which is entitled "Wanted—a Burglar."

• • •

Messrs. Roland Windover, Bert Jones and E. Nicholls were in charge of arrangements for the dance held at the Downyflake last evening by the Old Tyme Dance Club, and attended by about fifty people. Music was provided by Selwyn's Orchestra.

• • •

Mrs. J. A. Wilson, of Ottawa, National president of the Council of Women, who visited the Local Council yesterday afternoon, was the guest of the president, Mrs. C. H. Edwards. Mrs. Wilson left for Toronto this morning, to address a meeting of the Women's Art Association there this afternoon, and goes to Owen Sound to-morrow, returning to her home in Ottawa on Sunday.

• • •

Mr. Joseph Heffernan, of Kitchener, spent the holiday with his parents in Asphodel.

• • •

Mrs. Creighton and Mr. Marling of Lakefield, also Mr. and Mrs. W. W. Leonard, were visitors to the city yesterday.

• • •

Mrs. J. W. Kelly, McDonnel street, entertained at a small bridge party yesterday afternoon. The prize was won by Mrs. R. Wilson.

• • •

Mr. Wm. Kingdon, of Toronto, is visiting his daughter, Mrs. Gilbert Pakenham, Water street.

• • •

Mayor and Mrs. Roland Denne entertained a number of their friends at bridge last evening.

• • •

Miss Betty Runnett, R.N., has returned to Belleville, after visiting her parents, Mr. and Mrs. R. Runnett, Sherbrooke street.

• • •

Mrs. E. Bert McWilliams and baby daughter, Madeline, of Halifax, N.S., are visiting the former's mother, Mrs. C. Wright, 135 Rubidge street, before leaving for London, Ontario, where Mr. McWilliams has been transferred.

• • •

At an executive meeting of the Catholic Women's League, held last evening at the home of Mrs. M. Henry, Brock street, Mrs. F. A. Hodgson, who is leaving the city shortly, and has been an energetic worker in the League, was presented with a handsome amber and gold rosary.

• • •

Friends in the city of Mrs. Alice Roger Collins of Elora, formerly of Peterborough, will be pleased to know that she is at present engaged in the composition of four French-Canadian chansons to be sung by male quartettes, in a competition being held at this time.

• • •

Mrs. Frederick Carrie of Toronto spent the week-end with her mother, Mrs. E. Blewett, George street.

• • •

The many friends of Mr. William James Little, will regret to learn that he suffered a sudden attack of serious illness last week, from which he has not yet recovered.

• • •

The tea held in the green room of the Y.W.C.A. yesterday afternoon by the Local Council of Women, following the reception of members by the guest of the day, the National President, Mrs. J. A. Wilson of Ottawa, was an interesting conclusion to the programme of the afternoon. Arrangements were in the hands of Mrs. C. R. Banks, assisted by Mrs. John Lynch. The table was very pretily decorated with Madeira linen, a large central glass bowl filled with daffodils and narcissus the gift of the Home and School Associations of the city, and rose pink candles in low silver candlesticks. Tea was poured by Mrs. W. R. Morris and Mrs. A. Stevenson, assisted by Mesdames N. D. Seaton, J. Wearing, B. McNeely, W. H. Andrews, R. Cottrell, R. G. Perks. During the tea hour, a porgramme of instrumental music, arranged by Mrs. J. J. Pollock, was rendered, with piano numbers by Mrs. R. Goodfellow Miss Olive Prest and Miss Pearl Carruthers. The guest of honor, Mrs. Wilson, was presented by the ladies with a bouquet of carnations, the presentation being made by Mrs. Seaton.

• • •

A progressive euchre party was held last evening at the home of Mr. and Mrs. J. Logan, Park Street, under the auspices of the Peterborough Chapter 161, Order of the Eastern Star. Prizes were won by Mrs. G. Sexsmith, Mrs. W. A. Greenslade, Mrs. W. H. Andrews, and Mr. Norman Lewis. Dainty refreshments were served by members of the Social Committee. Among those present were: Mr. and Mrs. F. Mowry, Ma

DRESS
By MARY MARSHALL

The silhouette that shows a downward sag at the back is emphasized in this frock of taffeta and tulle with skirt, bodice and neckline cut in a long point at the back.

Since uneven hemlines have come into general fashion there seems to be no rule as to the exact angle that the unevenness should take.

Some skirts sag at both sides, some at one side only. A very new frock I saw the other day had drapery that was considerably longer at the front than anywhere else. But usually the downward droop is at the back and the effect is perhaps smartest when the sagging lines are repeated in the beltline and decolletage as well.

The women who first followed this fashion of the back droop were quite courageous because most of us still retain the old prejudice—which flourished in the days of the straight front and the front dip waistline—that the lines of a frock should all hang in just the opposite direction.

In keeping with this general backward sagging effect evening frocks are frequently cut with bodice fairly high at front and in a deep U line at the back. Sometimes there is a broad shallow U at front and a deeper U at the back.

In the new frocks necklines are decidedly varied. The broad U's are spoken of frequently for the coming season, but the V neckline both broad and narrow persists, and so does the square neckline and the one-sided effect with a diagonal line that makes the decolletage lower at one side than the other.

Bowknots have come into prominence as a decorative motive recently and applied bowknots of ribbon are seen on some of the more picturesque evening frocks. Small bows of ribbon are also sometimes used by way of decoration for the top of shoulder straps of evening frocks and sometimes there is a small bow of ribbon of the dress material at the point of the V neckline.

SAINT and SINNER
By ANNE AUSTIN

Miss Sutton, the day nurse, returning to duty the next morning at seven, bustled starchily into Faith's room, bringing in with her a faint but unmistakable odor of coffee and bacon and eggs. Hating herself for her interest in food, Faith could not keep her nostrils from twitching.

"Well, well, and how are we this fine morning?" Miss Sutton carolled cheerfully. "It's a wonderful day out—cold and still and sunshiny. I see by your chart that you slept well last night. Feel like eating a nice, hot breakfast?"

"Just a cup of coffee," she murmured faintly. She would not acknowledge even to herself that she was hungry.

But when the nurse, smiling broadly, deposited a tray of tempting, deliciously odorous food on the bedside table, Faith weakened, reached shamefacedly for a triangle of crisp, brown toast, glistening with melted butter.

"Doctor's orders are for you to eat every bit of this lovely breakfast," Miss Sutton encouraged her. "See? A beautiful coddled egg, a strip of curly, crackly bacon, a pot of real French-drip coffee and a glass of pure orange juice. Um-m! Isn't it nice to be an invalid? Now, I'll just leave you for a few minutes while you eat. Put on your light if you want anything."

Faith was childishly glad to be alone, for the warped pride of the sick would have kept her from eating if she had been watched. She was greedily scraping the egg-cup for the last delicious trace of egg when the door opened softly.

"Alone, Faith?" George called guardedly after he had closed the door.

"Oh!" she gasped, her face lighting up with pleasure and relief. "You're the one person I most wanted to see, George. Come close. I want to tell you something. I need your help."

He took her outstretched hand and chafed it gently. "Still got amnesia, honey?" he chuckled, his little black eyes very kind and fond.

"Yes, but I've got to be cured, I suppose," she confessed, smiling reluctantly. Somehow, with George, she did not feel so utterly loathesome as she had considered herself the day before. "I want to tell you why I ran away as I did. It was all a mistake, a horrible, ghastly mistake, due to my insane jealousy and suspicion. Oh, George, I'm not fit to live!"

"Steady, honey!" he urged, kissing the tips of her fingers. "I don't suppose any of us is fit to live, if the truth were known. But we've got to carry on and make the best of ourselves."

She told him then, in quick, whispered gasps, the story of her unfounded jealousy, the overheard conversation between Cherry and Bob, her determination to commit suicide, the reasons why she had not done so, and, finally, the explanation of that apparently damning conversation between Bob and her sister.

"And they think I'm good, George! I—so base, so unworthy!" she groaned. "Yesterday I hated myself so I didn't want to live, but I suppose I'll have to. But how can I get out of this 'amnesia' tangle?"

"Don't worry!" George begged. "I'll fix it, so that even the doctor will be completely taken in. No, I won't tell you how. You'll know, all right, as soon as I stage my stunt!"

Lyrics of Life - By Douglas Malloch

BEFORE THE DAWN

You will not find content by never knowing
An hour of ill:
The fire seems brightest when the wind is blowing,
The night is chill;
And every road of life that's worth the going
Lies up a hill.

You will not find your faith in tales you borrow
From other men,
For you must have your hurt, and your own sorrow,
And hear God then
Whisper His promise of a great Tomorrow
And joy again.

You will not find the path that leads to heaven
A sunlit lawn,
Nor know the truth of days till all the seven
Have come and gone.
The sun must sink, the clock must strike eleven,
Before the dawn.

(Copyright, 1928, Douglas Malloch.)

Hints on Etiquette

1. Should the guest be met at the train?
2. Is it necessary for the hostess to be there in person?
3. If unable to go, what is courteous?

The Answers.

1. Yes.
2. If the guest is a woman, yes.
3. Send some other woman of the family.

BAKED EGGS

Eggs, baked in buttered muffin tins, one in each hole with cream, butter and a dash of cheese, are delicious served on toast.

and Mrs. H. Heard, Mrs. Fisher, Miss Leota Fisher, Miss Alma Beavis, Miss Kenny, Miss Flo Hill, Miss Rose Sexsmith, Mrs. J. Baird, Mrs. G. Johnson, Mrs. N. Henry, Mrs. C. Wright, Mrs. W. H. Andrews, Mrs. W. A. Greenslade, Mrs. F. Miller, Mrs. A. McPhate, and Messrs. Ackford, Sexsmith, N. Lewis, and Keslick.

HOROSCOPE
The Stars Incline, But Do Not Compel

(Copyright, 1928, McClure Syndicate.)

SATURDAY, JANUARY 21, 1928

While this is not an important day in planetary direction, according to astrology, the aspects are fairly good.

One may not trust one's judgment under this sway which makes for unwise optimism. Plans made today should not be too firmly relied on.

Writers and editors again are subject to the most promising planetary rule. Large profits for newspapers and magazines are indicated.

A period of slack interest in motion pictures is forecast but this will be followed by renewed enthusiasm.

Land investments are subject to the best influences of the stars and the seers warn against defection of capital to speculative channels.

The aged now should benefit and they should find comfort in evidence of a reaction toward oldtime standard of domestic life.

Under this rule a political leader of great sagacity may be recognized, but he will seek nothing for himself.

The West is to exercise unusual power in the coming national campaign when sensational incidents will mark conventions and elections.

Women may take comfort in the prophecy that they are to gain the confidence of the public in large enterprises which they will initiate.

One of the reactionaries among women will introduce old-time domestic arts, it is prognosticated.

Again women will practice proficiency with the needle and they will, also, accept old-time modes that are modest.

Housing conditions affecting the poor will be widely discussed, it is forecast, and there will be unusual suffering among the poor.

Persons whose birthdate it is have the augury of prosperity in which elderly persons contribute.

Children born under this sign probably will be fond of books and will have a scientific trend of mind. Many subjects of this sign are chemists.

"ALIMONY CLUB" IS SENT TO NEW JAIL.

NEW YORK, Jan. 20.—The "Alimony Club" composed of about 30 men who would rather languish behind prison walls than fulfill court decrees, has been moved to new, but not better, quarter. The old Ludlow street jail, which has been its headquarters for 59 years, is being torn down. Some time ago it was discovered that the "guests" were served by a staff of 22 people, including four cooks, a physician and a laundress.

The inmates were not locked in their cells except at night. They had theatrical entertainments and a radio. They had rosebushes and dovecotes in the jail yard. They had service comparable to that of the best hotels. They had such a good time that they gave the warden a silver loving cup.

There is $5,764,386,844 in paper money in the United States.

CLEVER ORGANIST.

Leo B. Riggs, Playing Here, Has Held Important Positions.

Leo B. Riggs, who plays at Murray Street Church on January 21, is one of the outstanding organists of New York. While there he had charge of all the music of Hotel Astor and played the largest organ in the world. The concert here is under the aupices of "The Others" class of the Sunday school.

HAVELOCK W. A. ELECTION.

Mrs. W. Vance Chosen President By St. John's Ladies.

HAVELOCK, Jan. 20.—The annual meeting of the Women's Auxiliary of St. John's church was held on Tuesday afternoon at the home of Mrs. R. Sanderson, with a good attendance of members. The reports presented showed a very successful year.

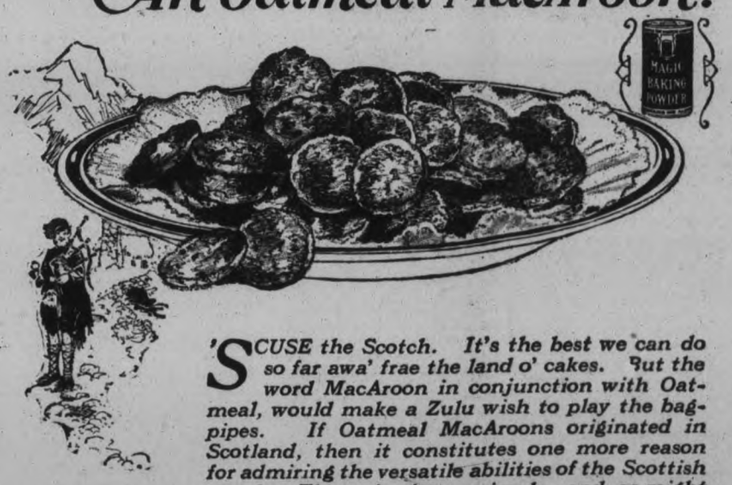
The following officers were elected for 1928:

President—Mrs. W. Vance.
Vice-President—Mrs. F. H. Falkner.
Secretary—Mrs. E. M. Williams.
Treasurer—Miss K. Munroe.
Dorcas Secretary— Mrs. E. Mathison.
Supt. of Juniors—Mrs. (Dr.) Holdcroft.
Secretary of Literature—Mrs. F. H. Falkner.
Sec.-Treas. of Living Message—Mrs. R. Sanderson.
Secretary of Little Helpers— Mrs. (Rev.) T. H. Stanley.

FRESH CHEESE

If you will rub the cut part of cheese with butter and then wrap in tightly, oiled paper and cover with a cloth cheese will not mould.

"D'Ye Ken Hoo Tae Mak An Oatmeal MacAroon?"



'SCUSE the Scotch. It's the best we can do so far awa' frae the land o' cakes. But the word MacAroon in conjunction with Oatmeal, would make a Zulu wish to play the bagpipes. If Oatmeal MacAroons originated in Scotland, then it constitutes one more reason for admiring the versatile abilities of the Scottish people. The recipe is very simple—and, as might be expected—most economical!

1 tablespoon butter
1 cup white sugar
1 egg
½ teaspoon salt
2 teaspoons Magic Baking Powder
1 teaspoon vanilla
2½ cups rolled oats

Rub together butter, sugar, rolled oats, salt and baking powder, then drop in the egg unbeaten, add vanilla, mix well with wooden spoon. Drop mixture about the size of a hazelnut in buttered pans and bake 10 to 15 minutes.

"Bake your own" with
MAGIC BAKING POWDER
for greater satisfaction and economy

HOW MANY BEANS IN THE QUART JAR

The Examiner's Contest to be held on the Merchants of Peterborough

TWIN DOLLAR DAYS
Wednesday and Thursday
January 25th and 26th

These Estimating Contests are very popular. A person can easily make a very close estimate by taking a quart sealer, filling it with beans and counting them.

This is the first occasion on which a TWIN DOLLAR DAY (Wednesday and Thursday), January 25th and 26th, has been held, and interest will no doubt be even greater than in former years on this account.

The Examiner's Special Twin Dollar Day Contest.

The Merchants' Treasury Box will distribute $150.00 in Cash Prizes and THE EXAMINER, as usual, will offer independently $35.00 in Cash Prizes, to be distributed as follows to the persons making "the nearest estimate of the number of beans in the Quart Sealer in THE EXAMINER Window:

First Nearest Estimate	$10.00
Second Nearest Estimate	5.00
Third Nearest Estimate	4.00
Fourth Nearest Estimate	3.00
Fifth Nearest Estimate	2.00
Sixth Nearest Estimate	1.00
	$25.00
Our Special Prize of	10.00
	$35.00

How To Estimate

For every dollar paid into THE EXAMINER on DOLLAR DAYS, WEDNESDAY AND THURSDAY, JANUARY 25 and 26, for an account for Printing or Advertising, a Subscription to THE EXAMINER at $6.00 delivered or $4.80 by mail per year, or THE WEEKLY EXAMINER at $1.50 per year, we will give Estimating Blanks for our own contest of $35.00 and for the Merchants' Treasury Box of $150.00, and we are also offering a Special Prize of $10.00 extra if the person winning the Merchants' Treasury Box First Prize of $50.00 secured the Estimating Blank through "EXAMINER" Office.

It is possible then for a First Prize winner who has secured EXAMINER Estimating Blanks to earn:

Merchants' Treasury Box Prize of	$50.00
Our Own First Prize of	10.00
And Special Prize	10.00
A Total of	$70.00

GOLDEN WEDDING IS CELEBRATED

Mr. and Mrs. George Berry Entertain Family and Friends.

On Monday, Jan. 9th, the friends, relatives, and neighbors of Mr. and Mrs. George Berry, 4th line, Cavan, gathered in the S.S. Hall at Centreville to celebrate with them the fiftieth anniversary of their wedding.

The hall was well filled by the time the guests of the evening arrived, and after Mr. Joseph Madill was appointed chairman for the evening, Mr. A. S. Hall and Mrs. O. B. Johnson brought Mr. and Mrs. Berry to the platform. An illuminated address was then read by Mr. W. W. Brown, and the presentation was made by Mr. H. A. Earle and J. Isbister, while little Miss Phyllis Larmer presented Mrs. Berry with a beautiful bouquet of golden roses.

Mr. Berry was given a case of pipes and a gold-headed cane and Mrs. Berry an inscribed plate holding fifty golden dollars.

Mr. Berry, in spite of his eighty-five years rose to the occasion, and on behalf of his bride and himself, made a very feeling and suitable reply ending with a song—"The Irishman's Toast" rendered in a manner to be envied by many a younger man

Speeches were made by the following gentlemen Rev. J. Riddle, G. A. Gillespie, R. Fair, W. T. Lucas, M.P., Jas. C. Campbell, A. J. Fallis, ex M.P.P., Thomas Donaldson, Robert Hooten, George Hooten and Dr. Berry.

An interesting item on the programme was a recitation by Mr. and Mrs. Berry's grand-daughter, little Miss Maureen Fisher. Miss Edith Deyell gave an excellent rendering of James W. Riley's—"The Girl I Love."

The musical numbers by Mr. Gauley and Dr. Berry were much enjoyed and Miss Viola White acquitted herself in her usual pleasing manner. Mr. Wilfred Johnson rendered "The Rosary" as a violin solo, and as his encore number played "Silver Threads Among the Gold" at the request of the bride.
